This Is a Big Book, But It Is Very Easy to Use

Psychologists have long understood a principle that many of us consider just common sense: that people have an aspect called personality that makes them feel more comfortable in some situations than in others. People who have a certain personality feel more capable of doing certain things and dealing with certain problems; they also feel more accepted when they are among people with personalities similar to their own. This is especially true for one place where people spend a major portion of their time: at work. People want to feel that they fit in with the people and with the activities where they work.

If personality is the key to this feeling of fitting in, then you need to consider this question: *What kind of personality do you have?* Maybe you can come up with a few ways to describe yourself, such as “sunny,” “energetic,” “conscientious,” “loyal,” “outgoing,” “funny,” or “competitive.” But what do those terms suggest for the kind of work you might enjoy and do well? What terms might be more useful?

Some Things You Can Do with This Book

This book can help you think about your personality in terms that have proven relevance to the world of work. You’ll learn about the personality types that many psychologists and career development practitioners use to describe people and jobs. You’ll take a quick assessment to help you clarify your dominant personality type. Then you’ll dig into a gold mine of facts about the jobs that are the best fit for your personality type—and that are the best for other reasons, too, such as their wages and job openings. The lists of “best jobs” will help you zero in on promising careers, and the descriptive profiles of the jobs will open your eyes to career choices that previously you may not have known much about.

We all want to fit in somewhere. And there are probably several different careers where each of us could fit in. But why not do it in a *really good job*? That’s what this book can help you choose.

Credits and Acknowledgments: While the authors created this book, it is based on the work of many others. The occupational information is based on data obtained from the U.S. Department of Labor and the U.S. Census Bureau. These sources provide the most authoritative occupational information available. The job titles and their related descriptions are from the O*NET database, which was developed by researchers and developers under the direction of the U.S. Department of Labor. They, in turn, were assisted by thousands of employers who provided details on the nature of work in the many thousands of job samplings used in the database’s development. We used the most recent version of the O*NET database, release 13.0. We appreciate and thank the staff of the U.S. Department of Labor for their efforts and expertise in providing such a rich source of data.

Table of Contents

Summary of Major Sections

Introduction. A short overview to help you better understand and use the book. *Starts on page 1.*

Part I: Overview of Personality and Career. Part I is an overview of personality and of personality types. This section also explores the relationship between personality and career. *Starts on page 17.*

Part II: What's Your Personality Type? Take an Assessment. This part helps you discover your personality type with a short, easy-to-complete assessment. *Starts on page 23.*

Part III: The Best Jobs Lists: Jobs for Each of the Six Personality Types. The 141 lists in Part III show you the best jobs in terms of high salaries, fast growth, and plentiful job openings for each of the six personality types. Further lists classify the jobs according to education and training required and several other features, such as jobs with the highest percentage of women and of men and jobs with high rates of self-employment and many part-time workers. Although there are a lot of lists, they are easy to understand because they have clear titles and are organized into groupings of related lists. *Starts on page 33.*

Part IV: Descriptions of the 50 Best Jobs for Each Personality Type. This part provides a brief but information-packed description of the 50 jobs from each personality type that met our criteria for this book. Each description contains information on earnings, projected growth, education and training required, job duties, skills, related job titles, related knowledge and courses, and many other details. The descriptions are presented in alphabetical order within each personality type. This structure makes it easy to look up a job that you've identified in a list from Part III and that you want to learn more about. *Starts on page 129.*

Part V: Appendixes. Appendix A contains a list of occupations in this book and their two-letter personality codes. Appendix B lists the Guide for Occupational Exploration (GOE) interest areas and work groups. Appendix C defines the skills and the types of knowledge listed in the job descriptions in Part IV. Appendix D identifies resources for further career exploration. *Starts on page 451.*

Foreword

When I wrote the foreword for the first edition of this book, I started by saying, *Whether you're a counselor or a career explorer, this book is a must-have resource!*

I'd like to take credit for the tens of thousands of copies that have been sold, but I am fairly certain that readers discovered the value of this fabulous resource for themselves. I have no doubt that *50 Best Jobs for Your Personality* will continue to be a popular reference for career guidance professionals and also for individuals who are in the process of choosing or changing their careers.

The O*NET content model as a whole and the in-depth descriptions of occupations that have grown out of that model are of huge significance. O*NET has provided career professionals and others the common terminology that was needed to communicate across disciplines about the world of work. This book, *50 Best Jobs for Your Personality*, takes great advantage of the O*NET occupational database. For counselors, the book is a ready reference that includes key descriptors of over 300 occupations, organized by the six career personality types ("RIASEC" or "Holland Codes") first described by John Holland. For the lay reader, there is a "How to Use This Book" section that will promote effective use in advancing individual career exploration. Though the focus is on personality type, the book is uniquely organized to encourage readers to consider a range of characteristics as they investigate potential careers.

As a career counseling professional, I have experienced firsthand the gratification that comes with helping individuals understand how their personal characteristics relate to occupational choice. I have witnessed the effects, both in terms of job satisfaction and of productivity, when there is a good match between an individual's personality and an environment that supports his/her personality traits. It's an exciting process, one that will be furthered through the use of this book.

Kristine Dobson
President, Career 1 Consulting

Introduction

Before we get started finding the best jobs for your personality type, here are a few things to know about the information in this book and how it is organized.

Where the Information Comes From

The information we used in creating this book comes from three major government sources:

- ✿ **The U.S. Department of Labor:** We used several data sources to construct the information we put into this book. We started with the jobs included in the U.S. Department of Labor's O*NET database. The O*NET includes information on about 950 occupations and is now the primary source of detailed information on occupations. One of the information topics the O*NET covers is the personality types that are discussed in this book. The Labor Department updates the O*NET on a regular basis, and we used the most recent one available, release 13. As it happens, in release 13 the data about personality types has been completely revised and updated. Because we also wanted to include earnings, growth, and number of openings—information not included in the O*NET—we used sources at the U.S. Department of Labor's Bureau of Labor Statistics (BLS). The Occupational Employment Statistics survey provided the most reliable figures on earnings we could obtain, and the Employment Projections program provided the nation's best figures on job growth and openings. These two BLS programs use a slightly different system of job titles than the O*NET does, but we were able to link the BLS data to most of the O*NET job titles we used to develop this book.
- ✿ **The U.S. Census Bureau:** Data on the demographic characteristics of workers came from the Current Population Survey (CPS), conducted by the U.S. Census Bureau. This includes our information about the proportion of workers in each job who are men and women, are self-employed, or work part time. As with the BLS data, we had to match slightly different sets of job titles, but we were able to identify CPS data for almost all the O*NET jobs.
- ✿ **The U.S. Department of Education:** We used the Classification of Instructional Programs, a system developed by the U.S. Department of Education, to cross-reference the educational or training programs related to each job.

Of course, information in a database format can be boring and even confusing, so we did many things to help make the data useful and present it to you in a form that is easy to understand.

How the Jobs in This Book Were Selected

Here is the procedure we followed to select the jobs we included in this book:

1. We began by creating our own database from the O*NET, the Census Bureau, and other sources to include the information that we wanted. This database covered 949 job titles, of which 812 were rated in terms of the six RIASEC personality types.
2. Although the O*NET was our source of data on the RIASEC personality types of occupations, we decided to base our best jobs lists on the system of job classification that the Department of Labor uses to report data for our other sources: the Standard Occupational Classification (SOC). The SOC system collapses several O*NET job titles; for example, the SOC job Accountants and Auditors combines two O*NET jobs, as the title indicates. In this example, the two O*NET jobs both have the same dominant RIASEC personality type, Conventional, so the personality type for Accountants and Auditors obviously is Conventional. Some other SOC jobs, however, combine O*NET jobs with differing RIASEC types, so we calculated the average of the ratings for the six RIASEC types to determine which type was dominant for these diverse SOC occupations. Thus we were able to determine the dominant RIASEC types for 733 SOC occupations.
3. We eliminated five jobs for which we lacked important information. (For example, we had no job-growth data for Farm Labor Contractors.) We eliminated an additional 14 jobs that are expected to employ fewer than 500 workers per year and to shrink rather than grow in workforce size. We also removed 51 jobs because they have annual earnings of less than \$20,920, which means that 75 percent of workers earn more than the workers in these jobs.
4. For the remaining 663 occupations, we were able to create six lists of occupations, each representing one dominant RIASEC personality type. The six lists ranged in size from 285 jobs for the Realistic type to 29 for the Artistic type.
5. Because we wanted to identify 50 best jobs for each personality type, we needed a pool of more than 29 jobs for the Artistic type. Therefore, we added to this pool another 41 jobs for which Artistic was the highest-rated *secondary* personality type. As a result, you'll find some jobs on the Artistic job lists that also appear on lists for another RIASEC type, such as Political Scientists (which has Investigative as its dominant RIASEC type), Training and Development Specialists (Social), or Public Relations Specialists (Enterprising).
6. Next, for each of the six RIASEC-based lists, we ranked the jobs three times, based on these major criteria: median annual earnings, projected growth through 2016, and number of job openings projected per year.

7. We then added the three numerical rankings for each job to calculate its overall score.
8. To emphasize jobs that tend to pay more, are likely to grow more rapidly, and have more job openings, we selected the 50 job titles with the best total scores for each of the six RIASEC types. Because 17 Artistic jobs also appear on other lists, a total of 283 jobs (rather than 300) appear on the Part III lists, and they are the focus of this book.

For example, Accountants and Auditors is the Conventional job with the highest combined score for earnings, growth, and number of job openings, so Accountants and Auditors is listed first in our “50 Best Conventional Jobs” list even though it is not the best-paying Conventional job (which is Actuaries), the fastest-growing Conventional job (which is Financial Analysts), or the Conventional job with the most openings (which is Office Clerks, General).

Why This Book Has More Than 300 Job Descriptions

We didn’t think you would mind that this book actually provides information on more than 300 jobs. As this introduction explains, the jobs on the Part III lists are based on the SOC job classification system, but in Part IV we describe the related O*NET jobs separately. This means that although we used 283 SOC job titles to construct the lists, Part IV actually has a total of 326 O*NET job descriptions.

Understand the Limits of the Data in This Book

In this book, we use the most reliable and up-to-date information available on earnings, projected growth, number of openings, and other topics. The earnings data came from the U.S. Department of Labor’s Bureau of Labor Statistics. As you look at the figures, keep in mind that they are estimates. They give you a general idea about the number of workers employed, annual earnings, rate of job growth, and annual job openings.

Understand that a problem with such data is that it describes an average. Just as there is no precisely average person, there is no such thing as a statistically average example of a particular job. We say this because data, while helpful, can also be misleading.

Take, for example, the way we assign the jobs to the six personality types. We follow the ratings assigned by the O*NET database, which are based on analysis of the occupation’s definition, core work tasks, types of knowledge used, and other information about the job. But workers with the same occupation title often work in different settings and have varying work duties, use varying kinds of knowledge, and vary in other ways that should influence the RIASEC type one would assign to their job. For example, Librarians who do research for a corporation have considerably different work tasks from the Librarians who work in a

public library. Therefore, when we assign Librarians to the Conventional personality type, you should keep in mind that Librarians can also find niches within their profession that are compatible with other personality types. One way to identify the most likely alternative personality types is to look at the full RIASEC personality code (usually two or three letters) listed for the job in the Part IV description. The code for Librarians is CSE, meaning that Social and Enterprising are secondary personality types for this occupation.

Salary figures, which seem so precise, likewise summarize a great amount of variation. The yearly earnings information in this book is based on highly reliable data obtained from a very large U.S. working population sample by the Bureau of Labor Statistics. It tells us the average annual pay received as of May 2007 by people in various job titles (actually, it is the median annual pay, which means that half earned more and half less).

This sounds great, except that half of all people in that occupation earned less than that amount. For example, people who are new to the occupation or with only a few years of work experience often earn much less than the median amount. People who live in rural areas or who work for smaller employers typically earn less than those who do similar work in cities (where the cost of living is higher) or for bigger employers. People in certain areas of the country earn less than those in others. Other factors also influence how much you are likely to earn in a given job in your area. For example, Aircraft Mechanics and Service Technicians in the Detroit–Livonia–Dearborn, Michigan, metropolitan division have median earnings of \$56,740, probably because Northwest Airlines has a hub in Detroit and its mechanics are unionized. By comparison, the Allentown–Bethlehem–Easton, Pennsylvania, metropolitan area has no major airline hub and only a small aircraft service facility with nonunionized workers. Aircraft Mechanics and Service Technicians there earn a median of only \$31,540.

Beginning wages vary greatly, too, depending not only on location and size of employer, but also on what skills and educational credentials a new hire brings to the job.

Also keep in mind that the figures for job growth and number of openings are projections by labor economists—their best guesses about what we can expect between now and 2016. Those projections are not guarantees. A catastrophic economic downturn, war, or technological breakthrough could change the actual outcome.

Finally, don't forget that the job market consists of both job openings and job *seekers*. The figures on job growth and openings don't tell you how many people will be competing with you to be hired. The Department of Labor does not publish figures on the supply of job candidates, so we are unable to tell you about the level of competition you can expect. Competition is an important issue that you should research for any tentative career goal. The *Occupational Outlook Handbook* provides informative statements for many occupations. You should speak to people who educate or train tomorrow's workers; they probably have a good idea of how many graduates find rewarding employment and how quickly. People in the workforce can provide insights into this issue as well. Use your critical thinking skills to evaluate what people tell you. For example, educators or trainers may be trying to recruit

you, whereas people in the workforce may be trying to discourage you from competing. Get a variety of opinions to balance out possible biases.

So, in reviewing the information in this book, please understand the limitations of the data. You need to use common sense in career decision making as in most other things in life. We hope that, by using that approach, you find the information helpful and interesting.

Data Complexities

For those of you who like details, we present some of the complexities inherent in our sources of information and what we did to make sense of them here. You don't need to know these things to use the book, so jump to the next section of the introduction if details bore you.

We selected the jobs partly on the basis of economic data, and we include information on earnings, projected growth, and number of job openings for each job throughout this book. We think this information is important to most people, but getting it for each job is not a simple task.

Earnings

The employment security agency of each state gathers information on earnings for various jobs and forwards it to the U.S. Bureau of Labor Statistics. This information is organized in standardized ways by a BLS program called Occupational Employment Statistics, or OES. To keep the earnings for the various jobs and regions comparable, the OES screens out certain types of earnings and includes others, so the OES earnings we use in this book represent straight-time gross pay exclusive of premium pay. More specifically, the OES earnings include each job's base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; on-call pay; and tips. The OES earnings do not include back pay, jury duty pay, overtime pay, severance pay, shift differentials, nonproduction bonuses, or tuition reimbursements. Also, self-employed workers are not included in the estimates, and they can be a significant segment in certain occupations. When data on annual earnings for an occupation is highly unreliable, OES does not report a figure, which meant that we reluctantly had to exclude from this book a few occupations such as Hunters and Trappers.

For each job, we report three figures related to earnings:

- ⌘ The Annual Earnings figure shows the median earnings (half earn more, half earn less).
- ⌘ The Beginning Wage figure shows the 10th percentile earnings (the figure that exceeds the earnings of the lowest 10 percent of the workers). This is a rough approximation of what a beginning worker may be offered.
- ⌘ The Earnings Growth Potential figure represents the ratio between the 10th percentile and the median. In a job for which this figure is high, you have great potential for

increasing your earnings as you gain experience and skills. When the figure is low, it means you will probably need to move on to another occupation to improve your earnings substantially. For the 283 SOC jobs in this book, the earnings growth potential ranges from a high of 59.9% for Music Directors and Composers to a low of 10.5% for Postal Service Clerks. Because the percentage figures would be hard to interpret, we use verbal tags to indicate the level of Earnings Growth Potential: “very low” when the percentage is less than 25%, “low” for 25–35%, “medium” for 35%–40%, “high” for 40%–50%, and “very high” for any figure higher than 50%. For the highest-paying jobs, those for which BLS reports the median earnings as “more than \$145,600,” we are unable to calculate a figure for Earnings Growth Potential.

The median earnings for all workers in all occupations were \$31,410 in May 2007. The 283 SOC jobs in this book were chosen partly on the basis of good earnings, so their average is a respectable \$45,793. (This is a weighted average, which means that jobs with larger workforces are given greater weight in the computation. It also is based on the assumption that a job with income reported as “more than \$145,600” pays exactly \$145,600, so the actual average is somewhat higher.)

The beginning (that is, 10th percentile) wage for all occupations in May 2007 was \$16,060. For the 283 SOC jobs in this book, the weighted average is an impressive \$28,118.

The earnings data from the OES survey is reported under the SOC system of job titles. As noted earlier in this introduction, the SOC system collapses some O*NET job titles, such as Accountants and Auditors. In Part IV of this book, where the O*NET job titles are described separately, you may notice that the salary we report for Accountants (\$57,060) in Part IV is identical to the salary we report for Auditors. In reality, there probably is a difference, but this is the best information available.

Projected Growth and Number of Job Openings

This information comes from the Office of Occupational Statistics and Employment Projections, a program within the Bureau of Labor Statistics that develops information about projected trends in the nation’s labor market for the next ten years. The most recent projections available cover the years from 2006 to 2016. The projections are based on information about people moving into and out of occupations. The BLS uses data from various sources in projecting the growth and number of openings for each job title: Some data comes from the Census Bureau’s Current Population Survey and some comes from an OES survey. The BLS economists assumed a steady economy unaffected by a major war, depression, or other upheaval. They also assumed that recessions may occur during the decade covered by these projections, as would be consistent with the pattern of business cycles we have experienced for several decades. However, because their projections cover 10 years, the figures for job growth and openings are intended to provide an average of both the good times and the bad times.

Like the earnings figures, the figures on projected growth and job openings are reported according to the SOC classification. So, again, we had to exclude a few jobs from this book because this information is not available for them. As with earnings, some of the SOC jobs crosswalk to more than one O*NET job. To continue the example we used earlier, the Department of Labor projects growth (17.7%) and openings (134,463) for one SOC occupation called Accountants and Auditors, but in the Part IV job descriptions, we report these figures separately for the O*NET occupation Accountants and for the O*NET occupation Auditors. When you see that Accountants has a 17.7% projected growth rate and 134,463 projected job openings and Auditors has the same two numbers, you should realize that the 17.7% rate of projected growth represents the *average* of these two occupations—one may actually experience higher growth than the other—and that these two occupations will *share* the 134,463 projected openings.

The Department of Labor provides a single figure (22.9%) for the projected growth of 38 postsecondary teaching jobs and also provides a single figure (237,478) for the projected annual job openings for these 38 jobs. Because these college-teaching jobs are related to two different RIASEC types—Investigative and Social—and because separate *earnings* figures are available for each of the 38 jobs, we thought you'd appreciate having these jobs appear separately in the Part III lists in this book. If the trends of the last several years continue, none of these jobs can be expected to grow or take on workers at a faster rate than the other 37. Therefore, in preparing the lists and in the Part IV descriptions, we assumed that all of these college-teaching jobs share the same rate of projected job growth, 22.9%, and we computed a figure for their projected job openings by dividing the total (237,478) into 38 parts, each of which is proportional in size to the current workforce of the job.

While salary figures are fairly straightforward, you may not know what to make of job-growth figures. For example, is projected growth of 15% good or bad? Keep in mind that the average (mean) growth projected for all occupations by the Bureau of Labor Statistics is 10.4%. One-quarter of the SOC occupations have a growth projection of 3.2% or lower. Growth of 11.6% is the median, meaning that half of the occupations have more, half less. Only one-quarter of the occupations have growth projected at more than 17.4%.

Because the jobs in this book were selected as “best” partly on the basis of job growth, their mean growth is 13.9%, which compares favorably to the mean for all jobs. Among these 283 SOC jobs, the job ranked 71st by projected growth has a figure of 22.9%, the job ranked 141st (the median) has a projected growth of 15.4%, and the job ranked 212th has a projected growth of 10.6%.

The number of job openings for the 283 best jobs is slightly lower than the national average for all occupations. The Bureau of Labor statistics projects an average of about 35,000 job openings per year for the 750 occupations that it studies, but for the 283 SOC occupations included in this book, the average is about 35,700 openings. The job ranked 71st for job openings has a figure of about 37,800 annual openings, the job ranked 141st (the median) has about 14,300 openings projected, and the job ranked 212th has about 5,600 openings projected.

However, keep in mind that average figures for job openings depend on how BLS defines an occupation. For example, consider the college teaching jobs. The Office of Occupational Statistics and Employment Projections recognizes *one* occupation called Teachers, Postsecondary, and projects 237,478 annual job openings for this occupation. As explained earlier in this introduction, we divided this huge occupation into 38 separate occupations, following the practice of O*NET and of the Occupational Employment Statistics program. The average number of openings for all occupations changes substantially depending on whether you deal with college teachers as one or 38 occupations. So it follows that, because the way BLS defines occupations is somewhat arbitrary, any average figure for job openings is also somewhat arbitrary.

Perhaps you're wondering why we present figures on both job growth *and* number of openings. Aren't these two ways of saying the same thing? Actually, you need to know both. Consider the occupation Makeup Artists, Theatrical and Performance, which is projected to grow at the astounding rate of 39.8%. There should be lots of opportunities in such a fast-growing job, right? Not exactly. This is a tiny occupation, with only about 2,100 people currently employed. So, even though it is growing rapidly, it will not create many new jobs (about 400 per year). Now consider Secretaries, Except Legal, Medical, and Executive. This occupation is growing at the glacial rate of 1.2% now that many secretarial tasks are being handled by word processors, answering machines, and other kinds of office automation. Nevertheless, this is a huge occupation that employs almost two million workers. So, even though its growth rate is unimpressive, it is expected to take on about 240,000 new workers each year as existing workers retire, die, or move on to other jobs. That's why we base our selection of the best jobs on both of these economic indicators and why you should pay attention to both when you scan our lists of best jobs.

Education or Training Required

One set of lists in Part III organizes jobs on the basis of the amount of education or training that they typically require for entry. In Part IV, each job description includes a statement of the education or training requirements. We base these educational and training requirements on ratings supplied by the Bureau of Labor Statistics.

You should keep in mind that some people working in these jobs may have credentials that differ considerably from the level listed here. For example, although a bachelor's degree is considered the appropriate preparation for Cost Estimators, over one-quarter of these workers have no college background at all. Conversely, although Registered Nurses can begin working after earning an associate degree, over half have a bachelor's, and in fact career opportunities without the bachelor's are considerably more limited.

Some workers who have more than the minimum required education for their job have earned a higher degree *after* being hired, but others entered the job with this educational credential, and the more advanced degree may have given them an advantage over other job-seekers with less education. Some workers with *less* than the normal minimum requirement may have been hired on the basis of their work experience in a similar job. So don't assume

that the one-line “Education Required” statement in the Part IV job descriptions gives a complete picture of how best to prepare for the job. If you’re considering the job seriously, you need to investigate this topic in greater detail. Consider using some of the resources listed in Appendix D for further career exploration.

Other Job Characteristics

Like the figures for earnings, some of the other figures used to create the lists of jobs in this book are shared by more than one job title. Usually this is the case for occupations that are so small that BLS does not release separate statistics for them. For example, the occupation Sound Engineering Technicians has a total workforce of only about 16,000 workers, so BLS does not report a specific figure for the percentage of women workers. In this case, we had to use the figure that BLS reports for a group of occupations it calls Broadcast and Sound Engineering Technicians and Radio Operators. We relied on this same figure for four other jobs: Camera Operators, Television, Video, and Motion Picture; Film and Video Editors; Audio and Video Equipment Technicians; and Broadcast Technicians. You may notice similar figure-sharing among related jobs where we list the percentages of workers in specific age brackets.

Information in the Job Descriptions

We used a variety of government and other sources to compile the job descriptions we provide in Part IV. Details on these various sources are mentioned later in this introduction in the section “Part IV: Descriptions of the 50 Best Jobs for Each Personality Type.”

How This Book Is Organized

The information in this book moves from the general to the highly specific. It starts by explaining how personality relates to career choice and presents a widely used model for making that connection. An assessment helps you focus on your dominant personality type (or types), and then you can consult a wealth of lists that itemize the best jobs for your personality type. These lists let you look at the jobs from several different perspectives—for example, which jobs pay the best, which jobs employ the most young people, and which jobs require an associate’s degree for entry. Finally, you can get highly detailed information about any of these career choices in the fact-packed job descriptions that make up the last part of the book.

Part I. Overview of Personality and Career

Part I is an overview of how personality relates to careers—the basic theory, plus the six personality types that were originally described by John Holland and have since become

the basis of many guidance resources. This section may clear up some misunderstandings you have about what personality means in the context of career choice, and it will help you understand a useful way of looking at yourself and the world of work.

Part II. What's Your Personality Type? Take an Assessment

You probably are not reading this book simply to educate yourself about career development theory. Rather, the odds are that you have a more practical goal: making a career choice. To help you, we've included a paper-and-pencil assessment that can help you clarify your dominant personality type or types. The Personality Type Inventory usually takes about 20 or 30 minutes to complete, but there is no time limit, nor are there any right or wrong answers.

After taking the Personality Type Inventory, you can use what you've learned about your personality type to identify a job that suits you well. This book makes that task easy because all of the information about jobs is grouped by the dominant personality type of the jobs. That means you don't have to waste time exploring jobs that are unlikely to be a good match for your personality. Also, because this book focuses on the 50 most rewarding jobs for each personality type, you don't have to complicate your search by considering jobs with low earnings or highly limited odds of being employed.

Part III. The Best Jobs Lists: Jobs for Each of the Six Personality Types

For many people, the 141 lists in Part III are the most interesting section of the book. Here you can see which jobs for each personality type are best in terms of high salaries, fast growth, and plentiful job openings and best when these three factors are combined. Other lists break out the best of each type according to the level of education or training required and several other features of the jobs and of the people who hold them. Look in the Table of Contents for a complete list of the lists. Although there are a lot of lists, they are not difficult to understand because they have clear titles and are organized into groupings of related lists.

People who prefer to think about careers in terms of economic rewards will want to browse the lists that show the best jobs in terms of earnings, growth, and openings. On the other hand, some people think first in terms of opportunities for young people or representation of women, and these readers will find other useful lists that reflect these interests.

We suggest that you use the lists that make the most sense for you. Following are the names of each group of lists along with short comments on each group. You will find additional information in a brief introduction provided at the beginning of each group of lists in Part III.

Best Jobs Overall for Each Personality Type: Jobs with the Highest Pay, Fastest Growth, and Most Openings

This group has four sets of six lists, and they are the ones that most people want to see first. The first set of lists presents, for each personality type, all 50 jobs that are included in this book in order of their total scores for earnings, growth, and number of job openings. These jobs are used in the more-specialized lists that follow and in the descriptions in Part IV. Three more sets of lists in this group present, for each personality type, specialized lists of jobs extracted from the best 50 overall: the 20 best-paying, the 20 fastest-growing, and the 20 with the most openings.

The Best Jobs for Each Personality Type with a High Percentage of Workers Age 16–24

This section provides lists of the jobs for each personality type that have the highest percentage of workers age 16–24. Each list is then re-sorted to present these youthful jobs in order of their total combined scores for earnings, growth, and number of openings. Thus there is a total of 12 lists in this section.

The Best Jobs for Each Personality Type with a High Percentage of Workers Age 55 and Over

The 12 lists in this section were assembled in the same manner as the lists in the previous section, except that these jobs have a high percentage of workers age 55 and over.

The Best Jobs for Each Personality Type with a High Percentage of Part-Time Workers

There are 12 lists in this group, and they extract the jobs from our 50 best jobs for each personality type that have a high percentage of part-time workers. Again, they are ordered first in terms of percentage of part-time workers, so you can easily find the jobs with the most opportunities for part-timers, and then they are re-sorted in order of their total combined score for earnings, growth, and number of openings.

The Best Jobs for Each Personality Type with a High Percentage of Self-Employed Workers

The 12 lists in this section show you the jobs that have the highest percentage of self-employed workers. Once again, the lists for the six personality types are re-sorted in order of the jobs' total combined scores for earnings, growth, and number of openings.

Best Jobs for Each Personality Type with a High Percentage of Women and of Men

For each personality type, you can see the jobs that have the highest percentage of workers who are women and workers who are men. In addition, each of the lists is re-sorted to show these predominantly-male or predominantly-female jobs ordered by their overall ranking on earnings, growth, and openings. That would make up 24 lists, but one personality type (Social) has no jobs with a high percentage of men, so this section includes 22 lists.

The Best Jobs for Each Personality Type Sorted by Education or Training Required

When considering a career choice, many people put a lot of emphasis on how long it takes to prepare for the job and what kind of preparation is appropriate—education, training, work experience. Just as it's important to choose a job that suits your personality, it can be helpful to choose learning goals that suit your preferences and abilities. Your financial circumstances also may shape your plans for career preparation because higher education can be expensive (even with financial aid) and the years you spend in college will postpone the years in which you will earn a salary. This set of lists sorts the jobs linked to each personality type into groups according to what preparation method is the fastest route to career entry. Within each group, the jobs are sorted by their overall ranking on earnings, growth, and openings.

Part IV. Descriptions of the 50 Best Jobs for Each Personality Type

This part of the book provides a brief but information-packed description of each of the 283 best jobs that met our criteria for this book. As noted earlier in this introduction, the jobs here are the O*NET equivalents of the SOC jobs named in the lists, so there are actually 326 job descriptions. The descriptions are divided into six groups, one for each personality type, and are presented in alphabetical order within each group. This structure makes it easy to look up a job that you've identified in a list from Part II or Part III and that you want to learn more about.

Note that 17 of the jobs on the Artistic lists in Part III actually have a different RIASEC type as their dominant personality type, as explained earlier in this introduction. Public Relations Managers is one such job; its dominant RIASEC type is actually Enterprising, but it also appears on Artistic lists in Part III. If you should look it up in the Artistic section of Part IV, you will find a note there telling you to look for Public Relations Managers in the Enterprising section of Part IV instead. Several jobs on the lists are related to multiple O*NET jobs, so we also provide notes to refer you to these jobs. For example, if you should turn to the Conventional section of Part IV to look up Surveying and Mapping Technicians (which appears on the Conventional lists), you will find a note there directing you to the descriptions of the related O*NET jobs: Mapping Technicians (Conventional) and Surveying Technicians (Realistic).

We used the most current information from a variety of government sources to create the descriptions. Although we've tried to make the descriptions easy to understand, the sample job description that follows—and the explanation of each of its parts—may help you better understand and use the descriptions.

Here are some details on each of the major parts of the job descriptions you will find in Part IV:

- ❶ **Job Title:** This is the job title for the job as defined by the U.S. Department of Labor and used in its O*NET database.
- ❷ **Data Elements:** This information comes from various U.S. Department of Labor and Census databases for this occupation, as explained elsewhere in this introduction.
- ❸ **Summary Description and Tasks:** The bold sentences provide a summary description of the occupation. This is followed by a listing of tasks that are generally performed by people who work in this job. We followed the listing of tasks in the O*NET database, except that where necessary we edited the tasks to keep them from exceeding 2,200 characters.
- ❹ **GOE:** This information cross-references the Guide for Occupational Exploration (or the GOE), a system that organizes jobs based on interests and is used in a variety of career information systems. We use the *New Guide for Occupational Exploration*, as published by JIST. That book uses a set of interest areas based on the 16 career clusters developed by the U.S. Department of Education and used in a variety of career information systems. Here we include the major interest area the job fits into, its more specific work group, and a list of related job titles that are in this same GOE work group. This information will help you identify other jobs that relate to similar interests or require similar skills. You can find more information on the GOE and its interest areas in Appendix B.
- ❺ **Skills:** The government provides data on many skills; we decided to list only those that were most important for each job rather than list pages of unhelpful details. For each job, we identified any skill with a rating for level of mastery that was higher than the average rating for that skill for all jobs and a rating for importance that was higher than very low. If there were more than eight, we included only those eight with the highest ratings, and we present them from highest to lowest score (that is, in terms of by how much its score exceeds the average score). You can find definitions of the skills in Appendix C.
- ❻ **Education/Training Program(s):** This part provides the names of one or more programs for preparing for the job. The titles are based on the U.S. Department of Education *Classification of Instructional Programs*. A particular college major or training program may not have the identical title—for example, there probably is no college that offers a major called “Political Science and Government, General,” but you are likely to find a major called “Political Science” or “Government.” We derived this information from a crosswalk created by the National Crosswalk Service Center to connect information in the Classification of Instructional Programs (CIP) to O*NET job titles. We made various changes to connect the O*NET job titles to the education or training programs related to them and also modified the names of some education and training programs so they would be more easily understood. In 25 cases, we abbreviated the listing of related programs for the sake of space; such entries end with “others.”

- ✿ **Related Knowledge/Courses:** This entry can help you understand the most important knowledge areas that are required for a job and the types of courses or programs you will likely need to take to prepare for it. For each job, we identified the highest-rated knowledge area in the O*NET database, so every job has at least one listed. We identified any additional knowledge area with a rating that was higher than the average rating for that knowledge area for all jobs. We listed as many as six knowledge areas in descending order.
- ✿ **Work Environment:** We included any work condition with a rating that exceeds the midpoint of the rating scale. The order does not indicate any condition's frequency on the job. Consider whether you like these conditions and whether any of these conditions would make you uncomfortable. Keep in mind that when hazards are present (for example, contaminants), protective equipment and procedures are provided to keep you safe.

How to Use This Book

This is a book that you can dive right into:

- ✿ **If you don't know much about what personality types are,** you'll want to read Part I, which is an overview of the theory behind using personality types as a way of making career choices. You'll also see definitions of the six personality types that are used in this book.
- ✿ **If you want to understand your own personality type,** you'll want to do the assessment in Part II. It takes only 20 or 30 minutes to complete and can guide you to jobs that suit you.
- ✿ **If you like lists and want an easy way to compare jobs,** you should turn to Part III. Here you can browse lists showing the 50 jobs for each personality type with the best pay, the fastest growth, and the most job openings. You can see these "best jobs" lists broken down in various ways, such as by amount of education or training required.
- ✿ **For detailed information about jobs,** turn to Part IV and read the profiles of the jobs. We include 326 jobs and itemize their major tasks, their top skills, their educational or training programs, and other facts you won't learn from the lists in Part III.

On the other hand, **if you like to do things in a methodical way**, you may want to read the sections in order:

1. Part I will give you useful background on how personality type can be a guide in choosing a career.
2. The assessment in Part II will help you identify your dominant personality type.

3. With a clearer understanding of your personality type, you can browse the appropriate lists of “best jobs” in Part III and take notes on the jobs that have the greatest appeal for you.
4. Then you can look up the descriptions of these jobs in Part IV and narrow down your list. Ask yourself, Do the work tasks interest me? Does the required education or training discourage me?

PART I

Overview of Personality and Career

Why Use Personality to Choose a Career?

Many psychological theorists and practicing career counselors believe that you will be most satisfied and productive in a career if it suits your personality. There are two main aspects of a job that determine whether it is a good fit:

- ✿ The nature of the work tasks and the skills and knowledge you use on the job must be a good match for the things you like to do and the subjects that interest you. For example, if you like to help other people and promote learning and personal development and if you like communication more than working with things or ideas, then a career in social work might be one that you would enjoy and do well in.
- ✿ The people you work with must share your personality traits so that you feel comfortable and can accomplish good work in their company. For an example of the opposite, think of how a person who enjoys following set procedures and working with data and detail might feel if forced to work with a group of conceptual artists who constantly seek self-expression and the inspiration for unconventional new artistic ideas.

Personality theorists believe that people with similar personality types naturally tend to associate with one another in the workplace (among other places). As they do so, they create a working environment that is hospitable to their personality type. For example, a workplace with a lot of Artistic types tends to reward creative thinking and behavior. Therefore, your personality type not only predicts how well your skills will match the demands of the work tasks in a particular job; it also predicts how well you will fit in with the culture of the work site as shaped by the people who will surround you and interact with you. Your personality type thus affects your satisfaction with the job, your productivity in it, and the likelihood that you will persist in this type of work.

One of the advantages of using personality as a key to career choice is that it is *economical*—it provides a tidy summary of many aspects of people and of careers. Consider how knotty a career decision could get if you were to break down the components of the work environment into highly specific aspects and reflect on how well you fit them. For example, you could focus on the skills required and your ability to meet them. Next you could analyze the kinds of knowledge that are used on the job and decide how much you enjoy working with those topics. Then you could consider a broad array of satisfactions, such as variety, creativity, and independence; for each one, you would evaluate its importance to you and then determine the potential of various career options to satisfy this need. You can see that, when looked at under a microscope like this, career choice gets extremely complex.

But the personality-based approach allows you to view the career alternatives from 40,000 feet. When you compare yourself or a job to certain basic personality types, you encounter much less complexity. With fewer ideas and facts to sort through and consider, the task of deciding becomes much easier.

Describing Personality Types

You probably have heard many labels that describe people's personalities: "He's a perfectionist." "She's a control freak." "He's a go-getter." "She's very self-confident." "He's pushy." "She's wishy-washy." "He has a short fuse." "She's a drama queen." The list could go on and on.

These everyday terms for personality types have some bearing on work, but they are not very useful for several reasons: They don't differentiate well between jobs (for example, self-confidence is useful in just about every job); some of them are too specific (for example, "control freak" focuses on one small aspect of how a person functions at work); and, worst of all, most of them are too negative for people to want to apply to themselves.

Now that it's clear what kinds of personality labels we *don't* want to use, let's consider what would characterize a useful set of personality types:

- ⌘ They should differentiate well between kinds of work.
- ⌘ They should differentiate well between people.
- ⌘ They should be broad enough that a small number of these categories can cover the whole universe of jobs and people.
- ⌘ They should have neutral connotations, neither negative nor positive.

The RIASEC Personality Types

During the 1950s, the career guidance researcher John L. Holland tried to find a meaningful new way to arrange the output of an interest inventory and relate it to occupations. He devised a set of six personality types that would meet the criteria listed in the previous

section, and he called them Realistic, Investigative, Artistic, Social, Enterprising, and Conventional. (The acronym *RIASEC* is a convenient way to remember them.)

The following table shows how these labels apply to both people and work:

| Personality Type | How It Applies to People | How It Applies to Work |
|------------------|---|---|
| Realistic | Realistic personalities like work activities that include practical, hands-on problems and solutions. They enjoy dealing with plants, animals, and real-world materials like wood, tools, and machinery. They enjoy outside work. Often they do not like occupations that mainly involve doing paperwork or working closely with others. | Realistic occupations frequently involve work activities that include practical, hands-on problems and solutions. They often deal with plants; animals; and real-world materials like wood, tools, and machinery. Many of the occupations require working outside and do not involve a lot of paperwork or working closely with others. |
| Investigative | Investigative personalities like work activities that have to do with ideas and thinking more than with physical activity. They like to search for facts and figure out problems mentally rather than to persuade or lead people. | Investigative occupations frequently involve working with ideas and require an extensive amount of thinking. These occupations can involve searching for facts and figuring out problems mentally. |
| Artistic | Artistic personalities like work activities that deal with the artistic side of things, such as forms, designs, and patterns. They like self-expression in their work. They prefer settings where work can be done without following a clear set of rules. | Artistic occupations frequently involve working with forms, designs, and patterns. They often require self-expression, and the work can be done without following a clear set of rules. |
| Social | Social personalities like work activities that assist others and promote learning and personal development. They prefer to communicate more than to work with objects, machines, or data. They like to teach, to give advice, to help, or otherwise to be of service to people. | Social occupations frequently involve working with, communicating with, and teaching people. These occupations often involve helping or providing service to others. |
| Enterprising | Enterprising personalities like work activities having to do with starting up and carrying out projects, especially business ventures. They like persuading and leading people and making decisions. They like taking risks for profit. These personalities prefer action rather than thought. | Enterprising occupations frequently involve starting up and carrying out projects. These occupations can involve leading people and making many decisions. They sometimes require risk taking and often deal with business. |
| Conventional | Conventional personalities like work activities that follow set procedures and routines. They prefer working with data and details rather than with ideas. They prefer work in which there are precise standards rather than work in which you have to judge things by yourself. These personalities like working where the lines of authority are clear. | Conventional occupations frequently involve following set procedures and routines. These occupations can include working with data and details more than with ideas. Usually there is a clear line of authority to follow. |

Holland went further by arranging these six personality types on a hexagon:

Figure 1: Holland's hexagon of personality types. (After Holland, *A Theory of Vocational Choice*, 1959.)

He used this diagram to explain that people tend to resemble one type primarily, but they may also have aspects of one or more adjacent types. Each personality type tends to have aspects of the types on the adjacent sides of the hexagon, but little in common with the type on the opposite side. Therefore, for example, a person might be primarily Realistic, with an additional but smaller resemblance to the Conventional type. Such a person would be described by the two-letter code RC and might be well suited to work as a Boilermaker or a Roofer (both coded RC). This person would have little in common with a Social personality type and likely would not be very happy or productive as a Special Education Teacher (coded SA). But this person could get along well with both Realistic and Conventional personalities and, to a lesser extent, with Investigative personalities.

Although Holland originally applied this model to academic advising, he soon extended it to the larger question of career choice. Since then, hundreds of researchers and practitioners have investigated the RIASEC framework and have applied it to real-life decisions and situations. Researchers have even found it useful for predicting who will have the most traffic accidents or what kinds of drug abuse people are likely to engage in. More relevant to the theme of this book, however, is the fact that a number of career decision-making assessments have been developed to help people determine what personality type best describes them.

(and perhaps an additional adjacent type or types that are also important). You can find one such assessment in Part II of this book.

Although the RIASEC scheme does a good job of covering the whole world of work, the symmetrical hexagon shape used to illustrate it may be a little misleading because when you count the different jobs in our economy and the number of people working in those jobs, you'll find that some sectors of the hexagon are much more heavily populated than others. Here is a breakdown of the 732 occupations in the Department of Labor's SOC classification for which we have both RIASEC codes and figures for workforce size:

| Personality Type | Number of Occupations | Number of Workers 2006 |
|------------------|-----------------------|------------------------|
| Realistic | 329 | 47,947,078 |
| Investigative | 79 | 6,503,428 |
| Artistic | 32 | 2,600,124 |
| Social | 107 | 22,554,382 |
| Enterprising | 91 | 28,477,616 |
| Conventional | 94 | 34,370,117 |

As the United States shifts from a manufacturing economy to an information economy, employment in the Realistic sector is declining and employment in the Investigative sector is growing, but a large imbalance is likely to continue for the foreseeable future.

The six sectors are asymmetrical in other ways, too. As you'll see when you look at the lists in Part III, Social jobs employ a lot more women than Realistic jobs do. Enterprising jobs employ a lot more men than do Conventional jobs. Likewise, there are differences when you consider where large numbers of young people and older people work.

The differences get really significant when you look at the amounts of education or training required by jobs linked to the various personality types. For example, for Realistic and Conventional jobs the most common entry route is on-the-job training, whereas for Investigative jobs a college degree is usually needed. John Holland and other researchers have explained that these differences reflect the different levels of cognitive complexity to be found in the jobs. Realistic jobs deal mainly with manipulating things physically—moving them, cleaning them, repairing them, and so forth. Conventional jobs deal mainly with data at the level of organizing it according to pre-determined patterns—filing it, keying it in, and so forth. Investigative jobs, on the other hand, deal mainly with ideas and solving problems mentally, so the level of cognitive complexity is high and a college education becomes a necessity.

You should not be troubled by this lack of symmetry in the RIASEC model (even if you are an Artistic type). It does not indicate a weakness in the theory. But it does create some problems for a book like this. Although we have attempted to give equal coverage to each of the six personality types, you will notice that some of the sets of lists in Part III are not of equal size. Also, since we identified the “50 Best Artistic Jobs” out of a pool of only 70 jobs

(some of which have Artistic as a secondary personality type), when you scan that list you may want to concentrate on the higher-ranked choices. On the other hand, to create the list of the “50 Best Realistic Jobs,” we sorted a pool of 285 jobs, so the best 50 truly represent the upper crust of that large group. These differences simply reflect the nature of the United States workforce.

No theory can perfectly describe the infinite variety of personalities to be found in our culture and the messy distribution of jobs that a free economy produces. You should note that the RIASEC scheme for describing personality types is not the only one that is used in career decision-making. However, it is the most popular and most thoroughly researched one, so it is the most appropriate one to use in this book.

Other Assessments with RIASEC Output

Apart from the assessment in Part II of this book, you may want to use any of these free assessments to explore your personality type in RIASEC terms:

- ⌘ The O*NET Computerized Interest Profiler (for Windows), which you can download at www.onetcenter.org/CIP.html (the assessment in Part II is based on it)
- ⌘ The University of Missouri’s Career Center Career Interests Game at <http://career.missouri.edu/students/explore/thecareerinterestsgame.php>
- ⌘ The Work Interest Quiz at www.myfuture.com/toolbox/workinterest.html
- ⌘ The University of New Orleans’s “What Is Your RIASEC?” checklist at www.career.uno.edu/pdfs/Career%20Interest%20Game.pdf

You also have a number of options if you are willing to pay a fee. For example, you can access John Holland’s own Self-Directed Search at www.self-directed-search.com/.

Keep in mind that although all of these assessments produce outputs with RIASEC codes and some of them also link these codes to occupations, they will not necessarily produce the exact same output. Assessment of personality is not as exact a science as, say, chemistry. Neither is the task of linking personalities to occupations.

You should not regard the output of *any* personality assessment as the final word on what career will suit you best. Use a variety of approaches to decide what kind of person you are and narrow down the kinds of work you enjoy. Actual work experience is probably the best way to test a tentative choice.

PART II

What's Your Personality Type? Take an Assessment

In this section, you can take a Personality Type Inventory that will help you determine your primary RIASEC personality type and perhaps one or two secondary RIASEC personality types. It asks if you like or dislike various activities and then lets you score your responses. You can use your scores in the following sections of the book to identify specific highly rewarding jobs to explore.

It's easy to use the Personality Type Inventory—just turn the page and follow the directions beginning with Step 1. This is not a test, so there are no right or wrong answers. There is also no time limit for completing this inventory.

If someone else will be using this book, you should photocopy the inventory pages and mark your responses on the photocopy.

Note: This inventory is based on the O*NET Interest Profiler, Version 3.0, developed by the U.S. Department of Labor (DOL). The DOL's edition consists of several components, including the Interest Profiler Instrument, Interest Profiler Score Report, and Interest Profiler O*NET Occupations Master List. The DOL provides a separate Interest Profiler User's Guide with information on the Profiler's development and validity as well as tips for professionals using it in career counseling. Additional information on these items is available at www.onetcenter.org, which is maintained by the DOL. This Personality Type Inventory is a version of the DOL's O*NET Interest Profiler that uses its work activity items and scoring system but has shorter directions, format changes, and additional content.

Restrictions for use: This and any other form of the O*NET Interest Profiler should be used for career exploration, career planning, and vocational counseling purposes only, and no other use has been authorized or is valid. Results should not be used for employment or hiring decisions or for applicant screening for jobs or training programs. Please see the DOL's separate "O*NET User Agreement" at www.onetcenter.org/agree/tools for additional details on restrictions and use. The word "O*NET" is a trademark of the U.S. Department of Labor, Employment and Training Administration.

JIST Publishing offers a color foldout version of this assessment. It is called the *O*NET Career Interests Inventory* and is sold in packages of 25.

Step 1: Respond to the Statements

Carefully read each work activity (items 1 through 180). For each item, fill in just one of the three circles as follows:

If you think you would LIKE the activity, fill in the circle containing the L, like this:

(L) (?) (D)

If you think you would DISLIKE the activity, fill in the circle containing the D, like this:

(L) (?) (D)

If you are UNSURE whether you would like the activity, fill in the circle with the ?, like this:

(L) (?) (D)

As you respond to each activity, don't consider whether you have the education or training needed for it or how much money you might earn if it were part of your job. Simply fill in the circle based on whether you would like, would dislike, or aren't sure about the activity.

After you respond to all 180 activities, you'll score your responses in Step 2.

Would you LIKE the activity or DISLIKE the activity, or are you UNSURE?

Page Score for C

Step 2: Score Your Responses

Do the following to score your responses:

- Score the responses on each page.** On each page of responses, go from top to bottom and add the number of “L’s you filled in. Then write that number in the “Page Score” box at the bottom of the page. Go on to the next page and do the same there.
- Determine your primary interest area.** Which Page Score has your highest score: **R, I, A, S, E, or C?** Enter the letter for that personality type on the following line.

My Primary Personality Type: _____

You will use your Primary Personality Type *first* to explore careers. (If two Page Scores are tied for the highest scores or are within 5 points of each other, use both of them for your Primary Personality Type. You are equally divided between two types.)

- ⌘ R = Realistic
- ⌘ I = Investigative
- ⌘ A = Artistic
- ⌘ S = Social
- ⌘ E = Enterprising
- ⌘ C = Conventional

- Determine your secondary interest areas.** Which Page Score has your next highest score? Which has your third highest score? Enter the letters for those areas on the following lines.

My Secondary Personality Types: _____

(If you do not find many occupations that you like using your Primary Personality Type, you can use your Secondary Personality Types to look at more career options.)

Step 3: Find Jobs That Suit Your Personality Type

Start with your Primary Personality Type. Turn to Part III and look at the Best Jobs lists for your type. Find lists that suit your particular priorities and see what job titles appear there. Don’t rule out a job just because the title is not familiar to you.

When you find job titles that interest you or that you want to learn more about, turn to Part IV. The job descriptions there are grouped by Primary Personality Type and are listed alphabetically within each type. Of course, you can also look at jobs that are linked to one of your Secondary Personality Types.

If you want to find jobs that *combine* your Primary Personality Type and a Secondary Personality Type, turn to Appendix A. All 326 jobs described in Part IV of this book are

listed there by their one- or two-letter personality codes. For example, if your Primary Personality Type is Social and your Secondary Personality Type is Enterprising, you would look in Appendix A for the letter S and then for jobs coded SE, such as Personal Financial Advisors and Training and Development Specialists.

You may discover that you can't find an appealing job in your Primary Personality Type that *also* is coded for one of your Secondary Personality Types. That is not necessarily a problem. John Holland himself has remarked, "You cannot expect a single job to satisfy all aspects of your personality." This is why we have hobbies. Use recreational time for activities related to your Secondary Personality Types. Volunteer work can be another outlet for these interests and abilities.

PART III

The Best Jobs Lists: Jobs for Each of the Six Personality Types

This part contains a lot of interesting lists, and it's a good place for you to start using the book. Here are some suggestions for using the lists to explore career options:

- ✿ The Table of Contents at the beginning of this book presents a complete listing of the list titles in this section. You can browse the lists or use the Table of Contents to find those that interest you most.
- ✿ We gave the lists clear titles, so most require little explanation. We provide comments for each group of lists.
- ✿ As you review the lists, one or more of the jobs may appeal to you enough that you want to seek additional information. As this happens, mark that job (or, if someone else will be using this book, write it on a separate sheet of paper) so that you can look up the description of the job in Part IV.
- ✿ Keep in mind that all jobs in these lists meet our basic criteria for being included in this book. All lists, therefore, are organized by personality type and emphasize occupations with high pay, high growth, or large numbers of openings. These economic measures are easily quantified and are often presented in lists of best jobs in the newspapers and other media. While earnings, growth, and openings are important, there are other factors to consider in your career planning. For example, location, having an opportunity to serve others, and enjoying your work are a few of many factors that may define the ideal job for you. These measures are difficult or impossible to quantify and thus are not used in this book, so you will need to consider the importance of these issues yourself. The resources listed in Appendix D may help you research these issues.
- ✿ All data used to create these lists comes from the U.S. Department of Labor. The earnings figures are based on the average annual pay received by full-time workers. Because the earnings represent the national averages, actual pay rates can vary greatly by location, amount of previous work experience, and other factors.

Best Jobs Overall for Each Personality Type: Jobs with the Highest Pay, Fastest Growth, and Most Openings

The four sets of lists that follow are the most important lists in this book. The first set of lists presents, for each personality type, the jobs with the highest combined scores for pay, growth, and number of openings. These are very appealing lists because they represent jobs with the very highest quantifiable measures from our labor market. The 283 jobs in these six lists are the ones that are described in detail in Part IV.

The three additional sets of lists present, for each personality type, jobs with the highest scores in each of three measures: annual earnings, projected percentage growth, and largest number of openings.

The 50 Best Jobs for Each Personality Type

These are the lists that most people want to see first. For each personality type, you can see the jobs that have the highest overall combined ratings for earnings, projected growth, and number of openings. (The “How the Jobs in This Book Were Selected” section in the Introduction explains in detail how we rated jobs to assemble this list.)

Although each list covers one personality type, you’ll notice a wide variety of jobs on the list. For example, among the top 20 Investigative jobs are some in the fields of high technology, medicine, education, and business. Among the top 20 Conventional jobs are some in the financial, legal, technology, and health-care industries. We included each job’s personality code, which indicates its primary and secondary (if any) personality types.

A look at one list will clarify how we ordered the jobs—take the Realistic list as an example. Civil Engineers is on the top of the list because it was the occupation with the best total score. The second-place job, Surveyors, has somewhat better projected job growth, but it has fewer projected job openings and considerably lower earnings, so its total score was lower than that for Civil Engineers. The other occupations follow in descending order based on their total scores. Many jobs had tied scores and were simply listed one after another, so there are often only very small or even no differences between the scores of jobs that are near each other on the list. All other job lists in this book use these lists as their source. You can find descriptions for each of these jobs in Part IV, beginning on page 129.

The 50 Best Realistic Jobs

| Job | Personality Code | Annual Earnings | Percent Growth | Annual Openings |
|---|------------------|------------------|----------------|-----------------|
| 1. Civil Engineers | RIC | \$71,710..... | 18.0% | 15,979 |

The 20 Best-Paying Jobs for Each Personality Type

In the following six lists you'll find the 20 best-paying jobs for each personality type that met our criteria for this book. These are popular lists, for obvious reasons.

If you compare these six lists, you may notice that some personality types have better income possibilities than others. For example, the best-paying Investigative and Enterprising jobs command much higher incomes than the best-paying Artistic and Conventional jobs. Keep in mind that these figures are only averages; there are a few artists (for example, think of movie stars) who are earning more than obstetricians. Also remember what we said earlier about how earnings can vary by region of the country and amount of experience and because of many other factors.

The 20 Best-Paying Realistic Jobs

| Job | Annual Earnings |
|---|-----------------|
| 1. Airline Pilots, Copilots, and Flight Engineers | \$145,600+ |
| 2. Civil Engineers | \$71,710 |
| 3. Captains, Mates, and Pilots of Water Vessels | \$57,210 |
| 4. Telecommunications Equipment Installers and Repairers, Except Line Installers..... | \$54,070 |
| 5. Electrical Power-Line Installers and Repairers | \$52,570 |
| 6. Electrical and Electronic Engineering Technicians..... | \$52,140 |
| 7. Surveyors..... | \$51,630 |
| 8. Transportation Inspectors | \$51,440 |
| 9. Boilermakers..... | \$50,700 |
| 10. Radiologic Technologists and Technicians | \$50,260 |
| 11. Cartographers and Photogrammetrists | \$49,970 |

The 20 Fastest-Growing Jobs for Each Personality Type

From the six lists of 50 jobs that met our criteria for this book, these six lists show the 20 for each personality type that are projected to have the highest percentage increase in the numbers of people employed through 2016.

You will notice that just as income opportunities vary among the lists of the best-paying jobs, job opportunities vary among the personality types. The top Investigative and Social jobs have better opportunities (an average of about 40 percent growth) than do the top jobs in the other groups (an average of about 24 percent growth). This is partly because the kind of work done by Investigative and Social workers typically cannot be done by computers or by overseas workers. An aging population with greater need for medical and personal care also will demand more Investigative and Social workers.

The 20 Fastest-Growing Realistic Jobs

| Job | Percent Growth |
|--|----------------|
| 1. Cardiovascular Technologists and Technicians | 25.5% |
| 2. Surgical Technologists..... | 24.5% |
| 3. Audio and Video Equipment Technicians | 24.2% |
| 4. Surveyors..... | 23.7% |
| 5. Cartographers and Photogrammetrists | 20.3% |
| 6. Security and Fire Alarm Systems Installers | 20.2% |
| 7. Athletes and Sports Competitors | 19.2% |
| 8. Construction and Building Inspectors | 18.2% |
| 9. Civil Engineers | 18.0% |
| 10. Captains, Mates, and Pilots of Water Vessels | 17.9% |
| 11. Correctional Officers and Jailers..... | 16.9% |
| 12. Transportation Inspectors | 16.4% |
| 13. Biological Technicians | 16.0% |
| 14. Sailors and Marine Oilers..... | 15.7% |
| 15. Tile and Marble Setters..... | 15.4% |
| 16. Radiologic Technologists and Technicians | 15.1% |
| 17. Medical and Clinical Laboratory Technicians | 15.0% |
| 18. Automotive Service Technicians and Mechanics | 14.3% |

| 18. Medical Secretaries | 16.7% |
| 19. Cargo and Freight Agents..... | 16.5% |
| 20. Computer Specialists, All Other..... | 15.1% |

The 20 Jobs with the Most Openings for Each Personality Type

From the six lists of 50 jobs that met our criteria for this book, this list shows the 20 jobs for each personality type that are projected to have the largest number of job openings per year through 2016.

Jobs with many openings present several advantages that may be attractive to you. Because there are many openings, these jobs can be easier to obtain, particularly for those just entering the job market. These jobs may also offer more opportunities to move from one employer to another with relative ease. Though some of these jobs have average or below-average pay, some also pay quite well and can provide good long-term career opportunities or the ability to move up to more responsible roles.

It is interesting but not surprising that job openings are dramatically more scarce in the Artistic list than in the other five lists; this is a category where keen competition for nonteaching jobs is the rule. If sales jobs were set aside, comparatively few openings also would be found among the Enterprising jobs; this also tends to be a competitive arena. The two personality types with outstanding figures for job openings are Conventional and Social.

On all the lists, the jobs that are expected to have the greatest number of openings tend to be those that require hands-on or in-person work—for example, truck drivers, teachers, salespeople, or cashiers. These workers are less likely to be replaced by technology or by overseas workers.

The 20 Realistic Jobs with the Most Openings

| Job | Annual Openings |
|--|-----------------|
| 1. Truck Drivers, Heavy and Tractor-Trailer | 279,032 |
| 2. Carpenters | 223,225 |
| 3. Maintenance and Repair Workers, General | 165,502 |
| 4. Painters, Construction and Maintenance | 101,140 |
| 5. Automotive Service Technicians and Mechanics | 97,350 |
| 6. Computer Support Specialists | 97,334 |
| 7. Electricians | 79,083 |
| 8. Plumbers, Pipefitters, and Steamfitters | 68,643 |
| 9. Correctional Officers and Jailers | 56,579 |
| 10. Operating Engineers and Other Construction Equipment Operators | 55,468 |
| 11. Roofers | 38,398 |
| 12. Automotive Body and Related Repairers | 37,469 |
| 13. Cement Masons and Concrete Finishers | 34,625 |

The 20 Realistic Jobs with the Most Openings

| Job | Annual Openings |
|---|-----------------|
| 14. Sheet Metal Workers..... | 31,677 |
| 15. Drywall and Ceiling Tile Installers | 30,945 |

| 19. Loan Interviewers and Clerks | 40,217 |
| 20. Medical Records and Health Information Technicians | 39,048 |

The Best Jobs for Each Personality Type with a High Percentage of Workers Age 16–24

In the following lists, we sorted the best 50 jobs for each personality type and included only those that employ the highest percentage of workers age 16–24. Workers in this age bracket make up 14.1 percent of the workforce, and jobs in the lists that follow include at least 10 percent of these workers.

Though young workers are employed in virtually all major occupations, and therefore in settings associated with all six personality types, you may notice that the jobs for the Realistic, Conventional, and Artistic personality types are considerably “younger” than those for the Investigative and Enterprising personality types. This largely reflects the fact that

careers in the Investigative and Enterprising categories often require a lot of prior education or time spent rising through the ranks to a supervisory role, whereas on-the-job training requiring less commitment of time may be sufficient preparation for many jobs for the other personality types.

Keep in mind that the young people who hold the jobs listed in this section may not stay in those jobs, or even in jobs related to the same personality type, for a whole career. Some people are “late bloomers” who do not recognize at an early age what their personality type is and how to find a job appropriate to that type. Others may take a job related to an inappropriate personality type because it offers the opportunity to enter the labor market, earn some money, gain basic job skills, and acquire the experience necessary for moving up to a job that is a better fit.

Realistic Jobs with the Highest Percentage of Workers Age 16–24

| Job | Percent Workers Age 16–24 |
|---|------------------------------|

The Best Jobs for Each Personality Type with a High Percentage of Workers Age 55 and Over

In the following lists, we sorted the best 50 jobs for each personality type and included only those that employ the highest percentage of workers age 55 and over. Workers in this age bracket make up roughly 15 percent of the workforce. We included occupations in the lists if the percentage of workers 55 and over was 15 percent or higher.

One use for these lists is to help you identify jobs that might be interesting to you as you decide to change careers or approach retirement. Some jobs are on the lists because they are attractive to older workers wanting part-time work to supplement their retirement income—for example, Tellers. Other occupations on the lists, such as several jobs in music (Artistic), medicine and science (Investigative), psychology (Social), and college teaching (several personality types), take many years of training and experience. People who are established in such careers often have many incentives to continue working at ages when workers in other fields are ready to retire. These jobs also may not be as physically demanding as some other jobs, especially compared to those linked to the Realistic personality type, and therefore may be easier for older workers to perform.

Realistic Jobs with the Highest Percentage of Workers Age 55 and Over

| Job | Percent Workers Age 55 and Over |
|---|------------------------------------|
| 1. Bus Drivers, Transit and Intercity | 38.2% |
| 2. Transportation Inspectors | 28.1% |

The Best Jobs for Each Personality Type with a High Percentage of Part-Time Workers

Starting with the 50 jobs that met our criteria for each personality type in this book, we created lists that include those jobs with 15 percent or more part-time workers.

If you want to work part time, these lists will be helpful in identifying where most others are finding opportunities for this kind of work in the personality type most compatible with you. Many people prefer to work less than full time. For example, people who are attending school or who have young children may prefer the flexibility of part-time work. People also work part time for money-related reasons, such as supplementing income from a full-time job or working two or more part-time jobs because one desirable full-time job is not available.

If you are the Enterprising type of personality, you will note that few occupations suited to you have a lot of part-timers. Keep in mind that even in occupations where few people work part-time it may be possible for you to carve out a position for yourself that does not require a 40-hour work week.

Many of these jobs can be learned quickly, offer flexible work schedules, are easy to obtain, and offer other desirable advantages. Although many people think of part-time jobs as requiring few skills and providing low pay, this is not always the case. Some of these jobs pay quite well, require substantial training or experience, or are growing rapidly.

Realistic Jobs with the Highest Percentage of Part-Time Workers

| Job | Percent Part-Time Workers |
|---|---------------------------|
| 1. Athletes and Sports Competitors | 39.1% |
| 2. Bus Drivers, Transit and Intercity | 34.1% |

The Best Jobs for Each Personality Type with a High Percentage of Self-Employed Workers

About 8 percent of all working people are self-employed or own their own business. This substantial part of our workforce gets little mention in most career books.

The jobs in the lists in this section are selected from the 50 best jobs for each personality type, and all have 8 percent or more self-employed workers. Many jobs in these lists, such as the various types of artists, are held by people who operate one- or two-person businesses and who may also do this work part time. Those in other occupations, such as Carpenters, often work on a per-job basis under the supervision of others.

As you will see from these lists, self-employed people hold a wide range of jobs at all levels of pay and skill. Many are in the arts (Artistic), construction (Realistic), or health-care (Investigative) professions, but many other fields are also represented. Also, while the lists do not include data on age and gender, older workers and women make up a rapidly growing part of the self-employed population. For example, some highly experienced older workers set up consulting and other small businesses following a layoff or as an alternative to full retirement. Large numbers of women are forming small businesses or creating self-employment opportunities as an alternative to traditional employment.

Realistic Jobs with the Highest Percentage of Self-Employed Workers

| Job | Percent Self-Employed Workers |

Best Jobs for Each Personality Type with a High Percentage of Women and of Men

We knew we would create some controversy when we first included the best jobs lists with high percentages of men and women in an earlier *Best Jobs* book. But these lists are not meant to restrict women or men from considering job options—one reason for including these lists is exactly the opposite. We hope the lists will help people see possibilities that they might not otherwise have considered. For example, we suggest that women browse the lists of jobs that employ high percentages of men. Many of these occupations pay quite well, and women who want to do them and are willing to undertake the education or training should consider them.

To create the lists, we sorted the jobs of each personality type that met the criteria for this book and included only those employing 70 percent or more of women or men. For the Realistic, Investigative, and Enterprising personality types, the list of predominantly male jobs is much longer than the list of predominantly female jobs. For the Social and Conventional personality types, you'll find the opposite to be true. In fact, there is no list for

Social jobs with a high percentage of men because no Social jobs employ 70 percent or more men. For the Artistic personality type, the lists are roughly equal.

We also produced “best overall” lists in which these predominantly male jobs and predominantly female jobs are sorted by their combined ranking in terms of annual earnings, percent growth, and annual job openings. In these lists, we list these facts for each job so you can compare their potential rewards.

In the following lists, if you compare the occupations employing a high percentage of women with those employing a high percentage of men, you may notice some distinct differences beyond the obvious. For example, you may notice that the jobs with a high percentage of women are growing somewhat faster than those with a high percentage of men. We’ve done the math and discovered that the difference is an average growth rate of 15.4 percent for the jobs that employ mostly women versus an average rate of 11.9 percent for the jobs that employ mostly men. The number of annual job openings shows a similar pattern. Occupations with a high percentage of men average 32,131 openings per year, while more than double that number of openings, 76,361, are projected on average for occupations with a high percentage of women.

This discrepancy reflects the trend that men have had more problems than women in adapting to an economy dominated by service and information-based jobs. Many women may simply be better prepared for these jobs, possessing more appropriate skills for the jobs that are now growing rapidly and have more job openings.

On the other hand, you may notice that on average the jobs with a high percentage of men have higher wages (an average of \$56,065) than do the jobs with a high percentage of women (\$36,553). This indicates that women interested in improving their earnings may want to consider jobs traditionally dominated by men. Remember that a time-honored gender imbalance is not always a barrier to women. Some employers are seeking female recruits to counterbalance a traditional male dominance.

Realistic Jobs with the Highest Percentage of Women

| Job | Percent Women |
|---|---------------|
| 1. Surgical Technologists | 80.1% |
| 2. Medical and Clinical Laboratory Technicians | 78.1% |
| 3. Cardiovascular Technologists and Technicians | 72.9% |
| 4. Radiologic Technologists and Technicians | 72.9% |

The Best Jobs for Each Personality Type Sorted by Education or Training Required

The lists that follow cover each personality type and separate the top 50 jobs that met the criteria for this book into lists based on the education or training typically required for entry. Next to each job title you'll find the job's annual earnings, percent growth, and annual job openings, and these measures are used to order the jobs within each grouping. Thus you can easily find the best overall jobs for a given level of education or training within a given personality type.

You can use these lists in a variety of ways. For example, they can help you identify a job that has higher potential than a job you now hold that requires a similar level of education.

You can also use these lists to figure out additional job possibilities that would open up if you were to get additional training, education, or work experience. For example, maybe you are a high school graduate working in a job associated with the Social personality type. There are many jobs in this field at all levels of education, but especially at higher levels. You can identify the job you're interested in and the related training you need (you'll find more details in Part IV) so you can move ahead while still working in jobs that are well suited to the Social personality type.

The lists of jobs by education should also help you when you're planning your education. For example, you might be thinking about a job within the Realistic personality type, but you aren't sure what kind of work you want to do. The lists show that Sheet Metal Workers need to get long-term on-the-job training and earn an average of \$39,210, whereas Aircraft Structure, Surfaces, Rigging, and Systems Assemblers need only moderate-term on-the-job training but earn an average of \$45,420. If you want higher earnings without lengthy training, this information might make a difference in your choice.

If you compare the different personality types, you'll note something that was discussed in Part I: some personality types (especially Investigative) offer most of their opportunities to people who are willing to get college degrees, whereas for other types (especially Realistic and Conventional) the most common entry route is on-the-job training.

The Education Levels

- ✿ **Short-term on-the-job training.** It is possible to work in these occupations and achieve an average level of performance within a few days or weeks through on-the-job training.
- ✿ **Moderate-term on-the-job training.** Occupations that require this type of training can be performed adequately after a 1- to 12-month period of combined on-the-job and informal training. Typically, untrained workers observe experienced workers performing tasks and are gradually moved into progressively more difficult assignments.
- ✿ **Long-term on-the-job training.** This training requires more than 12 months of on-the-job training or combined work experience and formal classroom instruction. This includes occupations that use formal apprenticeships for training workers that may take up to four years. It also includes intensive occupation-specific, employer-sponsored training such as police academies. Furthermore, it includes occupations that require natural talent that must be developed over many years.
- ✿ **Work experience in a related occupation.** This type of job requires experience in a related occupation. For example, First-Line Supervisors/Managers of Police and Detectives are selected based on their experience as Police and Sheriff's Patrol Officers.
- ✿ **Postsecondary vocational training.** This requirement involves an amount of training that can vary from a few months to about one year. In a few instances, there may be as many as four years of training.
- ✿ **Associate degree.** This degree usually requires two years of full-time academic work beyond high school.

- ✿ **Bachelor's degree.** This degree requires approximately four to five years of full-time academic work beyond high school.
- ✿ **Work experience plus degree.** Jobs in this category are often management-related and require some experience in a related nonmanagerial position.
- ✿ **Master's degree.** Completion of a master's degree usually requires one to two years of full-time study beyond the bachelor's degree.
- ✿ **Doctoral degree.** This degree normally requires two or more years of full-time academic work beyond the bachelor's degree.
- ✿ **First professional degree.** This type of degree normally requires a minimum of two years of education beyond the bachelor's degree and frequently requires three years.

Another Warning About the Data

We warned you in the Introduction to use caution in interpreting the data we use, and we want to do it again here. The occupational data we use is the most accurate available anywhere, but it has its limitations. For example, the education or training requirements for entry into a job are those typically required as a minimum—but some people working in those jobs may have considerably more or different credentials. For example, most Registered Nurses now have a four-year bachelor's degree, although the two-year associate degree is the minimum level of training the job requires.

In a similar way, people with jobs that require long-term on-the-job training typically earn more than people with jobs that require short-term on-the-job training. However, some people with short-term on-the-job training do earn more than the average for the highest-paying occupations listed in this book. On the other hand, some people with long-term on-the-job training earn much less than the average shown in this book—this is particularly true early in a person's career.

So as you browse the lists that follow, please use them as a way to be encouraged rather than discouraged. Education and training are very important for success in the labor market of the future, but so are ability, drive, initiative, and, yes, luck.

Having said this, we encourage you to get as much education and training as you can. It used to be that you got your schooling and never went back, but this is not a good attitude to have now. You will probably need to continue learning new things throughout your working life. You can do so by going to school, and this is a good thing for many people to do. But there are also many other ways to learn, such as workshops, certification programs, employer training, professional conferences, Internet training, reading related books and magazines, and many others. Upgrading your computer and other technical skills is particularly important in our rapidly changing workplace, and you avoid doing so at your peril.

An old saying goes, “The harder you work, the luckier you get.” It is just as true now as it ever was.

Best Realistic Jobs Requiring Short-Term On-the-Job Training

| Job | Annual Earnings | Percent Growth | Annual Openings |
|-----------------------------------|-----------------|----------------|-----------------|
| 1. Sailors and Marine Oilers..... | \$32,570 | 15.7% | 8,600 |

PART IV

Descriptions of the 50 Best Jobs for Each Personality Type

This part provides descriptions for all the jobs included in one or more of the lists in Part III. The book's introduction gives more details on how to use and interpret the job descriptions, but here are the highlights, along with some additional information.

- ✿ The job descriptions that follow met our criteria for inclusion in this book, as we describe in the Introduction. The jobs in this book scored among the 50 highest in each personality type for earnings, projected growth, and number of job openings. Many good jobs do not meet one or more of these criteria, but we think the jobs that do are the best ones to consider in your career planning.
- ✿ The job descriptions are arranged by personality type and in alphabetical order by job title within each personality type. This approach allows you to find a description quickly if you know its title from one of the lists in Part III. If you have not browsed the lists in Part III, consider spending some time there. The lists are interesting and will help you identify job titles that you can look up in the descriptions that follow.
- ✿ In some cases a job title that appears in Part III is linked to two or more different job titles in Part IV. For example, if you look for the job title Automotive Service Technicians and Mechanics, you will find it listed here alphabetically, but a note will tell you to see the descriptions for Automotive Master Mechanics and Automotive Specialty Technicians. Since these job titles are also listed alphabetically, you can find the descriptions easily.
- ✿ Refer to the Introduction, beginning on page 1, for details on interpreting the job descriptions' content.
- ✿ The section with GOE information includes a subsection titled Other Jobs in This Work Group to help you identify similar jobs. Not all of the jobs listed here are among the top 50 for each personality type.
- ✿ When reviewing the descriptions, keep in mind that the jobs meet our criteria for being among the top 50 jobs for each personality type based on their total scores for earnings, growth, and number of openings—but one or more of these measures may not be among the highest. For example, an occupation that has high pay may be included, even though growth rate and number of job openings are below average.

“Well,” you might ask, “doesn’t this mean that at least some ‘bad’ jobs are described in this part?” Our answer is yes and no. Some jobs with high scores for all measures, such as Securities, Commodities, and Financial Services Sales Agents—the Enterprising job with the highest total for pay, growth, and number of openings—would be a very bad job for people who dislike or are not good at that sort of work. On the other hand, many people would love working as Gaming Supervisors even though that job has lower earnings, a lower projected growth rate, and fewer openings. Descriptions for both jobs are included in this book.

Possibly somewhere a former securities sales agent works as a gaming supervisor and loves it. This person may even have figured out how to make more money (say, by getting hired in a very large casino), have a more flexible schedule, have more fun, or have other advantages not available to a securities sales agent.

The point is that each job is right for somebody, perhaps at a certain time in their lives. We are all likely to change careers and jobs several times, and it’s not always money that motivates us. So browse the job descriptions that follow and know that somewhere there is a good place for you. We hope you find it.

Use the job descriptions in this section as one step in a continuing process of career exploration. When you find a job that interests you, turn to Appendix D for suggestions about resources for further exploration.

Realistic Occupations

Aircraft Mechanics and Service Technicians

- ⦿ Personality Code: RCI
- ⦿ Education/Training Required: Postsecondary vocational training
- ⦿ Annual Earnings: \$49,010
- ⦿ Beginning Wage: \$32,160
- ⦿ Earnings Growth Potential: Low
- ⦿ Growth: 10.6%
- ⦿ Annual Job Openings: 9,708
- ⦿ Self-Employed: 0.4%
- ⦿ Part-Time: 2.1%

Diagnose, adjust, repair, or overhaul aircraft engines and assemblies, such as hydraulic and pneumatic systems. Read and interpret maintenance manuals, service bulletins, and other specifications to determine the feasibility and method of repairing or replacing malfunctioning or damaged components. Inspect completed work to certify that maintenance meets standards and that aircraft are ready for operation. Maintain repair logs, documenting all preventive and corrective aircraft maintenance. Conduct routine and special inspections as required by regulations. Examine and inspect aircraft components, including landing gear, hydraulic systems, and de-icers, to locate cracks, breaks, leaks, or other problem. Inspect airframes for wear or other defects. Maintain, repair, and rebuild aircraft structures; functional components; and parts such as wings and fuselage, rigging, hydraulic units, oxygen systems, fuel systems, electrical systems, gaskets, and seals. Measure the tension of control cables. Replace or repair worn, defective, or damaged components, using hand tools, gauges, and testing equipment. Measure parts for wear, using precision instruments. Assemble and install electrical, plumbing, mechanical, hydraulic, and structural components and accessories, using hand tools and

power tools. Test operation of engines and other systems, using test equipment such as ignition analyzers, compression checkers, distributor timers, and ammeters. Obtain fuel and oil samples and check them for contamination. Reassemble engines following repair or inspection and re-install engines in aircraft. Read and interpret pilots' descriptions of problems to diagnose causes. Modify aircraft structures, space vehicles, systems, or components, following drawings, schematics, charts, engineering orders, and technical publications. Install and align repaired or replacement parts for subsequent riveting or welding, using clamps and wrenches. Locate and mark dimensions and reference lines on defective or replacement parts, using templates, scribes, compasses, and steel rules. Clean, strip, prime, and sand structural surfaces and materials to prepare them for bonding. Service and maintain aircraft and related apparatus by performing activities such as flushing crankcases, cleaning screens, and lubricating moving parts.

GOE—Interest Area/Cluster: 13. Manufacturing.

Work Group: 13.14. Vehicle and Facility Mechanical Work. **Other Jobs in This Work Group:** Aircraft Structure, Surfaces, Rigging, and Systems Assemblers; Automotive Body and Related Repairers; Automotive Glass Installers and Repairers; Automotive Master Mechanics; Automotive Service Technicians and Mechanics; Automotive Specialty Technicians; Bus and Truck Mechanics and Diesel Engine Specialists; Farm Equipment Mechanics; Fiberglass Laminators and Fabricators; Mobile Heavy Equipment Mechanics, Except Engines; Motorboat Mechanics; Motorcycle Mechanics; Outdoor Power Equipment and Other Small Engine Mechanics; Rail Car Repairers; Recreational Vehicle Service Technicians; Tire Repairers and Changers.

Skills: Repairing; Equipment Maintenance; Installation; Operation Monitoring; Troubleshooting; Operation and Control; Quality Control Analysis; Complex Problem Solving.

Education and Training Programs: Agricultural Mechanics and Equipment/Machine Technology; Aircraft Powerplant Technology/Technician; Airframe Mechanics and Aircraft Maintenance Technology/

Technician. **Related Knowledge/Courses:** Mechanical Devices; Design; Physics; Chemistry; Engineering and Technology; Transportation.

Work Environment: Noisy; contaminants; cramped work space, awkward positions; standing; using hands on objects, tools, or controls; bending or twisting the body.

Aircraft Structure, Surfaces, Rigging, and Systems Assemblers

- ⌘ Personality Code: RC
- ⌘ Education/Training Required: Moderate-term on-the-job training
- ⌘ Annual Earnings: \$45,420
- ⌘ Beginning Wage: \$25,050
- ⌘ Earnings Growth Potential: High
- ⌘ Growth: 12.8%
- ⌘ Annual Job Openings: 6,550
- ⌘ Self-Employed: 0.0%
- ⌘ Part-Time: 1.9%

Assemble, fit, fasten, and install parts of airplanes, space vehicles, or missiles, such as tails, wings, fuselage, bulkheads, stabilizers, landing gear, rigging and control equipment, or heating and ventilating systems. Form loops or splices in cables, using clamps and fittings, or reweave cable strands. Align and fit structural assemblies manually or signal crane operators to position assemblies for joining. Align, fit, assemble, connect, and install system components, using jigs, fixtures, measuring instruments, hand tools, and power tools. Assemble and fit prefabricated parts to form subassemblies. Assemble, install, and connect parts, fittings, and assemblies on aircraft, using layout tools; hand tools; power tools; and fasteners such as bolts, screws, rivets, and clamps. Attach brackets, hinges, or clips to secure or support components and subassemblies, using bolts, screws, rivets, chemical bonding, or welding. Select and install accessories in swaging machines, using hand tools. Fit and fasten sheet metal coverings to surface areas and other sections of aircraft prior to welding or

riveting. Lay out and mark reference points and locations for installation of parts and components, using jigs, templates, and measuring and marking instruments. Inspect and test installed units, parts, systems, and assemblies for fit, alignment, performance, defects, and compliance with standards, using measuring instruments and test equipment. Install mechanical linkages and actuators and verify tension of cables, using tensiometers. Join structural assemblies such as wings, tails, and fuselage. Measure and cut cables and tubing, using master templates, measuring instruments, and cable cutters or saws. Read and interpret blueprints, illustrations, and specifications to determine layouts, sequences of operations, or identities and relationships of parts. Prepare and load live ammunition, missiles, and bombs onto aircraft according to established procedures. Adjust, repair, rework, or replace parts and assemblies to eliminate malfunctions and to ensure proper operation. Cut, trim, file, bend, and smooth parts and verify sizes and fitting tolerances in order to ensure proper fit and clearance of parts. Install and connect control cables to electronically controlled units, using hand tools, ring locks, cotter keys, threaded connectors, turnbuckles, and related devices.

GOE—Interest Area/Cluster: 13. Manufacturing.

Work Group: 13.14. Vehicle and Facility Mechanical Work. **Other Jobs in This Work Group:** Aircraft Mechanics and Service Technicians; Automotive Body and Related Repairers; Automotive Glass Installers and Repairers; Automotive Master Mechanics; Automotive Service Technicians and Mechanics; Automotive Specialty Technicians; Bus and Truck Mechanics and Diesel Engine Specialists; Farm Equipment Mechanics; Fiberglass Laminators and Fabricators; Mobile Heavy Equipment Mechanics, Except Engines; Motorboat Mechanics; Motorcycle Mechanics; Outdoor Power Equipment and Other Small Engine Mechanics; Rail Car Repairers; Recreational Vehicle Service Technicians; Tire Repairers and Changers.

Skills: Installation; Equipment Maintenance; Repairing; Quality Control Analysis; Equipment Selection; Operation Monitoring; Mathematics; Troubleshooting.

Education and Training Programs: Airframe Mechanics and Aircraft Maintenance Technology/Technician; Aircraft Powerplant Technology/Technician; Avionics Maintenance Technology/Technician. **Related Knowledge/Courses:** Mechanical Devices; Design; Chemistry; Public Safety and Security; Production and Processing.

Work Environment: More often indoors than outdoors; hazardous equipment; standing; using hands on objects, tools, or controls; repetitive motions.

Airline Pilots, Copilots, and Flight Engineers

- ⦿ Personality Code: RCI
- ⦿ Education/Training Required: Bachelor's degree
- ⦿ Annual Earnings: More than \$145,600
- ⦿ Beginning Wage: \$56,540
- ⦿ Earnings Growth Potential: Cannot be calculated
- ⦿ Growth: 12.9%
- ⦿ Annual Job Openings: 4,073
- ⦿ Self-Employed: 2.5%
- ⦿ Part-Time: 14.2%

Pilot and navigate the flight of multi-engine aircraft in regularly scheduled service for the transport of passengers and cargo. Requires Federal Air Transport rating and certification in specific aircraft type used. Use instrumentation to guide flights when visibility is poor. Respond to and report in-flight emergencies and malfunctions. Work as part of a flight team with other crew members, especially during takeoffs and landings. Contact control towers for takeoff clearances, arrival instructions, and other information, using radio equipment. Steer aircraft along planned routes with the assistance of autopilot and flight management computers. Monitor gauges, warning devices, and control panels to verify aircraft performance and to regulate engine speed. Start engines, operate controls, and pilot airplanes to transport passengers, mail, or freight while

adhering to flight plans, regulations, and procedures. Inspect aircraft for defects and malfunctions according to pre-flight checklists. Check passenger and cargo distributions and fuel amounts to ensure that weight and balance specifications are met. Monitor engine operation, fuel consumption, and functioning of aircraft systems during flights. Confer with flight dispatchers and weather forecasters to keep abreast of flight conditions. Coordinate flight activities with ground crews and air-traffic control and inform crew members of flight and test procedures. Order changes in fuel supplies, loads, routes, or schedules to ensure safety of flights. Choose routes, altitudes, and speeds that will provide the fastest, safest, and smoothest flights. Direct activities of aircraft crews during flights. Brief crews about flight details such as destinations, duties, and responsibilities. Record in logbooks information such as flight times, distances flown, and fuel consumption. Make announcements regarding flights, using public address systems. File instrument flight plans with air traffic control to ensure that flights are coordinated with other air traffic. Perform minor maintenance work or arrange for major maintenance. Instruct other pilots and student pilots in aircraft operations and the principles of flight. Conduct in-flight tests and evaluations at specified altitudes and in all types of weather to determine the receptivity and other characteristics of equipment and systems.

GOE—Interest Area/Cluster: 16. Transportation, Distribution, and Logistics. **Work Group:** 16.02. Air Vehicle Operation. **Other Jobs in This Work Group:** Commercial Pilots.

Skills: Operation Monitoring; Operation and Control; Systems Analysis; Judgment and Decision Making; Troubleshooting; Science; Systems Evaluation; Monitoring.

Education and Training Programs: Airline/Commercial/Professional Pilot and Flight Crew Training; Flight Instruction. **Related Knowledge/Courses:** Transportation; Geography; Physics; Public Safety and Security; Psychology; Law and Government.

Work Environment: Indoors; noisy; contaminants; radiation; sitting; using hands on objects, tools, or controls.

Architectural and Civil Drafters

See Architectural Drafters (an Artistic job) and Civil Drafters (a Realistic job), described separately.

Athletes and Sports Competitors

- ✿ Personality Code: RE
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$38,440
- ✿ Beginning Wage: \$15,210
- ✿ Earnings Growth Potential: Very high
- ✿ Growth: 19.2%
- ✿ Annual Job Openings: 4,293
- ✿ Self-Employed: 27.0%
- ✿ Part-Time: 39.1%

Compete in athletic events. Assess performance following athletic competition, identifying strengths and weaknesses and making adjustments to improve future performance. Receive instructions from coaches and other sports staff prior to events and discuss performance afterwards. Lead teams by serving as captains. Maintain equipment used in a particular sport. Represent teams or professional sports clubs, performing such activities as meeting with members of the media, making speeches, or participating in charity events. Participate in athletic events and competitive sports according to established rules and regulations. Attend scheduled practice and training sessions. Exercise and practice under the direction of athletic trainers or professional coaches in order to develop skills, improve physical condition, and prepare for competitions. Maintain optimum physical fitness levels by training regularly, following nutrition plans, and consulting with health professionals.

GOE—Interest Area/Cluster: 09. Hospitality, Tourism, and Recreation. **Work Group:** 09.06.

Sports. **Other Jobs in This Work Group:** Coaches and Scouts; Umpires, Referees, and Other Sports Officials.

Skills: Equipment Maintenance; Equipment Selection; Troubleshooting; Time Management; Learning Strategies; Active Learning; Judgment and Decision Making; Repairing.

Education and Training Program: Health and Physical Education, General. **Related Knowledge/Courses:** Therapy and Counseling; Communications and Media; Psychology; Sales and Marketing; Personnel and Human Resources.

Work Environment: More often outdoors than indoors; minor burns, cuts, bites, or stings; standing; walking and running; bending or twisting the body.

Audio and Video Equipment Technicians

- ✿ Personality Code: RIC
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$36,050
- ✿ Beginning Wage: \$20,450
- ✿ Earnings Growth Potential: High
- ✿ Growth: 24.2%
- ✿ Annual Job Openings: 4,681
- ✿ Self-Employed: 12.8%
- ✿ Part-Time: 12.9%

Set up or set up and operate audio and video equipment, including microphones, sound speakers, video screens, projectors, video monitors, recording equipment, connecting wires and cables, sound and mixing boards, and related electronic equipment for concerts, sports events, meetings and conventions, presentations, and news conferences. May also set up and operate associated spotlights and other custom lighting systems. Notify supervisors when major equipment repairs are needed. Monitor incoming and outgoing pictures and sound feeds to ensure quality; notify

directors of any possible problems. Mix and regulate sound inputs and feeds or coordinate audio feeds with television pictures. Install, adjust, and operate electronic equipment used to record, edit, and transmit radio and television programs, cable programs, and motion pictures. Design layouts of audio and video equipment and perform upgrades and maintenance. Perform minor repairs and routine cleaning of audio and video equipment. Diagnose and resolve media system problems in classrooms. Switch sources of video input from one camera or studio to another, from film to live programming, or from network to local programming. Meet with directors and senior members of camera crews to discuss assignments and determine filming sequences, camera movements, and picture composition. Construct and position properties, sets, lighting equipment, and other equipment. Compress, digitize, duplicate, and store audio and video data. Obtain, set up, and load videotapes for scheduled productions or broadcasts. Edit videotapes by erasing and removing portions of programs and adding video or sound as required. Direct and coordinate activities of assistants and other personnel during production. Plan and develop pre-production ideas into outlines, scripts, storyboards, and graphics, using own ideas or specifications of assignments. Maintain inventories of audiotapes and videotapes and related supplies. Determine formats, approaches, content, levels, and media to effectively meet objectives within budgetary constraints, utilizing research, knowledge, and training. Record and edit audio material such as movie soundtracks, using audio recording and editing equipment. Inform users of audiotaping and videotaping service policies and procedures. Obtain and preview musical performance programs prior to events to become familiar with the order and approximate times of pieces. Produce rough and finished graphics and graphic designs. Locate and secure settings, properties, effects, and other production necessities.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.09. Media Technology. **Other Jobs in This Work Group:** Broadcast Technicians; Camera Operators, Television, Video, and Motion Picture; Film and Video Editors; Multi-

Media Artists and Animators; Photographers; Radio Operators; Sound Engineering Technicians.

Skills: Installation; Operation and Control; Equipment Maintenance; Troubleshooting; Operation Monitoring; Repairing; Equipment Selection; Technology Design.

Education and Training Programs: Agricultural Communication/Journalism; Photographic and Film/Video Technology/Technician and Assistant; Recording Arts Technology/Technician.

Related Knowledge/Courses: Computers and Electronics; Telecommunications; Engineering and Technology; Communications and Media; Mechanical Devices; Physics.

Work Environment: Indoors; standing; using hands on objects, tools, or controls.

Automotive Body and Related Repairers

- ✿ Personality Code: R
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$35,690
- ✿ Beginning Wage: \$21,480
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 11.6%
- ✿ Annual Job Openings: 37,469
- ✿ Self-Employed: 14.1%
- ✿ Part-Time: 5.6%

Repair and refinish automotive vehicle bodies and straighten vehicle frames. File, grind, sand, and smooth filled or repaired surfaces, using power tools and hand tools. Sand body areas to be painted and cover bumpers, windows, and trim with masking tape or paper to protect them from the paint. Follow supervisors' instructions as to which parts to restore or replace and how much time a job should take. Remove damaged sections of vehicles, using metal-cutting guns, air grinders, and wrenches, and install replacement parts, using wrenches or welding

equipment. Cut and tape plastic separating film to outside repair areas to avoid damaging surrounding surfaces during repair procedure and remove tape and wash surfaces after repairs are complete. Prime and paint repaired surfaces, using paint spray guns and motorized sanders. Inspect repaired vehicles for dimensional accuracy and test-drive them to ensure proper alignment and handling. Mix polyester resins and hardeners to be used in restoring damaged areas. Chain or clamp frames and sections to alignment machines that use hydraulic pressure to align damaged components. Fill small dents that cannot be worked out with plastic or solder. Fit and weld replacement parts into place, using wrenches and welding equipment, and grind down welds to smooth them, using power grinders and other tools. Position dolly blocks against surfaces of dented areas and beat opposite surfaces to remove dents, using hammers. Remove damaged panels and identify the family and properties of the plastic used on a vehicle. Review damage reports, prepare or review repair cost estimates, and plan work to be performed. Remove small pits and dimples in body metal, using pick hammers and punches. Remove upholstery, accessories, electrical window- and seat-operating equipment, and trim to gain access to vehicle bodies and fenders. Clean work areas, using air hoses, to remove damaged material and discarded fiberglass strips used in repair procedures. Adjust or align headlights, wheels, and brake systems. Apply heat to plastic panels, using hot-air welding guns or immersion in hot water, and press the softened panels back into shape by hand. Soak fiberglass matting in resin mixtures and apply layers of matting over repair areas to specified thicknesses.

GOE—Interest Area/Cluster: 13. Manufacturing. **Work Group:** 13.14. Vehicle and Facility Mechanical Work.

Other Jobs in This Work Group: Aircraft Mechanics and Service Technicians; Aircraft Structure, Surfaces, Rigging, and Systems Assemblers; Automotive Glass Installers and Repairers; Automotive Master Mechanics; Automotive Service Technicians and Mechanics; Automotive Specialty Technicians; Bus and Truck Mechanics and Diesel Engine Specialists; Farm Equipment Mechanics;

Fiberglass Laminators and Fabricators; Mobile Heavy Equipment Mechanics, Except Engines; Motorboat Mechanics; Motorcycle Mechanics; Outdoor Power Equipment and Other Small Engine Mechanics; Rail Car Repairers; Recreational Vehicle Service Technicians; Tire Repairers and Changers.

Skills: Repairing; Installation; Equipment Maintenance; Troubleshooting; Equipment Selection; Management of Financial Resources.

Education and Training Program: Autobody/Collision and Repair Technology/Technician. **Related Knowledge/Courses:** Mechanical Devices; Building and Construction; Chemistry; Production and Processing; Administration and Management; Transportation.

Work Environment: Noisy; contaminants; hazardous equipment; standing; using hands on objects, tools, or controls; repetitive motions.

Automotive Master Mechanics

- ✿ Personality Code: RI
- ✿ Education/Training Required: Postsecondary vocational training
- ✿ Annual Earnings: \$34,170
- ✿ Beginning Wage: \$19,240
- ✿ Earnings Growth Potential: High
- ✿ Growth: 14.3%
- ✿ Annual Job Openings: 97,350
- ✿ Self-Employed: 16.8%
- ✿ Part-Time: 5.6%

The job openings listed here are shared with Automotive Specialty Technicians.

Repair automobiles, trucks, buses, and other vehicles. Master mechanics repair virtually any part on the vehicle or specialize in the transmission system. Examine vehicles to determine extent of damage or malfunctions. Test-drive vehicles and test components and systems, using equipment such as infrared engine analyzers, compression gauges, and computerized diagnostic devices. Repair, reline,

replace, and adjust brakes. Review work orders and discuss work with supervisors. Follow checklists to ensure all important parts are examined, including belts, hoses, steering systems, spark plugs, brake and fuel systems, wheel bearings, and other potentially troublesome areas. Plan work procedures, using charts, technical manuals, and experience. Test and adjust repaired systems to meet manufacturers' performance specifications. Confer with customers to obtain descriptions of vehicle problems and to discuss work to be performed and future repair requirements. Perform routine and scheduled maintenance services such as oil changes, lubrications, and tune-ups. Disassemble units and inspect parts for wear, using micrometers, calipers, and gauges. Overhaul or replace carburetors, blowers, generators, distributors, starters, and pumps. Repair and service air conditioning, heating, engine-cooling, and electrical systems. Repair or replace parts such as pistons, rods, gears, valves, and bearings. Tear down, repair, and rebuild faulty assemblies such as power systems, steering systems, and linkages. Rewire ignition systems, lights, and instrument panels. Repair radiator leaks. Install and repair accessories such as radios, heaters, mirrors, and windshield wipers. Repair manual and automatic transmissions. Repair or replace shock absorbers. Align vehicles' front ends. Rebuild parts such as crankshafts and cylinder blocks. Repair damaged automobile bodies. Replace and adjust headlights.

GOE—Interest Area/Cluster: 13. Manufacturing. **Work Group:** 13.14. Vehicle and Facility Mechanical Work. **Other Jobs in This Work Group:** Aircraft Mechanics and Service Technicians; Aircraft Structure, Surfaces, Rigging, and Systems Assemblers; Automotive Body and Related Repairers; Automotive Glass Installers and Repairers; Automotive Service Technicians and Mechanics; Automotive Specialty Technicians; Bus and Truck Mechanics and Diesel Engine Specialists; Farm Equipment Mechanics; Fiberglass Laminators and Fabricators; Mobile Heavy Equipment Mechanics, Except Engines; Motorboat Mechanics; Motorcycle Mechanics; Outdoor Power Equipment and Other Small Engine Mechanics; Rail Car Repairers; Recreational Vehicle Service Technicians; Tire Repairers and Changers.

Skills: Repairing; Troubleshooting; Installation; Equipment Maintenance; Equipment Selection; Operation Monitoring; Complex Problem Solving; Technology Design.

Education and Training Programs: Automotive Engineering Technology/Technician; Automobile/Automotive Mechanics Technology/Technician; Medium/Heavy Vehicle and Truck Technology/Technician. **Related Knowledge/Courses:** Mechanical Devices; Physics; Computers and Electronics; Engineering and Technology; Chemistry; Public Safety and Security.

Work Environment: Noisy; contaminants; hazardous equipment; minor burns, cuts, bites, or stings; standing; using hands on objects, tools, or controls.

Automotive Service Technicians and Mechanics

See Automotive Master Mechanics (a Realistic job) and Automotive Specialty Technicians (a Realistic job), described separately.

Automotive Specialty Technicians

- ⦿ Personality Code: RIC
- ⦿ Education/Training Required: Postsecondary vocational training
- ⦿ Annual Earnings: \$34,170
- ⦿ Beginning Wage: \$19,240
- ⦿ Earnings Growth Potential: High
- ⦿ Growth: 14.3%
- ⦿ Annual Job Openings: 97,350
- ⦿ Self-Employed: 16.8%
- ⦿ Part-Time: 5.6%

The job openings listed here are shared with Automotive Master Mechanics.

Repair only one system or component on a vehicle, such as brakes, suspension, or radiator. Examine vehicles, compile estimates of repair costs, and

secure customers' approval to perform repairs. Repair, overhaul, and adjust automobile brake systems. Use electronic test equipment to locate and correct malfunctions in fuel, ignition, and emissions control systems. Repair and replace defective ball joint suspensions, brake shoes, and wheel bearings. Inspect and test new vehicles for damage; then record findings so that necessary repairs can be made. Test electronic computer components in automobiles to ensure that they are working properly. Tune automobile engines to ensure proper and efficient functioning. Install and repair air conditioners and service components such as compressors, condensers, and controls. Repair, replace, and adjust defective carburetor parts and gasoline filters. Remove and replace defective mufflers and tailpipes. Repair and replace automobile leaf springs. Rebuild, repair, and test automotive fuel injection units. Align and repair wheels, axles, frames, torsion bars, and steering mechanisms of automobiles, using special alignment equipment and wheel-balancing machines. Repair, install, and adjust hydraulic and electromagnetic automatic lift mechanisms used to raise and lower automobile windows, seats, and tops. Repair and rebuild clutch systems. Convert vehicle fuel systems from gasoline to butane gas operations and repair and service operating butane fuel units.

GOE—Interest Area/Cluster: 13. Manufacturing.

Work Group: 13.14. Vehicle and Facility Mechanical Work.

Other Jobs in This Work Group: Aircraft Mechanics and Service Technicians; Aircraft Structure, Surfaces, Rigging, and Systems Assemblers; Automotive Body and Related Repairers; Automotive Glass Installers and Repairers; Automotive Master Mechanics; Automotive Service Technicians and Mechanics; Bus and Truck Mechanics and Diesel Engine Specialists; Farm Equipment Mechanics; Fiberglass Laminators and Fabricators; Mobile Heavy Equipment Mechanics, Except Engines; Motorboat Mechanics; Motorcycle Mechanics; Outdoor Power Equipment and Other Small Engine Mechanics; Rail Car Repairers; Recreational Vehicle Service Technicians; Tire Repairers and Changers.

Skills: Repairing; Troubleshooting; Operation Monitoring; Equipment Maintenance; Installation;

Equipment Selection; Active Learning; Operation and Control.

Education and Training Programs: Automotive Engineering Technology/Technician; Vehicle Emissions Inspection and Maintenance Technology/Technician; Alternative Fuel Vehicle Technology/Technician. **Related Knowledge/Courses:** Mechanical Devices; Physics; Engineering and Technology; Customer and Personal Service; Sales and Marketing; Administration and Management.

Work Environment: Contaminants; cramped work space, awkward positions; minor burns, cuts, bites, or stings; standing; using hands on objects, tools, or controls; bending or twisting the body.

Aviation Inspectors

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Work experience in a related occupation
- ✿ Annual Earnings: \$51,440
- ✿ Beginning Wage: \$27,340
- ✿ Earnings Growth Potential: High
- ✿ Growth: 16.4%
- ✿ Annual Job Openings: 2,122
- ✿ Self-Employed: 5.9%
- ✿ Part-Time: 3.7%

The job openings listed here are shared with Freight and Cargo Inspectors and with Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation.

Inspect aircraft, maintenance procedures, air navigational aids, air traffic controls, and communications equipment to ensure conformance with federal safety regulations. Inspect work of aircraft mechanics performing maintenance, modification, or repair and overhaul of aircraft and aircraft mechanical systems to ensure adherence to standards and procedures. Start aircraft and observe gauges, meters, and other instruments to detect evidence of malfunctions. Examine aircraft access plates and doors for security. Examine landing gear, tires,

and exteriors of fuselage, wings, and engines for evidence of damage or corrosion and to determine whether repairs are needed. Prepare and maintain detailed repair, inspection, investigation, and certification records and reports. Inspect new, repaired, or modified aircraft to identify damage or defects and to assess airworthiness and conformance to standards, using checklists, hand tools, and test instruments. Examine maintenance records and flight logs to determine if service and maintenance checks and overhauls were performed at prescribed intervals. Recommend replacement, repair, or modification of aircraft equipment. Recommend changes in rules, policies, standards, and regulations based on knowledge of operating conditions, aircraft improvements, and other factors. Issue pilots' licenses to individuals meeting standards. Investigate air accidents and complaints to determine causes. Observe flight activities of pilots to assess flying skills and to ensure conformance to flight and safety regulations. Conduct flight test programs to test equipment, instruments, and systems under a variety of conditions, using both manual and automatic controls. Approve or deny issuance of certificates of airworthiness. Analyze training programs and conduct oral and written examinations to ensure the competency of persons operating, installing, and repairing aircraft equipment. Schedule and coordinate in-flight testing programs with ground crews and air traffic control to ensure availability of ground tracking, equipment monitoring, and related services.

GOE—Interest Area/Cluster: 07. Government and Public Administration. **Work Group:** 07.03. Regulations Enforcement. **Other Jobs in This Work Group:** Agricultural Inspectors; Compliance Officers, Except Agriculture, Construction, Health and Safety, and Transportation; Construction and Building Inspectors; Environmental Compliance Inspectors; Equal Opportunity Representatives and Officers; Financial Examiners; Fire Inspectors; Fish and Game Wardens; Forest Fire Inspectors and Prevention Specialists; Freight and Cargo Inspectors; Government Property Inspectors and Investigators; Immigration and Customs Inspectors; Licensing Examiners and Inspectors; Nuclear Monitoring Technicians; Occupational

Health and Safety Specialists; Occupational Health and Safety Technicians; Tax Examiners, Collectors, and Revenue Agents; Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation.

Skills: Systems Analysis; Systems Evaluation; Quality Control Analysis; Operation Monitoring; Troubleshooting; Operation and Control; Reading Comprehension; Judgment and Decision Making.

Education and Training Program: Avionics Maintenance Technology/Technician. **Related Knowledge/Courses:** Physics; Mechanical Devices; Transportation; Chemistry; Design; Law and Government.

Work Environment: More often indoors than outdoors; noisy; sitting.

Biological Technicians

- ✿ Personality Code: RIC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$37,810
- ✿ Beginning Wage: \$24,360
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 16.0%
- ✿ Annual Job Openings: 15,374
- ✿ Self-Employed: 0.0%
- ✿ Part-Time: 6.2%

Assist biological and medical scientists in laboratories. Set up, operate, and maintain laboratory instruments and equipment; monitor experiments; make observations; and calculate and record results. May analyze organic substances, such as blood, food, and drugs. Keep detailed logs of all work-related activities. Monitor laboratory work to ensure compliance with set standards. Isolate, identify, and prepare specimens for examination. Use computers, computer-interfaced equipment, robotics, or high-technology industrial applications to perform work duties. Conduct research or assist in the conduct of research, including the collection of information and samples such as blood, water, soil,

plants, and animals. Set up, adjust, calibrate, clean, maintain, and troubleshoot laboratory and field equipment. Provide technical support and services for scientists and engineers working in fields such as agriculture, environmental science, resource management, biology, and health sciences. Clean, maintain, and prepare supplies and work areas. Participate in the research, development, or manufacturing of medicinal and pharmaceutical preparations. Conduct standardized biological, microbiological, or biochemical tests and laboratory analyses to evaluate the quantity or quality of physical or chemical substances in food or other products. Analyze experimental data and interpret results to write reports and summaries of findings. Measure or weigh compounds and solutions for use in testing or animal feed. Monitor and observe experiments, recording production and test data for evaluation by research personnel. Examine animals and specimens to detect the presence of disease or other problems. Conduct or supervise operational programs such as fish hatcheries, greenhouses, and livestock production programs. Feed livestock or laboratory animals.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.06. Medical Technology.

Other Jobs in This Work Group: Cardiovascular Technologists and Technicians; Diagnostic Medical Sonographers; Medical and Clinical Laboratory Technicians; Medical and Clinical Laboratory Technologists; Medical Equipment Preparers; Medical Records and Health Information Technicians; Nuclear Medicine Technologists; Opticians, Dispensing; Orthotists and Prosthetists; Radiologic Technicians; Radiologic Technologists; Radiologic Technologists and Technicians.

Skills: Science; Equipment Maintenance; Quality Control Analysis; Troubleshooting; Mathematics; Active Learning; Technology Design; Learning Strategies.

Education and Training Program: Biology Technician/Biotechnology Laboratory Technician. **Related Knowledge/Courses:** Chemistry; Biology.

Work Environment: Indoors; standing; using hands on objects, tools, or controls; repetitive motions.

Boilermakers

- ✿ Personality Code: RC
 - ✿ Education/Training Required: Long-term on-the-job training
 - ✿ Annual Earnings: \$50,700
 - ✿ Beginning Wage: \$32,910
 - ✿ Earnings Growth Potential: Medium
 - ✿ Growth: 14.0%
 - ✿ Annual Job Openings: 2,333
 - ✿ Self-Employed: 0.2%
 - ✿ Part-Time: 2.6%
-

Construct, assemble, maintain, and repair stationary steam boilers and boiler house auxiliaries. Align structures or plate sections to assemble boiler frame tanks or vats, following blueprints. Work involves use of hand and power tools, plumb bobs, levels, wedges, dogs, or turnbuckles. Assist in testing assembled vessels. Direct cleaning of boilers and boiler furnaces. Inspect and repair boiler fittings, such as safety valves, regulators, automatic-control mechanisms, water columns, and auxiliary machines. Examine boilers, pressure vessels, tanks, and vats to locate defects such as leaks, weak spots, and defective sections so that they can be repaired. Bolt or arc-weld pressure vessel structures and parts together, using wrenches and welding equipment. Inspect assembled vessels and individual components, such as tubes, fittings, valves, controls, and auxiliary mechanisms, to locate any defects. Repair or replace defective pressure vessel parts, such as safety valves and regulators, using torches, jacks, caulking hammers, power saws, threading dies, welding equipment, and metal-working machinery. Attach rigging and signal crane or hoist operators to lift heavy frame and plate sections and other parts into place. Bell, bead with power hammers, or weld pressure vessel tube ends in

order to ensure leakproof joints. Lay out plate, sheet steel, or other heavy metal and locate and mark bending and cutting lines, using protractors, compasses, and drawing instruments or templates. Install manholes, handholes, taps, tubes, valves, gauges, and feedwater connections in drums of water tube boilers, using hand tools. Study blueprints to determine locations, relationships, and dimensions of parts. Straighten or reshape bent pressure vessel plates and structure parts, using hammers, jacks, and torches. Shape seams, joints, and irregular edges of pressure vessel sections and structural parts in order to attain specified fit of parts, using cutting torches, hammers, files, and metalworking machines. Position, align, and secure structural parts and related assemblies to boiler frames, tanks, or vats of pressure vessels, following blueprints. Locate and mark reference points for columns or plates on boiler foundations, following blueprints and using straightedges, squares, transits, and measuring instruments. Shape and fabricate parts, such as stacks, uptakes, and chutes, in order to adapt pressure vessels, heat exchangers, and piping to premises, using heavy-metalworking machines such as brakes, rolls, and drill presses. Clean pressure vessel equipment, using scrapers, wire brushes, and cleaning solvents.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track

Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Repairing; Installation; Equipment Maintenance; Operation Monitoring; Mathematics; Troubleshooting; Operation and Control; Equipment Selection.

Education and Training Program: Boilermaking/Boilermaker. **Related Knowledge/Courses:** Building and Construction; Mechanical Devices; Engineering and Technology; Design; Physics; Transportation.

Work Environment: Noisy; very hot or cold; contaminants; minor burns, cuts, bites, or stings; standing; using hands on objects, tools, or controls.

Brickmasons and Blockmasons

- ⌘ Personality Code: RCI
- ⌘ Education/Training Required: Long-term on-the-job training
- ⌘ Annual Earnings: \$44,070
- ⌘ Beginning Wage: \$26,370
- ⌘ Earnings Growth Potential: High
- ⌘ Growth: 9.7%
- ⌘ Annual Job Openings: 17,569
- ⌘ Self-Employed: 24.5%
- ⌘ Part-Time: 7.9%

Lay and bind building materials, such as brick, structural tile, concrete block, cinderblock, glass block, and terra-cotta block, with mortar and other substances to construct or repair walls, partitions, arches, sewers, and other structures. Construct corners by fastening in plumb position a corner pole or building a corner pyramid of bricks and filling

in between the corners, using a line from corner to corner to guide each course, or layer, of brick. Measure distance from reference points and mark guidelines to lay out work, using plumb bobs and levels. Fasten or fuse brick or other building material to structure with wire clamps, anchor holes, torch, or cement. Calculate angles and courses and determine vertical and horizontal alignment of courses. Break or cut bricks, tiles, or blocks to size, using trowel edge, hammer, or power saw. Remove excess mortar with trowels and hand tools and finish mortar joints with jointing tools for a sealed, uniform appearance. Interpret blueprints and drawings to determine specifications and to calculate the materials required. Apply and smooth mortar or other mixture over work surface. Mix specified amounts of sand, clay, dirt, or mortar powder with water to form refractory mixtures. Examine brickwork or structure to determine need for repair. Clean working surface to remove scale, dust, soot, or chips of brick and mortar, using broom, wire brush, or scraper. Lay and align bricks, blocks, or tiles to build or repair structures or high-temperature equipment, such as cupola, kilns, ovens, or furnaces. Remove burned or damaged brick or mortar, using sledgehammer, crowbar, chipping gun, or chisel. Spray or spread refractory material over brickwork to protect against deterioration.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers;

Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmakers; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Equipment Maintenance; Mathematics; Installation; Repairing; Technology Design.

Education and Training Program: Mason/Masonry. **Related Knowledge/Courses:** Building and Construction; Design; Mechanical Devices; Production and Processing; Public Safety and Security; Mathematics.

Work Environment: Outdoors; very hot or cold; hazardous equipment; standing; using hands on objects, tools, or controls; bending or twisting the body.

Bus and Truck Mechanics and Diesel Engine Specialists

- ✿ Personality Code: RC
- ✿ Education/Training Required: Postsecondary vocational training
- ✿ Annual Earnings: \$38,640
- ✿ Beginning Wage: \$25,210
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 11.5%
- ✿ Annual Job Openings: 25,428
- ✿ Self-Employed: 5.8%
- ✿ Part-Time: 2.8%

Diagnose, adjust, repair, or overhaul trucks, buses, and all types of diesel engines. Includes mechanics working primarily with automobile diesel engines. Use hand tools such as screwdrivers, pliers, wrenches, pressure gauges, and precision instruments, as well as power tools such as pneumatic wrenches, lathes, welding equipment, and jacks and

hoists. Inspect brake systems, steering mechanisms, wheel bearings, and other important parts to ensure that they are in proper operating condition. Perform routine maintenance such as changing oil, checking batteries, and lubricating equipment and machinery. Adjust and reline brakes, align wheels, tighten bolts and screws, and reassemble equipment. Raise trucks, buses, and heavy parts or equipment, using hydraulic jacks or hoists. Test drive trucks and buses to diagnose malfunctions or to ensure that they are working properly. Inspect, test, and listen to defective equipment to diagnose malfunctions, using test instruments such as handheld computers, motor analyzers, chassis charts, and pressure gauges. Examine and adjust protective guards, loose bolts, and specified safety devices. Inspect and verify dimensions and clearances of parts to ensure conformance to factory specifications. Specialize in repairing and maintaining parts of the engine, such as fuel injection systems. Attach test instruments to equipment and read dials and gauges to diagnose malfunctions. Rewire ignition systems, lights, and instrument panels. Recondition and replace parts, pistons, bearings, gears, and valves. Repair and adjust seats, doors, and windows and install and repair accessories. Inspect, repair, and maintain automotive and mechanical equipment and machinery such as pumps and compressors. Disassemble and overhaul internal combustion engines, pumps, generators, transmissions, clutches, and differential units. Rebuild gas or diesel engines. Align front ends and suspension systems. Operate valve-grinding machines to grind and reset valves.

GOE—Interest Area/Cluster: 13. Manufacturing.
Work Group: 13.14. Vehicle and Facility Mechanical Work. **Other Jobs in This Work Group:** Aircraft Mechanics and Service Technicians; Aircraft Structure, Surfaces, Rigging, and Systems Assemblers; Automotive Body and Related Repairers; Automotive Glass Installers and Repairers; Automotive Master Mechanics; Automotive Service Technicians and Mechanics; Automotive Specialty Technicians; Farm Equipment Mechanics; Fiberglass Laminators and Fabricators; Mobile Heavy Equipment Mechanics, Except Engines; Motorboat Mechanics; Motorcycle Mechanics; Outdoor Power Equipment and Other

Small Engine Mechanics; Rail Car Repairers; Recreational Vehicle Service Technicians; Tire Repairers and Changers.

Skills: Repairing; Equipment Maintenance; Troubleshooting; Installation; Science; Technology Design; Equipment Selection.

Education and Training Programs: Diesel Mechanics Technology/Technician; Medium/Heavy Vehicle and Truck Technology/Technician. **Related Knowledge/Courses:** Mechanical Devices; Transportation; Public Safety and Security; Physics; Engineering and Technology; Law and Government.

Work Environment: Noisy; very bright or dim lighting; contaminants; hazardous equipment; standing; using hands on objects, tools, or controls.

Bus Drivers, Transit and Intercity

- ✿ Personality Code: RS
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$33,160
- ✿ Beginning Wage: \$19,660
- ✿ Earnings Growth Potential: High
- ✿ Growth: 12.5%
- ✿ Annual Job Openings: 27,100
- ✿ Self-Employed: 1.3%
- ✿ Part-Time: 34.1%

Drive bus or motor coach, including regular route operations, charters, and private carriage. May assist passengers with baggage. May collect fares or tickets. Inspect vehicles and check gas, oil, and water levels prior to departure. Drive vehicles over specified routes or to specified destinations according to time schedules to transport passengers, complying with traffic regulations. Park vehicles at loading areas so that passengers can board. Assist passengers with baggage and collect tickets or cash fares. Report delays or accidents. Advise passengers to be seated and orderly while on vehicles. Regulate heating, lighting, and ventilating systems for passenger comfort. Load and unload baggage in baggage

compartments. Record cash receipts and ticket fares. Make minor repairs to vehicle and change tires.

GOE—Interest Area/Cluster: 16. Transportation, Distribution, and Logistics. **Work Group:** 16.06. Other Services Requiring Driving. **Other Jobs in This Work Group:** Ambulance Drivers and Attendants, Except Emergency Medical Technicians; Bus Drivers, School; Couriers and Messengers; Driver/Sales Workers; Parking Lot Attendants; Postal Service Mail Carriers; Taxi Drivers and Chauffeurs.

Skills: Equipment Maintenance; Operation and Control; Social Perceptiveness; Operation Monitoring; Troubleshooting; Repairing.

Education and Training Program: Truck and Bus Driver/Commercial Vehicle Operation. **Related Knowledge/Courses:** Transportation; Geography; Public Safety and Security; Psychology; Law and Government; Customer and Personal Service.

Work Environment: Outdoors; noisy; contaminants; sitting; using hands on objects, tools, or controls; repetitive motions.

Camera Operators, Television, Video, and Motion Picture

- ✿ Personality Code: RA
- ✿ Education/Training Required: Postsecondary vocational training
- ✿ Annual Earnings: \$41,850
- ✿ Beginning Wage: \$21,050
- ✿ Earnings Growth Potential: High
- ✿ Growth: 11.5%
- ✿ Annual Job Openings: 3,496
- ✿ Self-Employed: 16.9%
- ✿ Part-Time: 18.9%

Operate television, video, or motion picture camera to photograph images or scenes for various purposes, such as TV broadcasts, advertising, video production, or motion pictures. Operate television or motion picture cameras to record scenes for television broadcasts, advertising, or motion pictures.

Compose and frame each shot, applying the technical aspects of light, lenses, film, filters, and camera settings to achieve the effects sought by directors. Operate zoom lenses, changing images according to specifications and rehearsal instructions. Use cameras in any of several different camera mounts, such as stationary, track-mounted, or crane-mounted. Test, clean, and maintain equipment to ensure proper working condition. Adjust positions and controls of cameras, printers, and related equipment to change focus, exposure, and lighting. Gather and edit raw footage on location to send to television affiliates for broadcast, using electronic news-gathering or film-production equipment. Confer with directors, sound and lighting technicians, electricians, and other crew members to discuss assignments and determine filming sequences, desired effects, camera movements, and lighting requirements. Observe sets or locations for potential problems and to determine filming and lighting requirements. Instruct camera operators regarding camera setups, angles, distances, movement, and variables and cues for starting and stopping filming. Select and assemble cameras, accessories, equipment, and film stock to be used during filming, using knowledge of filming techniques, requirements, and computations. Label and record contents of exposed film and note details on report forms. Read charts and compute ratios to determine variables such as lighting, shutter angles, filter factors, and camera distances. Set up cameras, optical printers, and related equipment to produce photographs and special effects. View films to resolve problems of exposure control, subject and camera movement, changes in subject distance, and related variables. Reload camera magazines with fresh raw film stock. Read and analyze work orders and specifications to determine locations of subject material, work procedures, sequences of operations, and machine setups. Receive raw film stock and maintain film inventories.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.09. Media Technology. **Other Jobs in This Work Group:** Audio and Video Equipment Technicians; Broadcast Technicians; Film and Video Editors; Multi-Media Artists

and Animators; Photographers; Radio Operators; Sound Engineering Technicians.

Skills: Operation Monitoring; Operation and Control; Equipment Maintenance; Troubleshooting; Equipment Selection; Operations Analysis; Active Listening; Installation.

Education and Training Programs: Radio and Television Broadcasting Technology/Technician; Audio-visual Communications Technologies/Technicians, Other; Cinematography and Film/Video Production. **Related Knowledge/Courses:** Communications and Media; Telecommunications; Computers and Electronics; Engineering and Technology.

Work Environment: More often indoors than outdoors; very bright or dim lighting; standing; using hands on objects, tools, or controls.

Captains, Mates, and Pilots of Water Vessels

See Mates—Ship, Boat, and Barge (a Realistic job), Pilots, Ship (a Realistic job), and Ship and Boat Captains (an Enterprising job), described separately.

Cardiovascular Technologists and Technicians

- ✿ Personality Code: RIS
- ✿ Education/Training Required: Associate degree
- ✿ Annual Earnings: \$44,940
- ✿ Beginning Wage: \$24,650
- ✿ Earnings Growth Potential: High
- ✿ Growth: 25.5%
- ✿ Annual Job Openings: 3,550
- ✿ Self-Employed: 1.1%
- ✿ Part-Time: 17.3%

Conduct tests on pulmonary or cardiovascular systems of patients for diagnostic purposes. May conduct or assist in electrocardiograms,

cardiac catheterizations, pulmonary-functions, lung capacity, and similar tests. Monitor patients' blood pressures and heart rates, using electrocardiogram (EKG) equipment during diagnostic and therapeutic procedures to notify physicians if something appears wrong. Explain testing procedures to patients to obtain cooperation and reduce anxiety. Observe gauges, recorders, and video screens of data analysis systems during imaging of cardiovascular systems. Monitor patients' comfort and safety during tests, alerting physicians to abnormalities or changes in patient responses. Obtain and record patients' identities, medical histories, or test results. Attach electrodes to patients' chests, arms, and legs; connect electrodes to leads from electrocardiogram (EKG) machines; and operate EKG machines to obtain readings. Adjust equipment and controls according to physicians' orders or established protocol. Prepare and position patients for testing. Check, test, and maintain cardiology equipment, making minor repairs when necessary, to ensure proper operation. Supervise and train other cardiology technologists and students. Perform general administrative tasks, such as scheduling appointments or ordering supplies and equipment. Maintain a proper sterile field during surgical procedures. Assist physicians in the diagnosis and treatment of cardiac and peripheral vascular treatments, such as implanting pacemakers or assisting with balloon angioplasties to treat blood vessel blockages. Inject contrast medium into patients' blood vessels. Assess cardiac physiology and calculate valve areas from blood flow velocity measurements. Operate diagnostic imaging equipment to produce contrast enhanced radiographs of hearts and cardiovascular systems. Observe ultrasound display screens and listen to signals to record vascular information such as blood pressure, limb volume changes, oxygen saturation, and cerebral circulation. Transcribe, type, and distribute reports of diagnostic procedures for interpretation by physician. Conduct electrocardiogram (EKG), phonocardiogram, echocardiogram, stress testing, or other cardiovascular tests to record patients' cardiac activities, using specialized electronic test equipment, recording devices, and laboratory instruments.

GOE—Interest Area/Cluster: 08. Health Science.
Work Group: 08.06. Medical Technology. **Other Jobs in This Work Group:** Biological Technicians; Diagnostic Medical Sonographers; Medical and Clinical Laboratory Technicians; Medical and Clinical Laboratory Technologists; Medical Equipment Preparers; Medical Records and Health Information Technicians; Nuclear Medicine Technologists; Opticians, Dispensing; Orthotists and Prosthetists; Radiologic Technicians; Radiologic Technologists; Radiologic Technologists and Technicians.

Skills: Operation Monitoring; Management of Personnel Resources; Systems Analysis; Quality Control Analysis; Management of Material Resources.

Education and Training Programs: Cardiovascular Technology/Technologist; Electrocardiograph Technology/Technician; Perfusion Technology/Perfusionist; Cardiopulmonary Technology/Technologist.

Related Knowledge/Courses: Medicine and Dentistry; Biology; Psychology; Customer and Personal Service; Sociology and Anthropology; Chemistry.

Work Environment: Indoors; radiation; disease or infections; standing; walking and running; using hands on objects, tools, or controls.

Carpenters

See Construction Carpenters (a Realistic job) and Rough Carpenters (a Realistic job), described separately.

Cartographers and Photogrammetrists

- ✿ Personality Code: RIC
 - ✿ Education/Training Required: Bachelor's degree
 - ✿ Annual Earnings: \$49,970
 - ✿ Beginning Wage: \$32,380
 - ✿ Earnings Growth Potential: Medium
 - ✿ Growth: 20.3%
 - ✿ Annual Job Openings: 2,823

 - ✿ Part-Time: 4.6%
-

Collect, analyze, and interpret geographic information provided by geodetic surveys, aerial photographs, and satellite data. Research, study, and prepare maps and other spatial data in digital or graphic form for legal, social, political, educational, and design purposes. May work with Geographic Information Systems (GIS). May design and evaluate algorithms, data structures, and user interfaces for GIS and mapping systems. Identify, scale, and orient geodetic points, elevations, and other planimetric or topographic features, applying standard mathematical formulas. Collect information about specific features of the Earth, using aerial photography and other digital remote sensing techniques. Revise existing maps and charts, making all necessary corrections and adjustments. Compile data required for map preparation, including aerial photographs, survey notes, records, reports, and original maps. Inspect final compositions to ensure completeness and accuracy. Determine map content and layout, as well as production specifications such as scale, size, projection, and colors, and direct production to ensure that specifications are followed. Examine and analyze data from ground surveys, reports, aerial photographs, and satellite images to prepare topographic maps, aerial-photograph mosaics, and related charts. Select aerial photographic and remote sensing techniques and plotting equipment needed to meet required standards of accuracy. Delineate aerial photographic detail such as control points, hydrography,

topography, and cultural features, using precision stereoplotted apparatus or drafting instruments. Build and update digital databases. Prepare and alter trace maps, charts, tables, detailed drawings, and three-dimensional optical models of terrain, using stereoscopic plotting and computer graphics equipment. Determine guidelines that specify which source material is acceptable for use. Study legal records to establish boundaries of local, national, and international properties. Travel over photographed areas to observe, identify, record, and verify all relevant features.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.09. Engineering Technology. **Other Jobs in This Work Group:**

Aerospace Engineering and Operations Technicians; Civil Engineering Technicians; Electrical and Electronic Engineering Technicians; Electrical and Electronics Drafters; Electrical Drafters; Electrical Engineering Technicians; Electro-Mechanical Technicians; Electronic Drafters; Electronics Engineering Technicians; Environmental Engineering Technicians; Mapping Technicians; Mechanical Drafters; Mechanical Engineering Technicians; Surveying and Mapping Technicians; Surveying Technicians.

Skills: Science; Technology Design; Mathematics; Active Learning; Troubleshooting; Reading Comprehension; Operation and Control; Writing.

Education and Training Programs: Surveying Technology/Surveying; Cartography. **Related Knowledge/Courses:**

Geography; Design; Engineering and Technology; Computers and Electronics; Production and Processing; Mathematics.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Cement Masons and Concrete Finishers

- ✿ Personality Code: RE
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$33,840
- ✿ Beginning Wage: \$21,980
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 11.4%
- ✿ Annual Job Openings: 34,625
- ✿ Self-Employed: 2.0%
- ✿ Part-Time: 6.0%

Smooth and finish surfaces of poured concrete, such as floors, walks, sidewalks, roads, or curbs, using a variety of hand and power tools. Align forms for sidewalks, curbs, or gutters; patch voids; and use saws to cut expansion joints. Check the forms that hold the concrete to see that they are properly constructed. Set the forms that hold concrete to the desired pitch and depth and align them. Spread, level, and smooth concrete, using rake, shovel, hand or power trowel, hand or power screed, and float. Mold expansion joints and edges, using edging tools, jointers, and straightedge. Monitor how the wind, heat, or cold affect the curing of the concrete throughout the entire process. Signal truck driver to position truck to facilitate pouring concrete and move chute to direct concrete on forms. Produce rough concrete surface, using broom. Operate power vibrator to compact concrete. Direct the casting of the concrete and supervise laborers who use shovels or special tools to spread it. Mix cement, sand, and water to produce concrete, grout, or slurry, using hoe, trowel, tamper, scraper, or concrete-mixing machine. Cut out damaged areas, drill holes for reinforcing rods, and position reinforcing rods to repair concrete, using power saw and drill. Wet surface to prepare for bonding, fill holes and cracks with grout or slurry, and smooth, using trowel. Wet concrete surface and rub with stone to smooth surface and obtain specified finish. Clean chipped area, using wire brush, and feel and observe surface to determine if it is rough

or uneven. Apply hardening and sealing compounds to cure surface of concrete and waterproof or restore surface. Chip, scrape, and grind high spots, ridges, and rough projections to finish concrete, using pneumatic chisels, power grinders, or hand tools. Spread roofing paper on surface of foundation and spread concrete onto roofing paper with trowel to form terrazzo base. Build wooden molds and clamp molds around area to be repaired, using hand tools. Sprinkle colored marble or stone chips, powdered steel, or coloring powder over surface to produce prescribed finish. Cut metal division strips and press them into terrazzo base so that top edges form desired design or pattern. Fabricate concrete beams, columns, and panels. Waterproof or restore concrete surfaces, using appropriate compounds.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Mathematics; Installation; Repairing; Equipment Maintenance; Equipment Selection; Coordination.

Education and Training Program: Concrete Finishing/Concrete Finisher. **Related Knowledge/Courses:** Building and Construction; Public Safety and Security; Mechanical Devices; Design; Engineering and Technology.

Work Environment: Outdoors; noisy; hazardous equipment; standing; using hands on objects, tools, or controls; bending or twisting the body.

Civil Drafters

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Postsecondary vocational training
- ✿ Annual Earnings: \$43,310
- ✿ Beginning Wage: \$27,680
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 6.1%
- ✿ Annual Job Openings: 16,238
- ✿ Self-Employed: 5.0%
- ✿ Part-Time: 5.9%

The job openings listed here are shared with Architectural Drafters.

Prepare drawings and topographical and relief maps used in civil engineering projects such as highways, bridges, pipelines, flood control projects, and water and sewerage control systems. Produce drawings by using computer-assisted drafting systems (CAD) or drafting machines or by hand, using compasses, dividers, protractors, triangles, and other drafting devices. Draw maps, diagrams, and profiles, using cross-sections and surveys, to represent elevations, topographical contours, subsurface formations, and structures. Draft plans and detailed drawings for structures, installations, and construction projects such as highways, sewage disposal systems, and dikes, working from sketches or notes. Determine the order of work and method of

presentation such as orthographic or isometric drawing. Finish and duplicate drawings and documentation packages according to required mediums and specifications for reproduction, using blueprinting, photography, or other duplication methods. Review rough sketches, drawings, specifications, and other engineering data received from civil engineers to ensure that they conform to design concepts. Calculate excavation tonnage and prepare graphs and fill-hauling diagrams for use in earth-moving operations. Supervise and train other technologists, technicians, and drafters. Correlate, interpret, and modify data obtained from topographical surveys, well logs, and geophysical prospecting reports. Determine quality, cost, strength, and quantity of required materials and enter figures on materials lists. Locate and identify symbols located on topographical surveys to denote geological and geophysical formations or oil field installations. Calculate weights, volumes, and stress factors and their implications for technical aspects of designs. Supervise or conduct field surveys, inspections, or technical investigations to obtain data required to revise construction drawings. Explain drawings to production or construction teams and provide adjustments as necessary. Plot characteristics of boreholes for oil and gas wells from photographic subsurface survey recordings and other data, representing depth, degree, and direction of inclination.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.03. Architecture/Construction Engineering Technologies. **Other Jobs in This Work Group:** Architectural and Civil Drafters; Architectural Drafters; Surveyors.

Skills: Programming; Systems Analysis; Mathematics; Quality Control Analysis; Systems Evaluation.

Education and Training Programs: Architectural Technology/Technician; Drafting and Design Technology/Technician, General; CAD/CADD Drafting and/or Design Technology/Technician; Architectural Drafting and Architectural CAD/CADD; Civil Drafting and Civil Engineering CAD/CADD. **Related Knowledge/Courses:** Design; Engineering and Technology; Building and Construction; Geography; Mathematics; Physics.

Work Environment: Indoors; sitting; repetitive motions.

Civil Engineering Technicians

- ⦿ Personality Code: RCI
- ⦿ Education/Training Required: Associate degree
- ⦿ Annual Earnings: \$42,580
- ⦿ Beginning Wage: \$25,390
- ⦿ Earnings Growth Potential: High
- ⦿ Growth: 10.2%
- ⦿ Annual Job Openings: 7,499
- ⦿ Self-Employed: 0.9%
- ⦿ Part-Time: 5.9%

Apply theory and principles of civil engineering in planning, designing, and overseeing construction and maintenance of structures and facilities under the direction of engineering staff or physical scientists. Calculate dimensions, square footage, profile and component specifications, and material quantities, using calculator or computer. Draft detailed dimensional drawings and design layouts for projects and to ensure conformance to specifications. Analyze proposed site factors and design maps, graphs, tracings, and diagrams to illustrate findings. Read and review project blueprints and structural specifications to determine dimensions of structure or system and material requirements. Prepare reports and document project activities and data. Confer with supervisor to determine project details such as plan preparation, acceptance testing, and evaluation of field conditions. Inspect project site and evaluate contractor work to detect design malfunctions and ensure conformance to design specifications and applicable codes. Plan and conduct field surveys to locate new sites and analyze details of project sites. Develop plans and estimate costs for installation of systems, utilization of facilities, or construction of structures. Report maintenance problems occurring at project site to supervisor and negotiate changes to resolve system conflicts. Conduct materials test and analysis, using tools and equipment and applying engineering knowledge. Respond to

public suggestions and complaints. Evaluate facility to determine suitability for occupancy and square footage availability.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.09. Engineering Technology. **Other Jobs in This Work Group:** Aerospace Engineering and Operations Technicians; Cartographers and Photogrammetrists; Electrical and Electronic Engineering Technicians; Electrical and Electronics Drafters; Electrical Drafters; Electrical Engineering Technicians; Electro-Mechanical Technicians; Electronic Drafters; Electronics Engineering Technicians; Environmental Engineering Technicians; Mapping Technicians; Mechanical Drafters; Mechanical Engineering Technicians; Surveying and Mapping Technicians; Surveying Technicians.

Skills: Mathematics; Science; Operations Analysis; Writing; Complex Problem Solving; Reading Comprehension; Technology Design; Active Learning.

Education and Training Programs: Civil Engineering Technology/Technician; Construction Engineering Technology/Technician. **Related Knowledge/Courses:** Building and Construction; Design; Engineering and Technology; Mathematics; Computers and Electronics; Transportation.

Work Environment: More often indoors than outdoors; sitting.

Civil Engineers

- ✿ Personality Code: RIC
 - ✿ Education/Training Required: Bachelor's degree
 - ✿ Annual Earnings: \$71,710
 - ✿ Beginning Wage: \$46,420
 - ✿ Earnings Growth Potential: Medium
 - ✿ Growth: 18.0%
 - ✿ Annual Job Openings: 15,979
 - ✿ Self-Employed: 4.9%
 - ✿ Part-Time: 3.2%
-

Perform engineering duties in planning, designing, and overseeing construction and maintenance of building structures and facilities such as roads, railroads, airports, bridges, harbors, channels, dams, irrigation projects, pipelines, power plants, water and sewage systems, and waste disposal units. Includes architectural, structural, traffic, ocean, and geo-technical engineers. Manage and direct staff members and the construction, operations, or maintenance activities at project site. Provide technical advice regarding design, construction, or program modifications and structural repairs to industrial and managerial personnel. Inspect project sites to monitor progress and ensure conformance to design specifications and safety or sanitation standards. Estimate quantities and cost of materials, equipment, or labor to determine project feasibility. Test soils and materials to determine the adequacy and strength of foundations, concrete, asphalt, or steel. Compute load and grade requirements, water flow rates, and material stress factors to determine design specifications. Plan and design transportation or hydraulic systems and structures, following construction and government standards and using design software and drawing tools. Analyze survey reports, maps, drawings, blueprints, aerial photography, and other topographical or geologic data to plan projects. Prepare or present public reports on topics such as bid proposals, deeds, environmental impact statements, or property and right-of-way descriptions. Direct or participate in surveying to lay out installations and establish reference points, grades, and elevations to guide construction. Conduct studies of traffic patterns or environmental conditions to identify engineering problems and assess the potential impact of projects.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering. **Other Jobs in This Work Group:** Aerospace Engineers; Biomedical Engineers; Chemical Engineers; Computer Hardware Engineers; Electrical Engineers; Electronics Engineers, Except Computer; Marine Architects; Marine Engineers; Marine Engineers and

Naval Architects; Materials Engineers; Mechanical Engineers; Nuclear Engineers.

Skills: Management of Personnel Resources; Systems Analysis; Systems Evaluation; Management of Material Resources; Management of Financial Resources; Operation Monitoring; Negotiation; Complex Problem Solving.

Education and Training Programs: Civil Engineering, General; Transportation and Highway Engineering; Water Resources Engineering; Civil Engineering, Other. **Related Knowledge/Courses:** Engineering and Technology; Design; Building and Construction; Physics; Transportation; Geography.

Work Environment: More often outdoors than indoors; very hot or cold; contaminants; hazardous equipment; sitting.

Computer Support Specialists

- ⦿ Personality Code: RIC
- ⦿ Education/Training Required: Associate degree
- ⦿ Annual Earnings: \$42,400
- ⦿ Beginning Wage: \$25,950
- ⦿ Earnings Growth Potential: Medium
- ⦿ Growth: 12.9%
- ⦿ Annual Job Openings: 97,334
- ⦿ Self-Employed: 1.3%
- ⦿ Part-Time: 6.9%

Provide technical assistance to computer system users. Answer questions or resolve computer problems for clients in person, via telephone, or from remote locations. May provide assistance concerning the use of computer hardware and software, including printing, installation, word processing, e-mail, and operating systems. Oversee the daily performance of computer systems. Answer user inquiries regarding computer software or hardware operation to resolve problems. Enter commands and observe system functioning to verify correct operations and detect errors. Set up equipment

for employee use, performing or ensuring proper installation of cables, operating systems, or appropriate software. Install and perform minor repairs to hardware, software, or peripheral equipment, following design or installation specifications. Maintain records of daily data communication transactions, problems and remedial actions taken, or installation activities. Read technical manuals, confer with users, or conduct computer diagnostics to investigate and resolve problems or to provide technical assistance and support. Refer major hardware or software problems or defective products to vendors or technicians for service. Develop training materials and procedures or train users in the proper use of hardware or software. Confer with staff, users, and management to establish requirements for new systems or modifications. Prepare evaluations of software or hardware and recommend improvements or upgrades. Read trade magazines and technical manuals or attend conferences and seminars to maintain knowledge of hardware and software. Hire, supervise, and direct workers engaged in special project work, problem solving, monitoring, and installing data communication equipment and software. Inspect equipment and read order sheets to prepare for delivery to users. Modify and customize commercial programs for internal needs. Conduct office automation feasibility studies, including workflow analysis, space design, or cost comparison analysis.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Information Technology Specialties. **Other Jobs in This Work Group:** Computer and Information Scientists, Research; Computer Operators; Computer Programmers; Computer Security Specialists; Computer Software Engineers, Applications; Computer Software Engineers, Systems Software; Computer Systems Analysts; Computer Systems Engineers/Architects; Database Administrators; Network Designers; Network Systems and Data Communications Analysts; Software Quality Assurance Engineers and Testers; Web Administrators; Web Developers.

Skills: Programming; Installation; Systems Analysis; Operation Monitoring; Repairing;

Systems Evaluation; Troubleshooting; Operation and Control.

Education and Training Programs: Agricultural Business Technology; Data Processing and Data Processing Technology/Technician; Computer Hardware Technology/Technician; Computer Software Technology/Technician; Accounting and Computer Science; Medical Office Computer Specialist/Assistant. **Related Knowledge/Courses:** Computers and Electronics; Telecommunications; Engineering and Technology; Clerical Practices; Customer and Personal Service; Communications and Media.

Work Environment: Indoors; noisy; sitting; repetitive motions.

Construction and Building Inspectors

- ⌘ Personality Code: RCI
- ⌘ Education/Training Required: Work experience in a related occupation
- ⌘ Annual Earnings: \$48,330
- ⌘ Beginning Wage: \$30,450
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 18.2%
- ⌘ Annual Job Openings: 12,606
- ⌘ Self-Employed: 9.4%
- ⌘ Part-Time: 4.6%

Inspect structures using engineering skills to determine structural soundness and compliance with specifications, building codes, and other regulations. Inspections may be general in nature or may be limited to a specific area, such as electrical systems or plumbing. Issue violation notices and stop-work orders, conferring with owners, violators, and authorities to explain regulations and recommend rectifications. Inspect bridges, dams, highways, buildings, wiring, plumbing, electrical circuits, sewers, heating systems, and foundations during and after construction for structural quality, general safety, and conformance to specifications and codes. Approve and sign plans that meet required

specifications. Review and interpret plans, blueprints, site layouts, specifications, and construction methods to ensure compliance to legal requirements and safety regulations. Monitor installation of plumbing, wiring, equipment, and appliances to ensure that installation is performed properly and is in compliance with applicable regulations. Inspect and monitor construction sites to ensure adherence to safety standards, building codes, and specifications. Measure dimensions and verify level, alignment, and elevation of structures and fixtures to ensure compliance to building plans and codes. Maintain daily logs and supplement inspection records with photographs. Use survey instruments, metering devices, tape measures, and test equipment such as concrete strength measurers to perform inspections. Train, direct, and supervise other construction inspectors. Issue permits for construction, relocation, demolition, and occupancy. Examine lifting and conveying devices such as elevators, escalators, moving sidewalks, lifts and hoists, inclined railways, ski lifts, and amusement rides to ensure safety and proper functioning. Compute estimates of work completed or of needed renovations or upgrades and approve payment for contractors. Evaluate premises for cleanliness, including proper garbage disposal and lack of vermin infestation.

GOE—Interest Area/Cluster: 07. Government and Public Administration. **Work Group:** 07.03. Regulations Enforcement. **Other Jobs in This Work Group:** Agricultural Inspectors; Aviation Inspectors; Compliance Officers, Except Agriculture, Construction, Health and Safety, and Transportation; Environmental Compliance Inspectors; Equal Opportunity Representatives and Officers; Financial Examiners; Fire Inspectors; Fish and Game Wardens; Forest Fire Inspectors and Prevention Specialists; Freight and Cargo Inspectors; Government Property Inspectors and Investigators; Immigration and Customs Inspectors; Licensing Examiners and Inspectors; Nuclear Monitoring Technicians; Occupational Health and Safety Specialists; Occupational Health and Safety Technicians; Tax Examiners, Collectors, and Revenue Agents; Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation.

Skills: Quality Control Analysis; Systems Analysis; Systems Evaluation; Management of Personnel Resources; Operation Monitoring.

Education and Training Program: Building/Home/Construction Inspection/Inspector. **Related Knowledge/Courses:** Building and Construction; Engineering and Technology; Design; Physics; Public Safety and Security; Mechanical Devices.

Work Environment: More often outdoors than indoors; noisy; contaminants; hazardous equipment; standing.

Construction Carpenters

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$37,660
- ✿ Beginning Wage: \$23,370
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 10.3%
- ✿ Annual Job Openings: 223,225
- ✿ Self-Employed: 31.8%
- ✿ Part-Time: 6.1%

The job openings listed here are shared with Rough Carpenters.

Construct, erect, install, and repair structures and fixtures of wood, plywood, and wallboard, using carpenter's hand tools and power tools. Measure and mark cutting lines on materials, using ruler, pencil, chalk, and marking gauge. Follow established safety rules and regulations and maintain a safe and clean environment. Verify trueness of structure, using plumb bob and level. Shape or cut materials to specified measurements, using hand tools, machines, or power saw. Study specifications in blueprints, sketches, or building plans to prepare project layout and determine dimensions and materials required. Assemble and fasten materials to make framework or props, using hand tools and wood screws, nails, dowel pins, or glue. Build or repair cabinets, doors,

frameworks, floors, and other wooden fixtures used in buildings, using woodworking machines, carpenter's hand tools, and power tools. Erect scaffolding and ladders for assembling structures above ground level. Remove damaged or defective parts or sections of structures and repair or replace, using hand tools. Install structures and fixtures, such as windows, frames, floorings, and trim, or hardware, using carpenter's hand and power tools. Select and order lumber and other required materials. Maintain records, document actions, and present written progress reports. Finish surfaces of woodwork or wallboard in houses and buildings, using paint, hand tools, and paneling. Prepare cost estimates for clients or employers. Arrange for subcontractors to deal with special areas such as heating and electrical wiring work. Inspect ceiling or floor tile, wall coverings, siding, glass, or woodwork to detect broken or damaged structures. Work with or remove hazardous material. Construct forms and chutes for pouring concrete. Cover subfloors with building paper to keep out moisture and lay hardwood, parquet, and wood-strip-block floors by nailing floors to subfloor or cementing them to mastic or asphalt base. Fill cracks and other defects in plaster or plasterboard and sand patch, using patching plaster, trowel, and sanding tool. Perform minor plumbing, welding, or concrete mixing work. Apply shock-absorbing, sound-deadening, and decorative paneling to ceilings and walls.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators;

Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmakers; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Management of Personnel Resources; Management of Material Resources; Management of Financial Resources; Repairing; Equipment Maintenance; Quality Control Analysis; Installation; Mathematics.

Education and Training Program: Carpentry/Carpenter. **Related Knowledge/Courses:** Building and Construction; Mechanical Devices; Design; Engineering and Technology; Production and Processing; Public Safety and Security.

Work Environment: Outdoors; noisy; hazardous equipment; standing; walking and running; using hands on objects, tools, or controls.

Correctional Officers and Jailers

- ✿ Personality Code: REC
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$36,970
- ✿ Beginning Wage: \$24,820
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 16.9%
- ✿ Annual Job Openings: 56,579
- ✿ Self-Employed: 0.0%
- ✿ Part-Time: 1.8%

Guard inmates in penal or rehabilitative institution in accordance with established regulations and procedures. May guard prisoners in transit

between jail, courtroom, prison, or other point. Includes deputy sheriffs and police who spend the majority of their time guarding prisoners in correctional institutions. Conduct head counts to ensure that each prisoner is present. Monitor conduct of prisoners in housing unit or during work or recreational activities according to established policies, regulations, and procedures to prevent escape or violence. Inspect conditions of locks, window bars, grills, doors, and gates at correctional facilities to ensure security and help prevent escapes. Record information such as prisoner identification, charges, and incidences of inmate disturbance and keep daily logs of prisoner activities. Search prisoners and vehicles and conduct shakedowns of cells for valuables and contraband, such as weapons or drugs. Use weapons, handcuffs, and physical force to maintain discipline and order among prisoners. Guard facility entrances to screen visitors. Inspect mail for the presence of contraband. Maintain records of prisoners' identification and charges. Process or book convicted individuals into prison. Settle disputes between inmates. Conduct fire, safety, and sanitation inspections. Provide to supervisors oral and written reports of the quality and quantity of work performed by inmates, inmate disturbances and rule violations, and unusual occurrences. Participate in required job training. Take prisoners into custody and escort to locations within and outside of facility, such as visiting room, courtroom, or airport. Serve meals, distribute commissary items, and dispense prescribed medication to prisoners. Counsel inmates and respond to legitimate questions, concerns, and requests. Drive passenger vehicles and trucks used to transport inmates to other institutions, courtrooms, hospitals, and work sites. Use nondisciplinary tools and equipment such as a computer. Assign duties to inmates, providing instructions as needed. Investigate crimes that have occurred within an institution or assist police in their investigations of crimes and inmates. Issue clothing, tools, and other authorized items to inmates. Arrange daily schedules for prisoners, including library visits, work assignments, family visits, and counseling appointments. Search for and recapture escapees.

GOE—Interest Area/Cluster: 12. Law and Public Safety. **Work Group:** 12.04. Law Enforcement and Public Safety. **Other Jobs in This Work Group:** Bailiffs; Criminal Investigators and Special Agents; Detectives and Criminal Investigators; Fire Investigators; Forensic Science Technicians; Parking Enforcement Workers; Police and Sheriff's Patrol Officers; Police Detectives; Police Identification and Records Officers; Police Patrol Officers; Sheriffs and Deputy Sheriffs; Transit and Railroad Police.

Skills: None met the criteria.

Education and Training Programs: Corrections; Juvenile Corrections; Corrections and Criminal Justice, Other. **Related Knowledge/Courses:** Public Safety and Security; Psychology; Therapy and Counseling; Law and Government; Medicine and Dentistry; Sociology and Anthropology.

Work Environment: More often indoors than outdoors; noisy; contaminants; disease or infections; standing.

Drywall and Ceiling Tile Installers

- ✿ Personality Code: RC
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$36,520
- ✿ Beginning Wage: \$23,480
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 7.3%
- ✿ Annual Job Openings: 30,945
- ✿ Self-Employed: 23.0%
- ✿ Part-Time: 6.1%

Apply plasterboard or other wallboard to ceilings or interior walls of buildings. Apply or mount acoustical tiles or blocks, strips, or sheets of shock-absorbing materials to ceilings and walls of buildings to reduce or reflect sound. Materials may be of decorative quality. Includes lathers who fasten wooden, metal, or rockboard lath to walls, ceilings, or partitions of buildings to provide support

base for plaster, fireproofing, or acoustical material. Inspect furlings, mechanical mountings, and masonry surface for plumbness and level, using spirit or water levels. Install metal lath where plaster applications will be exposed to weather or water or for curved or irregular surfaces. Install blanket insulation between studs and tack plastic moisture barriers over insulation. Coordinate work with drywall finishers who cover the seams between drywall panels. Trim rough edges from wallboard to maintain even joints, using knives. Seal joints between ceiling tiles and walls. Scribe and cut edges of tile to fit walls where wall molding is not specified. Read blueprints and other specifications to determine methods of installation, work procedures, and material and tool requirements. Nail channels or wood furring strips to surfaces to provide mounting for tile. Mount tile by using adhesives or by nailing, screwing, stapling, or wire-tying lath directly to structural frameworks. Measure and mark surfaces to lay out work according to blueprints and drawings, using tape measures, straightedges or squares, and marking devices. Hang drywall panels on metal frameworks of walls and ceilings in offices, schools, and other large buildings, using lifts or hoists to adjust panel heights when necessary. Install horizontal and vertical metal or wooden studs to frames so that wallboard can be attached to interior walls. Fasten metal or rockboard lath to the structural framework of walls, ceilings, and partitions of buildings, using nails, screws, staples, or wire-ties. Apply or mount acoustical tile or blocks, strips, or sheets of shock-absorbing materials to ceilings and walls of buildings to reduce reflection of sound or to decorate rooms. Apply cement to backs of tiles and press tiles into place, aligning them with layout marks or joints of previously laid tile. Hang dry lines (stretched string) to wall moldings in order to guide positioning of main runners. Assemble and install metal framing and decorative trim for windows, doorways, and vents. Fit and fasten wallboard or drywall into position on wood or metal frameworks, using glue, nails, or screws.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:**

Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhanglers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Installation; Management of Personnel Resources; Management of Material Resources; Management of Financial Resources; Mathematics; Repairing; Science; Equipment Selection.

Education and Training Program: Drywall Installation/Drywaller. **Related Knowledge/Courses:** Building and Construction; Design; Mechanical Devices; Mathematics; Production and Processing; Public Safety and Security.

Work Environment: Indoors; contaminants; hazardous equipment; minor burns, cuts, bites, or stings; standing; using hands on objects, tools, or controls.

Electrical and Electronic Engineering Technicians

See Electrical Engineering Technicians (a Realistic job) and Electronics Engineering Technicians (a Realistic job), described separately.

Electrical Engineering Technicians

- ✿ Personality Code: RIC
 - ✿ Education/Training Required: Associate degree
 - ✿ Annual Earnings: \$52,140
 - ✿ Beginning Wage: \$31,310
 - ✿ Earnings Growth Potential: High
 - ✿ Growth: 3.6%
 - ✿ Annual Job Openings: 12,583
 - ✿ Self-Employed: 0.9%
 - ✿ Part-Time: 5.9%
-

The job openings listed here are shared with Electronics Engineering Technicians.

Apply electrical theory and related knowledge to test and modify developmental or operational electrical machinery and electrical control equipment and circuitry in industrial or commercial plants and laboratories. Usually work under direction of engineering staff. Assemble electrical and electronic systems and prototypes according to engineering data and knowledge of electrical principles, using hand tools and measuring instruments. Provide technical assistance and resolution when electrical or engineering problems are encountered before, during, and after construction. Install and maintain electrical control systems and solid state equipment. Modify electrical prototypes, parts, assemblies, and systems to correct functional deviations. Set up and operate test equipment to evaluate performance of developmental parts, assemblies, or systems under simulated operating conditions and record results. Collaborate with electrical engineers and other personnel to identify, define, and solve developmental problems.

Build, calibrate, maintain, troubleshoot, and repair electrical instruments or testing equipment. Analyze and interpret test information to resolve design-related problems. Write commissioning procedures for electrical installations. Prepare project cost and work-time estimates. Evaluate engineering proposals, shop drawings, and design comments for sound electrical engineering practice and conformance with established safety and design criteria and recommend approval or disapproval. Draw or modify diagrams and write engineering specifications to clarify design details and functional criteria of experimental electronics units. Conduct inspections for quality control and assurance programs, reporting findings and recommendations. Prepare contracts and initiate, review, and coordinate modifications to contract specifications and plans throughout the construction process. Plan, schedule, and monitor work of support personnel to assist supervisor. Review existing electrical engineering criteria to identify necessary revisions, deletions, or amendments to outdated material. Perform supervisory duties such as recommending work assignments, approving leaves, and completing performance evaluations. Plan method and sequence of operations for developing and testing experimental electronic and electrical equipment. Visit construction sites to observe conditions impacting design and to identify solutions to technical design problems involving electrical systems equipment that arise during construction.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.09. Engineering Technology. **Other Jobs in This Work Group:** Aerospace Engineering and Operations Technicians; Cartographers and Photogrammetrists; Civil Engineering Technicians; Electrical and Electronic Engineering Technicians; Electrical and Electronics Drafters; Electrical Drafters; Electro-Mechanical Technicians; Electronic Drafters; Electronics Engineering Technicians; Environmental Engineering Technicians; Mapping Technicians; Mechanical Drafters; Mechanical Engineering Technicians; Surveying and Mapping Technicians; Surveying Technicians.

Skills: Repairing; Installation; Troubleshooting; Science; Operations Analysis; Technology Design; Mathematics; Equipment Maintenance.

Education and Training Programs: Electrical, Electronic, and Communications Engineering Technology/Technician; Telecommunications Technology/Technician; Electrical and Electronic Engineering Technologies/Technicians, Other; Computer Engineering Technology/Technician; Computer Technology/Computer Systems Technology. **Related Knowledge/Courses:** Engineering and Technology; Design; Computers and Electronics; Physics; Mechanical Devices; Telecommunications.

Work Environment: Indoors; noisy; sitting; using hands on objects, tools, or controls.

Electrical Power-Line Installers and Repairers

- ✿ Personality Code: RIC
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$52,570
- ✿ Beginning Wage: \$29,780
- ✿ Earnings Growth Potential: High
- ✿ Growth: 7.2%
- ✿ Annual Job Openings: 6,401
- ✿ Self-Employed: 0.6%
- ✿ Part-Time: 1.3%

Install or repair cables or wires used in electrical power or distribution systems. May erect poles and light- or heavy-duty transmission towers. Adhere to safety practices and procedures, such as checking equipment regularly and erecting barriers around work areas. Open switches or attach grounding devices to remove electrical hazards from disturbed or fallen lines or to facilitate repairs. Climb poles or use truck-mounted buckets to access equipment. Place insulating or fireproofing materials over conductors and joints. Install, maintain, and repair electrical distribution and transmission systems, including conduits; cables; wires; and related

equipment such as transformers, circuit breakers, and switches. Identify defective sectionalizing devices, circuit breakers, fuses, voltage regulators, transformers, switches, relays, or wiring, using wiring diagrams and electrical-testing instruments. Drive vehicles equipped with tools and materials to job sites. Coordinate work assignment preparation and completion with other workers. String wire conductors and cables between poles, towers, trenches, pylons, and buildings, setting lines in place and using winches to adjust tension. Inspect and test power lines and auxiliary equipment to locate and identify problems, using reading and testing instruments. Test conductors according to electrical diagrams and specifications to identify corresponding conductors and to prevent incorrect connections. Replace damaged poles with new poles and straighten the poles. Install watt-hour meters and connect service drops between power lines and consumers' facilities. Attach crossarms, insulators, and auxiliary equipment to poles prior to installing them. Travel in trucks, helicopters, and airplanes to inspect lines for freedom from obstruction and adequacy of insulation. Dig holes, using augers, and set poles, using cranes and power equipment. Trim trees that could be hazardous to the functioning of cables or wires. Splice or solder cables together or to overhead transmission lines, customer service lines, or street light lines, using hand tools, epoxies, or specialized equipment. Cut and peel lead sheathing and insulation from defective or newly installed cables and conduits prior to splicing.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.05. Systems and Equipment Installation, Maintenance, and Repair. **Other Jobs in This Work Group:** Electrical and Electronics Repairers, Powerhouse, Substation, and Relay; Elevator Installers and Repairers; Heating and Air Conditioning Mechanics and Installers; Maintenance and Repair Workers, General; Refrigeration Mechanics and Installers; Telecommunications Equipment Installers and Repairers, Except Line Installers; Telecommunications Line Installers and Repairers.

Skills: Repairing; Installation; Equipment Maintenance; Operation Monitoring; Troubleshooting; Operation and Control; Equipment Selection; Technology Design.

Education and Training Programs: Electrical and Power Transmission Installation/Installer, General; Lineworker; Electrical and Power Transmission Installers, Other. **Related Knowledge/Courses:** Building and Construction; Mechanical Devices; Customer and Personal Service; Engineering and Technology; Transportation; Design.

Work Environment: Outdoors; very hot or cold; high places; hazardous conditions; hazardous equipment; using hands on objects, tools, or controls.

Electricians

- ✿ Personality Code: RIC
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$44,780
- ✿ Beginning Wage: \$27,330
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 7.4%
- ✿ Annual Job Openings: 79,083
- ✿ Self-Employed: 10.7%
- ✿ Part-Time: 2.3%

Install, maintain, and repair electrical wiring, equipment, and fixtures. Ensure that work is in accordance with relevant codes. May install or service street lights, intercom systems, or electrical control systems. Maintain current electrician's license or identification card to meet governmental regulations. Connect wires to circuit breakers, transformers, or other components. Repair or replace wiring, equipment, and fixtures, using hand tools and power tools. Assemble, install, test, and maintain electrical or electronic wiring, equipment, appliances, apparatus, and fixtures, using hand tools and power tools. Test electrical systems and continuity of circuits in electrical wiring, equipment, and fixtures, using testing devices such as ohmmeters, voltmeters,

and oscilloscopes, to ensure compatibility and safety of system. Use a variety of tools and equipment such as power construction equipment, measuring devices, power tools, and testing equipment, including oscilloscopes, ammeters, and test lamps. Plan layout and installation of electrical wiring, equipment, and fixtures based on job specifications and local codes. Inspect electrical systems, equipment, and components to identify hazards, defects, and the need for adjustment or repair and to ensure compliance with codes. Direct and train workers to install, maintain, or repair electrical wiring, equipment, and fixtures. Diagnose malfunctioning systems, apparatus, and components, using test equipment and hand tools, to locate the cause of a breakdown and correct the problem. Prepare sketches or follow blueprints to determine the location of wiring and equipment and to ensure conformance to building and safety codes. Install ground leads and connect power cables to equipment such as motors. Work from ladders, scaffolds, and roofs to install, maintain, or repair electrical wiring, equipment, and fixtures. Perform business management duties such as maintaining records and files, preparing reports, and ordering supplies and equipment. Fasten small metal or plastic boxes to walls to house electrical switches or outlets. Place conduit, pipes, or tubing inside designated partitions, walls, or other concealed areas and pull insulated wires or cables through the conduit to complete circuits between boxes. Advise management on whether continued operation of equipment could be hazardous.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and

Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Repairing; Operation Monitoring; Installation; Equipment Maintenance; Troubleshooting; Operation and Control; Quality Control Analysis.

Education and Training Program: Electrician.

Related Knowledge/Courses: Building and Construction; Mechanical Devices; Design; Physics; Telecommunications; Engineering and Technology.

Work Environment: Outdoors; noisy; minor burns, cuts, bites, or stings; standing; walking and running; using hands on objects, tools, or controls.

Electronics Engineering Technicians

- Personality Code: RI
- Education/Training Required: Associate degree
- Annual Earnings: \$52,140
- Beginning Wage: \$31,310
- Earnings Growth Potential: High
- Growth: 3.6%
- Annual Job Openings: 12,583
- Self-Employed: 0.9%
- Part-Time: 5.9%

The job openings listed here are shared with Electrical Engineering Technicians.

Lay out, build, test, troubleshoot, repair, and modify developmental and production electronic components, parts, equipment, and systems, such as computer equipment, missile control instrumentation, electron tubes, test equipment, and machine tool numerical controls, applying principles and theories of electronics, electrical circuitry, engineering mathematics, electronic and electrical testing, and physics. Usually work under direction of engineering staff. Read blueprints, wiring diagrams, schematic drawings, and engineering instructions for assembling electronics units, applying knowledge of electronic theory and components. Test electronics units, using standard test equipment, and analyze results to evaluate performance and determine need for adjustment. Perform preventative maintenance and calibration of equipment and systems. Assemble, test, and maintain circuitry or electronic components according to engineering instructions, technical manuals, and knowledge of electronics, using hand and power tools. Adjust and replace defective or improperly functioning circuitry and electronics components, using hand tools and soldering iron. Write reports and record data on testing techniques, laboratory equipment, and specifications to assist engineers. Identify and resolve equipment malfunctions, working with manufacturers and field representatives as necessary to procure replacement parts. Provide user applications and engineering support and recommendations for new and existing equipment with regard to installation, upgrades, and enhancement. Maintain system logs and manuals to document testing and operation of equipment. Provide customer support and education, working with users to identify needs, determine sources of problems, and provide information on product use. Maintain working knowledge of state-of-the-art tools or software by reading or by attending conferences, workshops, or other training. Build prototypes from rough sketches or plans. Design basic circuitry and draft sketches for clarification of details and design documentation under engineers' direction, using drafting instruments and computer-aided design (CAD) equipment. Procure parts and maintain inventory and related documentation.

Research equipment and component needs, sources, competitive prices, delivery times, and ongoing operational costs. Write computer or microprocessor software programs. Fabricate parts such as coils, terminal boards, and chassis, using bench lathes, drills, or other machine tools. Develop and upgrade preventative maintenance procedures for components, equipment, parts, and systems.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.09. Engineering Technology.

Other Jobs in This Work Group: Aerospace Engineering and Operations Technicians; Cartographers and Photogrammetrists; Civil Engineering Technicians; Electrical and Electronic Engineering Technicians; Electrical and Electronics Drafters; Electrical Drafters; Electrical Engineering Technicians; Electro-Mechanical Technicians; Electronic Drafters; Environmental Engineering Technicians; Mapping Technicians; Mechanical Drafters; Mechanical Engineering Technicians; Surveying and Mapping Technicians; Surveying Technicians.

Skills: Repairing; Troubleshooting; Operation Monitoring; Equipment Maintenance; Systems Analysis; Quality Control Analysis; Systems Evaluation; Operation and Control.

Education and Training Programs: Electrical, Electronic, and Communications Engineering Technology/Technician; Telecommunications Technology/Technician; Electrical and Electronic Engineering Technologies/Technicians, Other; Computer Engineering Technology/Technician.

Related Knowledge/Courses: Telecommunications; Engineering and Technology; Design; Mechanical Devices; Computers and Electronics; Physics.

Work Environment: Indoors; contaminants; hazardous conditions; hazardous equipment; sitting; using hands on objects, tools, or controls.

Fire Fighters

See Forest Fire Fighters (a Realistic job) and Municipal Fire Fighters (a Realistic job), described separately.

Forest Fire Fighters

- ✿ Personality Code: RS
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$43,170
- ✿ Beginning Wage: \$21,530
- ✿ Earnings Growth Potential: Very high
- ✿ Growth: 12.1%
- ✿ Annual Job Openings: 18,887
- ✿ Self-Employed: 0.0%
- ✿ Part-Time: 1.3%

The job openings listed here are shared with Municipal Fire Fighters.

Control and suppress fires in forests or vacant public land. Maintain contact with fire dispatchers at all times to notify them of the need for additional firefighters and supplies or to detail any difficulties encountered. Rescue fire victims and administer emergency medical aid. Collaborate with other firefighters as a member of a firefighting crew. Patrol burned areas after fires to locate and eliminate hot spots that may restart fires. Extinguish flames and embers to suppress fires, using shovels or engine- or hand-driven water or chemical pumps. Fell trees, cut and clear brush, and dig trenches to create fire-lines, using axes, chain saws, or shovels. Maintain knowledge of current firefighting practices by participating in drills and by attending seminars, conventions, and conferences. Operate pumps connected to high-pressure hoses. Participate in physical training to maintain high levels of physical fitness. Establish water supplies, connect hoses, and direct water onto fires. Maintain fire equipment and firehouse living quarters. Inform and educate the public about fire prevention. Take action to contain any hazardous chemicals that could catch fire, leak, or spill. Organize fire caches, positioning equipment for the most effective response. Transport personnel and cargo to and from fire areas. Participate in fire prevention and inspection programs. Perform forest maintenance and improvement tasks such as cutting brush,

planting trees, building trails, and marking timber. Test and maintain tools, equipment, jump gear, and parachutes to ensure readiness for fire-suppression activities. Observe forest areas from fire lookout towers to spot potential problems. Orient self in relation to fire, using compass and map, and collect supplies and equipment dropped by parachute. Serve as fully trained lead helicopter crewmember and as helispot manager. Drop weighted paper streamers from aircraft to determine the speed and direction of the wind at fire sites.

GOE—Interest Area/Cluster: 12. Law and Public Safety. **Work Group:** 12.06. Emergency Responding. **Other Jobs in This Work Group:** Emergency Medical Technicians and Paramedics; Fire Fighters; Municipal Fire Fighters.

Skills: Repairing; Equipment Maintenance; Management of Personnel Resources; Operation Monitoring; Equipment Selection; Operation and Control; Systems Analysis; Operations Analysis.

Education and Training Programs: Fire Science/Firefighting; Fire Protection, Other. **Related Knowledge/Courses:** Geography; Customer and Personal Service; Mechanical Devices; Public Safety and Security; Education and Training; Psychology.

Work Environment: Outdoors; very hot or cold; contaminants; hazardous conditions; minor burns, cuts, bites, or stings; using hands on objects, tools, or controls.

Freight and Cargo Inspectors

- ✿ Personality Code: RC
- ✿ Education/Training Required: Work experience in a related occupation
- ✿ Annual Earnings: \$51,440
- ✿ Beginning Wage: \$27,340
- ✿ Earnings Growth Potential: High
- ✿ Growth: 16.4%
- ✿ Annual Job Openings: 2,122
- ✿ Self-Employed: 5.9%
- ✿ Part-Time: 3.7%

The job openings listed here are shared with Aviation Inspectors and with Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation.

Inspect the handling, storage, and stowing of freight and cargoes. Prepare and submit reports after completion of freight shipments. Inspect shipments to ensure that freight is securely braced and blocked. Record details about freight conditions, handling of freight, and any problems encountered. Advise crews in techniques of stowing dangerous and heavy cargo. Observe loading of freight to ensure that crews comply with procedures. Recommend remedial procedures to correct any violations found during inspections. Inspect loaded cargo, cargo lashed to decks or in storage facilities, and cargo handling devices to determine compliance with health and safety regulations and need for maintenance. Measure ships' holds and depths of fuel and water in tanks, using sounding lines and tape measures. Notify workers of any special treatment required for shipments. Direct crews to reload freight or to insert additional bracing or packing as necessary. Check temperatures and humidities of shipping and storage areas to ensure that they are at appropriate levels to protect cargo. Determine cargo transportation capabilities by reading documents that set forth cargo loading and securing procedures, capacities, and stability factors. Read draft markings to determine depths of vessels in water. Issue certificates of compliance for vessels without violations. Write certificates of admeasurement that list details such as designs, lengths, depths, and breadths of vessels, and methods of propulsion. Calculate gross and net tonnage, hold capacities, volumes of stored fuel and water, cargo weights, and ship stability factors, using mathematical formulas. Post warning signs on vehicles containing explosives or flammable or radioactive materials. Measure heights and widths of loads to ensure they will pass over bridges or through tunnels on scheduled routes. Time rolls of ships, using stopwatches. Determine types of licenses and safety equipment required, and compute applicable fees such as tolls and wharfage fees.

GOE—Interest Area/Cluster: 07. Government and Public Administration. **Work Group:** 07.03. Regulations Enforcement. **Other Jobs in This Work Group:** Agricultural Inspectors; Aviation Inspectors; Compliance Officers, Except Agriculture, Construction, Health and Safety, and Transportation; Construction and Building Inspectors; Environmental Compliance Inspectors; Equal Opportunity Representatives and Officers; Financial Examiners; Fire Inspectors; Fish and Game Wardens; Forest Fire Inspectors and Prevention Specialists; Government Property Inspectors and Investigators; Immigration and Customs Inspectors; Licensing Examiners and Inspectors; Nuclear Monitoring Technicians; Occupational Health and Safety Specialists; Occupational Health and Safety Technicians; Tax Examiners, Collectors, and Revenue Agents; Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation.

Skills: Operation Monitoring; Quality Control Analysis; Science; Mathematics; Writing; Service Orientation; Equipment Selection; Troubleshooting.

Education and Training Programs: No related CIP programs; this job is learned through work experience in a related occupation. **Related Knowledge/Courses:** Transportation; Engineering and Technology; Public Safety and Security; Physics; Geography; Mechanical Devices.

Work Environment: Outdoors; standing; walking and running; using hands on objects, tools, or controls.

Heating and Air Conditioning Mechanics and Installers

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$38,360
- ✿ Beginning Wage: \$24,240
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 8.7%
- ✿ Annual Job Openings: 29,719
- ✿ Self-Employed: 12.7%
- ✿ Part-Time: 3.6%

The job openings listed here are shared with Refrigeration Mechanics and Installers.

Install, service, and repair heating and air conditioning systems in residences and commercial establishments. Obtain and maintain required certifications. Comply with all applicable standards, policies, and procedures, including safety procedures and the maintenance of a clean work area. Repair or replace defective equipment, components, or wiring. Test electrical circuits and components for continuity, using electrical test equipment. Reassemble and test equipment following repairs. Inspect and test system to verify system compliance with plans and specifications and to detect and locate malfunctions. Discuss heating-cooling system malfunctions with users to isolate problems or to verify that malfunctions have been corrected. Test pipe or tubing joints and connections for leaks, using pressure gauge or soap-and-water solution. Record and report all faults, deficiencies, and other unusual occurrences, as well as the time and materials expended on work orders. Adjust system controls to setting recommended by manufacturer to balance system, using hand tools. Recommend, develop, and perform preventive and general maintenance procedures such as cleaning, power-washing, and vacuuming equipment; oiling parts; and changing filters. Lay out and connect electrical wiring between controls and equipment

according to wiring diagram, using electrician's hand tools. Install auxiliary components to heating-cooling equipment, such as expansion and discharge valves, air ducts, pipes, blowers, dampers, flues, and stokers, following blueprints. Assist with other work in coordination with repair and maintenance teams. Install, connect, and adjust thermostats, humidistats, and timers, using hand tools. Generate work orders that address deficiencies in need of correction. Join pipes or tubing to equipment and to fuel, water, or refrigerant source to form complete circuit. Assemble, position, and mount heating or cooling equipment, following blueprints. Study blueprints, design specifications, and manufacturers' recommendations to ascertain the configuration of heating or cooling equipment components and to ensure the proper installation of components. Cut and drill holes in floors, walls, and roof to install equipment, using power saws and drills.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.05. Systems and Equipment Installation, Maintenance, and Repair.

Other Jobs in This Work Group: Electrical and Electronics Repairers, Powerhouse, Substation, and Relay; Electrical Power-Line Installers and Repairers; Elevator Installers and Repairers; Maintenance and Repair Workers, General; Refrigeration Mechanics and Installers; Telecommunications Equipment Installers and Repairers, Except Line Installers; Telecommunications Line Installers and Repairers.

Skills: Repairing; Installation; Equipment Maintenance; Troubleshooting; Systems Evaluation; Science; Systems Analysis; Coordination.

Education and Training Programs: Heating, Air Conditioning, and Refrigeration Technology/Technician (ACH/ACR/ACHR/HRAC/HVAC); Solar Energy Technology/Technician; Heating, Air Conditioning, Ventilation, and Refrigeration Maintenance Technology/Technician. **Related Knowledge/Courses:** Mechanical Devices; Building and Construction; Design; Physics; Engineering and Technology; Sales and Marketing.

Work Environment: Outdoors; very hot or cold; contaminants; hazardous conditions; minor burns, cuts, bites, or stings; using hands on objects, tools, or controls.

Heating, Air Conditioning, and Refrigeration Mechanics and Installers

See Heating and Air Conditioning Mechanics and Installers (a Realistic job) and Refrigeration Mechanics and Installers (a Realistic job), described separately.

Industrial Machinery Mechanics

- ✿ Personality Code: RIC
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$42,350
- ✿ Beginning Wage: \$27,650
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 9.0%
- ✿ Annual Job Openings: 23,361
- ✿ Self-Employed: 2.5%
- ✿ Part-Time: 1.7%

Repair, install, adjust, or maintain industrial production and processing machinery or refinery and pipeline distribution systems. Disassemble machinery and equipment to remove parts and make repairs. Repair and replace broken or malfunctioning components of machinery and equipment. Repair and maintain the operating condition of industrial production and processing machinery and equipment. Examine parts for defects such as breakage and excessive wear. Reassemble equipment after completion of inspections, testing, or repairs. Observe and test the operation of machinery and equipment to diagnose malfunctions, using voltmeters and other testing devices. Operate newly repaired machinery and equipment to verify the adequacy of repairs. Clean, lubricate, and adjust parts, equipment, and

machinery. Analyze test results, machine error messages, and information obtained from operators to diagnose equipment problems. Record repairs and maintenance performed. Study blueprints and manufacturers' manuals to determine correct installation and operation of machinery. Record parts and materials used, ordering or requisitioning new parts and materials as necessary. Cut and weld metal to repair broken metal parts, fabricate new parts, and assemble new equipment. Demonstrate equipment functions and features to machine operators. Enter codes and instructions to program computer-controlled machinery.

GOE—Interest Area/Cluster: 13. Manufacturing.

Work Group: 13.13. Machinery Repair. **Other Jobs in This Work Group:** Bicycle Repairers; Control and Valve Installers and Repairers, Except Mechanical Door; Home Appliance Repairers; Locksmiths and Safe Repairers; Maintenance Workers, Machinery; Mechanical Door Repairers; Millwrights; Signal and Track Switch Repairers.

Skills: Installation; Repairing; Equipment Maintenance; Operation Monitoring; Troubleshooting; Technology Design; Equipment Selection; Operation and Control.

Education and Training Programs: Industrial Mechanics and Maintenance Technology; Heavy/Industrial Equipment Maintenance Technologies, Other. **Related Knowledge/Courses:** Mechanical Devices; Engineering and Technology; Building and Construction; Design; Chemistry; Physics.

Work Environment: Noisy; contaminants; hazardous conditions; hazardous equipment; standing; using hands on objects, tools, or controls.

Maintenance and Repair Workers, General

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$32,570
- ✿ Beginning Wage: \$19,590
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 10.1%
- ✿ Annual Job Openings: 165,502
- ✿ Self-Employed: 1.5%
- ✿ Part-Time: 5.2%

Perform work involving the skills of two or more maintenance or craft occupations to keep machines, mechanical equipment, or the structure of an establishment in repair. Duties may involve pipe fitting; boiler making; insulating; welding; machining; carpentry; repairing electrical or mechanical equipment; installing, aligning, and balancing new equipment; and repairing buildings, floors, or stairs. Repair or replace defective equipment parts, using hand tools and power tools, and reassemble equipment. Perform routine preventive maintenance to ensure that machines continue to run smoothly, building systems operate efficiently, and the physical condition of buildings does not deteriorate. Inspect drives, motors, and belts; check fluid levels; replace filters; and perform other maintenance actions, following checklists. Use tools ranging from common hand and power tools, such as hammers, hoists, saws, drills, and wrenches, to precision measuring instruments and electrical and electronic testing devices. Assemble, install, or repair wiring, electrical and electronic components, pipe systems and plumbing, machinery, and equipment. Diagnose mechanical problems and determine how to correct them, checking blueprints, repair manuals, and parts catalogs as necessary. Inspect, operate, and test machinery and equipment to diagnose machine malfunctions. Record maintenance and repair work performed and the costs of the work. Clean and

lubricate shafts, bearings, gears, and other parts of machinery. Dismantle devices to gain access to and remove defective parts, using hoists, cranes, hand tools, and power tools. Plan and lay out repair work, using diagrams, drawings, blueprints, maintenance manuals, and schematic diagrams. Adjust functional parts of devices and control instruments, using hand tools, levels, plumb bobs, and straightedges. Order parts, supplies, and equipment from catalogs and suppliers or obtain them from storerooms. Paint and repair roofs, windows, doors, floors, woodwork, plaster, drywall, and other parts of building structures. Operate cutting torches or welding equipment to cut or join metal parts. Align and balance new equipment after installation. Inspect used parts to determine changes in dimensional requirements, using rules, calipers, micrometers, and other measuring instruments. Set up and operate machine tools to repair or fabricate machine parts, jigs and fixtures, and tools. Maintain and repair specialized equipment and machinery found in cafeterias, laundries, hospitals, stores, offices, and factories.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.05. Systems and Equipment Installation, Maintenance, and Repair.

Other Jobs in This Work Group: Electrical and Electronics Repairers, Powerhouse, Substation, and Relay; Electrical Power-Line Installers and Repairers; Elevator Installers and Repairers; Heating and Air Conditioning Mechanics and Installers; Refrigeration Mechanics and Installers; Telecommunications Equipment Installers and Repairers, Except Line Installers; Telecommunications Line Installers and Repairers.

Skills: Equipment Maintenance; Installation; Repairing; Troubleshooting; Operation Monitoring; Operation and Control; Equipment Selection; Technology Design.

Education and Training Program: Building/Construction Site Management/Manager.

Related Knowledge/Courses: Building and Construction; Mechanical Devices; Design; Physics; Engineering and Technology; Public Safety and Security.

Work Environment: Indoors; noisy; minor burns, cuts, bites, or stings; standing; walking and running; using hands on objects, tools, or controls.

Mates—Ship, Boat, and Barge

- Personality Code: ERC
- Education/Training Required: Work experience in a related occupation
- Annual Earnings: \$57,210
- Beginning Wage: \$29,530
- Earnings Growth Potential: High
- Growth: 17.9%
- Annual Job Openings: 2,665
- Self-Employed: 6.8%
- Part-Time: 4.8%

The job openings listed here are shared with Pilots, Ship, and with Ship and Boat Captains.

Supervise and coordinate activities of crew aboard ships, boats, barges, or dredges. Determine geographical position of ship, using lorans, azimuths of celestial bodies, or computers, and use this information to determine the course and speed of the ship. Observe water from ship's masthead to advise on navigational direction. Supervise crews in cleaning and maintaining decks, superstructures, and bridges. Supervise crew members in the repair or replacement of defective gear and equipment. Steer vessels, using navigational devices such as compasses and sextants and navigational aids such as lighthouses and buoys. Inspect equipment such as cargo-handling gear, life-saving equipment, visual-signaling equipment, and fishing, towing, or dredging gear to detect problems. Arrange for ships to be stocked, fueled, and repaired. Assume command of vessel in the event that ship's master becomes incapacitated. Participate in activities related to maintenance of vessel security. Stand watches on vessel during specified periods while vessel is under way. Observe loading and unloading of cargo and equipment to ensure that handling and storage are performed according to specifications.

GOE—Interest Area/Cluster: 16. Transportation, Distribution, and Logistics. **Work Group:** 16.05. Water Vehicle Operation. **Other Jobs in This Work Group:** Captains, Mates, and Pilots of Water Vessels; Dredge Operators; Motorboat Operators; Pilots, Ship; Sailors and Marine Oilers; Ship and Boat Captains.

Skills: Equipment Maintenance; Repairing; Operation and Control; Operation Monitoring; Troubleshooting; Installation; Equipment Selection; Judgment and Decision Making.

Education and Training Programs: Commercial Fishing; Marine Science/Merchant Marine Officer; Marine Transportation, Other. **Related Knowledge/Courses:** Geography; Transportation; Public Safety and Security; Telecommunications; Personnel and Human Resources; Mechanical Devices.

Work Environment: More often outdoors than indoors; very hot or cold; standing; using hands on objects, tools, or controls.

Mechanical Drafters

- Personality Code: RCI
- Education/Training Required: Postsecondary vocational training
- Annual Earnings: \$44,740
- Beginning Wage: \$28,540
- Earnings Growth Potential: Medium
- Growth: 5.2%
- Annual Job Openings: 10,902
- Self-Employed: 5.5%
- Part-Time: 5.9%

Prepare detailed working diagrams of machinery and mechanical devices, including dimensions, fastening methods, and other engineering information. Develop detailed design drawings and specifications for mechanical equipment, dies, tools, and controls, using computer-assisted drafting (CAD) equipment. Coordinate with and consult other workers to design, lay out, or detail components and

systems and to resolve design or other problems. Review and analyze specifications, sketches, drawings, ideas, and related data to assess factors affecting component designs and the procedures and instructions to be followed. Position instructions and comments onto drawings. Compute mathematical formulas to develop and design detailed specifications for components or machinery, using computer-assisted equipment. Modify and revise designs to correct operating deficiencies or to reduce production problems. Design scale or full-size blueprints of specialty items such as furniture and automobile body or chassis components. Check dimensions of materials to be used and assign numbers to the materials. Lay out and draw schematic, orthographic, or angle views to depict functional relationships of components, assemblies, systems, and machines. Confer with customer representatives to review schematics and answer questions pertaining to installation of systems. Draw freehand sketches of designs, trace finished drawings onto designated paper for the reproduction of blueprints, and reproduce working drawings on copy machines. Supervise and train other drafters, technologists, and technicians. Lay out, draw, and reproduce illustrations for reference manuals and technical publications to describe operation and maintenance of mechanical systems. Shade or color drawings to clarify and emphasize details and dimensions or eliminate background, using ink, crayon, airbrush, and overlays.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.09. Engineering Technology. **Other Jobs in This Work Group:** Aerospace Engineering and Operations Technicians; Cartographers and Photogrammetrists; Civil Engineering Technicians; Electrical and Electronic Engineering Technicians; Electrical and Electronics Drafters; Electrical Drafters; Electrical Engineering Technicians; Electro-Mechanical Technicians; Electronic Drafters; Electronics Engineering Technicians; Environmental Engineering Technicians; Mapping Technicians; Mechanical Engineering Technicians; Surveying and Mapping Technicians; Surveying Technicians.

Skills: Technology Design; Installation; Equipment Selection; Operations Analysis; Quality Control Analysis; Mathematics; Repairing; Science.

Education and Training Program: Mechanical Drafting and Mechanical Drafting CAD/CADD.

Related Knowledge/Courses: Design; Engineering and Technology; Building and Construction; Physics; Mathematics; English Language.

Work Environment: Indoors; noisy; sitting; using hands on objects, tools, or controls; repetitive motions.

Medical and Clinical Laboratory Technicians

- ✿ Personality Code: RIC
- ✿ Education/Training Required: Associate degree
- ✿ Annual Earnings: \$34,270
- ✿ Beginning Wage: \$22,670
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 15.0%
- ✿ Annual Job Openings: 10,866
- ✿ Self-Employed: 0.7%
- ✿ Part-Time: 14.3%

Perform routine medical laboratory tests for the diagnosis, treatment, and prevention of disease.

May work under the supervision of a medical technologist. Conduct chemical analyses of bodily fluids, such as blood and urine, using microscope or automatic analyzer to detect abnormalities or diseases, and enter findings into computer. Set up, adjust, maintain, and clean medical laboratory equipment. Analyze the results of tests and experiments to ensure conformity to specifications, using special mechanical and electrical devices. Analyze and record test data to issue reports that use charts, graphs and narratives. Conduct blood tests for transfusion purposes and perform blood counts. Perform medical research to further control and cure disease. Obtain specimens, cultivating, isolating, and identifying microorganisms for analysis. Examine cells stained with

dye to locate abnormalities. Collect blood or tissue samples from patients, observing principles of asepsis to obtain blood sample. Consult with a pathologist to determine a final diagnosis when abnormal cells are found. Inoculate fertilized eggs, broths, or other bacteriological media with organisms. Cut, stain, and mount tissue samples for examination by pathologists. Supervise and instruct other technicians and laboratory assistants. Prepare standard volumetric solutions and reagents to be combined with samples, following standardized formulas or experimental procedures. Prepare vaccines and serums by standard laboratory methods, testing for virus inactivity and sterility. Test raw materials, processes, and finished products to determine quality and quantity of materials or characteristics of a substance.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.06. Medical Technology. **Other Jobs in This Work Group:**

Biological Technicians; Cardiovascular Technologists and Technicians; Diagnostic Medical Sonographers; Medical and Clinical Laboratory Technologists; Medical Equipment Preparers; Medical Records and Health Information Technicians; Nuclear Medicine Technologists; Opticians, Dispensing; Orthotists and Prosthetists; Radiologic Technicians; Radiologic Technologists; Radiologic Technologists and Technicians.

Skills: Science; Equipment Maintenance; Troubleshooting; Quality Control Analysis; Operation Monitoring; Operation and Control; Monitoring; Installation.

Education and Training Programs: Clinical/Medical Laboratory Assistant; Blood Bank Technology Specialist; Hematology Technology/Technician; Clinical/Medical Laboratory Technician; Histologic Technician. **Related Knowledge/Courses:** Medicine and Dentistry; Therapy and Counseling; Biology; Clerical Practices.

Work Environment: Indoors; disease or infections; standing; walking and running; using hands on objects, tools, or controls.

Mobile Heavy Equipment Mechanics, Except Engines

- ✿ Personality Code: RC
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$41,450
- ✿ Beginning Wage: \$27,200
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 12.3%
- ✿ Annual Job Openings: 11,037
- ✿ Self-Employed: 5.0%
- ✿ Part-Time: 2.3%

Diagnose, adjust, repair, or overhaul mobile mechanical, hydraulic, and pneumatic equipment, such as cranes, bulldozers, graders, and conveyors, used in construction, logging, and surface mining. Test mechanical products and equipment after repair or assembly to ensure proper performance and compliance with manufacturers' specifications. Repair and replace damaged or worn parts. Diagnose faults or malfunctions to determine required repairs, using engine diagnostic equipment such as computerized test equipment and calibration devices. Operate and inspect machines or heavy equipment to diagnose defects. Dismantle and reassemble heavy equipment, using hoists and hand tools. Clean, lubricate, and perform other routine maintenance work on equipment and vehicles. Examine parts for damage or excessive wear, using micrometers and gauges. Read and understand operating manuals, blueprints, and technical drawings. Schedule maintenance for industrial machines and equipment and keep equipment service records. Overhaul and test machines or equipment to ensure operating efficiency. Assemble gear systems and align frames and gears. Fit bearings to adjust, repair, or overhaul mobile mechanical, hydraulic, and pneumatic equipment. Weld or solder broken parts and structural members, using electric or gas welders and soldering tools. Clean parts by spraying them with grease solvent or immersing them in tanks of solvent. Adjust, maintain, and repair or replace subassemblies, such as transmissions and

crawler heads, using hand tools, jacks, and cranes. Adjust and maintain industrial machinery, using control and regulating devices. Fabricate needed parts or items from sheet metal. Direct workers who are assembling or disassembling equipment or cleaning parts.

GOE—Interest Area/Cluster: 13. Manufacturing. **Work Group:** 13.14. Vehicle and Facility Mechanical Work. **Other Jobs in This Work Group:** Aircraft Mechanics and Service Technicians; Aircraft Structure, Surfaces, Rigging, and Systems Assemblers; Automotive Body and Related Repairers; Automotive Glass Installers and Repairers; Automotive Master Mechanics; Automotive Service Technicians and Mechanics; Automotive Specialty Technicians; Bus and Truck Mechanics and Diesel Engine Specialists; Farm Equipment Mechanics; Fiberglass Laminators and Fabricators; Motorboat Mechanics; Motorcycle Mechanics; Outdoor Power Equipment and Other Small Engine Mechanics; Rail Car Repairers; Recreational Vehicle Service Technicians; Tire Repairers and Changers.

Skills: Installation; Repairing; Equipment Maintenance; Operation Monitoring; Troubleshooting; Operation and Control; Equipment Selection; Technology Design.

Education and Training Programs: Agricultural Mechanics and Equipment/Machine Technology; Heavy Equipment Maintenance Technology/Technician. **Related Knowledge/Courses:** Mechanical Devices; Engineering and Technology; Physics.

Work Environment: Noisy; contaminants; hazardous equipment; minor burns, cuts, bites, or stings; standing; using hands on objects, tools, or controls.

Municipal Fire Fighters

- ❖ Personality Code: RSE
- ❖ Education/Training Required: Long-term on-the-job training
- ❖ Annual Earnings: \$43,170
- ❖ Beginning Wage: \$21,530
- ❖ Earnings Growth Potential: Very high
- ❖ Growth: 12.1%
- ❖ Annual Job Openings: 18,887
- ❖ Self-Employed: 0.0%
- ❖ Part-Time: 1.3%

The job openings listed here are shared with Forest Fire Fighters.

Control and extinguish municipal fires, protect life and property, and conduct rescue efforts. Administer first aid and cardiopulmonary resuscitation to injured persons. Rescue victims from burning buildings and accident sites. Search burning buildings to locate fire victims. Drive and operate fire fighting vehicles and equipment. Move toward the source of a fire, using knowledge of types of fires, construction design, building materials, and physical layout of properties. Dress with equipment such as fire-resistant clothing and breathing apparatus. Position and climb ladders to gain access to upper levels of buildings or to rescue individuals from burning structures. Take action to contain hazardous chemicals that might catch fire, leak, or spill. Assess fires and situations and report conditions to superiors to receive instructions, using two-way radios. Respond to fire alarms and other calls for assistance, such as automobile and industrial accidents. Operate pumps connected to high-pressure hoses. Select and attach hose nozzles, depending on fire type, and direct streams of water or chemicals onto fires. Create openings in buildings for ventilation or entrance, using axes, chisels, crowbars, electric saws, or core cutters. Inspect fire sites after flames have been extinguished to ensure that there is no further danger. Lay hose lines and connect them to water supplies. Protect property from water and smoke, using waterproof

salvage covers, smoke ejectors, and deodorants. Participate in physical training activities to maintain a high level of physical fitness. Salvage property by removing broken glass, pumping out water, and ventilating buildings to remove smoke. Participate in fire drills and demonstrations of fire fighting techniques. Clean and maintain fire stations and fire fighting equipment and apparatus. Collaborate with police to respond to accidents, disasters, and arson investigation calls. Establish firelines to prevent unauthorized persons from entering areas near fires. Inform and educate the public on fire prevention. Inspect buildings for fire hazards and compliance with fire prevention ordinances, testing and checking smoke alarms and fire suppression equipment as necessary.

GOE—Interest Area/Cluster: 12. Law and Public Safety. **Work Group:** 12.06. Emergency Responding. **Other Jobs in This Work Group:** Emergency Medical Technicians and Paramedics; Fire Fighters; Forest Fire Fighters.

Skills: Equipment Maintenance; Equipment Selection; Service Orientation; Operation Monitoring; Science; Social Perceptiveness; Coordination; Complex Problem Solving.

Education and Training Programs: Fire Science/Firefighting; Fire Protection, Other. **Related Knowledge/Courses:** Medicine and Dentistry; Physics; Customer and Personal Service; Building and Construction; Chemistry; Public Safety and Security.

Work Environment: More often outdoors than indoors; noisy; contaminants; disease or infections; hazardous equipment.

Operating Engineers and Other Construction Equipment Operators

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$38,130
- ✿ Beginning Wage: \$24,840
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 8.4%
- ✿ Annual Job Openings: 55,468
- ✿ Self-Employed: 5.7%
- ✿ Part-Time: 2.1%

Operate one or several types of power construction equipment, such as motor graders, bulldozers, scrapers, compressors, pumps, derricks, shovels, tractors, or front-end loaders, to excavate, move, and grade earth; erect structures; or pour concrete or other hard-surface pavement. May repair and maintain equipment in addition to other duties. Learn and follow safety regulations. Take actions to avoid potential hazards and obstructions such as utility lines, other equipment, other workers, and falling objects. Adjust handwheels and depress pedals to control attachments such as blades, buckets, scrapers, and swing booms. Start engines; move throttles, switches, and levers; and depress pedals to operate machines such as bulldozers, trench excavators, road graders, and backhoes. Locate underground services, such as pipes and wires, prior to beginning work. Monitor operations to ensure that health and safety standards are met. Align machines, cutterheads, or depth gauge makers with reference stakes and guidelines or ground or position equipment by following hand signals of other workers. Load and move dirt, rocks, equipment, and materials, using trucks, crawler tractors, power cranes, shovels, graders, and related equipment. Drive and maneuver equipment equipped with blades in successive passes over working areas to remove topsoil, vegetation, and rocks and to distribute and level earth or terrain. Coordinate machine actions with other activities, positioning or moving loads in response to hand or audio signals

from crew members. Operate tractors and bulldozers to perform such tasks as clearing land, mixing sludge, trimming backfills, and building roadways and parking lots. Repair and maintain equipment, making emergency adjustments or assisting with major repairs as necessary. Check fuel supplies at sites to ensure adequate availability. Connect hydraulic hoses, belts, mechanical linkages, or power takeoff shafts to tractors. Operate loaders to pull out stumps, rip asphalt or concrete, rough-grade properties, bury refuse, or perform general cleanup. Select and fasten bulldozer blades or other attachments to tractors, using hitches. Test atmosphere for adequate oxygen and explosive conditions when working in confined spaces. Operate compactors, scrapers, and rollers to level, compact, and cover refuse at disposal grounds. Talk to clients and study instructions, plans, and diagrams to establish work requirements.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Painters, Construction and Maintenance; Paperhanglers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Equipment Maintenance; Installation; Operation and Control; Operation Monitoring; Repairing; Equipment Selection; Management of Financial Resources; Management of Material Resources.

Education and Training Programs: Construction/Heavy Equipment/Earthmoving Equipment Operation; Mobile Crane Operation/Operator. **Related Knowledge/Courses:** Building and Construction; Mechanical Devices; Engineering and Technology; Design; Production and Processing; Public Safety and Security.

Work Environment: Outdoors; noisy; very hot or cold; contaminants; whole-body vibration; using hands on objects, tools, or controls.

Painters, Construction and Maintenance

- ✿ Personality Code: RC
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$32,080
- ✿ Beginning Wage: \$21,720
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 11.8%
- ✿ Annual Job Openings: 101,140
- ✿ Self-Employed: 42.2%
- ✿ Part-Time: 9.8%

Paint walls, equipment, buildings, bridges, and other structural surfaces with brushes, rollers, and spray guns. May remove old paint to prepare surfaces before painting. May mix colors or oils to obtain desired color or consistencies. Cover surfaces with dropcloths or masking tape and paper to protect surfaces during painting. Fill cracks, holes, and joints with caulk, putty, plaster, or other fillers, using caulking guns or putty knives. Apply primers or sealers to prepare new surfaces such as bare wood or metal for finish coats. Apply paint, stain, varnish, enamel, and other finishes to equipment, buildings, bridges, and/or other structures, using brushes, spray guns, or rollers. Calculate amounts of required

materials and estimate costs, based on surface measurements and/or work orders. Read work orders or receive instructions from supervisors or homeowners to determine work requirements. Erect scaffolding and swing gates, or set up ladders, to work above ground level. Remove fixtures such as pictures, door knobs, lamps, and electric switch covers prior to painting. Wash and treat surfaces with oil, turpentine, mildew remover, or other preparations, and sand rough spots to ensure that finishes will adhere properly. Mix and match colors of paint, stain, or varnish with oil and thinning and drying additives to obtain desired colors and consistencies. Remove old finishes by stripping, sanding, wire brushing, burning, or using water and/or abrasive blasting. Select and purchase tools and finishes for surfaces to be covered, considering durability, ease of handling, methods of application, and customers' wishes. Smooth surfaces, using sandpaper, scrapers, brushes, steel wool, and/or sanding machines. Polish final coats to specified finishes. Use special finishing techniques such as sponging, ragging, layering, or faux finishing. Waterproof buildings, using waterproofers and caulking. Cut stencils, and brush and spray lettering and decorations on surfaces. Spray or brush hot plastics or pitch onto surfaces. Bake finishes on painted and enameled articles, using baking ovens.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers,

Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Equipment Maintenance; Management of Material Resources; Equipment Selection; Repairing; Management of Personnel Resources; Monitoring; Coordination.

Education and Training Program: Painting/Painter and Wall Coverer. **Related Knowledge/Courses:** Building and Construction; Design; Transportation; Customer and Personal Service; Production and Processing; Administration and Management.

Work Environment: Contaminants; standing; climbing ladders, scaffolds, or poles; using hands on objects, tools, or controls; bending or twisting the body; repetitive motions.

Pilots, Ship

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Work experience in a related occupation
- ✿ Annual Earnings: \$57,210
- ✿ Beginning Wage: \$29,530
- ✿ Earnings Growth Potential: High
- ✿ Growth: 17.9%
- ✿ Annual Job Openings: 2,665
- ✿ Self-Employed: 6.8%
- ✿ Part-Time: 4.8%

The job openings listed here are shared with Mates—Ship, Boat, and Barge, and with Ship and Boat Captains.

Command ships to steer them into and out of harbors, estuaries, straits, and sounds and on rivers, lakes, and bays. Must be licensed by U.S. Coast

Guard with limitations indicating class and tonnage of vessels for which licenses are valid and routes and waters that may be piloted. Maintain and repair boats and equipment. Give directions to crew members who are steering ships. Make nautical maps. Set ships' courses to avoid reefs, outlying shoals, and other hazards, using navigational aids such as lighthouses and buoys. Report to appropriate authorities any violations of federal or state pilotage laws. Relieve crew members on tugs and launches. Provide assistance to vessels approaching or leaving seacoasts, navigating harbors, and docking and undocking. Provide assistance in maritime rescue operations. Prevent ships under their navigational control from engaging in unsafe operations. Operate amphibious craft during troop landings. Maintain ships' logs. Learn to operate new technology systems and procedures, through the use of instruction, simulators, and models. Advise ships' masters on harbor rules and customs procedures. Steer ships into and out of berths or signal tugboat captains to berth and unberth ships. Serve as vessels' docking masters upon arrival at a port and when at a berth. Operate ship-to-shore radios to exchange information needed for ship operations. Consult maps, charts, weather reports, and navigation equipment to determine and direct ship movements. Direct courses and speeds of ships, based on specialized knowledge of local winds, weather, water depths, tides, currents, and hazards. Oversee cargo storage on or below decks.

GOE—Interest Area/Cluster: 16. Transportation, Distribution, and Logistics. **Work Group:** 16.05. Water Vehicle Operation. **Other Jobs in This Work Group:** Captains, Mates, and Pilots of Water Vessels; Dredge Operators; Mates—Ship, Boat, and Barge; Motorboat Operators; Sailors and Marine Oilers; Ship and Boat Captains.

Skills: Operation and Control; Operation Monitoring; Judgment and Decision Making; Management of Personnel Resources; Troubleshooting; Equipment Maintenance; Negotiation; Coordination.

Education and Training Programs: Commercial Fishing; Marine Science/Merchant Marine Officer; Marine Transportation, Other. **Related Knowledge/**

Courses: Transportation; Geography; Public Safety and Security; Telecommunications; Mechanical Devices; Law and Government.

Work Environment: More often indoors than outdoors; more often standing than sitting; keeping or regaining balance; using hands on objects, tools, or controls.

Pipe Fitters and Steamfitters

- Personality Code: RC
- Education/Training Required: Long-term on-the-job training
- Annual Earnings: \$44,090
- Beginning Wage: \$26,550
- Earnings Growth Potential: Medium
- Growth: 10.6%
- Annual Job Openings: 68,643
- Self-Employed: 12.3%
- Part-Time: 3.4%

The job openings listed here are shared with Plumbers.

Lay out, assemble, install, and maintain pipe systems, pipe supports, and related hydraulic and pneumatic equipment for steam, hot water, heating, cooling, lubricating, sprinkling, and industrial production and processing systems. Cut, thread, and hammer pipe to specifications, using tools such as saws, cutting torches, and pipe threaders and benders. Assemble and secure pipes, tubes, fittings, and related equipment according to specifications by welding, brazing, cementing, soldering, and threading joints. Attach pipes to walls, structures, and fixtures, such as radiators or tanks, using brackets, clamps, tools, or welding equipment. Inspect, examine, and test installed systems and pipelines, using pressure gauge, hydrostatic testing, observation, or other methods. Measure and mark pipes for cutting and threading. Lay out full scale drawings of pipe systems, supports, and related equipment, following blueprints. Plan pipe system layout, installation, or repair according to specifications. Select pipe

sizes and types and related materials, such as supports, hangers, and hydraulic cylinders, according to specifications. Cut and bore holes in structures such as bulkheads, decks, walls, and mains prior to pipe installation, using hand and power tools. Modify, clean, and maintain pipe systems, units, fittings, and related machines and equipment, following specifications and using hand and power tools. Install automatic controls used to regulate pipe systems. Turn valves to shut off steam, water, or other gases or liquids from pipe sections, using valve keys or wrenches. Remove and replace worn components. Prepare cost estimates for clients. Inspect work sites for obstructions and to ensure that holes will not cause structural weakness. Operate motorized pumps to remove water from flooded manholes, basements, or facility floors. Dip nonferrous piping materials in a mixture of molten tin and lead to obtain a coating that prevents erosion or galvanic and electrolytic action.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and

Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Installation; Repairing; Systems Analysis; Management of Personnel Resources; Equipment Maintenance; Operation Monitoring; Operation and Control; Technology Design.

Education and Training Program: Pipefitting/Pipefitter and Sprinkler Fitter.

Related Knowledge/Courses: Building and Construction; Design; Mechanical Devices; Engineering and Technology; Economics and Accounting; Transportation.

Work Environment: Outdoors; hazardous equipment; minor burns, cuts, bites, or stings; standing; using hands on objects, tools, or controls; repetitive motions.

Plumbers

The job openings listed here are shared with Pipe Fitters and Steamfitters.

Assemble, install, and repair pipes, fittings, and fixtures of heating, water, and drainage systems according to specifications and plumbing codes.

Measure, cut, thread, and bend pipe to required angles, using hand and power tools or machines such as pipe cutters, pipe-threading machines, and pipe-bending machines. Study building plans and inspect structures to assess material and equipment needs to establish the sequence of pipe installations and to plan installation around obstructions such as

electrical wiring. Locate and mark the position of pipe installations, connections, passage holes, and fixtures in structures, using measuring instruments such as rulers and levels. Assemble pipe sections, tubing, and fittings, using couplings, clamps, screws, bolts, cement, plastic solvent, caulking, or soldering, brazing, and welding equipment. Fill pipes or plumbing fixtures with water or air and observe pressure gauges to detect and locate leaks. Install pipe assemblies, fittings, valves, appliances such as dishwashers and water heaters, and fixtures such as sinks and toilets, using hand and power tools. Direct workers engaged in pipe cutting and preassembly and installation of plumbing systems and components. Cut openings in structures to accommodate pipes and pipe fittings, using hand and power tools. Review blueprints and building codes and specifications to determine work details and procedures. Install underground storm, sanitary, and water piping systems and extend piping to connect fixtures and plumbing to these systems. Repair and maintain plumbing, replacing defective washers, replacing or mending broken pipes, and opening clogged drains. Keep records of assignments and produce detailed work reports. Hang steel supports from ceiling joists to hold pipes in place. Perform complex calculations and planning for special or very large jobs. Clear away debris in renovations. Install oxygen and medical gas in hospitals. Prepare written work cost estimates and negotiate contracts. Use specialized techniques, equipment, or materials, such as performing computer-assisted welding of small pipes or working with the special piping used in microchip fabrication.

Radiologic Technicians

- ❖ Personality Code: RC
- ❖ Education/Training Required: Associate degree
- ❖ Annual Earnings: \$50,260
- ❖ Beginning Wage: \$33,910
- ❖ Earnings Growth Potential: Low
- ❖ Growth: 15.1%
- ❖ Annual Job Openings: 12,836
- ❖ Self-Employed: 1.1%
- ❖ Part-Time: 17.3%

The job openings listed here are shared with Radiologic Technologists.

Maintain and use equipment and supplies necessary to demonstrate portions of the human body on X-ray film or fluoroscopic screen for diagnostic purposes. Use beam-restrictive devices and patient-shielding techniques to minimize radiation exposure to patient and staff. Position X-ray equipment and adjust controls to set exposure factors, such as time and distance. Position patient on examining table and set up and adjust equipment to obtain optimum view of specific body area as requested by physician. Determine patients' X-ray needs by reading requests or instructions from physicians. Make exposures necessary for the requested procedures, rejecting and repeating work that does not meet established standards. Process exposed radiographs, using film processors or computer-generated methods. Explain procedures to patients to reduce anxieties and obtain cooperation. Perform procedures such as linear tomography; mammography; sonograms; joint and cyst aspirations; routine contrast studies; routine fluoroscopy; and examinations of the head, trunk, and extremities under supervision of physician. Prepare and set up X-ray room for patient. Assure that sterile supplies, contrast materials, catheters, and other required equipment are present and in working order, requisitioning materials as necessary. Maintain records of patients examined, examinations performed, views taken, and technical factors

used. Provide assistance to physicians or other technologists in the performance of more complex procedures. Monitor equipment operation and report malfunctioning equipment to supervisor. Provide students and other technologists with suggestions of additional views, alternate positioning, or improved techniques to ensure the images produced are of the highest quality. Coordinate work of other technicians or technologists when procedures require more than one person. Assist with on-the-job training of new employees and students and provide input to supervisors regarding training performance. Maintain a current file of examination protocols. Operate mobile X-ray equipment in operating room, in emergency room, or at patient's bedside. Provide assistance in radiopharmaceutical administration, monitoring patients' vital signs and notifying the radiologist of any relevant changes.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.06. Medical Technology. **Other**

Jobs in This Work Group: Biological Technicians; Cardiovascular Technologists and Technicians; Diagnostic Medical Sonographers; Medical and Clinical Laboratory Technicians; Medical and Clinical Laboratory Technologists; Medical Equipment Preparers; Medical Records and Health Information Technicians; Nuclear Medicine Technologists; Opticians, Dispensing; Orthotists and Prosthetists; Radiologic Technologists; Radiologic Technologists and Technicians.

Skills: Science; Operation Monitoring; Equipment Selection; Operation and Control; Service Orientation; Active Listening; Negotiation; Writing.

Education and Training Programs: Medical Radiologic Technology/Science—Radiation Therapist; Radiologic Technology/Science—Radiographer; Allied Health Diagnostic, Intervention, and Treatment Professions, Other. **Related Knowledge/Courses:** Medicine and Dentistry; Clerical Practices; Psychology; Physics; Biology; Chemistry.

Work Environment: Indoors; radiation; disease or infections; standing; walking and running; using hands on objects, tools, or controls.

Radiologic Technologists

- ✿ Personality Code: RS
- ✿ Education/Training Required: Associate degree
- ✿ Annual Earnings: \$50,260
- ✿ Beginning Wage: \$33,910

The job openings listed here are shared with Radiologic Technicians.

Take X rays and Computerized Axial Tomography (CAT or CT) scans or administer nonradioactive materials into patient's bloodstream for diagnostic purposes. Includes technologists who specialize in other modalities such as computed tomography, ultrasound, and magnetic resonance. Use radiation safety measures and protection devices to comply with government regulations and to ensure safety of patients and staff. Review and evaluate developed X rays, videotape, or computer-generated information to determine if images are satisfactory for diagnostic purposes. Position imaging equipment and adjust controls to set exposure times and distances, according to specification of examinations. Explain procedures and observe patients to ensure safety and comfort during scans. Key commands and data into computers to document and specify scan sequences, adjust transmitters and receivers, or photograph certain images. Operate or oversee operation of radiologic and magnetic imaging equipment to produce images of the body for diagnostic purposes. Position and immobilize patients on examining tables. Record, process, and maintain patient data and treatment records, and prepare reports. Take thorough and accurate patient medical histories. Remove and process film. Set up examination rooms, ensuring that all necessary equipment is ready. Monitor patients'

conditions and reactions, reporting abnormal signs to physicians. Coordinate work with clerical personnel or other technologists. Provide assistance in dressing or changing seriously ill, injured, or disabled patients. Demonstrate new equipment, procedures, and techniques to staff and provide technical assistance. Collaborate with other medical team members such as physicians and nurses to conduct angiography or special vascular procedures. Prepare and administer oral or injected contrast media to patients. Monitor video displays of areas being scanned and adjust density or contrast to improve picture quality. Operate fluoroscope to aid physicians to view and guide wires or catheters through blood vessels to areas of interest. Assign duties to radiologic staffs to maintain patient flows and achieve production goals. Perform scheduled maintenance and minor emergency repairs on radiographic equipment. Perform administrative duties such as developing departmental operating budgets, coordinating purchases of supplies and equipment, and preparing work schedules.

Refrigeration Mechanics and Installers

- ✿ Personality Code: RCE
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$38,360
- ✿ Beginning Wage: \$24,240
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 8.7%
- ✿ Annual Job Openings: 29,719
- ✿ Self-Employed: 12.7%
- ✿ Part-Time: 3.6%

The job openings listed here are shared with Heating and Air Conditioning Mechanics and Installers.

Install and repair industrial and commercial refrigerating systems. Braze or solder parts to repair defective joints and leaks. Observe and test system operation, using gauges and instruments. Test lines, components, and connections for leaks. Dismantle malfunctioning systems and test components, using electrical, mechanical, and pneumatic testing equipment. Adjust or replace worn or defective mechanisms and parts and reassemble repaired systems. Read blueprints to determine location, size, capacity, and type of components needed to build refrigeration system. Supervise and instruct assistants. Perform mechanical overhauls and refrigerant reclaiming. Install wiring to connect components

to an electric power source. Cut, bend, thread, and connect pipe to functional components and water, power, or refrigeration system. Adjust valves according to specifications and charge system with proper type of refrigerant by pumping the specified gas or fluid into the system. Estimate, order, pick up, deliver, and install materials and supplies needed to maintain equipment in good working condition. Install expansion and control valves, using acetylene torches and wrenches. Mount compressor, condenser, and other components in specified locations on frames, using hand tools and acetylene welding equipment. Keep records of repairs and replacements made and causes of malfunctions. Schedule work with customers and initiate work orders, house requisitions, and orders from stock. Lay out reference points for installation of structural and functional components, using measuring instruments. Fabricate and assemble structural and functional components of refrigeration system, using hand tools, power tools, and welding equipment. Lift and align components into position, using hoist or block and tackle. Drill holes and install mounting brackets and hangers into floor and walls of building. Insulate shells and cabinets of systems.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.05. Systems and Equipment Installation, Maintenance, and Repair.

Other Jobs in This Work Group: Electrical and Electronics Repairers, Powerhouse, Substation, and Relay; Electrical Power-Line Installers and Repairers; Elevator Installers and Repairers; Heating and Air Conditioning Mechanics and Installers; Maintenance and Repair Workers, General; Telecommunications Equipment Installers and Repairers, Except Line Installers; Telecommunications Line Installers and Repairers.

Skills: Installation; Repairing; Equipment Maintenance; Operation Monitoring; Science; Systems Evaluation; Systems Analysis; Troubleshooting.

Education and Training Programs: Heating, Air Conditioning, and Refrigeration Technology/Technician (ACH/ACR/ACHR/HRAC/HVAC); Solar Energy Technology/Technician; Heating, Air Conditioning, Ventilation, and Refrigeration Maintenance

- ✿ Part-Time: 7.6%

Cover roofs of structures with shingles, slate, asphalt, aluminum, wood, and related materials.

May spray roofs, sidings, and walls with material to bind, seal, insulate, or soundproof sections of structures. Install, repair, or replace single-ply roofing systems, using waterproof sheet materials such as modified plastics, elastomeric coatings, or other asphaltic compositions. Apply alternate layers of hot asphalt or tar and roofing paper to roofs, according to specification. Apply gravel or pebbles over top layers of roofs, using rakes or stiff-bristled brooms. Cement or nail flashing strips of metal or shingle over joints to make them watertight. Punch holes in slate, tile, terra cotta, or wooden shingles, using punches and hammers. Hammer and chisel away rough spots or remove them with rubbing bricks to prepare surfaces for waterproofing. Align roofing materials with edges of roofs. Mop or pour hot asphalt or tar onto roof bases. Apply plastic coatings and membranes, fiberglass, or felt over sloped roofs before applying shingles. Install vapor barriers and/or layers of insulation

on the roof decks of flat roofs and seal the seams. Install partially overlapping layers of material over roof insulation surfaces, determining distance of roofing material overlap using chalk lines, gauges on shingling hatchets, or lines on shingles. Inspect problem roofs to determine the best procedures for repairing them. Glaze top layers to make a smooth finish, or embed gravel in the bitumen for rough surfaces. Cut roofing paper to size, using knives, and nail or staple roofing paper to roofs in overlapping strips to form bases for other materials. Cut felt, shingles, and strips of flashing and fit them into angles formed by walls, vents, and intersecting roof surfaces. Cover roofs and exterior walls of structures with slate, asphalt, aluminum, wood, gravel, gypsum, and/or related materials, using brushes, knives, punches, hammers, and other tools. Clean and maintain equipment. Cover exposed nailheads with roofing cement or caulking to prevent water leakage and rust. Waterproof and damp-proof walls, floors, roofs, foundations, and basements by painting or spraying surfaces with waterproof coatings or by attaching waterproofing membranes to surfaces. Spray roofs, sidings, and walls with material to bind, seal, insulate, or soundproof sections of structures, using spray guns, air compressors, and heaters.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers,

Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Repairing; Installation; Equipment Maintenance; Operations Analysis; Technology Design; Mathematics; Management of Personnel Resources; Coordination.

Education and Training Program: Roofer.

Related Knowledge/Courses: Building and Construction; Design; Engineering and Technology; Transportation.

Work Environment: Outdoors; high places; minor burns, cuts, bites, or stings; kneeling, crouching, stooping, or crawling; keeping or regaining balance; using hands on objects, tools, or controls.

Rough Carpenters

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Long-term on-the-job training

The job openings listed here are shared with Construction Carpenters.

Build rough wooden structures, such as concrete forms, scaffolds, tunnel, bridge, or sewer supports, billboard signs, and temporary frame shelters, according to sketches, blueprints, or

oral instructions. Study blueprints and diagrams to determine dimensions of structure or form to be constructed. Measure materials or distances, using square, measuring tape, or rule to lay out work. Cut or saw boards, timbers, or plywood to required size, using handsaw, power saw, or woodworking machine. Assemble and fasten material together to construct wood or metal framework of structure, using bolts, nails, or screws. Anchor and brace forms and other structures in place, using nails, bolts, anchor rods, steel cables, planks, wedges, and timbers. Mark cutting lines on materials, using pencil and scribe. Erect forms, framework, scaffolds, hoists, roof supports, or chutes, using hand tools, plumb rule, and level. Install rough door and window frames, subflooring, fixtures, or temporary supports in structures undergoing construction or repair. Examine structural timbers and supports to detect decay and replace timbers as required, using hand tools, nuts, and bolts. Bore boltholes in timber, masonry, or concrete walls, using power drill. Fabricate parts, using woodworking and metalworking machines. Dig or direct digging of post holes and set poles to support structures. Build sleds from logs and timbers for use in hauling camp buildings and machinery through wooded areas. Build chutes for pouring concrete.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Repairing; Installation; Management of Personnel Resources; Equipment Selection; Mathematics; Technology Design; Equipment Maintenance; Coordination.

Education and Training Program: Carpentry/Carpenter. **Related Knowledge/Courses:** Building and Construction; Design; Engineering and Technology; Mechanical Devices; Production and Processing; Physics.

Work Environment: Outdoors; noisy; very hot or cold; contaminants; standing; using hands on objects, tools, or controls.

Sailors and Marine Oilers

- ✿ Personality Code: RC
- ✿ Education/Training Required: Short-term on-the-job training
- ✿ Annual Earnings: \$32,570
- ✿ Beginning Wage: \$19,500
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.7%
- ✿ Annual Job Openings: 8,600
- ✿ Self-Employed: 0.1%
- ✿ Part-Time: 5.7%

Stand watch to look for obstructions in path of vessels; measure water depths; turn wheels on bridges; or use emergency equipment as directed by captains, mates, or pilots. Break out, rig, overhaul, and store cargo-handling gear, stationary rigging, and running gear. Perform a variety of maintenance tasks to preserve the painted surface

of ships and to maintain line and ship equipment. Must hold government-issued certification and tankerman certification when working aboard liquid-carrying vessels. Provide engineers with assistance in repairing and adjusting machinery. Attach hoses and operate pumps to transfer substances to and from liquid cargo tanks. Give directions to crew members engaged in cleaning wheelhouses and quarterdecks. Load or unload materials from vessels. Lower and man lifeboats when emergencies occur. Participate in shore patrols. Read pressure and temperature gauges or displays and record data in engineering logs. Record in ships' logs data such as weather conditions and distances traveled. Stand by wheels when ships are on automatic pilot and verify accuracy of courses, using magnetic compasses. Steer ships under the direction of commanders or navigating officers or direct helmsmen to steer, following designated courses. Chip and clean rust spots on decks, superstructures, and sides of ships, using wire brushes and hand or air chipping machines. Relay specified signals to other ships, using visual signaling devices such as blinker lights and semaphores. Splice and repair ropes, wire cables, and cordage, using marlinspikes, wirecutters, twine, and hand tools. Paint or varnish decks, superstructures, lifeboats, or sides of ships. Overhaul lifeboats and lifeboat gear and lower or raise lifeboats with winches or falls. Operate, maintain, and repair ship equipment such as winches, cranes, derricks, and weapons systems. Measure depths of water in shallow or unfamiliar waters, using leadlines, and telephone or shout depth information to vessel bridges. Maintain ships' engines under direction of ships' engineering officers. Lubricate machinery, equipment, and engine parts such as gears, shafts, and bearings. Handle lines to moor vessels to wharfs, to tie up vessels to other vessels, or to rig towing lines. Examine machinery to verify specified pressures and lubricant flows. Clean and polish wood trim, brass, and other metal parts. Break out, rig, and stow cargo-handling gear, stationary rigging, and running gear. Stand gangway watches to prevent unauthorized persons from boarding ships in port. Tie barges together into tow units for tugboats to handle, inspecting barges periodically

during voyages and disconnecting them when destinations are reached.

GOE—Interest Area/Cluster: 16. Transportation, Distribution, and Logistics. **Work Group:** 16.05. Water Vehicle Operation. **Other Jobs in This Work Group:** Captains, Mates, and Pilots of Water Vessels; Dredge Operators; Mates—Ship, Boat, and Barge; Motorboat Operators; Pilots, Ship; Ship and Boat Captains.

Skills: Repairing; Equipment Maintenance.

Education and Training Program: Marine Transportation Services, Other. **Related Knowledge/Courses:** Mechanical Devices; Transportation; Engineering and Technology; Public Safety and Security; Geography; Production and Processing.

Work Environment: Outdoors; minor burns, cuts, bites, or stings; standing; keeping or regaining balance; using hands on objects, tools, or controls; bending or twisting the body.

Security and Fire Alarm Systems Installers

- ✿ Personality Code: RC
- ✿ Education/Training Required: Postsecondary vocational training
- ✿ Annual Earnings: \$35,390
- ✿ Beginning Wage: \$22,800
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 20.2%
- ✿ Annual Job Openings: 5,729
- ✿ Self-Employed: 7.2%
- ✿ Part-Time: 2.7%

Install, program, maintain, and repair security and fire alarm wiring and equipment. Ensure that work is in accordance with relevant codes. Examine systems to locate problems such as loose connections or broken insulation. Test backup batteries, keypad programming, sirens, and all security features in order to ensure proper functioning, and to diagnose malfunctions. Mount and fasten control

panels, door and window contacts, sensors, and video cameras, and attach electrical and telephone wiring in order to connect components. Install, maintain, or repair security systems, alarm devices, and related equipment, following blueprints of electrical layouts and building plans. Inspect installation sites and study work orders, building plans, and installation manuals in order to determine materials requirements and installation procedures. Feed cables through access holes, roof spaces, and cavity walls to reach fixture outlets; then position and terminate cables, wires and strapping. Adjust sensitivity of units based on room structures and manufacturers' recommendations, using programming keypads. Test and repair circuits and sensors, following wiring and system specifications. Drill holes for wiring in wall studs, joists, ceilings, and floors. Demonstrate systems for customers, and explain details such as the causes and consequences of false alarms. Consult with clients to assess risks and to determine security requirements. Keep informed of new products and developments. Mount raceways and conduits, and fasten wires to wood framing, using staplers. Prepare documents such as invoices and warranties. Provide customers with cost estimates for equipment installation. Order replacement parts.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers,

Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Installation; Repairing; Troubleshooting; Equipment Maintenance; Systems Evaluation; Technology Design; Operations Analysis; Programming.

Education and Training Programs: Electrician; Security System Installation, Repair, and Inspection Technology/Technician. **Related Knowledge/Courses:** Telecommunications; Building and Construction; Mechanical Devices; Computers and Electronics; Public Safety and Security; Design.

Work Environment: More often indoors than outdoors; noisy; very hot or cold; standing; using hands on objects, tools, or controls.

Sheet Metal Workers

- ✿ Personality Code: R
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$39,210
- ✿ Beginning Wage: \$22,820
- ✿ Earnings Growth Potential: High
- ✿ Growth: 6.7%
- ✿ Annual Job Openings: 31,677
- ✿ Self-Employed: 4.7%
- ✿ Part-Time: 4.2%

Fabricate, assemble, install, and repair sheet metal products and equipment, such as ducts, control boxes, drainpipes, and furnace casings. Work may involve any of the following: setting up and operating fabricating machines to cut, bend, and straighten sheet metal; shaping metal over anvils, blocks, or forms, using hammer; operating

soldering and welding equipment to join sheet metal parts; and inspecting, assembling, and smoothing seams and joints of burred surfaces. Determine project requirements, including scope, assembly sequences, and required methods and materials, according to blueprints, drawings, and written or verbal instructions. Lay out, measure, and mark dimensions and reference lines on material such as roofing panels according to drawings or templates, using calculators, scribes, dividers, squares, and rulers. Maneuver completed units into position for installation and anchor the units. Convert blueprints into shop drawings to be followed in the construction and assembly of sheet metal products. Install assemblies such as flashing, pipes, tubes, heating and air conditioning ducts, furnace casings, rain gutters, and downspouts in supportive frameworks. Select gauges and types of sheet metal or non-metallic material according to product specifications. Drill and punch holes in metal for screws, bolts, and rivets. Fasten seams and joints together with welds, bolts, cement, rivets, solder, caulk, metal drive clips, and bonds to assemble components into products or to repair sheet metal items. Fabricate or alter parts at construction sites, using shears, hammers, punches, and drills. Finish parts, using hacksaws and hand, rotary, or squaring shears. Trim, file, grind, deburr, buff, and smooth surfaces, seams, and joints of assembled parts, using hand tools and portable power tools. Maintain equipment, making repairs and modifications when necessary. Shape metal material over anvils, blocks, or other forms, using hand tools. Transport prefabricated parts to construction sites for assembly and installation. Develop and lay out patterns that use materials most efficiently, using computerized metalworking equipment to experiment with different layouts. Inspect individual parts, assemblies, and installations for conformance to specifications and building codes, using measuring instruments such as calipers, scales, and micrometers. Secure metal roof panels in place and interlock and fasten grooved panel edges. Fasten roof panel edges and machine-made molding to structures, nailing or welding pieces into place.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers; Tile and Marble Setters.

Skills: Installation; Repairing; Equipment Maintenance; Mathematics; Technology Design; Equipment Selection; Troubleshooting; Coordination.

Education and Training Program: Sheet Metal Technology/Sheetworking. **Related Knowledge/Courses:** Building and Construction; Mechanical Devices; Physics; Design; Production and Processing; Mathematics.

Work Environment: Noisy; contaminants; hazardous equipment; minor burns, cuts, bites, or stings; standing; using hands on objects, tools, or controls.

Surgical Technologists

- ✿ Personality Code: RSC
- ✿ Education/Training Required: Postsecondary vocational training
- ✿ Annual Earnings: \$37,540
- ✿ Beginning Wage: \$26,650
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 24.5%

Assist in operations under the supervision of surgeons, registered nurses, or other surgical personnel. May help set up operating rooms; prepare and transport patients for surgery; adjust lights and equipment; pass instruments and other supplies to surgeons and surgeons' assistants; hold retractors; cut sutures; and help count sponges, needles, supplies, and instruments. Count sponges, needles, and instruments before and after operations. Maintain a proper sterile field during surgical procedures. Hand instruments and supplies to surgeons and surgeons' assistants, hold retractors and cut sutures, and perform other tasks as directed by surgeons during operations. Prepare patients for surgery, including positioning patients on operating tables and covering them with sterile surgical drapes to prevent exposure. Scrub arms and hands and assist surgical teams to scrub and put on gloves, masks, and surgical clothing. Wash and sterilize equipment, using germicides and sterilizers. Monitor and continually assess operating room conditions, including needs of the patient and surgical team. Prepare dressings or bandages and apply or assist with their application following surgeries. Clean and restock operating rooms, gathering and placing equipment and supplies and arranging instruments according to instructions such as those found on a preference card. Operate, assemble, adjust, or monitor sterilizers, lights, suction machines, and diagnostic equipment to ensure proper operation. Prepare, care for, and dispose of tissue specimens taken for laboratory analysis. Provide

technical assistance to surgeons, surgical nurses, and anesthesiologists. Maintain supply of fluids such as plasma, saline, blood, and glucose for use during operations. Maintain files and records of surgical procedures. Observe patients' vital signs to assess physical condition. Order surgical supplies.

GOE—Interest Area/Cluster: 08. Health Science. **Work Group:** 08.02. Medicine and Surgery. **Other Jobs in This Work Group:** Anesthesiologists; Family and General Practitioners; Internists, General; Medical Assistants; Medical Transcriptionists; Obstetricians and Gynecologists; Pediatricians, General; Pharmacists; Pharmacy Aides; Pharmacy Technicians; Physician Assistants; Psychiatrists; Registered Nurses; Surgeons.

Skills: Operation Monitoring; Quality Control Analysis.

Education and Training Programs: Pathology/Pathologist Assistant; Surgical Technology/Technologist. **Related Knowledge/Courses:** Medicine and Dentistry; Biology; Psychology; Chemistry; Therapy and Counseling; Customer and Personal Service.

Work Environment: Indoors; contaminants; disease or infections; hazardous conditions; standing; using hands on objects, tools, or controls.

Surveying Technicians

- ✿ Personality Code: RC
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$33,640
- ✿ Beginning Wage: \$20,670
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 19.4%
- ✿ Annual Job Openings: 8,299
- ✿ Self-Employed: 4.2%
- ✿ Part-Time: 4.5%

The job openings listed here are shared with Mapping Technicians.

Adjust and operate surveying instruments such as theodolite and electronic distance-measuring equipment and compile notes, make sketches, and enter data into computers. Perform calculations to determine Earth curvature corrections, atmospheric impacts on measurements, traverse closures and adjustments, azimuths, level runs, and placement of markers. Record survey measurements and descriptive data using notes, drawings, sketches, and inked tracings. Search for section corners, property irons, and survey points. Position and hold the vertical rods, or targets, that theodolite operators use for sighting to measure angles, distances, and elevations. Lay out grids and determine horizontal and vertical controls. Compare survey computations with applicable standards to determine adequacy of data. Set out and recover stakes, marks, and other monumentation. Conduct surveys to ascertain the locations of natural features and man-made structures on Earth's surface, underground, and underwater, using electronic distance-measuring equipment and other surveying instruments. Direct and supervise work of subordinate members of surveying parties. Compile information necessary to stake projects for construction, using engineering plans. Prepare topographic and contour maps of land surveyed, including site features and other relevant information, such as charts, drawings, and survey notes. Place and hold measuring tapes when electronic distance-measuring equipment is not used. Collect information needed to carry out new surveys using source maps, previous survey data, photographs, computer records, and other relevant information. Operate and manage land-information computer systems, performing tasks such as storing data, making inquiries, and producing plots and reports. Run rods for benches and cross-section elevations. Perform manual labor, such as cutting brush for lines, carrying stakes, rebar, and other heavy items, and stacking rods. Maintain equipment and vehicles used by surveying crews. Provide assistance in the development of methods and procedures for conducting field surveys.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.09. Engineering Technology. **Other**

Jobs in This Work Group: Aerospace Engineering and Operations Technicians; Cartographers and Photogrammetrists; Civil Engineering Technicians; Electrical and Electronic Engineering Technicians; Electrical and Electronics Drafters; Electrical Drafters; Electrical Engineering Technicians; Electro-Mechanical Technicians; Electronic Drafters; Electronics Engineering Technicians; Environmental Engineering Technicians; Mapping Technicians; Mechanical Drafters; Mechanical Engineering Technicians; Surveying and Mapping Technicians.

Skills: Mathematics; Operation and Control; Management of Personnel Resources; Operation Monitoring; Systems Analysis.

Education and Training Programs: Surveying Technology/Surveying; Cartography. **Related Knowledge/Courses:** Geography; Design; Building and Construction; Mathematics; Law and Government; Engineering and Technology.

Work Environment: Outdoors; very hot or cold; very bright or dim lighting; hazardous equipment; minor burns, cuts, bites, or stings; using hands on objects, tools, or controls.

Surveyors

Make exact measurements and determine property boundaries. Provide data relevant to the shape, contour, gravitation, location, elevation, or dimension of land or land features on or near Earth's surface for engineering, mapmaking,

mining, land evaluation, construction, and other purposes. Verify the accuracy of survey data including measurements and calculations conducted at survey sites. Calculate heights, depths, relative positions, property lines, and other characteristics of terrain. Search legal records, survey records, and land titles to obtain information about property boundaries in areas to be surveyed. Prepare and maintain sketches, maps, reports, and legal descriptions of surveys to describe, certify, and assume liability for work performed. Direct or conduct surveys to establish legal boundaries for properties, based on legal deeds and titles. Prepare or supervise preparation of all data, charts, plots, maps, records, and documents related to surveys. Write descriptions of property boundary surveys for use in deeds, leases, or other legal documents. Compute geodetic measurements and interpret survey data to determine positions, shapes, and elevations of geomorphic and topographic features. Determine longitudes and latitudes of important features and boundaries in survey areas using theodolites, transits, levels, and satellite-based global positioning systems (GPS). Record the results of surveys including the shape, contour, location, elevation, and dimensions of land or land features. Coordinate findings with the work of engineering and architectural personnel, clients, and others concerned with projects. Establish fixed points for use in making maps, using geodetic and engineering instruments. Train assistants and helpers, and direct their work in such activities as performing surveys or drafting maps. Plan and conduct ground surveys designed to establish baselines, elevations, and other geodetic measurements. Adjust surveying instruments to maintain their accuracy. Analyze survey objectives and specifications to prepare survey proposals or to direct others in survey proposal preparation. Develop criteria for survey methods and procedures. Survey bodies of water to determine navigable channels and to secure data for construction of breakwaters, piers, and other marine structures. Conduct research in surveying and mapping methods using knowledge of techniques of photogrammetric map compilation and electronic data processing.

Realistic Occupations: Telecommunications Equipment Installers and Repairers, Except Line Installers

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.03. Architecture/Construction Engineering Technologies. **Other Jobs in This Work Group:** Architectural and Civil Drafters; Architectural Drafters; Civil Drafters.

Skills: Operation Monitoring; Management of Personnel Resources; Operation and Control; Repairing.

Education and Training Program: Surveying Technology/Surveying. **Related Knowledge/Courses:** Geography; Design; Building and Construction; History and Archeology; Engineering and Technology; Mathematics.

Work Environment: More often outdoors than indoors; very hot or cold; hazardous equipment; minor burns, cuts, bites, or stings; standing.

Telecommunications Equipment Installers and Repairers, Except Line Installers

Set up, rearrange, or remove switching and dialing equipment used in central offices. Service or repair telephones and other communication equipment on customers' properties. May install equipment in new locations or install wiring and telephone jacks in buildings under construction.

Note differences in wire and cable colors so that work can be performed correctly. Test circuits and components of malfunctioning telecommunications equipment to isolate sources of malfunctions, using test

meters, circuit diagrams, polarity probes, and other hand tools. Test repaired, newly installed, or updated equipment to ensure that it functions properly and conforms to specifications, using test equipment and observation. Drive crew trucks to and from work areas. Inspect equipment on a regular basis to ensure proper functioning. Repair or replace faulty equipment such as defective and damaged telephones, wires, switching system components, and associated equipment. Remove and remake connections to change circuit layouts, following work orders or diagrams. Demonstrate equipment to customers, explain how it is to be used, and respond to any inquiries or complaints. Analyze test readings, computer printouts, and trouble reports to determine equipment repair needs and required repair methods. Adjust or modify equipment to enhance equipment performance or to respond to customer requests. Remove loose wires and other debris after work is completed. Request support from technical service centers when on-site procedures fail to solve installation or maintenance problems. Communicate with bases, using telephones or two-way radios, to receive instructions or technical advice or to report equipment status. Assemble and install communication equipment such as data and telephone communication lines, wiring, switching equipment, wiring frames, power apparatus, computer systems, and networks. Collaborate with other workers to locate and correct malfunctions. Review manufacturers' instructions, manuals, technical specifications, building permits, and ordinances to determine communication equipment requirements and procedures. Test connections to ensure that power supplies are adequate and that communications links function. Refer to manufacturers' manuals to obtain maintenance instructions pertaining to specific malfunctions. Climb poles and ladders, use truck-mounted booms, and enter areas such as manholes and cable vaults to install, maintain, or inspect equipment.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.05. Systems and Equipment Installation, Maintenance, and Repair.

Other Jobs in This Work Group: Electrical and Electronics Repairers, Powerhouse, Substation, and

Relay; Electrical Power-Line Installers and Repairers; Elevator Installers and Repairers; Heating and Air Conditioning Mechanics and Installers; Maintenance and Repair Workers, General; Refrigeration Mechanics and Installers; Telecommunications Line Installers and Repairers.

Skills: Installation; Repairing; Troubleshooting; Technology Design; Equipment Selection; Systems Analysis; Quality Control Analysis; Equipment Maintenance.

Education and Training Program: Communications Systems Installation and Repair Technology. **Related Knowledge/Courses:** Telecommunications; Mechanical Devices; Computers and Electronics; Engineering and Technology; Design; Public Safety and Security.

Work Environment: Outdoors; noisy; very hot or cold; contaminants; cramped work space, awkward positions; using hands on objects, tools, or controls.

Telecommunications Line Installers and Repairers

- ⌘ Personality Code: RE
- ⌘ Education/Training Required: Long-term on-the-job training
- ⌘ Annual Earnings: \$47,220
- ⌘ Beginning Wage: \$25,140
- ⌘ Earnings Growth Potential: High

String and repair telephone and television cable, including fiber optics and other equipment for transmitting messages or television programming. Travel to customers' premises to install, maintain, and repair audio and visual electronic reception equipment and accessories. Inspect and test lines and cables, recording and analyzing test results, to assess transmission characteristics and locate faults and

malfuctions. Splice cables, using hand tools, epoxy, or mechanical equipment. Measure signal strength at utility poles, using electronic test equipment. Set up service for customers, installing, connecting, testing, and adjusting equipment. Place insulation over conductors and seal splices with moisture-proof covering. Access specific areas to string lines and install terminal boxes, auxiliary equipment, and appliances, using bucket trucks, or by climbing poles and ladders or entering tunnels, trenches, or crawl spaces. String cables between structures and lines from poles, towers, or trenches and pull lines to proper tension. Install equipment such as amplifiers and repeaters to maintain the strength of communications transmissions. Lay underground cable directly in trenches or string it through conduits running through trenches. Pull up cable by hand from large reels mounted on trucks; then pull lines through ducts by hand or with winches. Clean and maintain tools and test equipment. Explain cable service to subscribers after installation and collect any installation fees that are due. Compute impedance of wires from poles to houses to determine additional resistance needed for reducing signals to desired levels. Use a variety of construction equipment to complete installations, including digger derricks, trenchers, and cable plows. Dig trenches for underground wires and cables. Dig holes for power poles, using power augers or shovels, set poles in place with cranes, and hoist poles upright, using winches. Fill and tamp holes, using cement, earth, and tamping devices. Participate in the construction and removal of telecommunication towers and associated support structures.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.05. Systems and Equipment Installation, Maintenance, and Repair.

Other Jobs in This Work Group: Electrical and Electronics Repairers, Powerhouse, Substation, and Relay; Electrical Power-Line Installers and Repairers; Elevator Installers and Repairers; Heating and Air Conditioning Mechanics and Installers; Maintenance and Repair Workers, General; Refrigeration Mechanics and Installers; Telecommunications Equipment Installers and Repairers, Except Line Installers.

Skills: Installation; Troubleshooting; Repairing; Equipment Maintenance; Programming; Technology Design; Quality Control Analysis; Equipment Selection.

Education and Training Program: Communications Systems Installation and Repair Technology.

Related Knowledge/Courses: Telecommunications; Engineering and Technology; Building and Construction; Customer and Personal Service; Design; Mechanical Devices.

Work Environment: Outdoors; very hot or cold; contaminants; cramped work space, awkward positions; hazardous equipment; using hands on objects, tools, or controls.

Tile and Marble Setters

- ✿ Personality Code: RCA
- ✿ Education/Training Required: Long-term on-the-job training
- ✿ Annual Earnings: \$38,720
- ✿ Beginning Wage: \$21,890
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.4%
- ✿ Annual Job Openings: 9,066
- ✿ Self-Employed: 33.8%
- ✿ Part-Time: 7.2%

Apply hard tile, marble, and wood tile to walls, floors, ceilings, and roof decks. Align and straighten tile, using levels, squares, and straightedges. Determine and implement the best layout to achieve a desired pattern. Cut and shape tile to fit around obstacles and into odd spaces and corners, using hand- and power-cutting tools. Finish and dress the joints and wipe excess grout from between tiles, using damp sponge. Apply mortar to tile back, position the tile, and press or tap with trowel handle to affix tile to base. Mix, apply, and spread plaster, concrete, mortar, cement, mastic, glue, or other adhesives to form a bed for the tiles, using brush, trowel, and screed. Prepare cost and labor estimates based on calculations of time and materials needed for project. Measure

and mark surfaces to be tiled, following blueprints. Level concrete and allow to dry. Build underbeds and install anchor bolts, wires, and brackets. Prepare surfaces for tiling by attaching lath or waterproof paper or by applying a cement mortar coat onto a metal screen. Study blueprints and examine surface to be covered to determine amount of material needed. Cut, surface, polish, and install marble and granite or install pre-cast terrazzo, granite, or marble units. Install and anchor fixtures in designated positions, using hand tools. Cut tile backing to required size, using shears. Remove any old tile, grout, and adhesive, using chisels and scrapers, and clean the surface carefully. Lay and set mosaic tiles to create decorative wall, mural, and floor designs. Assist customers in selection of tile and grout. Remove and replace cracked or damaged tile. Measure and cut metal lath to size for walls and ceilings, using tin snips. Select and order tile and other items to be installed, such as bathroom accessories, walls, panels, and cabinets, according to specifications. Mix and apply mortar or cement to edges and ends of drain tiles to seal halves and joints. Spread mastic or other adhesive base on roof deck to form base for promenade tile, using serrated spreader. Apply a sealer to make grout stain- and water-resistant. Brush glue onto manila paper on which design has been drawn and position tiles, finished side down, onto paper.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.04. Construction Crafts. **Other Jobs in This Work Group:** Boilermakers; Brickmasons and Blockmasons; Carpet Installers; Cement Masons and Concrete Finishers; Commercial Divers; Construction Carpenters; Crane and Tower Operators; Drywall and Ceiling Tile Installers; Electricians; Fence Erectors; Floor Layers, Except Carpet, Wood, and Hard Tiles; Floor Sanders and Finishers; Glaziers; Hazardous Materials Removal Workers; Insulation Workers, Floor, Ceiling, and Wall; Insulation Workers, Mechanical; Manufactured Building and Mobile Home Installers; Operating Engineers and Other Construction Equipment Operators; Painters, Construction and Maintenance; Paperhangers; Paving, Surfacing, and Tamping Equipment Operators; Pile-Driver

Operators; Pipe Fitters and Steamfitters; Pipelayers; Plasterers and Stucco Masons; Plumbers; Plumbers, Pipefitters, and Steamfitters; Rail-Track Laying and Maintenance Equipment Operators; Refractory Materials Repairers, Except Brickmasons; Reinforcing Iron and Rebar Workers; Riggers; Roofers; Rough Carpenters; Security and Fire Alarm Systems Installers; Segmental Pavers; Sheet Metal Workers; Stone Cutters and Carvers, Manufacturing; Stonemasons; Structural Iron and Steel Workers; Tapers; Terrazzo Workers and Finishers.

Skills: Installation; Management of Financial Resources; Mathematics; Equipment Selection; Technology Design; Management of Material Resources; Social Perceptiveness; Equipment Maintenance.

Education and Training Program: Mason or Masonry. **Related Knowledge/Courses:** Building and Construction; Design; Production and Processing; Economics and Accounting; Administration and Management; Transportation.

Work Environment: Noisy; contaminants; cramped work space, awkward positions; standing; using hands on objects, tools, or controls; bending or twisting the body.

Transportation Inspectors

See Aviation Inspectors (a Realistic job), Freight and Cargo Inspectors (a Realistic job), and Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation (a Realistic job), described separately.

Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation

- ✿ Personality Code: RCI
- ✿ Education/Training Required: Work experience in a related occupation
- ✿ Annual Earnings: \$51,440
- ✿ Beginning Wage: \$27,340
- ✿ Earnings Growth Potential: High
- ✿ Growth: 16.4%
- ✿ Annual Job Openings: 2,122
- ✿ Self-Employed: 5.9%
- ✿ Part-Time: 3.7%

The job openings listed here are shared with Aviation Inspectors and with Freight and Cargo Inspectors.

Inspect and monitor transportation equipment, vehicles, or systems to ensure compliance with regulations and safety standards. Conduct vehicle or transportation equipment tests, using diagnostic equipment. Investigate and make recommendations on carrier requests for waiver of federal standards. Prepare reports on investigations or inspections and actions taken. Issue notices and recommend corrective actions when infractions or problems are found. Investigate incidents or violations such as delays, accidents, and equipment failures. Investigate complaints regarding safety violations. Inspect repairs to transportation vehicles and equipment to ensure that repair work was performed properly. Examine transportation vehicles, equipment, or systems to detect damage, wear, or malfunction. Inspect vehicles and other equipment for evidence of abuse, damage, or mechanical malfunction. Examine carrier operating rules, employee qualification guidelines, and carrier training and testing programs for compliance with regulations or safety standards. Inspect vehicles or equipment to ensure compliance with rules, standards, or regulations.

GOE—Interest Area/Cluster: 07. Government and Public Administration. **Work Group:** 07.03.

Regulations Enforcement. Other Jobs in This Work Group: Agricultural Inspectors; Aviation Inspectors; Compliance Officers, Except Agriculture, Construction, Health and Safety, and Transportation; Construction and Building Inspectors; Environmental Compliance Inspectors; Equal Opportunity Representatives and Officers; Financial Examiners; Fire Inspectors; Fish and Game Wardens; Forest Fire Inspectors and Prevention Specialists; Freight and Cargo Inspectors; Government Property Inspectors and Investigators; Immigration and Customs Inspectors; Licensing Examiners and Inspectors; Nuclear Monitoring Technicians; Occupational Health and Safety Specialists; Occupational Health and Safety Technicians; Tax Examiners, Collectors, and Revenue Agents.

Skills: Repairing; Equipment Maintenance; Troubleshooting; Installation; Quality Control Analysis; Operation Monitoring; Systems Analysis; Systems Evaluation.

Education and Training Programs: No related CIP programs; this job is learned through work experience in a related occupation. **Related Knowledge/Courses:** Mechanical Devices; Transportation; Public Safety and Security; Engineering and Technology; Administration and Management; Physics.

Work Environment: Outdoors; standing; using hands on objects, tools, or controls.

Truck Drivers, Heavy and Tractor-Trailer

- ✿ Personality Code: RC
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$36,220
- ✿ Beginning Wage: \$23,380
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 10.4%
- ✿ Annual Job Openings: 279,032
- ✿ Self-Employed: 8.8%
- ✿ Part-Time: 7.2%

Drive a tractor-trailer combination or a truck with a capacity of at least 26,000 GVW to transport and deliver goods, livestock, or materials in liquid, loose, or packaged form. May be required to unload truck. May require use of automated routing equipment. Requires commercial drivers' license. Follow appropriate safety procedures when transporting dangerous goods. Check vehicles before driving them to ensure that mechanical, safety, and emergency equipment is in good working order. Maintain logs of working hours and of vehicle service and repair status, following applicable state and federal regulations. Obtain receipts or signatures when loads are delivered and collect payment for services when required. Check all load-related documentation to ensure that it is complete and accurate. Maneuver trucks into loading or unloading positions, following signals from loading crew as needed; check that vehicle position is correct and any special loading equipment is properly positioned. Drive trucks with capacities greater than 3 tons, including tractor-trailer combinations, to transport and deliver products, livestock, or other materials. Secure cargo for transport, using ropes, blocks, chain, binders, or covers. Read bills of lading to determine assignment details. Report vehicle defects, accidents, traffic violations, or damage to the vehicles. Read and interpret maps to determine vehicle routes. Couple and uncouple trailers by changing trailer jack positions, connecting or disconnecting air and electrical lines, and manipulating fifth-wheel locks. Collect delivery instructions from appropriate sources, verifying instructions and routes. Drive trucks to weigh stations before and after loading and along routes to document weights and to comply with state regulations. Operate equipment such as truck cab computers, CB radios, and telephones to exchange necessary information with bases, supervisors, or other drivers. Check conditions of trailers after contents have been unloaded to ensure that there has been no damage. Crank trailer landing gear up and down to safely secure vehicles. Wrap goods, using pads, packing paper, and containers, and secure loads to trailer walls, using straps. Perform basic vehicle maintenance tasks such as adding oil, fuel, and radiator fluid

or performing minor repairs. Load and unload trucks or help others with loading and unloading, operating any special loading-related equipment on vehicles and using other equipment as necessary.

GOE—Interest Area/Cluster: 16. Transportation, Distribution, and Logistics. **Work Group:** 16.03. Truck Driving. **Other Jobs in This Work Group:** Truck Drivers, Light or Delivery Services.

Skills: Equipment Maintenance; Repairing; Operation Monitoring; Troubleshooting; Operation and Control.

Education and Training Program: Truck and Bus Driver/Commercial Vehicle Operation. **Related Knowledge/Courses:** Transportation; Geography; Public Safety and Security; Law and Government; Mechanical Devices.

Work Environment: Outdoors; very hot or cold; contaminants; sitting; using hands on objects, tools, or controls; repetitive motions.

Water and Liquid Waste Treatment Plant and System Operators

- ⌘ Personality Code: RC
- ⌘ Education/Training Required: Long-term on-the-job training
- ⌘ Annual Earnings: \$37,090
- ⌘ Beginning Wage: \$22,570
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 13.8%
- ⌘ Annual Job Openings: 9,575
- ⌘ Self-Employed: 1.3%
- ⌘ Part-Time: 3.4%

Operate or control an entire process or system of machines, often through the use of control boards, to transfer or treat water or liquid waste. Add chemicals such as ammonia, chlorine, or lime to disinfect and deodorize water and other liquids. Operate and adjust controls on equipment to purify and clarify water, process or dispose of sewage, and

generate power. Inspect equipment or monitor operating conditions, meters, and gauges to determine load requirements and detect malfunctions. Collect and test water and sewage samples, using test equipment and color analysis standards. Record operational data, personnel attendance, or meter and gauge readings on specified forms. Maintain, repair, and lubricate equipment, using hand tools and power tools. Clean and maintain tanks and filter beds, using hand tools and power tools. Direct and coordinate plant workers engaged in routine operations and maintenance activities.

GOE—Interest Area/Cluster: 13. Manufacturing. **Work Group:** 13.16. Utility Operation and Energy Distribution. **Other Jobs in This Work Group:** Chemical Plant and System Operators; Gas Compressor and Gas Pumping Station Operators; Gas Plant Operators; Nuclear Power Reactor Operators; Petroleum Pump System Operators, Refinery Operators, and Gaugers; Power Distributors and Dispatchers; Power Plant Operators; Ship Engineers; Stationary Engineers and Boiler Operators.

Skills: Operation Monitoring; Operation and Control; Installation; Troubleshooting; Operations Analysis; Management of Material Resources; Equipment Maintenance; Science.

Education and Training Program: Water Quality and Wastewater Treatment Management and Recycling Technology/Technician. **Related Knowledge/Courses:** Biology; Chemistry; Physics; Public Safety and Security; Mechanical Devices; Law and Government.

Work Environment: More often outdoors than indoors; noisy; very hot or cold; contaminants; minor burns, cuts, bites, or stings.

Investigative Occupations

Aerospace Engineers

- ✿ Personality Code: IR
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$90,930
- ✿ Beginning Wage: \$60,760
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 10.2%
- ✿ Annual Job Openings: 6,498
- ✿ Self-Employed: 1.4%
- ✿ Part-Time: 2.6%

Perform a variety of engineering work in designing, constructing, and testing aircraft, missiles, and spacecraft. May conduct basic and applied research to evaluate adaptability of materials and equipment to aircraft design and manufacture. May recommend improvements in testing equipment and techniques. Formulate conceptual design of aeronautical or aerospace products or systems to meet customer requirements. Direct and coordinate activities of engineering or technical personnel designing, fabricating, modifying, or testing aircraft or aerospace products. Develop design criteria for aeronautical or aerospace products or systems, including testing methods, production costs, quality standards, and completion dates. Plan and conduct experimental, environmental, operational, and stress tests on models and prototypes of aircraft and aerospace systems and equipment. Evaluate product data and design from inspections and reports for conformance to engineering principles, customer requirements, and quality standards. Formulate mathematical models or other methods of computer analysis to develop, evaluate, or modify design according to customer engineering requirements. Write technical reports and other documentation, such as handbooks and bulletins, for use by engineering staff, management, and customers.

Analyze project requests and proposals and engineering data to determine feasibility, productibility, cost, and production time of aerospace or aeronautical product. Review performance reports and documentation from customers and field engineers and inspect malfunctioning or damaged products to determine problem. Direct research and development programs. Evaluate and approve selection of vendors by study of past performance and new advertisements. Plan and coordinate activities concerned with investigating and resolving customers' reports of technical problems with aircraft or aerospace vehicles. Maintain records of performance reports for future reference.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering.

Other Jobs in This Work Group: Biomedical Engineers; Chemical Engineers; Civil Engineers; Computer Hardware Engineers; Electrical Engineers; Electronics Engineers, Except Computer; Marine Architects; Marine Engineers; Marine Engineers and Naval Architects; Materials Engineers; Mechanical Engineers; Nuclear Engineers.

Skills: Science; Systems Evaluation; Systems Analysis; Judgment and Decision Making; Technology Design; Persuasion; Operations Analysis; Management of Personnel Resources.

Education and Training Program: Aerospace, Aeronautical and Astronautical Engineering. **Related Knowledge/Courses:** Engineering and Technology;

Physics; Design; Mechanical Devices; Production and Processing; Mathematics.

Work Environment: Indoors; sitting; repetitive motions.

Anesthesiologists

- ⌘ Personality Code: IRS
- ⌘ Education/Training Required: First professional degree
- ⌘ Annual Earnings: More than \$145,600
- ⌘ Beginning Wage: \$118,320
- ⌘ Earnings Growth Potential: Cannot be calculated
- ⌘ Growth: 14.2%
- ⌘ Annual Job Openings: 38,027
- ⌘ Self-Employed: 14.7%
- ⌘ Part-Time: 8.1%

The job openings listed here are shared with Family and General Practitioners; Internists, General; Obstetricians and Gynecologists; Pediatricians, General; Psychiatrists; and Surgeons.

Administer anesthetics during surgery or other medical procedures. Administer anesthetic or sedation during medical procedures, using local, intravenous, spinal, or caudal methods. Monitor patient before, during, and after anesthesia and counteract adverse reactions or complications. Provide and maintain life support and airway management and help prepare patients for emergency surgery. Record type and amount of anesthesia and patient condition throughout procedure. Examine patient; obtain medical history; and use diagnostic tests to determine risk during surgical, obstetrical, and other medical procedures. Position patient on operating table to maximize patient comfort and surgical accessibility. Decide when patients have recovered or stabilized enough to be sent to another room or ward or to be sent home following outpatient surgery. Coordinate administration of anesthetics with surgeons during operation. Confer with other medical professionals to determine type and method of anesthetic or sedation to render patient insensible to pain. Coordinate and direct work of nurses, medical technicians, and other health-care providers. Order laboratory tests, X rays, and other diagnostic procedures. Diagnose illnesses, using examinations, tests, and reports. Manage

anesthesiological services, coordinating them with other medical activities and formulating plans and procedures. Provide medical care and consultation in many settings, prescribing medication and treatment and referring patients for surgery. Inform students and staff of types and methods of anesthesia administration, signs of complications, and emergency methods to counteract reactions. Schedule and maintain use of surgical suite, including operating, wash-up, and waiting rooms and anesthetic and sterilizing equipment. Instruct individuals and groups on ways to preserve health and prevent disease. Conduct medical research to aid in controlling and curing disease, to investigate new medications, and to develop and test new medical techniques.

GOE—Interest Area/Cluster: 08. Health Science. **Work Group:** 08.02. Medicine and Surgery.

Other Jobs in This Work Group: Family and General Practitioners; Internists, General; Medical Assistants; Medical Transcriptionists; Obstetricians and Gynecologists; Pediatricians, General; Pharmacists; Pharmacy Aides; Pharmacy Technicians; Physician Assistants; Psychiatrists; Registered Nurses; Surgeons; Surgical Technologists.

Skills: Operation Monitoring; Science; Operation and Control; Judgment and Decision Making; Equipment Selection; Monitoring; Equipment Maintenance; Complex Problem Solving.

Education and Training Programs: Anesthesiology; Critical Care Anesthesiology. **Related Knowledge/Courses:** Medicine and Dentistry; Biology; Chemistry; Psychology; Physics; Therapy and Counseling.

Work Environment: Indoors; contaminants; radiation; disease or infections; standing; using hands on objects, tools, or controls.

Anthropologists

- ✿ Personality Code: IA
- ✿ Education/Training Required: Master's degree
- ✿ Annual Earnings: \$53,080
- ✿ Beginning Wage: \$31,130
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.0%
- ✿ Annual Job Openings: 446
- ✿ Self-Employed: 6.1%
- ✿ Part-Time: 20.1%

The job openings listed here are shared with Archeologists.

Research, evaluate, and establish public policy concerning the origins of humans; their physical, social, linguistic, and cultural development; and their behavior, as well as the cultures, organizations, and institutions they have created. Collect information and make judgments through observation, interviews, and the review of documents. Plan and direct research to characterize and compare the economic, demographic, health-care, social, political, linguistic, and religious institutions of distinct cultural groups, communities, and organizations. Write about and present research findings for a variety of specialized and general audiences. Advise government agencies, private organizations, and communities regarding proposed programs, plans, and policies and their potential impacts on cultural institutions, organizations, and communities. Identify culturally-specific beliefs and practices affecting health status and access to services for distinct populations and communities in collaboration with medical and public health officials. Build and use text-based database management systems to support the analysis of detailed first-hand observational records, or "field notes." Develop intervention procedures, utilizing techniques such as individual and focus group interviews, consultations, and participant observation of social interaction. Construct and test data collection methods. Explain the origins and physical, social, or

cultural development of humans, including physical attributes, cultural traditions, beliefs, languages, resource management practices, and settlement patterns. Conduct participatory action research in communities and organizations to assess how work is done and to design work systems, technologies, and environments. Train others in the application of ethnographic research methods to solve problems in organizational effectiveness, communications, technology development, policy-making, and program planning. Formulate general rules that describe and predict the development and behavior of cultures and social institutions. Collaborate with economic development planners to decide on the implementation of proposed development policies, plans, and programs based on culturally institutionalized barriers and facilitating circumstances. Create data records for use in describing and analyzing social patterns and processes, using photography, videography, and audio recordings.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.04. Social Sciences. **Other Jobs in This Work Group:** Anthropologists and Archeologists; Archeologists; Economists; Historians; Industrial-Organizational Psychologists; Political Scientists; School Psychologists; Sociologists.

Skills: Writing; Science; Social Perceptiveness; Complex Problem Solving; Systems Evaluation; Reading Comprehension; Systems Analysis; Active Listening.

Education and Training Programs: Anthropology; Physical Anthropology. **Related Knowledge/Courses:** Sociology and Anthropology; History and Archeology; Foreign Language; Philosophy and Theology; Geography; Biology.

Work Environment: Indoors; sitting.

Anthropologists and Archeologists

See Anthropologists (an Investigative job) and Archeologists (an Investigative job), described separately.

Archeologists

- ⌘ Personality Code: IRA
- ⌘ Education/Training Required: Master's degree
- ⌘ Annual Earnings: \$53,080
- ⌘ Beginning Wage: \$31,130

The job openings listed here are shared with Anthropologists.

Conduct research to reconstruct record of past human life and culture from human remains, artifacts, architectural features, and structures recovered through excavation, underwater recovery, or other means of discovery. Write, present, and publish reports that record site history, methodology, and artifact analysis results, along with recommendations for conserving and interpreting findings. Compare findings from one site with archeological data from other sites to find similarities or differences. Research, survey, or assess sites of past societies and cultures in search of answers to specific research questions. Study objects and structures recovered by excavation to identify, date, and authenticate them and to interpret their significance. Develop and test theories concerning the origin and development of past cultures. Consult site reports, existing artifacts, and topographic maps to identify archeological sites. Create a grid of each site and draw and update maps of unit profiles, stratum surfaces, features, and findings. Record the exact locations and conditions of artifacts uncovered in diggings or surveys, using drawings and photographs as necessary. Assess archeological sites for resource management, development, or conservation purposes and recommend methods for site protection. Describe artifacts' physical properties or attributes, such as the materials from which artifacts are made and their size, shape, function, and decoration. Teach archeology at colleges and universities.

Collect artifacts made of stone, bone, metal, and other materials, placing them in bags and marking them to show where they were found. Create artifact typologies to organize and make sense of past material cultures. Lead field training sites and train field staff, students, and volunteers in excavation methods. Clean, restore, and preserve artifacts.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.04. Social Sciences. **Other Jobs in This Work Group:** Anthropologists; Anthropologists and Archeologists; Economists; Historians; Industrial-Organizational Psychologists; Political Scientists; School Psychologists; Sociologists.

Skills: Science; Management of Financial Resources; Writing; Management of Personnel Resources; Reading Comprehension; Active Learning; Management of Material Resources; Critical Thinking.

Education and Training Program: Archeology. **Related Knowledge/Courses:** History and Archeology; Sociology and Anthropology; Geography; Philosophy and Theology; Foreign Language; Biology.

Work Environment: More often indoors than outdoors; sitting; using hands on objects, tools, or controls.

Astronomers

- ⌘ Personality Code: IAR
- ⌘ Education/Training Required: Doctoral degree
- ⌘ Annual Earnings: \$99,020
- ⌘ Beginning Wage: \$44,490
- ⌘ Earnings Growth Potential: Very high
- ⌘ Growth: 5.6%
- ⌘ Annual Job Openings: 128
- ⌘ Self-Employed: 0.4%
- ⌘ Part-Time: 5.2%

Observe, research, and interpret celestial and astronomical phenomena to increase basic knowledge and apply such information to practical

problems. Study celestial phenomena, using a variety of ground-based and space-borne telescopes and scientific instruments. Analyze research data to determine its significance, using computers. Present research findings at scientific conferences and in papers written for scientific journals. Measure radio, infrared, gamma, and X-ray emissions from extraterrestrial sources. Develop theories based on personal observations or on observations and theories of other astronomers. Raise funds for scientific research. Collaborate with other astronomers to carry out research projects. Develop instrumentation and software for astronomical observation and analysis. Teach astronomy or astrophysics. Develop and modify astronomy-related programs for public presentation. Calculate orbits and determine sizes, shapes, brightness, and motions of different celestial bodies. Direct the operations of a planetarium.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.02. Physical Sciences. **Other Jobs in This Work Group:** Atmospheric and Space Scientists; Chemists; Geographers; Geoscientists, Except Hydrologists and Geographers; Hydrologists; Materials Scientists; Physicists.

Skills: Science; Programming; Mathematics; Complex Problem Solving; Technology Design; Active Learning; Critical Thinking; Reading Comprehension.

Education and Training Programs: Astronomy; Astrophysics; Planetary Astronomy and Science; Astronomy and Astrophysics, Other. **Related Knowledge/Courses:** Physics; Mathematics; Engineering and Technology; Chemistry; Computers and Electronics; Education and Training.

Work Environment: Indoors; sitting.

Atmospheric and Space Scientists

- ⦿ Personality Code: IR
- ⦿ Education/Training Required: Bachelor's degree
- ⦿ Annual Earnings: \$78,390
- ⦿ Beginning Wage: \$37,030
- ⦿ Earnings Growth Potential: Very high
- ⦿ Growth: 10.6%
- ⦿ Annual Job Openings: 735
- ⦿ Self-Employed: 0.0%
- ⦿ Part-Time: 5.2%

Investigate atmospheric phenomena and interpret meteorological data gathered by surface and air stations, satellites, and radar to prepare reports and forecasts for public and other uses. Study and interpret data, reports, maps, photographs, and charts to predict long- and short-range weather conditions, using computer models and knowledge of climate theory, physics, and mathematics. Broadcast weather conditions, forecasts, and severe weather warnings to the public via television, radio, and the Internet or provide this information to the news media. Gather data from sources such as surface and upper air stations, satellites, weather bureaus, and radar for use in meteorological reports and forecasts. Prepare forecasts and briefings to meet the needs of industry, business, government, and other groups. Apply meteorological knowledge to problems in areas including agriculture, pollution control, and water management and to issues such as global warming or ozone depletion. Conduct basic or applied meteorological research into the processes and determinants of atmospheric phenomena, weather, and climate. Operate computer graphic equipment to produce weather reports and maps for analysis, distribution, or use in weather broadcasts. Measure wind, temperature, and humidity in the upper atmosphere, using weather balloons. Develop and use weather forecasting tools such as mathematical and computer models. Direct forecasting services at weather stations or at radio or television broadcasting facilities. Research and analyze the impact of industrial projects and pollution on

climate, air quality, and weather phenomena. Collect air samples from planes and ships over land and sea to study atmospheric composition. Conduct numerical simulations of climate conditions to understand and predict global and regional weather patterns. Collect and analyze historical climate information such as precipitation and temperature records help predict future weather and climate trends. Consult with agencies, professionals, or researchers regarding the use and interpretation of climatological information. Design and develop new equipment and methods for meteorological data collection, remote sensing, or related applications. Make scientific presentations and publish reports, articles, or texts.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.02. Physical Sciences. **Other Jobs in This Work Group:** Astronomers; Chemists; Geographers; Geoscientists, Except Hydrologists and Geographers; Hydrologists; Materials Scientists; Physicists.

Education and Training Programs: Atmospheric Sciences and Meteorology, General; Atmospheric Chemistry and Climatology; Atmospheric Physics and Dynamics; Meteorology; Atmospheric Sciences and Meteorology, Other. **Related Knowledge/Courses:** Geography; Physics; Mathematics; Computers and Electronics; Communications and Media; Customer and Personal Service.

Work Environment: Indoors; noisy; sitting; repetitive motions.

Biochemists and Biophysicists

- ✿ Personality Code: IAR
- ✿ Education/Training Required: Doctoral degree
- ✿ Annual Earnings: \$79,270
- ✿ Beginning Wage: \$42,670
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.9%
- ✿ Annual Job Openings: 1,637
- ✿ Self-Employed: 2.5%
- ✿ Part-Time: 7.3%

Study the chemical composition and physical principles of living cells and organisms and their electrical and mechanical energy and related phenomena. May conduct research in order to further understanding of the complex chemical combinations and reactions involved in metabolism, reproduction, growth, and heredity. May determine the effects of foods, drugs, serums, hormones, and other substances on tissues and vital processes of living organisms. Design and perform experiments with equipment such as lasers, accelerators, and mass spectrometers. Analyze brain functions, such as learning, thinking, and memory, and analyze the dynamics of seeing and hearing. Share research findings by writing scientific articles and by making presentations at scientific conferences. Develop and test new drugs and medications intended for commercial distribution. Develop methods to process, store, and use foods, drugs, and chemical compounds. Develop new methods to study the mechanisms of biological processes. Examine the molecular and chemical aspects of immune system functioning. Investigate the nature, composition, and expression of genes and research how genetic engineering can impact these processes. Determine the three-dimensional structure of biological macromolecules. Prepare reports and recommendations based upon research outcomes. Design and build laboratory equipment needed for special research projects. Isolate, analyze, and synthesize vitamins, hormones, allergens, minerals, and enzymes and determine their effects on body

functions. Research cancer treatment, using radiation and nuclear particles. Research transformations of substances in cells, using atomic isotopes. Study how light is absorbed in processes such as photosynthesis or vision. Analyze foods to determine their nutritional values and the effects of cooking, canning, and processing on these values. Study spatial configurations of submicroscopic molecules such as proteins, using X rays and electron microscopes. Teach and advise undergraduate and graduate students and supervise their research. Investigate the transmission of electrical impulses along nerves and muscles. Research how characteristics of plants and animals are carried through successive generations. Investigate damage to cells and tissues caused by X rays and nuclear particles. Research the chemical effects of substances such as drugs, serums, hormones, and food on tissues and vital processes. Develop and execute tests to detect diseases, genetic disorders, or other abnormalities. Produce pharmaceutically and industrially useful proteins, using recombinant DNA technology.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.03. Life Sciences. **Other Jobs in This Work Group:** Biologists; Environmental Scientists and Specialists, Including Health; Epidemiologists; Medical Scientists, Except Epidemiologists; Microbiologists.

Skills: Science; Technology Design; Writing; Equipment Selection; Operations Analysis; Reading Comprehension; Troubleshooting; Quality Control Analysis.

Education and Training Programs: Soil Chemistry and Physics; Soil Microbiology; Biophysics; Molecular Biophysics; Biochemistry/Biophysics and Molecular Biology; Cell/Cellular Biology and Anatomical Sciences, Other. **Related Knowledge/Courses:** Biology; Chemistry; Physics; Engineering and Technology; Medicine and Dentistry; Design.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls.

Biomedical Engineers

- ⦿ Personality Code: IR
- ⦿ Education/Training Required: Bachelor's degree
- ⦿ Annual Earnings: \$75,440
- ⦿ Beginning Wage: \$45,910
- ⦿ Earnings Growth Potential: Medium
- ⦿ Growth: 21.1%
- ⦿ Annual Job Openings: 1,804
- ⦿ Self-Employed: 0.0%
- ⦿ Part-Time: 3.4%

Apply knowledge of engineering, biology, and biomechanical principles to the design, development, and evaluation of biological and health systems and products, such as artificial organs, prostheses, instrumentation, medical information systems, and health management and care delivery systems. Evaluate the safety, efficiency, and effectiveness of biomedical equipment. Install, adjust, maintain, and/or repair biomedical equipment. Advise hospital administrators on the planning, acquisition, and use of medical equipment. Advise and assist in the application of instrumentation in clinical environments. Develop models or computer simulations of human bio-behavioral systems in order to obtain data for measuring or controlling life processes. Research new materials to be used for products such as implanted artificial organs. Design and develop medical diagnostic and clinical instrumentation, equipment, and procedures, utilizing the principles of engineering and bio-behavioral sciences. Conduct research, along with life scientists, chemists, and medical scientists, on the engineering aspects of the biological systems of humans and animals. Teach biomedical engineering or disseminate knowledge about field through writing or consulting. Design and deliver technology to assist people with disabilities. Diagnose and interpret bioelectric data, using signal-processing techniques. Adapt or design computer hardware or software for medical science uses. Analyze new medical procedures in order to forecast likely outcomes. Develop new applications

for energy sources, such as using nuclear power for biomedical implants.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering.

Other Jobs in This Work Group: Aerospace Engineers; Chemical Engineers; Civil Engineers; Computer Hardware Engineers; Electrical Engineers; Electronics Engineers, Except Computer; Marine Architects; Marine Engineers; Marine Engineers and Naval Architects; Materials Engineers; Mechanical Engineers; Nuclear Engineers.

Skills: Technology Design; Science; Installation; Operations Analysis; Quality Control Analysis; Systems Evaluation; Troubleshooting; Management of Material Resources.

Education and Training Program: Biomedical/Medical Engineering. **Related Knowledge/Courses:**

Engineering and Technology; Computers and Electronics; Physics; Design; Mechanical Devices; Chemistry.

Work Environment: Indoors; contaminants; disease or infections; hazardous conditions; sitting; using hands on objects, tools, or controls.

Chemical Engineers

- ✿ Personality Code: IR
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$81,500
- ✿ Beginning Wage: \$52,060
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 7.9%
- ✿ Annual Job Openings: 2,111
- ✿ Self-Employed: 1.9%
- ✿ Part-Time: 3.4%

Design chemical plant equipment and devise processes for manufacturing chemicals and products, such as gasoline, synthetic rubber, plastics, detergents, cement, paper, and pulp, by applying

principles and technology of chemistry, physics, and engineering. Perform tests throughout stages of production to determine degree of control over variables, including temperature, density, specific gravity, and pressure. Develop safety procedures to be employed by workers operating equipment or working in close proximity to ongoing chemical reactions. Determine most effective arrangement of operations such as mixing, crushing, heat transfer, distillation, and drying. Prepare estimate of production costs and production progress reports for management. Direct activities of workers who operate or who are engaged in constructing and improving absorption, evaporation, or electromagnetic equipment. Perform laboratory studies of steps in manufacture of new product and test proposed process in small-scale operation such as a pilot plant. Develop processes to separate components of liquids or gases or generate electrical currents by using controlled chemical processes. Conduct research to develop new and improved chemical manufacturing processes. Design measurement and control systems for chemical plants based on data collected in laboratory experiments and in pilot plant operations. Design and plan layout of equipment.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering.

Other Jobs in This Work Group: Aerospace Engineers; Biomedical Engineers; Civil Engineers; Computer Hardware Engineers; Electrical Engineers; Electronics Engineers, Except Computer; Marine Architects; Marine Engineers; Marine Engineers and Naval Architects; Materials Engineers; Mechanical Engineers; Nuclear Engineers.

Skills: Science; Technology Design; Troubleshooting; Programming; Operations Analysis; Installation; Mathematics; Systems Analysis.

Education and Training Program: Chemical Engineering. **Related Knowledge/Courses:** Engineering and Technology; Chemistry; Physics; Design; Production and Processing; Mathematics.

Work Environment: Indoors; noisy; hazardous conditions; sitting.

Chemists

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$63,490
- ✿ Beginning Wage: \$36,810
- ✿ Earnings Growth Potential: High
- ✿ Growth: 9.1%
- ✿ Annual Job Openings: 9,024
- ✿ Self-Employed: 1.2%
- ✿ Part-Time: 3.9%

Conduct qualitative and quantitative chemical analyses or chemical experiments in laboratories for quality or process control or to develop new products or knowledge. Analyze organic and inorganic compounds to determine chemical and physical properties, composition, structure, relationships, and reactions, utilizing chromatography, spectroscopy, and spectrophotometry techniques. Develop, improve, and customize products, equipment, formulas, processes, and analytical methods. Compile and analyze test information to determine process or equipment operating efficiency and to diagnose malfunctions. Confer with scientists and engineers to conduct analyses of research projects, interpret test results, or develop nonstandard tests. Direct, coordinate, and advise personnel in test procedures for analyzing components and physical properties of materials. Induce changes in composition of substances by introducing heat, light, energy, and chemical catalysts for quantitative and qualitative analysis. Write technical papers and reports and prepare standards and specifications for processes, facilities, products, or tests. Study effects of various methods of processing, preserving, and packaging on composition and properties of foods. Prepare test solutions, compounds, and reagents for laboratory personnel to conduct test.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.02. Physical Sciences. **Other Jobs in**

This Work Group: Astronomers; Atmospheric and Space Scientists; Geographers; Geoscientists, Except Hydrologists and Geographers; Hydrologists; Materials Scientists; Physicists.

Skills: Science; Quality Control Analysis; Technology Design; Operation Monitoring; Equipment Selection; Management of Material Resources; Management of Financial Resources; Operations Analysis.

Education and Training Programs: Chemistry, General; Analytical Chemistry; Inorganic Chemistry; Organic Chemistry; Physical and Theoretical Chemistry; Polymer Chemistry; Chemical Physics; Chemistry, Other. **Related Knowledge/Courses:** Chemistry; Mathematics; Engineering and Technology; Production and Processing; Computers and Electronics; Law and Government.

Work Environment: Indoors; contaminants; hazardous conditions; standing.

Clinical Psychologists

- ✿ Personality Code: ISA
- ✿ Education/Training Required: Doctoral degree
- ✿ Annual Earnings: \$62,210
- ✿ Beginning Wage: \$37,300
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.8%
- ✿ Annual Job Openings: 8,309
- ✿ Self-Employed: 34.2%
- ✿ Part-Time: 24.0%

The job openings listed here are shared with Counseling Psychologists and with School Psychologists.

Diagnose or evaluate mental and emotional disorders of individuals through observation, interview, and psychological tests and formulate and administer programs of treatment. Identify psychological, emotional, or behavioral issues and diagnose disorders, using information obtained from

interviews, tests, records, and reference materials. Develop and implement individual treatment plans, specifying type, frequency, intensity, and duration of therapy. Interact with clients to assist them in gaining insight, defining goals, and planning action to achieve effective personal, social, educational, and vocational development and adjustment. Discuss the treatment of problems with clients. Utilize a variety of treatment methods such as psychotherapy, hypnosis, behavior modification, stress reduction therapy, psychodrama, and play therapy. Counsel individuals and groups regarding problems such as stress, substance abuse, and family situations to modify behavior or to improve personal, social, and vocational adjustment. Write reports on clients and maintain required paperwork. Evaluate the effectiveness of counseling or treatments and the accuracy and completeness of diagnoses; then modify plans and diagnoses as necessary. Obtain and study medical, psychological, social, and family histories by interviewing individuals, couples, or families and by reviewing records. Consult reference material such as textbooks, manuals, and journals to identify symptoms, make diagnoses, and develop approaches to treatment. Maintain current knowledge of relevant research. Observe individuals at play, in group interactions, or in other contexts to detect indications of mental deficiency, abnormal behavior, or maladjustment. Select, administer, score, and interpret psychological tests to obtain information on individuals' intelligence, achievements, interests, and personalities. Refer clients to other specialists, institutions, or support services as necessary. Develop, direct, and participate in training programs for staff and students. Provide psychological or administrative services and advice to private firms and community agencies regarding mental health programs or individual cases. Provide occupational, educational, and other information to individuals so that they can make educational and vocational plans.

GOE—Interest Area/Cluster: 10. Human Service.
Work Group: 10.01. Counseling and Social Work.

Other Jobs in This Work Group: Child, Family, and School Social Workers; Clinical, Counseling, and School Psychologists; Counseling Psychologists;

Marriage and Family Therapists; Medical and Public Health Social Workers; Mental Health and Substance Abuse Social Workers; Mental Health Counselors; Probation Officers and Correctional Treatment Specialists; Rehabilitation Counselors; Residential Advisors; Social and Human Service Assistants; Substance Abuse and Behavioral Disorder Counselors.

Skills: Social Perceptiveness; Service Orientation; Complex Problem Solving; Learning Strategies; Active Listening; Negotiation; Active Learning; Critical Thinking.

Education and Training Programs: Psychology, General; Clinical Psychology; Counseling Psychology; Developmental and Child Psychology; School Psychology; Clinical Child Psychology; Psychoanalysis and Psychotherapy. **Related Knowledge/Courses:** Therapy and Counseling; Psychology; Sociology and Anthropology; Philosophy and Theology; Customer and Personal Service; Medicine and Dentistry.

Work Environment: Indoors; sitting.

Clinical, Counseling, and School Psychologists

See Clinical Psychologists (an Investigative job), Counseling Psychologists (a Social job), and School Psychologists (an Investigative job), described separately.

Computer and Information Scientists, Research

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Doctoral degree
- ✿ Annual Earnings: \$97,970
- ✿ Beginning Wage: \$55,930
- ✿ Earnings Growth Potential: High
- ✿ Growth: 21.5%
- ✿ Annual Job Openings: 2,901
- ✿ Self-Employed: 5.3%
- ✿ Part-Time: 5.6%

Conduct research into fundamental computer and information science as theorists, designers, or inventors. Solve or develop solutions to problems in the field of computer hardware and software.

Analyze problems to develop solutions involving computer hardware and software. Assign or schedule tasks in order to meet work priorities and goals. Evaluate project plans and proposals to assess feasibility issues. Apply theoretical expertise and innovation to create or apply new technology, such as adapting principles for applying computers to new uses. Consult with users, management, vendors, and technicians to determine computing needs and system requirements. Meet with managers, vendors, and others to solicit cooperation and resolve problems. Conduct logical analyses of business, scientific, engineering, and other technical problems, formulating mathematical models of problems for solution by computers. Develop and interpret organizational goals, policies, and procedures. Participate in staffing decisions and direct training of subordinates. Develop performance standards and evaluate work in light of established standards. Design computers and the software that runs them. Maintain network hardware and software, direct network security measures, and monitor networks to ensure availability to system users. Participate in multidisciplinary projects in areas such as virtual reality, human-computer interaction, or robotics. Approve, prepare, monitor, and adjust operational budgets. Direct daily operations

of departments, coordinating project activities with other departments.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Information Technology Specialties. **Other Jobs in This Work Group:** Computer Operators; Computer Programmers; Computer Security Specialists; Computer Software Engineers, Applications; Computer Software Engineers, Systems Software; Computer Support Specialists; Computer Systems Analysts; Computer Systems Engineers/Architects; Database Administrators; Network Designers; Network Systems and Data Communications Analysts; Software Quality Assurance Engineers and Testers; Web Administrators; Web Developers.

Skills: Programming; Science; Systems Analysis; Operations Analysis; Technology Design; Active Learning; Complex Problem Solving; Mathematics.

Education and Training Programs: Computer and Information Sciences, General; Artificial Intelligence and Robotics; Information Science/Studies; Computer Systems Analysis/Analyst; Computer Science; Computer and Information Sciences and Support Services, Other; Medical Informatics. **Related Knowledge/Courses:** Computers and Electronics; Telecommunications; Engineering and Technology; Mathematics; Design; Education and Training.

Work Environment: No data available.

Computer Hardware Engineers

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$91,860
- ✿ Beginning Wage: \$55,880
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 4.6%
- ✿ Annual Job Openings: 3,572
- ✿ Self-Employed: 3.6%
- ✿ Part-Time: 2.7%

Research, design, develop, and test computer or computer-related equipment for commercial, industrial, military, or scientific use. May supervise the manufacturing and installation of computer or computer-related equipment and components. Update knowledge and skills to keep up with rapid advancements in computer technology. Provide technical support to designers, marketing and sales departments, suppliers, engineers, and other team members throughout the product development and implementation process. Test and verify hardware and support peripherals to ensure that they meet specifications and requirements, analyzing and recording test data. Monitor functioning of equipment and make necessary modifications to ensure system operates in conformance with specifications. Analyze information to determine, recommend, and plan layout, including type of computers and peripheral equipment modifications. Build, test, and modify product prototypes, using working models or theoretical models constructed using computer simulation. Analyze user needs and recommend appropriate hardware. Direct technicians, engineering designers, or other technical support personnel as needed. Confer with engineering staff and consult specifications to evaluate interface between hardware and software and operational and performance requirements of overall system. Select hardware and material, assuring compliance with specifications and product requirements. Store, retrieve, and manipulate data for analysis of system capabilities and requirements. Write detailed functional specifications that document the hardware development process and support hardware introduction. Specify power supply requirements and configuration, drawing on system performance expectations and design specifications. Provide training and support to system designers and users. Assemble and modify existing pieces of equipment to meet special needs. Evaluate factors such as reporting formats required, cost constraints, and need for security restrictions to determine hardware configuration. Design and develop computer hardware and support peripherals, including central processing units (CPUs), support logic, microprocessors, custom integrated circuits, and printers and disk

drives. Recommend purchase of equipment to control dust, temperature, and humidity in area of system installation.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering.

Other Jobs in This Work Group: Aerospace Engineers; Biomedical Engineers; Chemical Engineers; Civil Engineers; Electrical Engineers; Electronics Engineers, Except Computer; Marine Architects; Marine Engineers; Marine Engineers and Naval Architects; Materials Engineers; Mechanical Engineers; Nuclear Engineers.

Skills: Programming; Operations Analysis; Systems Analysis; Systems Evaluation; Troubleshooting; Technology Design; Science; Quality Control Analysis.

Education and Training Programs: Computer Engineering, General; Computer Hardware Engineering. **Related Knowledge/Courses:** Computers and Electronics; Engineering and Technology; Telecommunications; Design; Physics; Communications and Media.

Work Environment: Indoors; sitting.

Computer Security Specialists

- ✿ Personality Code: CIR
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$64,690
- ✿ Beginning Wage: \$39,970
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 27.0%
- ✿ Annual Job Openings: 37,010
- ✿ Self-Employed: 0.4%
- ✿ Part-Time: 3.1%

The job openings listed here are shared with Network and Computer Systems Administrators.

Plan, coordinate, and implement security measures for information systems to regulate access to computer data files and prevent unauthorized modification, destruction, or disclosure of information. Train users and promote security awareness to ensure system security and to improve server and network efficiency. Develop plans to safeguard computer files against accidental or unauthorized modification, destruction, or disclosure and to meet emergency data processing needs. Confer with users to discuss issues such as computer data access needs, security violations, and programming changes. Monitor current reports of computer viruses to determine when to update virus protection systems. Modify computer security files to incorporate new software, correct errors, or change individual access status. Coordinate implementation of computer system plan with establishment personnel and outside vendors. Monitor use of data files and regulate access to safeguard information in computer files. Perform risk assessments and execute tests of data-processing system to ensure functioning of data-processing activities and security measures. Encrypt data transmissions and erect firewalls to conceal confidential information as it is being transmitted and to keep out tainted digital transfers. Document computer security and emergency measures policies, procedures, and tests. Review violations of computer security procedures and discuss procedures with violators to ensure violations are not repeated. Maintain permanent fleet cryptologic and carry-on direct support systems required in special land, sea surface, and sub-surface operations.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Information Technology Specialties. **Other Jobs in This Work Group:**

Computer and Information Scientists, Research; Computer Operators; Computer Programmers; Computer Software Engineers, Applications; Computer Software Engineers, Systems Software; Computer Support Specialists; Computer Systems Analysts; Computer Systems Engineers/Architects; Database Administrators; Network Designers; Network Systems and Data Communications Analysts;

Software Quality Assurance Engineers and Testers; Web Administrators; Web Developers.

Skills: Systems Evaluation; Systems Analysis; Operations Analysis; Programming; Installation; Management of Material Resources; Troubleshooting; Management of Financial Resources.

Education and Training Programs: Computer and Information Sciences, General; Information Science/Studies; Computer Systems Analysis/Analyst; Computer Systems Networking and Telecommunications; System Administration/Administrator; System, Networking, and LAN/WAN Management/Manager; Computer and Information Systems Security; Computer and Information Sciences and Support Services, Other. **Related Knowledge/Courses:** Computers and Electronics; Telecommunications; Engineering and Technology; Design; Education and Training; Therapy and Counseling.

Computer Software Engineers, Applications

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$83,130
- ✿ Beginning Wage: \$52,090
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 44.6%
- ✿ Annual Job Openings: 58,690
- ✿ Self-Employed: 2.0%
- ✿ Part-Time: 2.6%

Develop, create, and modify general computer applications software or specialized utility programs. Analyze user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing operational efficiency. May analyze and design databases within an application area, working individually

or coordinating database development as part of a team. Confer with systems analysts, engineers, programmers, and others to design system and to obtain information on project limitations and capabilities, performance requirements, and interfaces. Modify existing software to correct errors, allow it to adapt to new hardware, or improve its performance. Analyze user needs and software requirements to determine feasibility of design within time and cost constraints. Consult with customers about software system design and maintenance. Coordinate software system installation and monitor equipment functioning to ensure specifications are met. Design, develop, and modify software systems, using scientific analysis and mathematical models to predict and measure outcome and consequences of design. Develop and direct software system testing and validation procedures, programming, and documentation. Analyze information to determine, recommend, and plan computer specifications and layouts and peripheral equipment modifications. Supervise the work of programmers, technologists, and technicians and other engineering and scientific personnel. Obtain and evaluate information on factors such as reporting formats required, costs, and security needs to determine hardware configuration. Determine system performance standards. Train users to use new or modified equipment. Store, retrieve, and manipulate data for analysis of system capabilities and requirements. Specify power supply requirements and configuration. Recommend purchase of equipment to control dust, temperature, and humidity in area of system installation.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Computer Software Engineers, Systems Software

- ✿ Personality Code: ICR
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$89,070
- ✿ Beginning Wage: \$55,870
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 28.2%
- ✿ Annual Job Openings: 33,139
- ✿ Self-Employed: 2.1%
- ✿ Part-Time: 2.6%

Research, design, develop, and test operating systems-level software, compilers, and network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general computing applications. Set operational specifications and formulate and analyze software requirements. Apply principles and techniques of computer science, engineering, and mathematical analysis. Modify existing software to correct errors, to adapt it to new hardware, or to upgrade interfaces and improve performance. Design and develop software systems, using scientific analysis

and mathematical models to predict and measure outcome and consequences of design. Consult with engineering staff to evaluate interface between hardware and software, develop specifications and performance requirements, and resolve customer problems. Analyze information to determine, recommend, and plan installation of a new system or modification of an existing system. Develop and direct software system testing and validation procedures. Direct software programming and development of documentation. Consult with customers or other departments on project status, proposals, and technical issues such as software system design and maintenance. Advise customer about, or perform, maintenance of software system. Coordinate installation of software system. Monitor functioning of equipment to ensure system operates in conformance with specifications. Store, retrieve, and manipulate data for analysis of system capabilities and requirements. Confer with data processing and project managers to obtain information on limitations and capabilities for data-processing projects. Prepare reports and correspondence concerning project specifications, activities, and status. Evaluate factors such as reporting formats required, cost constraints, and need for security restrictions to determine hardware configuration. Supervise and assign work to programmers, designers, technologists and technicians, and other engineering and scientific personnel. Train users to use new or modified equipment. Utilize microcontrollers to develop control signals; implement control algorithms; and measure process variables such as temperatures, pressures, and positions. Recommend purchase of equipment to control dust, temperature, and humidity in area of system installation. Specify power supply requirements and configuration.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Analyze science, engineering, business, and all other data-processing problems for application to electronic data processing systems. Analyze user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available software. May supervise computer programmers. Provide staff and

users with assistance solving computer-related problems, such as malfunctions and program problems. Test, maintain, and monitor computer programs and systems, including coordinating the installation of computer programs and systems. Use object-oriented programming languages as well as client and server applications development processes and multimedia and Internet technology. Confer with clients regarding the nature of the information processing or computation needs a computer program is to address. Coordinate and link the computer systems within an organization to increase compatibility and so information can be shared. Consult with management to ensure agreement on system principles. Expand or modify system to serve new purposes or improve workflow. Interview or survey workers, observe job performance, or perform the job to determine what information is processed and how it is processed. Determine computer software or hardware needed to set up or alter system. Train staff and users to work with computer systems and programs. Analyze information processing or computation needs and plan and design computer systems, using techniques such as structured analysis, data modeling, and information engineering. Assess the usefulness of pre-developed application packages and adapt them to a user environment. Define the goals of the system and devise flow charts and diagrams describing logical operational steps of programs. Develop, document, and revise system design procedures, test procedures, and quality standards. Review and analyze computer printouts and performance indicators to locate code problems; correct errors by correcting codes. Recommend new equipment or software packages. Read manuals, periodicals, and technical reports to learn how to develop programs that meet staff and user requirements. Supervise computer programmers or other systems analysts or serve as project leaders for particular systems projects. Utilize the computer in the analysis and solution of business problems such as development of integrated production and inventory control and cost analysis systems.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Information Technology Specialties. **Other Jobs in This Work Group:**

Computer and Information Scientists, Research; Computer Operators; Computer Programmers; Computer Security Specialists; Computer Software Engineers, Applications; Computer Software Engineers, Systems Software; Computer Support Specialists; Computer Systems Engineers/Architects; Database Administrators; Network Designers; Network Systems and Data Communications Analysts; Software Quality Assurance Engineers and Testers; Web Administrators; Web Developers.

Computer Systems Engineers/ Architects

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$71,510
- ✿ Beginning Wage: \$37,600
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.1%
- ✿ Annual Job Openings: 14,374
- ✿ Self-Employed: 6.6%
- ✿ Part-Time: 5.6%

The job openings listed here are shared with Network Designers, with Software Quality Assurance Engineers and Testers, with Web Administrators, and with Web Developers.

Design and develop solutions to complex applications problems, system administration issues, or network concerns. Perform systems management and integration functions. Communicate with staff or clients to understand specific system requirements. Provide advice on project costs, design concepts, or design changes. Document design specifications, installation instructions, and other system-related information. Verify stability, interoperability, portability, security, or scalability of system architecture. Collaborate with engineers or software developers to select appropriate design solutions or ensure the compatibility of system components. Provide technical guidance or support for the development or troubleshooting of systems. Evaluate current or emerging technologies to consider factors such as cost, portability, compatibility, or usability. Identify system data, hardware, or software components required to meet user needs. Provide guidelines for implementing secure systems to customers or installation teams. Monitor system operation to detect potential problems. Direct the analysis, development, and operation of complete computer systems. Investigate system component suitability for specified purposes and make recommendations regarding component use. Perform ongoing hardware and software maintenance operations, including installing or upgrading hardware or software. Develop or approve project plans, schedules, or budgets. Configure servers to meet functional specifications. Design and conduct hardware or software tests. Define and analyze objectives, scope, issues, or organizational impact of information systems. Develop system engineering, software engineering, system integration, or distributed system architectures. Establish functional or system standards to ensure operational requirements, quality requirements, and design constraints are addressed. Evaluate existing systems to determine effectiveness and suggest changes to meet organizational requirements. Research, test, or verify proper functioning of software patches and fixes. Communicate project information through presentations, technical reports, or white papers. Complete models and simulations, using manual or automated tools, to analyze or predict system performance under different operating conditions.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Coroners

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Work experience in a related occupation
- ✿ Annual Earnings: \$48,400
- ✿ Beginning Wage: \$28,980
- ✿ Earnings Growth Potential: High
- ✿ Growth: 4.9%
- ✿ Annual Job Openings: 15,841
- ✿ Self-Employed: 0.4%
- ✿ Part-Time: 5.0%

The job openings listed here are shared with Environmental Compliance Inspectors, with Equal Opportunity Representatives and Officers, with Government Property Inspectors and Investigators, and with Licensing Examiners and Inspectors.

Direct activities such as autopsies, pathological and toxicological analyses, and inquests relating to the investigation of deaths occurring within a legal jurisdiction to determine cause of death or to fix responsibility for accidental, violent, or unexplained deaths. Perform medico-legal examinations and autopsies, conducting preliminary examinations of the body in order to identify victims, to locate signs of trauma, and to identify factors that would indicate time of death. Inquire into the cause, manner, and circumstances of human deaths and establish the identities of deceased persons. Direct activities of workers who conduct autopsies, perform pathological and toxicological analyses, and prepare documents for permanent records. Complete death certificates, including the assignment of a cause and manner of death. Observe and record the positions and conditions of bodies and of related evidence. Collect and document any pertinent medical history information. Observe, record, and preserve any objects or personal property related to deaths, including objects such as medication containers and suicide notes. Complete reports and forms required to finalize cases. Remove or supervise removal of bodies from death scenes, using the proper equipment and supplies, and arrange for transportation to morgues. Testify at inquests, hearings, and court trials. Interview persons present at death scenes to obtain information useful in determining the manner of death. Provide information concerning the circumstances of death to relatives of the deceased. Locate and document information regarding the next of kin, including their relationship to the deceased and the status of notification attempts. Confer with officials of public health and law enforcement agencies in order to coordinate interdepartmental activities. Inventory personal effects, such as jewelry or wallets, that are recovered from bodies. Coordinate the release of personal effects to authorized persons and facilitate the disposition of unclaimed corpses and personal effects. Arrange for the next of kin to be notified of deaths. Record the disposition of minor children, as well as details of arrangements made for their care. Collect wills, burial instructions, and other documentation needed for investigations and for handling of

the remains. Witness and certify deaths that are the result of a judicial order.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.01. Managerial Work in Medical and Health Services. **Other Jobs in This Work Group:** Medical and Health Services Managers.

Skills: Science; Management of Financial Resources; Reading Comprehension; Critical Thinking; Management of Personnel Resources; Speaking; Management of Material Resources; Writing.

Education and Training Program: Public Administration. **Related Knowledge/Courses:** Medicine and Dentistry; Biology; Psychology; Therapy and Counseling; Chemistry; Law and Government.

Work Environment: More often indoors than outdoors; contaminants; disease or infections; hazardous equipment; using hands on objects, tools, or controls.

Dentists, General

Diagnose and treat diseases, injuries, and malformations of teeth and gums and related oral structures. May treat diseases of nerve, pulp, and other dental tissues affecting vitality of teeth. Use masks, gloves, and safety glasses to protect themselves and their patients from infectious diseases. Administer anesthetics to limit the amount of pain experienced by patients during procedures. Examine teeth, gums, and related tissues, using dental instruments, X rays, and other diagnostic equipment, to evaluate dental

health, diagnose diseases or abnormalities, and plan appropriate treatments. Formulate plan of treatment for patient's teeth and mouth tissue. Use air turbine and hand instruments, dental appliances, and surgical implements. Advise and instruct patients regarding preventive dental care, the causes and treatment of dental problems, and oral health-care services. Design, make, and fit prosthodontic appliances such as space maintainers, bridges, and dentures or write fabrication instructions or prescriptions for denturists and dental technicians. Diagnose and treat diseases, injuries, and malformations of teeth, gums, and related oral structures and provide preventive and corrective services. Fill pulp chamber and canal with endodontic materials. Write prescriptions for antibiotics and other medications. Analyze and evaluate dental needs to determine changes and trends in patterns of dental disease. Treat exposure of pulp by pulp capping, removal of pulp from pulp chamber, or root canal, using dental instruments. Eliminate irritating margins of fillings and correct occlusions, using dental instruments. Perform oral and periodontal surgery on the jaw or mouth. Remove diseased tissue, using surgical instruments. Apply fluoride and sealants to teeth. Manage business, employing and supervising staff and handling paperwork and insurance claims. Bleach, clean, or polish teeth to restore natural color. Plan, organize, and maintain dental health programs. Produce and evaluate dental health educational materials.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.03. Dentistry. **Other Jobs in This Work Group:**

Dental Assistants; Dental Hygienists; Oral and Maxillofacial Surgeons; Orthodontists; Prosthodontists.

Skills: Science; Management of Financial Resources; Management of Material Resources; Equipment Selection; Complex Problem Solving; Reading Comprehension; Service Orientation; Management of Personnel Resources.

Education and Training Programs: Dentistry (DDS, DMD); Dental Clinical Sciences, General (MS, PhD); Advanced General Dentistry (Cert, MS, PhD); Oral Biology and Oral Pathology (MS,

PhD); Dental Public Health and Education (Cert, MS/MPH, PhD/DPH); Dental Materials (MS, PhD); Pediatric Dentistry/Pedodontics (Cert, MS, PhD); Dental Public Health Specialty; Pedodontics Specialty. **Related Knowledge/Courses:** Medicine and Dentistry; Biology; Psychology; Chemistry; Personnel and Human Resources; Economics and Accounting.

Work Environment: Indoors; contaminants; radiation; disease or infections; sitting; using hands on objects, tools, or controls.

Diagnostic Medical Sonographers

- ✿ Personality Code: ISR
- ✿ Education/Training Required: Associate degree
- ✿ Annual Earnings: \$59,860
- ✿ Beginning Wage: \$42,250
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 19.1%
- ✿ Annual Job Openings: 3,211
- ✿ Self-Employed: 1.1%
- ✿ Part-Time: 17.3%

Produce ultrasonic recordings of internal organs for use by physicians. Provide sonograms and oral or written summaries of technical findings to physicians for use in medical diagnosis. Decide which images to include, looking for differences between healthy and pathological areas. Operate ultrasound equipment to produce and record images of the motion, shape, and composition of blood, organs, tissues, and bodily masses such as fluid accumulations. Select appropriate equipment settings and adjust patient positions to obtain the best sites and angles. Observe screens during scans to ensure that images produced are satisfactory for diagnostic purposes, making adjustments to equipment as required. Prepare patients for exams by explaining procedures, transferring them to ultrasound tables, scrubbing skin and applying gel, and positioning them properly. Observe and care for patients throughout examinations to ensure

their safety and comfort. Obtain and record accurate patient histories, including prior test results and information from physical examinations. Determine whether scope of exams should be extended, based on findings. Maintain records that include patient information; sonographs and interpretations; files of correspondence; publications and regulations; or quality assurance records such as pathology, biopsy, or post-operative reports. Record and store suitable images, using camera unit connected to the ultrasound equipment. Coordinate work with physicians and other health-care team members, including providing assistance during invasive procedures. Perform clerical duties such as scheduling exams and special procedures, keeping records, and archiving computerized images. Perform legal and ethical duties, including preparing safety and accident reports, obtaining written consent from patients to perform invasive procedures, and reporting symptoms of abuse and neglect. Clean, check, and maintain sonographic equipment, submitting maintenance requests or performing minor repairs as necessary. Supervise and train students and other medical sonographers. Maintain stock and supplies, preparing supplies for special examinations and ordering supplies when necessary. Process and code film from procedures and complete appropriate documentation.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.06. Medical Technology. **Other**

Jobs in This Work Group: Biological Technicians; Cardiovascular Technologists and Technicians; Medical and Clinical Laboratory Technicians; Medical and Clinical Laboratory Technologists; Medical Equipment Preparers; Medical Records and Health Information Technicians; Nuclear Medicine Technologists; Opticians, Dispensing; Orthotists and Prosthetists; Radiologic Technicians; Radiologic Technologists; Radiologic Technologists and Technicians.

Skills: Operation Monitoring; Service Orientation; Systems Analysis; Systems Evaluation.

Education and Training Programs: Diagnostic Medical Sonography/Sonographer and Ultrasound Technician; Allied Health Diagnostic, Intervention,

and Treatment Professions, Other. **Related Knowledge/Courses:** Medicine and Dentistry; Physics; Biology; Psychology; Customer and Personal Service; Clerical Practices.

Work Environment: Indoors; cramped work space, awkward positions; disease or infections; using hands on objects, tools, or controls; bending or twisting the body; repetitive motions.

Electrical Engineers

- ✿ Personality Code: IR
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$79,240
- ✿ Beginning Wage: \$51,220
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 6.3%
- ✿ Annual Job Openings: 6,806
- ✿ Self-Employed: 2.1%
- ✿ Part-Time: 2.0%

Design, develop, test, or supervise the manufacturing and installation of electrical equipment, components, or systems for commercial, industrial, military, or scientific use. Confer with engineers, customers, and others to discuss existing or potential engineering projects and products. Design, implement, maintain, and improve electrical instruments, equipment, facilities, components, products, and systems for commercial, industrial, and domestic purposes. Operate computer-assisted engineering and design software and equipment to perform engineering tasks. Direct and coordinate manufacturing, construction, installation, maintenance, support, documentation, and testing activities to ensure compliance with specifications, codes, and customer requirements. Perform detailed calculations to compute and establish manufacturing, construction, and installation standards and specifications. Inspect completed installations and observe operations to ensure conformance to design and equipment specifications and compliance with operational and safety

standards. Plan and implement research methodology and procedures to apply principles of electrical theory to engineering projects. Prepare specifications for purchase of materials and equipment. Supervise and train project team members as necessary. Investigate and test vendors' and competitors' products. Oversee project production efforts to assure projects are completed satisfactorily, on time, and within budget. Prepare and study technical drawings, specifications of electrical systems, and topographical maps to ensure that installation and operations conform to standards and customer requirements. Investigate customer or public complaints, determine nature and extent of problem, and recommend remedial measures. Plan layout of electric-power-generating plants and distribution lines and stations. Assist in developing capital project programs for new equipment and major repairs. Develop budgets, estimating labor, material, and construction costs. Compile data and write reports regarding existing and potential engineering studies and projects. Collect data relating to commercial and residential development, population, and power system interconnection to determine operating efficiency of electrical systems. Conduct field surveys and study maps, graphs, diagrams, and other data to identify and correct power system problems.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering. **Other Jobs in This Work Group:** Aerospace Engineers; Biomedical Engineers; Chemical Engineers; Civil Engineers; Computer Hardware Engineers; Electronics Engineers, Except Computer; Marine Architects; Marine Engineers; Marine Engineers and Naval Architects; Materials Engineers; Mechanical Engineers; Nuclear Engineers.

Skills: Technology Design; Science; Systems Analysis; Troubleshooting; Systems Evaluation; Equipment Selection; Management of Material Resources; Programming.

Education and Training Program: Electrical, Electronic, and Communications Engineering. **Related Knowledge/Courses:** Engineering and Technology;

Design; Physics; Telecommunications; Computers and Electronics; Mathematics.

Work Environment: Indoors; sitting.

Electronics Engineers, Except Computer

- Personality Code: IR
- Education/Training Required: Bachelor's degree
- Annual Earnings: \$83,340
- Beginning Wage: \$53,710
- Earnings Growth Potential: Medium
- Growth: 3.7%
- Annual Job Openings: 5,699
- Self-Employed: 2.2%
- Part-Time: 2.0%

Research, design, develop, and test electronic components and systems for commercial, industrial, military, or scientific use, utilizing knowledge of electronic theory and materials properties. Design electronic circuits and components for use in fields such as telecommunications, aerospace guidance and propulsion control, acoustics, or instruments and controls. Design electronic components, software, products, or systems for commercial, industrial, medical, military, or scientific applications. Provide technical support and instruction to staff or customers regarding equipment standards, assisting with specific, difficult in-service engineering. Operate computer-assisted engineering and design software and equipment to perform engineering tasks. Analyze system requirements, capacity, cost, and customer needs to determine feasibility of project and develop system plan. Confer with engineers, customers, vendors, or others to discuss existing and potential engineering projects or products. Review and evaluate work of others inside and outside the organization to ensure effectiveness, technical adequacy, and compatibility in the resolution of complex engineering problems. Determine material and equipment needs and order supplies.

Inspect electronic equipment, instruments, products, and systems to ensure conformance to specifications, safety standards, and applicable codes and regulations. Evaluate operational systems, prototypes, and proposals and recommend repair or design modifications based on factors such as environment, service, cost, and system capabilities. Prepare documentation containing information such as confidential descriptions and specifications of proprietary hardware and software, product development and introduction schedules, product costs, and information about product performance weaknesses. Direct and coordinate activities concerned with manufacture, construction, installation, maintenance, operation, and modification of electronic equipment, products, and systems. Develop and perform operational, maintenance, and testing procedures for electronic products, components, equipment, and systems. Plan and develop applications and modifications for electronic properties used in components, products, and systems to improve technical performance. Plan and implement research, methodology, and procedures to apply principles of electronic theory to engineering projects. Prepare engineering sketches and specifications for construction, relocation, and installation of equipment, facilities, products, and systems.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering.

Education and Training Program: Electrical, Electronic, and Communications Engineering. **Related Knowledge/Courses:** Engineering and Technology;

Design; Physics; Computers and Electronics; Telecommunications; Production and Processing.

Work Environment: Indoors; noisy; sitting.

Engineering Teachers, Postsecondary

- ✿ Personality Code: IRS
- ✿ Education/Training Required: Doctoral degree
- ✿ Annual Earnings: \$79,510
- ✿ Beginning Wage: \$43,090
- ✿ Earnings Growth Potential: High
- ✿ Growth: 22.9%
- ✿ Annual Job Openings: 5,565
- ✿ Self-Employed: 0.4%
- ✿ Part-Time: 27.8%

Teach courses pertaining to the application of physical laws and principles of engineering for the development of machines, materials, instruments, processes, and services. Includes teachers of subjects such as chemical, civil, electrical, industrial, mechanical, mineral, and petroleum engineering. Includes both teachers primarily engaged in teaching and those who do a combination of both teaching and research. Prepare and deliver lectures to undergraduate and/or graduate students on topics such as mechanics, hydraulics, and robotics. Keep abreast of developments in their field by reading current literature, talking with colleagues, and participating in professional conferences. Supervise undergraduate and/or graduate teaching, internship, and research work. Evaluate and grade students' classwork, laboratory work, assignments, and papers. Conduct research in a particular field of knowledge and publish findings in professional journals, books, and/or electronic media. Prepare course materials such as syllabi, homework assignments, and handouts. Compile, administer, and grade examinations or assign this work to others. Write grant proposals to procure external research funding. Supervise students' laboratory work. Initiate, facilitate,

and moderate class discussions. Maintain regularly scheduled office hours to advise and assist students. Plan, evaluate, and revise curricula, course content, and course materials and methods of instruction. Advise students on academic and vocational curricula and on career issues. Maintain student attendance records, grades, and other required records. Collaborate with colleagues to address teaching and research issues. Select and obtain materials and supplies such as textbooks and laboratory equipment. Participate in student recruitment, registration, and placement activities. Serve on academic or administrative committees that deal with institutional policies, departmental matters, and academic issues. Perform administrative duties such as serving as department head. Provide professional consulting services to government and/or industry. Compile bibliographies of specialized materials for outside reading assignments. Act as advisers to student organizations. Participate in campus and community events.

GOE—Interest Area/Cluster: 05. Education and Training. **Work Group:** 05.03. Environmental Engineers

- ⌘ Personality Code: IRC
- ⌘ Education/Training Required: Bachelor's degree
- ⌘ Annual Earnings: \$72,350
- ⌘ Beginning Wage: \$44,090
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 25.4%
- ⌘ Annual Job Openings: 5,003
- ⌘ Self-Employed: 2.7%
- ⌘ Part-Time: 3.0%

Design, plan, or perform engineering duties in the prevention, control, and remediation of environmental health hazards, using various engineering disciplines. Work may include waste treatment, site remediation, or pollution control technology. Collaborate with environmental scientists, planners, hazardous waste technicians, engineers, and other specialists, and experts in law and business to address environmental problems. Inspect industrial and municipal facilities and programs to evaluate operational effectiveness and ensure compliance with environmental regulations. Prepare, review, and update environmental investigation and recommendation reports. Design and supervise the development of systems processes or equipment for control, management, or remediation of water, air, or soil quality. Provide environmental engineering assistance in network analysis, regulatory analysis, and planning or reviewing database development. Obtain, update, and maintain plans, permits, and standard operating procedures. Provide technical-level support for environmental remediation and litigation projects, including remediation system design and determination of regulatory applicability. Monitor progress of environmental improvement programs. Inform company employees and other interested parties of environmental issues. Advise corporations and government agencies of procedures to follow in cleaning up contaminated sites to protect people and the environment. Develop proposed project objectives and targets, and report to management on progress in

attaining them. Request bids from suppliers or consultants. Advise industries and government agencies about environmental policies and standards. Assess the existing or potential environmental impact of land use projects on air, water, and land. Assist in budget implementation, forecasts, and administration. Serve on teams conducting multimedia inspections at complex facilities, providing assistance with planning, quality assurance, safety inspection protocols, and sampling. Coordinate and manage environmental protection programs and projects, assigning and evaluating work. Maintain, write, and revise quality assurance documentation and procedures. Provide administrative support for projects by collecting data, providing project documentation, training staff, and performing other general administrative duties.

GOE—Interest Area/Cluster: 01. Agriculture and Natural Resources. **Work Group:** 01.02. Resource Science/Engineering for Plants, Animals, and the Environment. **Other Jobs in This Work Group:** Agricultural Engineers; Animal Scientists; Conservation Scientists; Foresters; Mining and Geological Engineers, Including Mining Safety Engineers; Petroleum Engineers; Range Managers; Soil and Plant Scientists; Soil and Water Conservationists; Zoologists and Wildlife Biologists.

Skills: Management of Financial Resources; Systems Analysis; Mathematics; Systems Evaluation; Management of Personnel Resources; Writing; Operation Monitoring; Complex Problem Solving.

Education and Training Program: Environmental/Environmental Health Engineering. **Related Knowledge/Courses:** Engineering and Technology; Physics; Design; Chemistry; Building and Construction; Biology.

Work Environment: Indoors; sitting.

Environmental Science and Protection Technicians, Including Health

- ⦿ Personality Code: IRC
- ⦿ Education/Training Required: Associate degree
- ⦿ Annual Earnings: \$39,370
- ⦿ Beginning Wage: \$25,090
- ⦿ Earnings Growth Potential: Medium
- ⦿ Growth: 28.0%
- ⦿ Annual Job Openings: 8,404
- ⦿ Self-Employed: 1.5%
- ⦿ Part-Time: 19.4%

Perform laboratory and field tests to monitor the environment and investigate sources of pollution, including those that affect health. Under direction of environmental scientists or specialists, may collect samples of gases, soil, water, and other materials for testing and take corrective actions as assigned. Collect samples of gases, soils, water, industrial wastewater, and asbestos products to conduct tests on pollutant levels and identify sources of pollution. Record test data and prepare reports, summaries, and charts that interpret test results. Develop and implement programs for monitoring of environmental pollution and radiation. Discuss test results and analyses with customers. Set up equipment or stations to monitor and collect pollutants from sites such as smokestacks, manufacturing plants, or mechanical equipment. Maintain files, such as hazardous waste databases, chemical usage data, personnel exposure information, and diagrams showing equipment locations. Develop testing procedures or direct activities of workers in laboratory. Prepare samples or photomicrographs for testing and analysis. Calibrate microscopes and test instruments. Examine and analyze material for presence and concentration of contaminants such as asbestos, using variety of microscopes. Calculate amount of pollutant in samples or compute air pollution or gas flow in industrial processes, using chemical and mathematical formulas. Make

recommendations to control or eliminate unsafe conditions at workplaces or public facilities. Weigh, analyze, and measure collected sample particles such as lead, coal dust, or rock to determine concentration of pollutants. Provide information and technical and program assistance to government representatives, employers, and the general public on the issues of public health, environmental protection, or workplace safety. Conduct standardized tests to ensure materials and supplies used throughout power supply systems meet processing and safety specifications. Perform statistical analysis of environmental data. Respond to and investigate hazardous conditions or spills or outbreaks of disease or food poisoning, collecting samples for analysis. Determine amounts and kinds of chemicals to use in destroying harmful organisms and removing impurities from purification systems. Inspect sanitary conditions at public facilities. Inspect workplaces to ensure the absence of health and safety hazards such as high noise levels, radiation, or lighting that is too bright or dim.

GOE—Interest Area/Cluster: 01. Agriculture and Natural Resources. **Work Group:** 01.03. Resource Technologies for Plants, Animals, and the Environment. **Other Jobs in This Work Group:** Agricultural and Food Science Technicians; Agricultural Technicians; Food Science Technicians; Food Scientists and Technologists; Geological and Petroleum Technicians; Geological Sample Test Technicians; Geophysical Data Technicians.

Skills: Quality Control Analysis; Systems Analysis; Systems Evaluation; Operation Monitoring; Operation and Control; Science.

Education and Training Programs: Environmental Studies; Environmental Science; Physical Science Technologies/Technicians, Other; Science Technologies/Technicians, Other. **Related Knowledge/Courses:** Biology; Chemistry; Geography; Physics; Computers and Electronics; Building and Construction.

Work Environment: More often indoors than outdoors; noisy; very hot or cold; contaminants; sitting.

Environmental Scientists and Specialists, Including Health

- ⌘ Personality Code: IRC
- ⌘ Education/Training Required: Master's degree
- ⌘ Annual Earnings: \$58,380
- ⌘ Beginning Wage: \$35,630
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 25.1%
- ⌘ Annual Job Openings: 6,961
- ⌘ Self-Employed: 2.2%
- ⌘ Part-Time: 5.3%

Conduct research or perform investigation for the purpose of identifying, abating, or eliminating sources of pollutants or hazards that affect either the environment or the health of the population. Using knowledge of various scientific disciplines, may collect, synthesize, study, report, and take action based on data derived from measurements or observations of air, food, soil, water, and other sources. Collect, synthesize, analyze, manage, and report environmental data such as pollution emission measurements, atmospheric monitoring measurements, meteorological and mineralogical information, and soil or water samples. Analyze data to determine validity, quality, and scientific significance, and to interpret correlations between human activities and environmental effects. Communicate scientific and technical information to the public, organizations, or internal audiences through oral briefings, written documents, workshops, conferences, training sessions, or public hearings. Provide scientific and technical guidance, support, coordination, and oversight to governmental agencies, environmental programs, industry, or the public. Process and review environmental permits, licenses, and related materials. Review and implement environmental technical standards, guidelines, policies, and formal regulations that meet all appropriate requirements. Prepare charts or graphs from data samples, providing summary information on the environmental relevance of the data. Determine data collection

methods to be employed in research projects and surveys. Investigate and report on accidents affecting the environment. Research sources of pollution to determine their effects on the environment and to develop theories or methods of pollution abatement or control. Provide advice on proper standards and regulations or the development of policies, strategies, and codes of practice for environmental management. Monitor effects of pollution and land degradation, and recommend means of prevention or control. Supervise or train students, environmental technologists, technicians, or other related staff. Evaluate violations or problems discovered during inspections to determine appropriate regulatory actions or to provide advice on the development and prosecution of regulatory cases. Conduct environmental audits and inspections, and investigations of violations. Plan and develop research models, using knowledge of mathematical and statistical concepts. Conduct applied research on environmental topics such as waste control and treatment and pollution abatement methods.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.03. Life Sciences. **Other Jobs in This Work Group:** Biochemists and Biophysicists; Biologists; Epidemiologists; Medical Scientists, Except Epidemiologists; Microbiologists.

Skills: Science; Systems Analysis; Systems Evaluation; Writing; Reading Comprehension; Management of Personnel Resources; Management of Material Resources; Operation Monitoring.

Education and Training Programs: Environmental Studies; Environmental Science. **Related Knowledge/Courses:** Biology; Geography; Chemistry; Physics; Law and Government; Engineering and Technology.

Work Environment: More often indoors than outdoors; noisy; sitting.

Family and General Practitioners

- ✿ Personality Code: IS
- ✿ Education/Training Required: First professional degree
- ✿ Annual Earnings: More than \$145,600
- ✿ Beginning Wage: \$67,400
- ✿ Earnings Growth Potential: Cannot be calculated
- ✿ Growth: 14.2%
- ✿ Annual Job Openings: 38,027

The job openings listed here are shared with Anesthesiologists; Internists, General; Obstetricians and Gynecologists; Pediatricians, General; Psychiatrists; and Surgeons.

Diagnose, treat, and help prevent diseases and injuries that commonly occur in the general population. Prescribe or administer treatment, therapy, medication, vaccination, and other specialized medical care to treat or prevent illness, disease, or injury. Order, perform, and interpret tests and analyze records, reports, and examination information to diagnose patients' condition. Monitor the patients' conditions and progress and re-evaluate treatments as necessary. Explain procedures and discuss test results or prescribed treatments with patients. Collect, record, and maintain patient information, such as medical history, reports, and examination results. Advise patients and community members concerning diet, activity, hygiene, and disease prevention. Refer patients to medical specialists or other practitioners when necessary. Direct and coordinate activities of nurses, students, assistants, specialists, therapists, and other medical staff. Coordinate work with nurses, social workers, rehabilitation therapists, pharmacists, psychologists, and other health-care providers. Deliver babies. Operate on patients to remove, repair, or improve functioning of diseased or injured body parts and systems. Plan, implement, or administer health programs or standards in hospital,

business, or community for information, prevention, or treatment of injury or illness. Prepare reports for government or management of birth, death, and disease statistics; workforce evaluations; or medical status of individuals. Conduct research to study anatomy and develop or test medications, treatments, or procedures to prevent or control disease or injury.

GOE—Interest Area/Cluster: 08. Health Science. **Work Group:** 08.02. Medicine and Surgery. **Other Jobs in This Work Group:**

Anesthesiologists; Internists, General; Medical Assistants; Medical Transcriptionists; Obstetricians and Gynecologists; Pediatricians, General; Pharmacists; Pharmacy Aides; Pharmacy Technicians; Physician Assistants; Psychiatrists; Registered Nurses; Surgeons; Surgical Technologists.

Skills: Science; Social Perceptiveness; Reading Comprehension; Complex Problem Solving; Persuasion; Service Orientation; Management of Financial Resources; Active Learning.

Education and Training Programs: Medicine (MD); Osteopathic Medicine/Osteopathy (DO); Family Medicine. **Related Knowledge/Courses:** Medicine and Dentistry; Biology; Therapy and Counseling; Psychology; Sociology and Anthropology; Chemistry.

Work Environment: Indoors; disease or infections; standing; using hands on objects, tools, or controls.

Forensic Science Technicians

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$47,680
- ✿ Beginning Wage: \$29,170
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 30.7%
- ✿ Annual Job Openings: 3,074
- ✿ Self-Employed: 1.3%
- ✿ Part-Time: 19.4%

Collect, identify, classify, and analyze physical evidence related to criminal investigations. Perform tests on weapons or substances such as fiber, hair, and tissue to determine significance to investigation. May testify as expert witnesses on evidence or crime laboratory techniques. May serve as specialists in area of expertise, such as ballistics, fingerprinting, handwriting, or biochemistry. Testify in court about investigative and analytical methods and findings. Keep records and prepare reports detailing findings, investigative methods, and laboratory techniques. Interpret laboratory findings and test results to identify and classify substances, materials, and other evidence collected at crime scenes. Operate and maintain laboratory equipment and apparatus. Prepare solutions, reagents, and sample formulations needed for laboratory work. Analyze and classify biological fluids, using DNA typing or serological techniques. Collect evidence from crime scenes, storing it in conditions that preserve its integrity. Identify and quantify drugs and poisons found in biological fluids and tissues, in foods, and at crime scenes. Analyze handwritten and machine-produced textual evidence to decipher altered or obliterated text or to determine authorship, age, or source. Reconstruct crime scenes to determine relationships among pieces of evidence. Examine DNA samples to determine if they match other samples. Collect impressions of dust from surfaces to obtain and identify fingerprints. Analyze gunshot residue and bullet paths to determine how shootings occurred. Visit morgues, examine scenes of crimes, or contact other sources to obtain evidence or information to be used in investigations. Examine physical evidence such as hair, fiber, wood, or soil residues to obtain information about its source and composition. Determine types of bullets used in shooting and whether they were fired from a specific weapon. Examine firearms to determine mechanical condition and legal status, performing restoration work on damaged firearms to obtain information such as serial numbers. Confer with ballistics, fingerprinting, handwriting, document, electronics, medical, chemical, or metallurgical experts concerning evidence and its interpretation. Interpret the pharmacological effects of a drug or a combination of drugs

on an individual. Compare objects such as tools with impression marks to determine whether a specific object is responsible for a specific mark.

GOE—Interest Area/Cluster: 12. Law and Public Safety. **Work Group:** 12.04. Law Enforcement and Public Safety. **Other Jobs in This Work Group:** Bailiffs; Correctional Officers and Jailers; Criminal Investigators and Special Agents; Detectives and Criminal Investigators; Fire Investigators; Parking Enforcement Workers; Police and Sheriff's Patrol Officers; Police Detectives; Police Identification and Records Officers; Police Patrol Officers; Sheriffs and Deputy Sheriffs; Transit and Railroad Police.

Skills: Science; Quality Control Analysis; Troubleshooting; Speaking; Equipment Selection; Active Learning; Reading Comprehension; Monitoring.

Education and Training Program: Forensic Science and Technology. **Related Knowledge/Courses:** Chemistry; Law and Government; Biology; Public Safety and Security; English Language; Clerical Practices.

Work Environment: Indoors; contaminants; disease or infections; hazardous conditions; sitting.

Geoscientists, Except Hydrologists and Geographers

- Personality Code: IR
- Education/Training Required: Master's degree
- Annual Earnings: \$75,800
- Beginning Wage: \$41,020
- Earnings Growth Potential: High
- Growth: 21.9%
- Annual Job Openings: 2,471
- Self-Employed: 2.2%
- Part-Time: 5.3%

Study the composition, structure, and other physical aspects of the Earth. May use knowledge of geology, physics, and mathematics in exploration for oil, gas, minerals, or underground water

or in waste disposal, land reclamation, or other environmental problems. May study the Earth's internal composition, atmospheres, and oceans and its magnetic, electrical, and gravitational forces. Includes mineralogists, crystallographers, paleontologists, stratigraphers, geodesists, and seismologists. Analyze and interpret geological, geochemical, and geophysical information from sources such as survey data, well logs, bore holes, and aerial photos. Locate and estimate probable natural gas, oil, and mineral ore deposits and underground water resources, using aerial photographs, charts, or research and survey results. Plan and conduct geological, geochemical, and geophysical field studies and surveys, sample collection, or drilling and testing programs used to collect data for research or application. Analyze and interpret geological data, using computer software. Search for and review research articles or environmental, historical, and technical reports. Assess ground and surface water movement to provide advice regarding issues such as waste management, route and site selection, and the restoration of contaminated sites. Prepare geological maps, cross-sectional diagrams, charts, and reports concerning mineral extraction, land use, and resource management, using results of field work and laboratory research. Investigate the composition, structure, and history of the Earth's crust through the collection, examination, measurement, and classification of soils, minerals, rocks, or fossil remains. Conduct geological and geophysical studies to provide information for use in regional development, site selection, and development of public works projects. Measure characteristics of the Earth, such as gravity and magnetic fields, using equipment such as seismographs, gravimeters, torsion balances, and magnetometers. Inspect construction projects to analyze engineering problems, applying geological knowledge and using test equipment and drilling machinery. Design geological mine maps, monitor mine structural integrity, or advise and monitor mining crews. Identify risks for natural disasters such as mud slides, earthquakes, and volcanic eruptions, providing advice on mitigation of potential damage. Advise construction firms and government agencies on dam

and road construction, foundation design, or land use and resource management. Test industrial diamonds and abrasives, soil, or rocks to determine their geological characteristics, using optical, X-ray, heat, acid, and precision instruments.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.02. Physical Sciences. **Other Jobs in This Work Group:** Astronomers; Atmospheric and Space Scientists; Chemists; Geographers; Hydrologists; Materials Scientists; Physicists.

Skills: Systems Analysis; Science; Systems Evaluation; Mathematics; Writing; Operation Monitoring; Speaking.

Education and Training Programs: Geology/Earth Science, General; Geochemistry; Geophysics and Seismology; Paleontology; Geochemistry and Petrology; Oceanography, Chemical and Physical; Geological and Earth Sciences/Geosciences, Other.

Related Knowledge/Courses: Geography; Engineering and Technology; Physics; Chemistry; Mathematics; Design.

Work Environment: More often indoors than outdoors; sitting.

Hydrologists

- Personality Code: IR
- Education/Training Required: Master's degree

- Self-Employed: 2.4%
- Part-Time: 5.3%

Research the distribution, circulation, and physical properties of underground and surface waters; study the form and intensity of precipitation, its rate of infiltration into the soil, its movement

through the earth, and its return to the ocean and atmosphere. Study and document quantities, distribution, disposition, and development of underground and surface waters. Draft final reports describing research results, including illustrations, appendices, maps, and other attachments. Coordinate and supervise the work of professional and technical staff, including research assistants, technologists, and technicians. Prepare hydrogeologic evaluations of known or suspected hazardous waste sites and land treatment and feedlot facilities. Design and conduct scientific hydrogeological investigations to ensure that accurate and appropriate information is available for use in water resource management decisions. Study public water supply issues, including flood and drought risks, water quality, wastewater, and impacts on wetland habitats. Collect and analyze water samples as part of field investigations and/or to validate data from automatic monitors. Apply research findings to help minimize the environmental impacts of pollution, water-borne diseases, erosion, and sedimentation. Measure and graph phenomena such as lake levels, stream flows, and changes in water volumes. Investigate complaints or conflicts related to the alteration of public waters, gathering information, recommending alternatives, informing participants of progress, and preparing draft orders. Develop or modify methods of conducting hydrologic studies. Answer questions and provide technical assistance and information to contractors and/or the public regarding issues such as well drilling, code requirements, hydrology, and geology. Install, maintain, and calibrate instruments such as those that monitor water levels, rainfall, and sediments. Evaluate data and provide recommendations regarding the feasibility of municipal projects such as hydroelectric power plants, irrigation systems, flood warning systems, and waste treatment facilities. Conduct short-term and long-term climate assessments and study storm occurrences. Study and analyze the physical aspects of the Earth in terms of the hydrological components, including atmosphere, hydrosphere, and interior structure. Conduct research and communicate information to promote the conservation and preservation of water resources.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.02. Physical Sciences. **Other Jobs in This Work Group:** Astronomers; Atmospheric and Space Scientists; Chemists; Geographers; Geoscientists, Except Hydrologists and Geographers; Materials Scientists; Physicists.

Skills: Science; Programming; Management of Financial Resources; Mathematics; Management of Personnel Resources; Complex Problem Solving; Systems Analysis; Management of Material Resources.

Education and Training Programs: Geology/Earth Science, General; Hydrology and Water Resources Science; Oceanography, Chemical and Physical.

Related Knowledge/Courses: Geography; Physics; Engineering and Technology; Biology; Chemistry; Mathematics.

Work Environment: More often indoors than outdoors; sitting.

Industrial Engineers

- ✿ Personality Code: ICE
 - ✿ Education/Training Required: Bachelor's degree
 - ✿ Annual Earnings: \$71,430
 - ✿ Beginning Wage: \$46,340
 - ✿ Earnings Growth Potential: Medium
 - ✿ Growth: 20.3%

Design, develop, test, and evaluate integrated systems for managing industrial production processes, including human work factors, quality control, inventory control, logistics and material flow, cost analysis, and production coordination.

Analyze statistical data and product specifications to determine standards and establish quality and reliability objectives of finished product. Develop manufacturing methods, labor utilization standards, and cost analysis systems to promote efficient staff and

facility utilization. Recommend methods for improving utilization of personnel, material, and utilities. Plan and establish sequence of operations to fabricate and assemble parts or products and to promote efficient utilization. Apply statistical methods and perform mathematical calculations to determine manufacturing processes, staff requirements, and production standards. Coordinate quality control objectives and activities to resolve production problems, maximize product reliability, and minimize cost. Confer with vendors, staff, and management personnel regarding purchases, procedures, product specifications, manufacturing capabilities, and project status. Draft and design layout of equipment, materials, and workspace to illustrate maximum efficiency, using drafting tools and computer. Review production schedules, engineering specifications, orders, and related information to obtain knowledge of manufacturing methods, procedures, and activities. Communicate with management and user personnel to develop production and design standards. Estimate production cost and effect of product design changes for management review, action, and control. Formulate sampling procedures and designs and develop forms and instructions for recording, evaluating, and reporting quality and reliability data. Record or oversee recording of information to ensure currency of engineering drawings and documentation of production problems. Study operations sequence, material flow, functional statements, organization charts, and project information to determine worker functions and responsibilities. Direct workers engaged in product measurement, inspection, and testing activities to ensure quality control and reliability. Implement methods and procedures for disposition of discrepant material and defective or damaged parts and assess cost and responsibility.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.08. Industrial and Safety Engineering. **Other Jobs in This Work Group:** Fire-Prevention and Protection Engineers; Health and Safety Engineers, Except Mining Safety Engineers and Inspectors; Industrial Safety and Health Engineers; Product Safety Engineers.

Skills: Equipment Selection; Technology Design; Troubleshooting; Installation; Systems Analysis; Mathematics; Judgment and Decision Making; Negotiation.

Education and Training Program: Industrial Engineering. **Related Knowledge/Courses:** Engineering and Technology; Design; Production and Processing; Mechanical Devices; Physics; Mathematics.

Work Environment: Indoors; noisy; contaminants; hazardous equipment; more often sitting than standing.

Industrial-Organizational Psychologists

- ✿ Personality Code: IEA
- ✿ Education/Training Required: Master's degree
- ✿ Annual Earnings: \$80,820
- ✿ Beginning Wage: \$38,910
- ✿ Earnings Growth Potential: Very high
- ✿ Growth: 21.3%
- ✿ Annual Job Openings: 118
- ✿ Self-Employed: 39.3%
- ✿ Part-Time: 24.0%

Apply principles of psychology to personnel, administration, management, sales, and marketing problems. Activities may include policy planning; employee screening, training, and development; and organizational development and analysis. May work with management to reorganize the work setting to improve worker productivity. Develop and implement employee selection and placement programs. Analyze job requirements and content to establish criteria for classification, selection, training, and other related personnel functions. Develop interview techniques, rating scales, and psychological tests used to assess skills, abilities, and interests for the purpose of employee selection, placement, and promotion. Advise management concerning personnel, managerial, and marketing policies and practices and their potential effects on

organizational effectiveness and efficiency. Analyze data, using statistical methods and applications, to evaluate the outcomes and effectiveness of workplace programs. Assess employee performance. Observe and interview workers to obtain information about the physical, mental, and educational requirements of jobs as well as information about aspects such as job satisfaction. Write reports on research findings and implications to contribute to general knowledge and to suggest potential changes in organizational functioning. Facilitate organizational development and change. Identify training and development needs. Formulate and implement training programs, applying principles of learning and individual differences. Study organizational effectiveness, productivity, and efficiency, including the nature of workplace supervision and leadership. Conduct research studies of physical work environments, organizational structures, communication systems, group interactions, morale, and motivation to assess organizational functioning. Counsel workers about job and career-related issues. Study consumers' reactions to new products and package designs, and to advertising efforts, using surveys and tests. Participate in mediation and dispute resolution.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.04. Social Sciences. **Other Jobs in This Work Group:** Anthropologists; Anthropologists and Archeologists; Archeologists; Economists; Historians; Political Scientists; School Psychologists; Sociologists.

Skills: Science; Systems Evaluation; Judgment and Decision Making; Writing; Monitoring; Time Management; Coordination; Critical Thinking.

Education and Training Programs: Psychology, General; Industrial and Organizational Psychology. **Related Knowledge/Courses:** Personnel and Human Resources; Psychology; Sociology and Anthropology; Education and Training; Therapy and Counseling; Mathematics.

Work Environment: Indoors; sitting.

Internists, General

- Personality Code: ISR
- Education/Training Required: First professional degree
- Annual Earnings: More than \$145,600
- Beginning Wage: \$89,130
- Earnings Growth Potential: Cannot be calculated
- Growth: 14.2%
- Annual Job Openings: 38,027
- Self-Employed: 14.7%
- Part-Time: 8.1%

The job openings listed here are shared with Anesthesiologists; Family and General Practitioners; Obstetricians and Gynecologists; Pediatricians, General; Psychiatrists; and Surgeons.

Diagnose and provide non-surgical treatment of diseases and injuries of internal organ systems. Provide care mainly for adults who have a wide range of problems associated with the internal organs. Treat internal disorders, such as hypertension; heart disease; diabetes; and problems of the lung, brain, kidney, and gastrointestinal tract. Analyze records, reports, test results, or examination information to diagnose medical condition of patient. Prescribe or administer medication, therapy, and other specialized medical care to treat or prevent illness, disease, or injury. Provide and manage long-term, comprehensive medical care, including diagnosis and non-surgical treatment of diseases, for adult patients in an office or hospital. Manage and treat common health problems, such as infections, influenza and pneumonia, as well as serious, chronic, and complex illnesses, in adolescents, adults, and the elderly. Monitor patients' conditions and progress and re-evaluate treatments as necessary. Collect, record, and maintain patient information, such as medical history, reports, and examination results. Make diagnoses when different illnesses occur together or in situations where the diagnosis may be obscure. Explain procedures

and discuss test results or prescribed treatments with patients. Advise patients and community members concerning diet, activity, hygiene, and disease prevention. Refer patient to medical specialist or other practitioner when necessary. Immunize patients to protect them from preventable diseases. Advise surgeon of a patient's risk status and recommend appropriate intervention to minimize risk. Direct and coordinate activities of nurses, students, assistants, specialists, therapists, and other medical staff. Provide consulting services to other doctors caring for patients with special or difficult problems. Operate on patients to remove, repair, or improve functioning of diseased or injured body parts and systems. Plan, implement, or administer health programs in hospitals, businesses, or communities for prevention and treatment of injuries or illnesses. Conduct research to develop or test medications, treatments, or procedures to prevent or control disease or injury. Prepare government or organizational reports on birth, death, and disease statistics; workforce evaluations; or the medical status of individuals.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.02. Medicine and Surgery. **Other Jobs in This Work Group:**

Anesthesiologists; Family and General Practitioners; Medical Assistants; Medical Transcriptionists; Obstetricians and Gynecologists; Pediatricians, General; Pharmacists; Pharmacy Aides; Pharmacy Technicians; Physician Assistants; Psychiatrists; Registered Nurses; Surgeons; Surgical Technologists.

Skills: Science; Judgment and Decision Making; Complex Problem Solving; Reading Comprehension; Social Perceptiveness; Service Orientation; Management of Financial Resources; Persuasion.

Education and Training Programs: Cardiology; Critical Care Medicine; Endocrinology and Metabolism; Gastroenterology; Geriatric Medicine; Hematology; Infectious Disease; Internal Medicine; Nephrology; Neurology; Nuclear Medicine; Oncology; Pulmonary Disease; Rheumatology. **Related Knowledge/Courses:** Medicine and Dentistry;

Biology; Therapy and Counseling; Psychology; Chemistry; Education and Training.

Work Environment: Indoors; disease or infections; standing.

Management Analysts

- ⦿ Personality Code: IEC
- ⦿ Education/Training Required: Work experience plus degree
- ⦿ Annual Earnings: \$71,150
- ⦿ Beginning Wage: \$40,860
- ⦿ Earnings Growth Potential: High
- ⦿ Growth: 21.9%
- ⦿ Annual Job Openings: 125,669
- ⦿ Self-Employed: 27.0%
- ⦿ Part-Time: 13.2%

Conduct organizational studies and evaluations, design systems and procedures, conduct work simplifications and measurement studies, and prepare operations and procedures manuals to assist management in operating more efficiently and effectively. Includes program analysts and management consultants. Gather and organize information on problems or procedures. Analyze data gathered and develop solutions or alternative methods of proceeding. Confer with personnel concerned to ensure successful functioning of newly implemented systems or procedures. Develop and implement records management program for filing, protection, and retrieval of records and assure compliance with program. Review forms and reports and confer with management and users about format, distribution, and purpose and to identify problems and improvements. Document findings of study and prepare recommendations for implementation of new systems, procedures, or organizational changes. Interview personnel and conduct on-site observation to ascertain unit functions; work performed; and methods, equipment, and personnel used. Prepare manuals and train workers in use of new forms, reports, procedures, or equipment according to

organizational policy. Design, evaluate, recommend, and approve changes of forms and reports. Plan study of work problems and procedures, such as organizational change, communications, information flow, integrated production methods, inventory control, or cost analysis. Recommend purchase of storage equipment and design area layout to locate equipment in space available.

GOE—Interest Area/Cluster: 04. Business and Administration. **Work Group:** 04.05. Accounting, Auditing, and Analytical Support. **Other Jobs in This Work Group:** Accountants; Accountants and Auditors; Auditors; Budget Analysts; Industrial Engineering Technicians; Logisticians; Operations Research Analysts.

Skills: Operations Analysis; Systems Evaluation; Installation; Management of Financial Resources; Quality Control Analysis; Operation and Control; Systems Analysis; Equipment Maintenance.

Education and Training Programs: Business/Commerce, General; Business Administration and Management, General. **Related Knowledge/Courses:** Personnel and Human Resources; Clerical Practices; Sales and Marketing; Economics and Accounting; Customer and Personal Service; Administration and Management.

Work Environment: Indoors; sitting.

Market Research Analysts

- Personality Code: IEC
 - Education/Training Required: Bachelor's degree
 - Annual Earnings: \$60,300
 - Beginning Wage: \$33,310
 - Earnings Growth Potential: High
 - Growth: 20.1%
 - Annual Job Openings: 45,015
 - Self-Employed: 6.6%
 - Part-Time: 12.5%
-

Research market conditions in local, regional, or national areas to determine potential sales of a product or service. May gather information on competitors, prices, sales, and methods of marketing and distribution. May use survey results to create a marketing campaign based on regional preferences and buying habits. Collect and analyze data on customer demographics, preferences, needs, and buying habits to identify potential markets and factors affecting product demand. Prepare reports of findings, illustrating data graphically and translating complex findings into written text. Measure and assess customer and employee satisfaction. Forecast and track marketing and sales trends, analyzing collected data. Seek and provide information to help companies determine their position in the marketplace. Measure the effectiveness of marketing, advertising, and communications programs and strategies. Conduct research on consumer opinions and marketing strategies, collaborating with marketing professionals, statisticians, pollsters, and other professionals. Attend staff conferences to provide management with information and proposals concerning the promotion, distribution, design, and pricing of company products or services. Gather data on competitors and analyze their prices, sales, and method of marketing and distribution. Monitor industry statistics and follow trends in trade literature. Devise and evaluate methods and procedures for collecting data, such as surveys, opinion polls, or questionnaires, or arrange to obtain existing data. Develop and implement procedures for identifying advertising needs. Direct trained survey interviewers.

GOE—Interest Area/Cluster: 06. Finance and Insurance. **Work Group:** 06.02. Finance/Insurance Investigation and Analysis. **Other Jobs in This Work Group:** Appraisers and Assessors of Real Estate; Appraisers, Real Estate; Assessors; Claims Adjusters, Examiners, and Investigators; Claims Examiners, Property and Casualty Insurance; Cost Estimators; Credit Analysts; Financial Analysts; Insurance Adjusters, Examiners, and Investigators; Insurance Appraisers, Auto Damage; Insurance Underwriters; Loan Counselors; Loan Officers; Survey Researchers.

Skills: Writing; Negotiation; Persuasion; Judgment and Decision Making; Reading Comprehension; Management of Financial Resources; Coordination; Active Listening.

Education and Training Programs: Economics, General; Applied Economics; Econometrics and Quantitative Economics; International Economics; Business/Managerial Economics; Marketing Research. **Related Knowledge/Courses:** Sales and Marketing; Communications and Media; Administration and Management; Economics and Accounting; Clerical Practices; Computers and Electronics.

Work Environment: Indoors; sitting.

Mathematicians

- ⦿ Personality Code: ICA
- ⦿ Education/Training Required: Doctoral degree
- ⦿ Annual Earnings: \$90,870
- ⦿ Beginning Wage: \$51,240
- ⦿ Earnings Growth Potential: High
- ⦿ Growth: 10.2%
- ⦿ Annual Job Openings: 473
- ⦿ Self-Employed: 0.0%
- ⦿ Part-Time: 5.6%

Conduct research in fundamental mathematics or in application of mathematical techniques to science, management, and other fields. Solve or direct solutions to problems in various fields by mathematical methods. Apply mathematical theories and techniques to the solution of practical problems in business, engineering, the sciences, or other fields. Develop computational methods for solving problems that occur in areas of science and engineering or that come from applications in business or industry. Maintain knowledge in the field by reading professional journals, talking with other mathematicians, and attending professional conferences. Perform computations and apply methods of numerical analysis to data. Develop mathematical or statistical models of phenomena to be used for analysis

or for computational simulation. Assemble sets of assumptions and explore the consequences of each set. Address the relationships of quantities, magnitudes, and forms through the use of numbers and symbols. Develop new principles and new relationships between existing mathematical principles to advance mathematical science. Design, analyze, and decipher encryption systems designed to transmit military, political, financial, or law-enforcement-related information in code. Conduct research to extend mathematical knowledge in traditional areas, such as algebra, geometry, probability, and logic.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.06. Mathematics and Data Analysis.

Other Jobs in This Work Group: Actuaries; Mathematical Technicians; Social Science Research Assistants; Statistical Assistants; Statisticians.

Skills: Programming; Science; Mathematics; Complex Problem Solving; Operations Analysis; Reading Comprehension; Critical Thinking; Active Learning.

Education and Training Programs: Mathematics, General; Algebra and Number Theory; Analysis and Functional Analysis; Geometry/Geometric Analysis; Topology and Foundations; Mathematics, Other; Applied Mathematics; Computational Mathematics; Applied Mathematics, Other; Mathematical Statistics and Probability; Mathematics and Statistics, Other; Logic. **Related Knowledge/Courses:** Mathematics; Physics; Computers and Electronics; Engineering and Technology; English Language.

Work Environment: Indoors; sitting.

Mechanical Engineers

- ⌘ Personality Code: IRC
- ⌘ Education/Training Required: Bachelor's degree
- ⌘ Annual Earnings: \$72,300
- ⌘ Beginning Wage: \$46,560
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 4.2%
- ⌘ Annual Job Openings: 12,394
- ⌘ Self-Employed: 2.2%
- ⌘ Part-Time: 1.9%

Perform engineering duties in planning and designing tools, engines, machines, and other mechanically functioning equipment. Oversee installation, operation, maintenance, and repair of such equipment as centralized heat, gas, water, and steam systems. Read and interpret blueprints, technical drawings, schematics, and computer-generated reports. Confer with engineers and other personnel to implement operating procedures, resolve system malfunctions, and provide technical information. Research and analyze customer design proposals, specifications, manuals, and other data to evaluate the feasibility, cost, and maintenance requirements of designs or applications. Specify system components or direct modification of products to ensure conformance with engineering design and performance specifications. Research, design, evaluate, install, operate, and maintain mechanical products, equipment, systems, and processes to meet requirements, applying knowledge of engineering principles. Investigate equipment failures and difficulties to diagnose faulty operation and to make recommendations to maintenance crew. Assist drafters in developing the structural design of products, using drafting tools or computer-assisted design (CAD) or drafting equipment and software. Provide feedback to design engineers on customer problems and needs. Oversee installation, operation, maintenance, and repair to ensure that machines and equipment are installed and functioning according to specifications. Conduct research that tests and analyzes the feasibility,

design, operation, and performance of equipment, components, and systems. Recommend design modifications to eliminate machine or system malfunctions. Develop and test models of alternate designs and processing methods to assess feasibility, operating condition effects, possible new applications, and necessity of modification. Develop, coordinate, and monitor all aspects of production, including selection of manufacturing methods, fabrication, and operation of product designs. Estimate costs and submit bids for engineering, construction, or extraction projects and prepare contract documents. Perform personnel functions such as supervision of production workers, technicians, technologists, and other engineers or design of evaluation programs. Solicit new business and provide technical customer service. Establish and coordinate the maintenance and safety procedures, service schedule, and supply of materials required to maintain machines and equipment in the prescribed condition.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.07. Research and Design Engineering.

Other Jobs in This Work Group: Aerospace Engineers; Biomedical Engineers; Chemical Engineers; Civil Engineers; Computer Hardware Engineers; Electrical Engineers; Electronics Engineers, Except Computer; Marine Architects; Marine Engineers; Marine Engineers and Naval Architects; Materials Engineers; Nuclear Engineers.

Skills: Science; Operations Analysis; Installation; Complex Problem Solving; Mathematics; Systems Analysis; Judgment and Decision Making; Coordination.

Education and Training Program: Mechanical Engineering. **Related Knowledge/Courses:** Design; Engineering and Technology; Mechanical Devices; Production and Processing; Physics; Administration and Management.

Work Environment: Indoors; sitting.

Medical and Clinical Laboratory Technologists

- ✿ Personality Code: IRC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$51,720
- ✿ Beginning Wage: \$35,460
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 12.4%
- ✿ Annual Job Openings: 11,457
- ✿ Self-Employed: 0.7%
- ✿ Part-Time: 14.3%

Perform complex medical laboratory tests for diagnosis, treatment, and prevention of disease. May train or supervise staff. Conduct chemical analysis of bodily fluids, including blood, urine, and spinal fluid, to determine presence of normal and abnormal components. Analyze laboratory findings to check the accuracy of the results. Enter data from analysis of medical tests and clinical results into computer for storage. Operate, calibrate, and maintain equipment used in quantitative and qualitative analysis, such as spectrophotometers, calorimeters, flame photometers, and computer-controlled analyzers. Establish and monitor quality assurance programs and activities to ensure the accuracy of laboratory results. Set up, clean, and maintain laboratory equipment. Provide technical information about test results to physicians, family members, and researchers. Supervise, train, and direct lab assistants, medical and clinical laboratory technicians and technologists, and other medical laboratory workers engaged in laboratory testing. Collect and study blood samples to determine the number of cells, their morphology, or their blood group, blood type, and compatibility for transfusion purposes, using microscopic techniques. Analyze samples of biological material for chemical content or reaction. Cultivate, isolate, and assist in identifying microbial organisms, and perform various tests on these microorganisms. Obtain, cut, stain, and mount biological material on slides for microscopic study and diagnosis, following standard laboratory

procedures. Select and prepare specimen and media for cell culture, using aseptic technique and knowledge of medium components and cell requirements. Develop, standardize, evaluate, and modify procedures, techniques, and tests used in the analysis of specimens and in medical laboratory experiments. Harvest cell cultures at optimum time based on knowledge of cell cycle differences and culture conditions. Conduct medical research under direction of microbiologist or biochemist.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.06. Medical Technology. **Other**

Jobs in This Work Group: Biological Technicians; Cardiovascular Technologists and Technicians; Diagnostic Medical Sonographers; Medical and Clinical Laboratory Technicians; Medical Equipment Preparers; Medical Records and Health Information Technicians; Nuclear Medicine Technologists; Opticians, Dispensing; Orthotists and Prosthetists; Radiologic Technicians; Radiologic Technologists; Radiologic Technologists and Technicians.

Skills: Operation Monitoring; Management of Personnel Resources; Quality Control Analysis.

Education and Training Programs: Cytotechnology/Cytotechnologist; Clinical Laboratory Science/Medical Technology/Technologist; Histologic Technology/Histotechnologist; Cytogenetics/Genetics/Clinical Genetics Technology/Technologist; Renal/Dialysis Technologist/Technician; Clinical/Medical Laboratory Science and Allied Professions, Other.

Related Knowledge/Courses: Biology; Chemistry; Medicine and Dentistry; Mechanical Devices; Clerical Practices; Mathematics.

Work Environment: Indoors; contaminants; disease or infections; hazardous conditions; using hands on objects, tools, or controls; repetitive motions.

Medical Scientists, Except Epidemiologists

- ⌘ Personality Code: IRA
- ⌘ Education/Training Required: Doctoral degree
- ⌘ Annual Earnings: \$64,200
- ⌘ Beginning Wage: \$36,730
- ⌘ Earnings Growth Potential: High
- ⌘ Growth: 20.2%
- ⌘ Annual Job Openings: 10,596
- ⌘ Self-Employed: 2.0%
- ⌘ Part-Time: 5.9%

Conduct research dealing with the understanding of human diseases and the improvement of human health. Engage in clinical investigation or other research, production, technical writing, or related activities. Conduct research to develop methodologies, instrumentation, and procedures for medical application, analyzing data and presenting findings. Plan and direct studies to investigate human or animal disease, preventive methods, and treatments for disease. Follow strict safety procedures when handling toxic materials to avoid contamination. Evaluate effects of drugs, gases, pesticides, parasites, and microorganisms at various levels. Teach principles of medicine and medical and laboratory procedures to physicians, residents, students, and technicians. Prepare and analyze organ, tissue, and cell samples to identify toxicity, bacteria, or microorganisms or to study cell structure. Standardize drug dosages, methods of immunization, and procedures for manufacture of drugs and medicinal compounds. Investigate cause, progress, life cycle, or mode of transmission of diseases or parasites. Confer with health department, industry personnel, physicians, and others to develop health safety standards and public health improvement programs. Study animal and human health and physiological processes. Consult with and advise physicians, educators, researchers, and others regarding medical applications of physics, biology, and chemistry. Use equipment such as atomic

absorption spectrometers, electron microscopes, flow cytometers, and chromatography systems.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.03. Life Sciences. **Other Jobs in This Work Group:** Biochemists and Biophysicists; Biologists; Environmental Scientists and Specialists, Including Health; Epidemiologists; Microbiologists.

Skills: Science; Management of Financial Resources; Judgment and Decision Making; Reading Comprehension; Writing; Time Management; Complex Problem Solving; Active Listening.

Education and Training Programs: Biomedical Sciences, General; Biochemistry; Biophysics; Molecular Biology; Cell/Cellular Biology and Histology; Anatomy; Medical Microbiology and Bacteriology; Immunology; Human/Medical Genetics; Physiology, General; Molecular Physiology; Cell Physiology; Endocrinology; Reproductive Biology; Neurobiology and Neurophysiology; Cardiovascular Science; others. **Related Knowledge/Courses:** Biology; Medicine and Dentistry; Chemistry; Communications and Media; Personnel and Human Resources; Sociology and Anthropology.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls.

Network and Computer Systems Administrators

- ⌘ Personality Code: IRC
- ⌘ Education/Training Required: Bachelor's degree
- ⌘ Annual Earnings: \$64,690
- ⌘ Beginning Wage: \$39,970
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 27.0%
- ⌘ Annual Job Openings: 37,010
- ⌘ Self-Employed: 0.4%
- ⌘ Part-Time: 3.1%

The job openings listed here are shared with Computer Security Specialists.

Install, configure, and support organizations' local area networks (LANs), wide area networks (WANs), and Internet systems or segments of network systems. Maintain network hardware and software. Monitor networks to ensure network availability to all system users and perform necessary maintenance to support network availability. May supervise other network support and client server specialists and plan, coordinate, and implement network security measures. Maintain and administer computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations. Perform data backups and disaster recovery operations. Diagnose, troubleshoot, and resolve hardware, software, or other network and system problems, and replace defective components when necessary. Plan, coordinate, and implement network security measures to protect data, software, and hardware. Configure, monitor, and maintain e-mail applications or virus protection software. Operate master consoles to monitor the performance of computer systems and networks, and to coordinate computer network access and use. Load computer tapes and disks, and install software and printer paper or forms. Design, configure, and test computer hardware, networking software, and operating system software. Monitor network performance to determine whether adjustments need to be made and to determine where changes will need to be made in the future. Confer with network users about how to solve existing system problems. Research new technologies by attending seminars, reading trade articles, or taking classes, and implement or recommend the implementation of new technologies. Analyze equipment performance records to determine the need for repair or replacement. Implement and provide technical support for voice services and equipment such as private branch exchanges, voice mail systems, and telecom systems. Maintain inventories of parts for emergency repairs. Recommend changes to improve systems and network configurations, and determine

hardware or software requirements related to such changes. Gather data pertaining to customer needs, and use the information to identify, predict, interpret, and evaluate system and network requirements. Train people in computer system use. Coordinate with vendors and with company personnel to facilitate purchases. Perform routine network startup and shutdown procedures, and maintain control records. Maintain logs related to network functions, as well as maintenance and repair records.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.01. Managerial Work in Information Technology. **Other Jobs in This Work Group:** Computer and Information Systems Managers.

Skills: Programming; Systems Analysis; Systems Evaluation; Operation Monitoring; Quality Control Analysis; Troubleshooting; Management of Personnel Resources; Operation and Control.

Education and Training Programs: Computer and Information Sciences and Support Services, Other; Computer and Information Sciences, General; Computer and Information Systems Security; Computer Systems Analysis/Analyst; Computer Systems Networking and Telecommunications; Information Science/Studies; System Administration/Administrator; System, Networking, and LAN/WAN Management/Manager. **Related Knowledge/Courses:** Telecommunications; Computers and Electronics; Clerical Practices; Administration and Management; Engineering and Technology.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Network Systems and Data Communications Analysts

- ⌘ Personality Code: IC
- ⌘ Education/Training Required: Bachelor's degree
- ⌘ Annual Earnings: \$68,220
- ⌘ Beginning Wage: \$40,100
- ⌘ Earnings Growth Potential: High
- ⌘ Growth: 53.4%
- ⌘ Annual Job Openings: 35,086
- ⌘ Self-Employed: 17.5%
- ⌘ Part-Time: 8.6%

Analyze, design, test, and evaluate network systems, such as local area networks (LAN); wide area networks (WAN); and Internet, intranet, and other data communications systems. Perform network modeling, analysis, and planning. Research and recommend network and data communications hardware and software. Includes telecommunications specialists who deal with the interfacing of computer and communications equipment. May supervise computer programmers. Maintain needed files by adding and deleting files on the network server and backing up files to guarantee their safety in the event of problems with the network. Monitor system performance and provide security measures, troubleshooting, and maintenance as needed. Assist users to diagnose and solve data communication problems. Set up user accounts, regulating and monitoring file access to ensure confidentiality and proper use. Design and implement systems, network configurations, and network architecture, including hardware and software technology, site locations, and integration of technologies. Maintain the peripherals, such as printers, that are connected to the network. Identify areas of operation that need upgraded equipment such as modems, fiber-optic cables, and telephone wires. Train users in use of equipment. Develop and write procedures for installation, use, and troubleshooting of communications hardware and software. Adapt and modify existing software to meet specific needs. Work

with other engineers, systems analysts, programmers, technicians, scientists, and top-level managers in the design, testing, and evaluation of systems. Test and evaluate hardware and software to determine efficiency, reliability, and compatibility with existing system and make purchase recommendations. Read technical manuals and brochures to determine which equipment meets establishment requirements. Consult customers, visit workplaces, or conduct surveys to determine present and future user needs. Visit vendors, attend conferences or training, and study technical journals to keep up with changes in technology.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Information Technology Specialties. **Other Jobs in This Work Group:**

Computer and Information Scientists, Research; Computer Operators; Computer Programmers; Computer Security Specialists; Computer Software Engineers, Applications; Computer Software Engineers, Systems Software; Computer Support Specialists; Computer Systems Analysts; Computer Systems Engineers/Architects; Database Administrators; Network Designers; Software Quality Assurance Engineers and Testers; Web Administrators; Web Developers.

Skills: Installation; Technology Design; Troubleshooting; Systems Analysis; Programming; Systems Evaluation; Management of Material Resources; Operations Analysis.

Education and Training Programs: Computer and Information Sciences, General; Information Technology; Computer Systems Analysis/Analyst; Computer Systems Networking and Telecommunications; System, Networking, and LAN/WAN Management/Manager; Computer and Information Systems Security. **Related Knowledge/Courses:** Telecommunications; Computers and Electronics; Customer and Personal Service; Engineering and Technology; Education and Training; Design.

Work Environment: Indoors; sitting.

Nuclear Medicine Technologists

- ✿ Personality Code: IRS
- ✿ Education/Training Required: Associate degree
- ✿ Annual Earnings: \$64,670
- ✿ Beginning Wage: \$47,370
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 14.8%

Prepare, administer, and measure radioactive isotopes in therapeutic, diagnostic, and tracer studies, using a variety of radioisotope equipment. Prepare stock solutions of radioactive materials and calculate doses to be administered by radiologists. Subject patients to radiation. Execute blood volume, red cell survival, and fat absorption studies, following standard laboratory techniques. Detect and map radiopharmaceuticals in patients' bodies, using a camera to produce photographic or computer images. Administer radiopharmaceuticals or radiation intravenously to detect or treat diseases, using radioisotope equipment, under direction of a physician. Produce computer-generated or film images for interpretation by physicians. Calculate, measure, and record radiation dosages or radiopharmaceuticals received, used, and disposed, using computers and following physicians' prescriptions. Perform quality control checks on laboratory equipment and cameras. Maintain and calibrate radioisotope and laboratory equipment. Dispose of radioactive materials and store radiopharmaceuticals, following radiation safety procedures. Process cardiac function studies, using computers. Prepare stock radiopharmaceuticals, adhering to safety standards that minimize radiation exposure to workers and patients. Record and process results of procedures. Explain test procedures and safety precautions to patients and provide them with assistance during test procedures. Gather information on patients' illnesses and medical histories to guide choices of diagnostic

procedures for therapies. Measure glandular activity, blood volume, red cell survival, and radioactivity of patient, using scanners, Geiger counters, scintillation counters, and other laboratory equipment. Train and supervise student or subordinate nuclear medicine technologists. Position radiation fields, radiation beams, and patients to allow for most effective treatment of patients' diseases, using computers. Add radioactive substances to biological specimens such as blood, urine, and feces to determine therapeutic drug or hormone levels. Develop treatment procedures for nuclear medicine treatment programs.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.06. Medical Technology. **Other Jobs in This Work Group:** Biological Technicians; Cardiovascular Technologists and Technicians; Diagnostic Medical Sonographers; Medical and Clinical Laboratory Technicians; Medical and Clinical Laboratory Technologists; Medical Equipment Preparers; Medical Records and Health Information Technicians; Opticians, Dispensing; Orthotists and Prosthetists; Radiologic Technicians; Radiologic Technologists; Radiologic Technologists and Technicians.

Skills: Operation Monitoring; Equipment Maintenance; Quality Control Analysis; Systems Analysis; Operation and Control; Systems Evaluation.

Education and Training Programs: Nuclear Medical Technology/Technologist; Radiation Protection/Health Physics Technician. **Related Knowledge/Courses:** Medicine and Dentistry; Biology; Chemistry; Physics; Customer and Personal Service; Therapy and Counseling.

Work Environment: Indoors; contaminants; radiation; disease or infections; standing; using hands on objects, tools, or controls.

Obstetricians and Gynecologists

Diagnose, treat, and help prevent diseases of women, especially those affecting the reproductive system and the process of childbirth. Care for and treat women during prenatal, natal, and postnatal periods. Explain procedures and discuss test results or prescribed treatments with patients. Treat diseases of female organs. Monitor patients' condition and progress and re-evaluate treatments as necessary. Perform cesarean sections or other surgical procedures as needed to preserve patients' health and deliver babies safely. Prescribe or administer therapy, medication, and other specialized medical care to treat or prevent illness, disease, or injury. Analyze records, reports, test results, or examination information to diagnose medical condition of patient. Collect, record, and maintain patient information, such as medical histories, reports, and examination results. Advise patients and community members concerning diet, activity, hygiene, and disease prevention. Refer patient to medical specialist or other practitioner when necessary. Consult with, or provide consulting services to, other physicians. Direct and coordinate activities of nurses, students, assistants, specialists, therapists, and other medical staff. Plan, implement, or administer health programs in

hospitals, businesses, or communities for prevention and treatment of injuries or illnesses. Prepare government and organizational reports on birth, death, and disease statistics; workforce evaluations; or the medical status of individuals. Conduct research to develop or test medications, treatments, or procedures to prevent or control disease or injury.

GOE—Interest Area/Cluster: 08. Health Science. **Work Group:** 08.02. Medicine and Surgery.

Formulate and apply mathematical modeling and other optimizing methods, using a computer to develop and interpret information that assists management with decision making, policy formulation, or other managerial functions. May develop related software, service, or products. Frequently concentrates on collecting and analyzing data and developing decision support software. May develop and supply optimal time, cost, or logistics networks for program evaluation, review, or implementation. Formulate mathematical or simulation models of problems, relating constants and variables, restrictions, alternatives, and conflicting objectives and their numerical parameters. Collaborate with others in the organization to ensure successful implementation of chosen problem solutions. Analyze information obtained from management in order to conceptualize and define operational problems. Perform validation and testing of models to ensure adequacy; reformulate models as necessary. Collaborate with senior managers and decision-makers to identify and solve a variety of problems and to clarify management objectives. Define data requirements; then gather and validate information, applying judgment and statistical tests. Study and analyze information about alternative courses of action in order to determine which plan will offer the best outcomes. Prepare management reports defining and evaluating problems and recommending solutions. Break systems into their component parts, assign numerical values to each component, and examine the mathematical relationships between them. Specify manipulative or computational methods to be applied to models. Observe the current system in operation and gather and analyze information about each of the parts of component problems, using a variety of sources. Design, conduct, and evaluate experimental operational models in cases where models cannot be developed from existing data. Develop and apply time and cost networks in order to plan, control, and review large projects. Develop business methods and procedures, including accounting systems, file systems, office systems, logistics systems, and production schedules.

GOE—Interest Area/Cluster: 04. Business and Administration. **Work Group:** 04.05. Accounting, Auditing, and Analytical Support. **Other Jobs in This Work Group:** Accountants; Accountants and Auditors; Auditors; Budget Analysts; Industrial Engineering Technicians; Logisticians; Management Analysts.

Skills: Programming; Systems Analysis; Operations Analysis; Science; Mathematics; Systems Evaluation; Complex Problem Solving; Judgment and Decision Making.

Education and Training Programs: Educational Evaluation and Research; Educational Statistics and Research Methods; Operations Research; Management Science, General; Management Sciences and Quantitative Methods, Other. **Related Knowledge/Courses:** Mathematics; Engineering and Technology; Computers and Electronics; Production and Processing; Economics and Accounting; Administration and Management.

Work Environment: Indoors; sitting.

Optometrists

Diagnose, manage, and treat conditions and diseases of the human eye and visual system. Examine eyes and visual systems, diagnose problems or impairments, prescribe corrective lenses, and provide treatment. May prescribe therapeutic drugs to treat specific eye conditions. Examine eyes, using observation, instruments, and pharmaceutical

agents, to determine visual acuity and perception, focus, and coordination and to diagnose diseases and other abnormalities such as glaucoma or color blindness. Prescribe medications to treat eye diseases if state laws permit. Analyze test results and develop treatment plans. Prescribe, supply, fit, and adjust eyeglasses, contact lenses, and other vision aids. Educate and counsel patients on contact lens care, visual hygiene, lighting arrangements, and safety factors. Remove foreign bodies from eyes. Consult with and refer patients to ophthalmologist or other health care practitioners if additional medical treatment is determined necessary. Provide patients undergoing eye surgeries such as cataract and laser vision correction, with pre- and post-operative care. Prescribe therapeutic procedures to correct or conserve vision. Provide vision therapy and low vision rehabilitation.

Examine, diagnose, and treat dental malocclusions and oral cavity anomalies. Design and fabricate appliances to realign teeth and jaws to produce and maintain normal function and to improve appearance. Fit dental appliances in patients' mouths to alter the position and relationship of teeth and jaws and to realign teeth. Study diagnostic records such as medical/dental histories, plaster models of the teeth, photos of a patient's face and teeth, and X rays to develop patient treatment plans. Diagnose teeth and jaw or other dental-facial abnormalities. Examine patients to assess abnormalities of jaw development, tooth position, and other dental-facial structures. Prepare diagnostic and treatment records. Adjust dental appliances periodically to produce and maintain normal function. Provide patients with proposed treatment plans and cost estimates. Instruct dental officers and technical assistants in orthodontic procedures and techniques. Coordinate orthodontic services with other dental and medical services. Design and fabricate appliances, such as space maintainers, retainers, and labial and lingual arch wires.

GOE—Interest Area/Cluster: 08. Health Science. **Work Group:** 08.03. Dentistry. **Other Jobs in This Work Group:** Dental Assistants; Dental Hygienists; Dentists, General; Oral and Maxillofacial Surgeons; Prosthodontists.

Diagnose, treat, and help prevent children's diseases and injuries. Examine patients or order, perform, and interpret diagnostic tests to obtain information on medical condition and determine diagnosis. Examine children regularly to assess their growth and development. Prescribe or administer treatment, therapy, medication, vaccination, and other specialized medical care to treat or prevent illness, disease, or injury in infants and children. Collect, record, and maintain patient information, such

as medical history, reports, and examination results. Advise patients, parents or guardians, and community members concerning diet, activity, hygiene, and disease prevention. Treat children who have minor illnesses, acute and chronic health problems, and growth and development concerns. Explain procedures and discuss test results or prescribed treatments with patients and parents or guardians. Monitor patients' condition and progress and re-evaluate treatments as necessary. Plan and execute medical care programs to aid in the mental and physical growth and development of children and adolescents. Refer patient to medical specialist or other practitioner when necessary. Direct and coordinate activities of nurses, students, assistants, specialists, therapists, and other medical staff. Provide consulting services to other physicians. Plan, implement, or administer health programs or standards in hospital, business, or community for information, prevention, or treatment of injury or illness. Operate on patients to remove, repair, or improve functioning of diseased or injured body parts and systems. Conduct research to study anatomy and develop or test medications, treatments, or procedures to prevent or control disease or injury. Prepare reports for government or management of birth, death, and disease statistics; workforce evaluations; or medical status of individuals.

GOE—Interest Area/Cluster: 08. Health Science.

Compound and dispense medications, following prescriptions issued by physicians, dentists, or other authorized medical practitioners.

Review prescriptions to assure accuracy, to ascertain the needed ingredients, and to evaluate their suitability. Provide information and advice regarding drug interactions, side effects, dosage, and proper medication storage. Analyze prescribing trends to monitor patient compliance and to prevent excessive usage or harmful interactions. Order and purchase pharmaceutical supplies, medical supplies, and drugs, maintaining stock and storing and handling it properly. Maintain records, such as pharmacy files; patient profiles; charge system files; inventories; control records for radioactive nuclei; and registries of poisons, narcotics, and controlled drugs. Provide specialized services to help patients manage conditions such as diabetes, asthma, smoking cessation, or high blood pressure. Advise customers on the selection of medication brands, medical equipment, and health-care supplies. Collaborate with other health-care professionals to plan, monitor, review, and evaluate

the quality and effectiveness of drugs and drug regimens, providing advice on drug applications and characteristics. Compound and dispense medications as prescribed by doctors and dentists by calculating, weighing, measuring, and mixing ingredients or oversee these activities. Offer health promotion and prevention activities—for example, training people to use devices such as blood-pressure or diabetes monitors. Refer patients to other health professionals and agencies when appropriate. Prepare sterile solutions and infusions for use in surgical procedures, emergency rooms, or patients' homes. Plan, implement, and maintain procedures for mixing, packaging, and labeling pharmaceuticals according to policy and legal requirements to ensure quality, security, and proper disposal. Assay radiopharmaceuticals, verify rates of disintegration, and calculate the volume required to produce the desired results to ensure proper dosages. Manage pharmacy operations, hiring and supervising staff, performing administrative duties, and buying and selling nonpharmaceutical merchandise. Work in hospitals, clinics, or for health maintenance organizations (HMOs), dispensing prescriptions, serving as a medical team consultant, or specializing in specific drug therapy areas such as oncology or nuclear pharmacotherapy.

GOE—Interest Area/Cluster: 08. Health Science. **Work Group:** 08.02. Medicine and Surgery.

Conduct research into phases of physical phenomena, develop theories and laws on basis of observation and experiments, and devise methods to apply laws and theories to industry and other fields. Perform complex calculations as part of the analysis and evaluation of data, using computers. Describe and express observations and conclusions in mathematical terms. Analyze data from research conducted to detect and measure physical phenomena. Report experimental results by writing papers for scientific journals or by presenting information at scientific conferences. Design computer simulations to model physical data so that it can be better understood. Collaborate with other scientists in the design, development, and testing of experimental, industrial, or medical equipment, instrumentation, and procedures. Direct testing and monitoring of contamination of radioactive equipment, and recording of personnel and plant area radiation exposure data.

Observe the structure and properties of matter, and the transformation and propagation of energy, using equipment such as masers, lasers, and telescopes, in order to explore and identify the basic principles governing these phenomena. Develop theories and laws on the basis of observation and experiments, and apply these theories and laws to problems in areas such as nuclear energy, optics, and aerospace technology. Teach physics to students. Develop manufacturing, assembly, and fabrication processes of lasers, masers, infrared, and other light-emitting and light-sensitive devices. Conduct application evaluations and analyze results in order to determine commercial, industrial, scientific, medical, military, or other uses for electro-optical devices. Develop standards of permissible concentrations of radioisotopes in liquids and gases. Conduct research pertaining to potential environmental impacts of atomic energy-related industrial development in order to determine licensing qualifications. Advise authorities of procedures to be followed in radiation incidents or hazards, and assist in civil defense planning.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.02. Physical Sciences. **Other Jobs in This Work Group:**

Diagnose and treat diseases and deformities of the human foot. Treat bone, muscle, and joint disorders affecting the feet. Diagnose diseases and deformities of the foot, using medical histories, physical examinations, X rays, and laboratory test results. Prescribe medications, corrective devices, physical therapy, or surgery. Treat conditions such as corns, calluses, ingrown nails, tumors, shortened tendons, bunions, cysts, and abscesses by surgical methods. Advise patients about treatments and foot care techniques necessary for prevention of future problems. Refer patients to physicians when symptoms indicative of systemic disorders, such as arthritis or diabetes, are observed in feet and legs. Correct deformities by means of plaster casts and strapping. Make and fit prosthetic appliances. Perform administrative duties such as hiring employees, ordering supplies, and keeping records. Educate the public about the benefits of foot care through techniques such as speaking engagements, advertising, and other forums. Treat deformities, using mechanical methods, such as whirlpool or paraffin baths, and electrical methods, such as shortwave and low-voltage currents.

Study the origin, development, and operation of political systems. Research a wide range of subjects, such as relations between the United States and foreign countries, the beliefs and institutions of foreign nations, or the politics of small towns or a major metropolis. May study topics such as public opinion, political decision making, and ideology. May analyze the structure and operation of governments, as well as various political entities. May conduct public opinion surveys, analyze election results, or analyze public documents. Teach political science. Disseminate research results through academic publications, written reports, or public presentations. Identify issues for research and analysis. Develop and test theories, using information from interviews, newspapers, periodicals, case law, historical papers, polls, and/or statistical sources. Maintain current knowledge of government policy decisions. Collect, analyze, and interpret data such as election results and public opinion surveys; report on findings, recommendations, and conclusions. Interpret

and analyze policies; public issues; legislation; and the operations of governments, businesses, and organizations. Evaluate programs and policies and make related recommendations to institutions and organizations. Write drafts of legislative proposals and prepare speeches, correspondence, and policy papers for governmental use. Forecast political, economic, and social trends. Consult with and advise government officials, civic bodies, research agencies, the media, political parties, and others concerned with political issues. Provide media commentary and/or criticism related to public policy and political issues and events.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.04. Construct oral prostheses to replace missing teeth and other oral structures to correct natural and acquired deformation of mouth and jaws; to restore and maintain oral function, such as chewing and speaking; and to improve appearance.

Replace missing teeth and associated oral structures with permanent fixtures, such as crowns and bridges, or removable fixtures, such as dentures. Fit prostheses to patients, making any necessary adjustments and modifications. Design and fabricate dental prostheses or supervise dental technicians and laboratory bench workers who construct the devices. Measure and take impressions of patients' jaws and teeth to determine the shape and size of dental prostheses, using face bows, dental articulators, recording devices, and other materials. Collaborate with general dentists, specialists, and other health professionals to develop solutions to dental and oral health concerns. Repair, reline, and/or rebase dentures. Restore function and aesthetics to traumatic injury victims or to individuals with diseases or birth defects. Use bonding technology on the surface of the teeth to change tooth shape or to close gaps. Treat facial pain and jaw joint problems. Place veneers onto teeth to conceal defects. Bleach discolored teeth to brighten and whiten them.

GOE—Interest Area/Cluster: 08. Health Science. **Work Group:** 08.03. Dentistry. **Other Jobs in This Work Group:** Dental Assistants; Dental Hygienists;

Dentists, General; Oral and Maxillofacial Surgeons; Orthodontists.

The job openings listed here are shared with Clinical Psychologists and with Counseling Psychologists.

Investigate processes of learning and teaching and develop psychological principles and techniques applicable to educational problems. Compile and interpret students' test results, along with information from teachers and parents, to diagnose conditions and to help assess eligibility for special services. Report any pertinent information to the proper authorities in cases of child endangerment, neglect, or abuse. Assess an individual child's needs, limitations, and potential, using observation, review of school records, and consultation with parents and school personnel. Select, administer, and score psychological tests. Provide consultation to parents, teachers, administrators, and others on topics such as learning styles and behavior modification techniques. Promote an understanding of child development and its relationship to learning and behavior. Collaborate with other educational professionals to develop teaching strategies and school programs. Counsel children and families to help solve conflicts and problems in learning and adjustment. Develop individualized educational plans in collaboration with teachers and other staff members. Maintain student records, including special education reports, confidential records, records of services provided, and behavioral data. Serve as a resource to help families and schools deal with crises, such as separation and loss. Attend workshops, seminars, or professional meetings to remain informed

of new developments in school psychology. Design classes and programs to meet the needs of special students. Refer students and their families to appropriate community agencies for medical, vocational, or social services. Initiate and direct efforts to foster tolerance, understanding, and appreciation of diversity in school communities. Collect and analyze data to evaluate the effectiveness of academic programs and other services, such as behavioral management systems. Provide educational programs on topics such as classroom management, teaching strategies, or parenting skills. Conduct research to generate new knowledge that can be used to address learning and behavior issues.

Education and Training Programs: Educational Assessment, Testing, and Measurement; Psychology, General; Clinical Psychology; Counseling Psychology; Developmental and Child Psychology; School Psychology; Psychoanalysis and Psychotherapy.

Related Knowledge/Courses: Therapy and Counseling; Psychology; Sociology and Anthropology; Philosophy and Theology; Education and Training; Medicine and Dentistry.

Work Environment: Indoors; sitting.

Sociologists

- ⌘ Personality Code: IAS
- ⌘ Education/Training Required: Master's degree
- ⌘ Annual Earnings: \$61,140
- ⌘ Beginning Wage: \$36,740
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 10.0%
- ⌘ Annual Job Openings: 403
- ⌘ Self-Employed: 0.0%
- ⌘ Part-Time: 24.0%

Study human society and social behavior by examining the groups and social institutions that people form, as well as various social, religious, political, and business organizations. May study the behavior and interaction of groups, trace their origin and growth, and analyze the influence of group activities on individual members. Analyze and interpret data in order to increase the understanding of human social behavior. Prepare publications and reports containing research findings. Plan and conduct research to develop and test theories about societal issues such as crime, group relations, poverty, and aging. Collect data about the attitudes, values, and behaviors of people in groups, using observation, interviews, and review of documents. Develop, implement, and evaluate methods of data collection, such as questionnaires or interviews. Teach sociology. Direct work of statistical clerks, statisticians, and others who compile and evaluate research data. Consult with and advise individuals such as administrators, social workers, and legislators regarding social issues and policies, as well as the implications of research findings. Collaborate with research workers in other disciplines. Develop approaches to the solution of groups' problems based on research findings in sociology and related disciplines. Observe group interactions and role affiliations to collect data, identify problems, evaluate progress, and determine the need for additional change. Develop problem intervention procedures, utilizing techniques such as interviews,

consultations, role-playing, and participant observation of group interactions.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.04. Social Sciences. **Other Jobs in This Work Group:** Anthropologists; Anthropologists and Archeologists; Archeologists; Economists; Historians; Industrial-Organizational Psychologists; Political Scientists; School Psychologists.

Skills: Science; Writing; Management of Financial Resources; Reading Comprehension; Critical Thinking; Complex Problem Solving; Mathematics; Active Learning.

Education and Training Programs: Criminology; Demography and Population Studies; Sociology; Urban Studies/Affairs. **Related Knowledge/Courses:** Sociology and Anthropology; Philosophy and Theology; History and Archeology; Psychology; English Language; Mathematics.

Software Quality Assurance Engineers and Testers

- ⌘ Personality Code: ICR
- ⌘ Education/Training Required: Associate degree
- ⌘ Annual Earnings: \$71,510
- ⌘ Beginning Wage: \$37,600
- ⌘ Earnings Growth Potential: High
- ⌘ Growth: 15.1%
- ⌘ Annual Job Openings: 14,374
- ⌘ Self-Employed: 6.6%
- ⌘ Part-Time: 5.6%

The job openings listed here are shared with Computer Systems Engineers/Architects, with Network Designers, with Web Administrators, and with Web Developers.

Develop and execute software test plans in order to identify software problems and their causes. Design test plans, scenarios, scripts, or procedures.

Test system modifications to prepare for implementation. Document software defects, using a bug tracking system, and report defects to software developers. Develop testing programs that address areas such as database impacts, software scenarios, regression testing, negative testing, error or bug retests, or usability. Identify, analyze, and document problems with program function, output, online screens, or content. Monitor bug resolution efforts and track successes. Create or maintain databases of known test defects. Plan test schedules or strategies in accordance with project scope or delivery dates. Participate in product design reviews to provide input on functional requirements, product designs, schedules, or potential problems. Review software documentation to ensure technical accuracy, compliance, or completeness, or to mitigate risks. Document test procedures to ensure replicability and compliance with standards. Develop or specify standards, methods, or procedures to determine product quality or release readiness. Update automated test scripts to ensure currency. Investigate customer problems referred by technical support. Install, maintain, or use software testing programs. Provide feedback and recommendations to developers on software usability and functionality. Monitor program performance to ensure efficient and problem-free operations. Install and configure recreations of software production environments to allow testing of software performance. Collaborate with field staff or customers to evaluate or diagnose problems and recommend possible solutions. Conduct software compatibility tests with programs, hardware, operating systems, or network environments. Identify program deviance from standards, and suggest modifications to ensure compliance. Design or develop automated testing tools. Coordinate user or third party testing. Perform initial debugging procedures by reviewing configuration files, logs, or code pieces to determine breakdown sources. Visit beta testing sites to evaluate software performance. Evaluate or recommend software for testing or bug tracking.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Information Technology Specialties. **Other Jobs in This Work Group:**

Computer and Information Scientists, Research; Computer Operators; Computer Programmers; Computer Security Specialists; Computer Software Engineers, Applications; Computer Software Engineers, Systems Software; Computer Support Specialists; Computer Systems Analysts; Computer Systems Engineers/Architects; Database Administrators; Network Designers; Network Systems and Data Communications Analysts; Web Administrators; Web Developers.

Skills: Quality Control Analysis; Programming; Systems Analysis; Systems Evaluation; Troubleshooting; Technology Design; Operations Analysis; Writing.

Education and Training Programs: Computer and Information Sciences, General; Information Technology; Information Science/Studies; Computer Science; Computer and Information Sciences and Support Services, Other; Computer Engineering, General; Computer Software Engineering; Computer Engineering Technologies/Technicians, Other.

Surgeons

- Personality Code: IRS
- Education/Training Required: First professional degree
- Annual Earnings: More than \$145,600
- Beginning Wage: \$104,410
- Earnings Growth Potential: Cannot be calculated
- Growth: 14.2%
- Annual Job Openings: 38,027
- Self-Employed: 14.7%
- Part-Time: 8.1%

The job openings listed here are shared with Anesthesiologists; Family and General Practitioners; Internists, General; Obstetricians and Gynecologists; Pediatricians, General; and Psychiatrists.

Treat diseases, injuries, and deformities by invasive methods, such as manual manipulation, or by using instruments and appliances. Analyze patient's medical history, medication allergies, physical condition, and examination results to verify operation's necessity and to determine best procedure. Operate on patients to correct deformities, repair injuries, prevent and treat diseases, or improve or restore patients' functions. Follow established surgical techniques during the operation. Prescribe preoperative and postoperative treatments and procedures, such as sedatives, diets, antibiotics, and preparation and treatment of the patient's operative area. Examine patient to provide information on medical condition and surgical risk. Diagnose bodily disorders and orthopedic conditions and provide treatments, such as medicines and surgeries, in clinics, hospital wards, and operating rooms. Direct and coordinate activities of nurses, assistants, specialists, residents, and other medical staff. Provide consultation and surgical assistance to other physicians and surgeons. Refer patient to medical specialist or other practitioners when necessary. Examine instruments, equipment, and operating room to ensure sterility. Prepare case histories. Manage surgery services, including planning, scheduling and coordination, determination of procedures, and procurement of supplies and equipment. Conduct research to develop and test surgical techniques that can improve operating procedures and outcomes.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.02. Medicine and Surgery. **Other Jobs in This Work Group:** Anesthesiologists; Family and General Practitioners; Internists, General; Medical Assistants; Medical Transcriptionists; Obstetricians and Gynecologists; Pediatricians, General; Pharmacists; Pharmacy Aides; Pharmacy Technicians; Physician Assistants; Psychiatrists; Registered Nurses; Surgical Technologists.

Skills: Science; Reading Comprehension; Judgment and Decision Making; Complex Problem Solving; Management of Financial Resources; Critical Thinking; Equipment Selection; Technology Design.

Education and Training Programs: Colon and Rectal Surgery; Critical Care Surgery; General Surgery; Hand Surgery; Neurological Surgery/Neurosurgery; Orthopedics/Orthopedic Surgery; Otolaryngology; Pediatric Orthopedics; Pediatric Surgery; Plastic Surgery; Sports Medicine; Thoracic Surgery; Urology; Vascular Surgery; Adult Reconstructive Orthopedics (Orthopedic Surgery); Orthopedic Surgery of the Spine. **Related Knowledge/Courses:** Medicine and Dentistry; Biology; Therapy and Counseling; Psychology; Chemistry; Customer and Personal Service.

Work Environment: Indoors; contaminants; radiation; disease or infections; standing; using hands on objects, tools, or controls.

Survey Researchers

- ✿ Personality Code: ICE
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$36,820
- ✿ Beginning Wage: \$17,240
- ✿ Earnings Growth Potential: Very high
- ✿ Growth: 15.9%
- ✿ Annual Job Openings: 4,959
- ✿ Self-Employed: 6.8%
- ✿ Part-Time: 12.5%

Design or conduct surveys. May supervise interviewers who conduct the survey in person or over the telephone. May present survey results to client. Prepare and present summaries and analyses of survey data, including tables, graphs, and fact sheets that describe survey techniques and results. Consult with clients in order to identify survey needs and any specific requirements, such as special samples. Analyze data from surveys, old records, and/or case studies, using statistical software programs. Review, classify, and record survey data in preparation for computer analysis. Conduct research in order

to gather information about survey topics. Conduct surveys and collect data, using methods such as interviews, questionnaires, focus groups, market analysis surveys, public opinion polls, literature reviews, and file reviews. Collaborate with other researchers in the planning, implementation, and evaluation of surveys. Direct and review the work of staff members, including survey support staff and interviewers who gather survey data. Monitor and evaluate survey progress and performance, using sample disposition reports and response rate calculations. Produce documentation of the questionnaire development process, data collection methods, sampling designs, and decisions related to sample statistical weighting. Determine and specify details of survey projects, including sources of information, procedures to be used, and the design of survey instruments and materials. Support, plan, and coordinate operations for single or multiple surveys. Direct updates and changes in survey implementation and methods. Hire and train recruiters and data collectors. Write training manuals to be used by survey interviewers.

GOE—Interest Area/Cluster: 06. Finance and Insurance. **Work Group:** 06.02. Finance/Insurance Investigation and Analysis. **Other Jobs in This Work Group:** Appraisers and Assessors of Real Estate; Appraisers, Real Estate; Assessors; Claims Adjusters, Examiners, and Investigators; Claims Examiners, Property and Casualty Insurance; Cost Estimators; Credit Analysts; Financial Analysts; Insurance Adjusters, Examiners, and Investigators; Insurance Appraisers, Auto Damage; Insurance Underwriters; Loan Counselors; Loan Officers; Market Research Analysts.

Skills: Management of Financial Resources; Management of Personnel Resources; Time Management; Writing; Persuasion; Mathematics; Complex Problem Solving; Active Learning.

Education and Training Programs: Economics, General; Applied Economics; Business/Managerial Economics; Marketing Research. **Related Knowledge/Courses:** Administration and Management; Sociology and Anthropology; Mathematics;

Economics and Accounting; Personnel and Human Resources; Clerical Practices.

Work Environment: Indoors; noisy; sitting.

Veterinarians

- Personality Code: IR
- Education/Training Required: First professional degree
- Annual Earnings: \$75,230
- Beginning Wage: \$44,150
- Earnings Growth Potential: High
- Growth: 35.0%
- Annual Job Openings: 5,301
- Self-Employed: 17.1%
- Part-Time: 13.4%

Diagnose and treat diseases and dysfunctions of animals. May engage in a particular function, such as research and development, consultation, administration, technical writing, sale or production of commercial products, or rendering of technical services to commercial firms or other organizations. Includes veterinarians who inspect livestock. Examine animals to detect and determine the nature of diseases or injuries. Treat sick or injured animals by prescribing medication, setting bones, dressing wounds, or performing surgery. Inoculate animals against various diseases such as rabies and distemper. Collect body tissue, feces, blood, urine, or other body fluids for examination and analysis. Operate diagnostic equipment such as radiographic and ultrasound equipment and interpret the resulting images. Advise animal owners regarding sanitary measures, feeding, and general care necessary to promote health of animals. Educate the public about diseases that can be spread from animals to humans. Train and supervise workers who handle and care for animals. Provide care to a wide range of animals or specialize in a particular species, such as horses or exotic birds. Euthanize animals. Establish and conduct quarantine and testing procedures that prevent the spread of diseases to other animals or to humans

and that comply with applicable government regulations. Conduct postmortem studies and analyses to determine the causes of animals' deaths. Perform administrative duties such as scheduling appointments, accepting payments from clients, and maintaining business records. Drive mobile clinic vans to farms so that health problems can be treated or prevented. Direct the overall operations of animal hospitals, clinics, or mobile services to farms. Specialize in a particular type of treatment such as dentistry, pathology, nutrition, surgery, microbiology, or internal medicine. Inspect and test horses, sheep, poultry, and other animals to detect the presence of communicable diseases. Research diseases to which animals could be susceptible. Plan and execute animal nutrition and reproduction programs. Inspect animal housing facilities to determine their cleanliness and adequacy. Determine the effects of drug therapies, antibiotics, or new surgical techniques by testing them on animals.

GOE—Interest Area/Cluster: 08. Health Science.

Work Group: 08.05. Animal Care. **Other Jobs in This Work Group:** Animal Breeders; Animal Trainers; Nonfarm Animal Caretakers; Veterinary Assistants and Laboratory Animal Caretakers; Veterinary Technologists and Technicians.

Skills: Science; Management of Financial Resources; Reading Comprehension; Judgment and Decision Making; Complex Problem Solving; Management of Personnel Resources; Equipment Selection; Management of Material Resources.

Education and Training Programs: Veterinary Medicine (DVM); Veterinary Sciences/Veterinary Clinical Sciences, General (Cert, MS, PhD); Veterinary Anatomy (Cert, MS, PhD); Veterinary Physiology (Cert, MS, PhD); Veterinary Microbiology and Immunobiology (Cert, MS, PhD); Veterinary Pathology and Pathobiology (Cert, MS, PhD); Veterinary Toxicology and Pharmacology (Cert, MS, PhD); Large Animal/Food Animal and Equine Surgery and Medicine (Cert, MS, PhD); others. **Related Knowledge/Courses:** Biology; Medicine and Dentistry; Chemistry; Therapy and Counseling; Sales and Marketing; Customer and Personal Service.

Work Environment: Indoors; noisy; contaminants; disease or infections; standing; using hands on objects, tools, or controls.

Architectural Drafters

- ⌘ Personality Code: ARI
- ⌘ Education/Training Required: Postsecondary vocational training
- ⌘ Annual Earnings: \$43,310
- ⌘ Beginning Wage: \$27,680
- ⌘ Earnings Growth Potential: Medium
- ⌘ Growth: 6.1%
- ⌘ Annual Job Openings: 16,238
- ⌘ Self-Employed: 5.0%
- ⌘ Part-Time: 5.9%

The job openings listed here are shared with Civil Drafters.

Prepare detailed drawings of architectural designs and plans for buildings and structures according to specifications provided by architect. Analyze building codes, by-laws, space and site requirements, and other technical documents and reports to determine their effect on architectural designs. Operate computer-aided drafting (CAD) equipment or conventional drafting station to produce designs, working drawings, charts, forms, and records. Coordinate structural, electrical, and mechanical designs and determine a method of presentation to graphically represent building plans. Obtain and assemble data to complete architectural designs, visiting job sites to compile measurements as necessary. Lay out and plan interior room arrangements for commercial buildings, using computer-assisted drafting (CAD) equipment and software. Draw rough and detailed scale plans for foundations, buildings, and structures based on preliminary concepts, sketches, engineering calculations, specification sheets, and other data. Supervise, coordinate, and inspect the work of draftspersons, technicians, and technologists on construction projects. Represent architect on construction site, ensuring builder compliance with design specifications and advising on design corrections under architect's supervision. Check dimensions of materials to be used and assign numbers to lists of materials. Determine procedures and instructions to

be followed according to design specifications and quantity of required materials. Analyze technical implications of architect's design concept, calculating weights, volumes, and stress factors. Create free-hand drawings and lettering to accompany drawings. Prepare colored drawings of landscape and interior designs for presentation to client. Reproduce drawings on copy machines or trace copies of plans and drawings, using transparent paper or cloth, ink, pencil, and standard drafting instruments. Prepare cost estimates, contracts, bidding documents, and technical reports for specific projects under an architect's supervision. Calculate heat loss and gain of buildings and structures to determine required equipment specifications, following standard procedures. Build landscape, architectural, and display models.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.03. Architecture/Construction Engineering Technologies. **Other Jobs in This Work Group:** Architectural and Civil Drafters; Civil Drafters; Surveyors.

Skills: Operations Analysis; Coordination; Active Learning; Technology Design; Mathematics; Complex Problem Solving; Science; Monitoring.

Education and Training Programs: Architectural Technology/Technician; Drafting and Design Technology/Technician, General; CAD/CADD Drafting and/or Design Technology/Technician; Architectural Drafting and Architectural CAD/CADD; Civil Drafting and Civil Engineering CAD/CADD.

Related Knowledge/Courses: Design; Building and Construction; Engineering and Technology; Computers and Electronics; Mathematics; Physics.

Work Environment: Indoors; noisy; sitting; using hands on objects, tools, or controls; repetitive motions.

Art Directors

- ✿ Personality Code: AE
- ✿ Education/Training Required: Work experience plus degree
- ✿ Annual Earnings: \$72,320
- ✿ Beginning Wage: \$39,600
- ✿ Earnings Growth Potential: High
- ✿ Growth: 9.0%
- ✿ Annual Job Openings: 9,719
- ✿ Self-Employed: 59.0%
- ✿ Part-Time: 22.5%

Formulate design concepts and presentation approaches and direct workers engaged in art work, layout design, and copy writing for visual communications media, such as magazines, books, newspapers, and packaging. Formulate basic layout design or presentation approach and specify material details, such as style and size of type, photographs, graphics, animation, video, and sound. Review and approve proofs of printed copy and art and copy materials developed by staff members. Manage own accounts and projects, working within budget and scheduling requirements. Confer with creative, art, copy-writing, or production department heads to discuss client requirements and presentation concepts and to coordinate creative activities. Present final layouts to clients for approval. Confer with clients to determine objectives; budget; background information; and presentation approaches, styles, and techniques. Hire, train, and direct staff members who develop design concepts into art layouts or who prepare layouts for printing. Work with creative directors to develop design solutions. Review illustrative material to determine if it conforms to standards and specifications. Attend photo shoots and printing sessions to ensure that the products needed are obtained. Create custom illustrations or other graphic elements. Mark up, paste, and complete layouts and write typography instructions to prepare materials for typesetting or printing. Negotiate with printers and estimators to determine what services will be performed. Conceptualize and help design interfaces for multimedia games, products, and devices. Prepare detailed storyboards showing sequence and timing of story development for television production.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.01. Managerial Work in Arts and Communication. **Other Jobs in This Work Group:** Agents and Business Managers of Artists, Performers, and Athletes; Producers; Producers and Directors; Program Directors; Public Relations Managers; Technical Directors/Managers.

Skills: Operations Analysis; Management of Financial Resources; Coordination; Negotiation; Persuasion; Service Orientation; Systems Evaluation; Management of Personnel Resources.

Education and Training Programs: Graphic Design; Intermedia/Multimedia. **Related Knowledge/Courses:** Fine Arts; Design; Communications and Media; Production and Processing; Computers and Electronics; Administration and Management.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Develop and design manufactured products, such as cars, home appliances, and children's toys. Combine artistic talent with research on product use, marketing, and materials to create the most functional and appealing product design. Prepare sketches of ideas, detailed drawings, illustrations, artwork, or blueprints, using drafting instruments, paints and brushes, or computer-aided design equipment. Direct and coordinate the fabrication of models or samples and the drafting of working drawings and specification sheets from sketches. Modify and refine designs, using working models, to conform with customer specifications, production limitations, or changes in design trends. Coordinate

the look and function of product lines. Confer with engineering, marketing, production, or sales departments, or with customers, to establish and evaluate design concepts for manufactured products. Present designs and reports to customers or design committees for approval and discuss need for modification. Evaluate feasibility of design ideas based on factors such as appearance, safety, function, serviceability, budget, production costs/methods, and market characteristics. Read publications, attend showings, and study competing products and design styles and motifs to obtain perspective and generate design concepts. Research production specifications, costs, production materials, and manufacturing methods and provide cost estimates and itemized production requirements. Design graphic material for use as ornamentation, illustration, or advertising on manufactured materials and packaging or containers. Develop manufacturing procedures and monitor the manufacture of their designs in a factory to improve operations and product quality. Supervise assistants' work throughout the design process. Fabricate models or samples in paper, wood, glass, fabric, plastic, metal, or other materials, using hand or power tools. Investigate product characteristics such as the product's safety and handling qualities; its market appeal; how efficiently it can be produced; and ways of distributing, using, and maintaining it. Develop industrial standards and regulatory guidelines. Participate in new product planning or market research, including studying the potential need for new products. Advise corporations on issues involving corporate image projects or problems.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.05. Design. **Other Jobs in This Work Group:** Fashion Designers; Floral Designers; Graphic Designers; Interior Designers; Merchandise Displayers and Window Trimmers; Set and Exhibit Designers.

Skills: Technology Design; Operations Analysis; Quality Control Analysis; Troubleshooting; Equipment Selection; Installation; Mathematics; Systems Evaluation.

Education and Training Programs: Design and Visual Communications, General; Commercial and Advertising Art; Industrial Design; Design and Applied Arts, Other. **Related Knowledge/Courses:** Design; Engineering and Technology; Mathematics; Physics; Mechanical Devices; Production and Processing.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Communications Teachers, Postsecondary

The primary personality type for this occupation is Social. Look for the description among the Social jobs.

Editors

- Personality Code: AEC
- Education/Training Required: Bachelor's degree
- Annual Earnings: \$48,320
- Beginning Wage: \$27,360
- Earnings Growth Potential: High
- Growth: 2.3%
- Annual Job Openings: 20,193
- Self-Employed: 13.4%
- Part-Time: 14.6%

Perform variety of editorial duties, such as laying out, indexing, and revising content of written materials, in preparation for final publication. Prepare, rewrite, and edit copy to improve readability or supervise others who do this work. Read copy or proof to detect and correct errors in spelling, punctuation, and syntax. Allocate print space for story text, photos, and illustrations according to space parameters and copy significance, using knowledge of layout principles. Plan the contents of publications according to the publication's style, editorial policy, and publishing requirements. Verify facts, dates, and statistics, using standard reference sources. Review and

approve proofs submitted by composing room prior to publication production. Develop story or content ideas, considering reader or audience appeal. Oversee publication production, including artwork, layout, computer typesetting, and printing, ensuring adherence to deadlines and budget requirements. Confer with management and editorial staff members regarding placement and emphasis of developing news stories. Assign topics, events, and stories to individual writers or reporters for coverage. Read, evaluate, and edit manuscripts or other materials submitted for publication and confer with authors regarding changes in content, style or organization, or publication. Monitor news-gathering operations to ensure utilization of all news sources, such as press releases, telephone contacts, radio, television, wire services, and other reporters. Meet frequently with artists, typesetters, layout personnel, marketing directors, and production managers to discuss projects and resolve problems. Supervise and coordinate work of reporters and other editors. Make manuscript acceptance or revision recommendations to the publisher. Select local, state, national, and international news items received from wire services based on assessment of items' significance and interest value. Interview and hire writers and reporters or negotiate contracts, royalties, and payments for authors or freelancers. Direct the policies and departments of newspapers, magazines, and other publishing establishments. Arrange for copyright permissions. Read material to determine index items and arrange them alphabetically or topically, indicating page or chapter location.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.02. Writing and Editing. **Other Jobs in This Work Group:** Copy Writers; Poets, Lyricists, and Creative Writers; Technical Writers; Writers and Authors.

Skills: Writing; Reading Comprehension; Active Listening; Judgment and Decision Making; Time Management; Critical Thinking; Persuasion; Active Learning.

Design clothing and accessories. Create original garments or design garments that follow well-established fashion trends. May develop the line of color and kinds of materials. Examine sample garments on and off models, then modify designs to achieve desired effects. Determine prices for styles. Select materials and production techniques to be used for products. Draw patterns for articles designed, then cut patterns and cut material according to patterns, using measuring instruments and scissors. Design custom clothing and accessories for individuals, retailers, or theatrical, television, or film productions. Attend fashion shows and review garment magazines and manuals to gather information about fashion trends and consumer preferences. Develop a group of products and/or accessories and market them through venues such as boutiques or mail-order catalogs. Test fabrics or oversee testing so that garment-care labels can be created. Visit textile showrooms to keep up to date on the latest fabrics. Sew together sections of material to form mockups or samples of garments or articles, using sewing equipment. Research the styles and periods of clothing needed for film or theatrical productions. Direct and coordinate workers involved in drawing and cutting patterns and constructing samples or finished garments. Purchase new or used clothing and accessory items as needed to complete designs. Provide sample garments to agents and sales representatives and arrange for showings of sample garments at sales meetings or fashion shows. Identify target markets for designs, looking at factors such as age, gender, and socioeconomic status. Read scripts and consult directors and other production staff to develop design concepts and plan productions. Confer with sales and management executives or with clients to discuss design ideas. Collaborate with other designers to coordinate special products and designs. Sketch rough and detailed drawings of apparel or accessories and write specifications such as color schemes, construction, material types, and accessory requirements. Adapt other designers' ideas for the mass market.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.05. Design. **Other Jobs in This Work Group:** Commercial and Industrial

Designers; Floral Designers; Graphic Designers; Interior Designers; Merchandise Displayers and Window Trimmers; Set and Exhibit Designers.

Skills: Technology Design; Operations Analysis; Quality Control Analysis; Negotiation; Time Management; Systems Evaluation; Mathematics; Active Learning.

Education and Training Programs: Apparel and Textile Manufacture; Textile Science; Fashion and Fabric Consultant; Fashion/Apparel Design. **Related Knowledge/Courses:** Fine Arts; Design; Sales and Marketing; Production and Processing; Communications and Media; Administration and Management.

Film and Video Editors

- Personality Code: AEI
- Education/Training Required: Bachelor's degree
- Annual Earnings: \$47,870
- Beginning Wage: \$24,270
- Earnings Growth Potential: High
- Growth: 12.7%
- Annual Job Openings: 2,707
- Self-Employed: 15.9%
- Part-Time: 18.9%

Edit motion picture soundtracks, film, and video. Cut shot sequences to different angles at specific points in scenes, making each individual cut as fluid and seamless as possible. Study scripts to become familiar with production concepts and requirements. Edit films and videotapes to insert music, dialogue, and sound effects; to arrange films into sequences; and to correct errors, using editing equipment. Select and combine the most effective shots of each scene to form a logical and smoothly running story. Mark frames where a particular shot or piece of sound is to begin or end. Determine the specific audio and visual effects and music necessary to complete films.

Verify key numbers and time codes on materials. Organize and string together raw footage into a continuous whole according to scripts or the instructions of directors and producers. Review assembled films or edited videotapes on screens or monitors to determine if corrections are necessary. Program computerized graphic effects. Review footage sequence by sequence to become familiar with it before assembling it into a final product. Set up and operate computer editing systems, electronic titling systems, video switching equipment, and digital video effects units to produce a final product. Record needed sounds or obtain them from sound effects libraries. Confer with producers and directors concerning layout or editing approaches needed to increase dramatic or entertainment value of productions. Manipulate plot, score, sound, and graphics to make the parts into a continuous whole, working closely with people in audio, visual, music, optical, or special effects departments. Supervise and coordinate activities of workers engaged in film editing, assembling, and recording activities. Trim film segments to specified lengths and reassemble segments in sequences that present stories with maximum effect. Develop post-production models for films. Piece sounds together to develop film soundtracks. Conduct film screenings for directors and members of production staffs. Collaborate with music editors to select appropriate passages of music and develop production scores. Discuss the sound requirements of pictures with sound effects editors.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.09. Media Technology. **Other Jobs in This Work Group:** Audio and Video Equipment Technicians; Broadcast Technicians; Camera Operators, Television, Video, and Motion Picture; Multi-Media Artists and Animators; Photographers; Radio Operators; Sound Engineering Technicians.

Skills: Equipment Selection; Operation and Control; Operations Analysis; Equipment Maintenance; Installation; Troubleshooting; Operation Monitoring; Active Learning.

Education and Training Programs: Photojournalism; Radio and Television; Communications Technology/Technician; Radio and Television Broadcasting Technology/Technician; Audiovisual Communications Technologies/Technicians, Other; Cinematography and Film/Video Production. **Related Knowledge/Courses:** Fine Arts; Communications and Media; Design; Computers and Electronics; Telecommunications; English Language.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Fine Artists, Including Painters, Sculptors, and Illustrators

- ✿ Personality Code: AR

Create original artwork, using any of a wide variety of mediums and techniques such as painting and sculpture. Use materials such as pens and ink, watercolors, charcoal, oil, or computer software to create artwork. Integrate and develop visual elements such as line, space, mass, color, and perspective to produce desired effects, such as the illustration of ideas, emotions, or moods. Confer with clients, editors, writers, art directors, and other interested parties regarding the nature and content of artwork to be produced. Submit preliminary or finished artwork or project plans to clients for approval, incorporating changes as necessary. Maintain portfolios of artistic work to demonstrate styles, interests, and abilities. Create finished artwork as decoration or to elucidate or substitute for spoken or written messages. Cut,

bend, laminate, arrange, and fasten individual or mixed raw and manufactured materials and products to form works of art. Monitor events, trends, and other circumstances, research specific subject areas, attend art exhibitions, and read art publications to develop ideas and keep current on art-world activities. Study different techniques to learn how to apply them to artistic endeavors. Render drawings, illustrations, and sketches of buildings, manufactured products, or models, working from sketches, blueprints, memory, models, or reference materials. Create sculptures, statues, and other three-dimensional artwork, using abrasives and tools to shape, carve, and fabricate materials such as clay, stone, wood, or metal. Create sketches, profiles, or likenesses of posed subjects or photographs, using any combination of freehand drawing, mechanical assembly kits, and computer imaging. Develop project budgets for approval, estimating time lines and material costs. Study styles, techniques, colors, textures, and materials used in works undergoing restoration to ensure consistency during the restoration process. Shade and fill in sketch outlines and backgrounds, using a variety of media such as water colors, markers, and transparent washes, labeling designated colors when necessary. Collaborate with engineers, mechanics, and other technical experts as necessary to build and install creations.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.04. Studio Art. **Other Jobs in This Work Group:** Craft Artists; Potters, Manufacturing.

Translate or interpret written, oral, or sign language text into another language for others. Follow ethical codes that protect the confidentiality of information. Identify and resolve conflicts related to the meanings of words, concepts, practices, or behaviors. Proofread, edit, and revise translated materials. Translate messages simultaneously or consecutively into specified languages orally or by using hand signs, maintaining message content, context, and style as much as possible. Check translations of technical terms and terminology to ensure that they are accurate and remain consistent throughout translation revisions. Read written materials such as legal documents, scientific works, or news reports and rewrite material into specified languages. Refer to reference materials such as dictionaries, lexicons, encyclopedias, and computerized terminology banks as needed to ensure translation accuracy. Compile terminology and information to be used in translations, including

technical terms such as those for legal or medical material. Adapt translations to students' cognitive and grade levels, collaborating with educational team members as necessary. Listen to speakers' statements to determine meanings and to prepare translations, using electronic listening systems as necessary. Check original texts or confer with authors to ensure that translations retain the content, meaning, and feeling of the original material. Compile information about the content and context of information to be translated, as well as details of the groups for whom translation or interpretation is being performed. Discuss translation requirements with clients and determine any fees to be charged for services provided. Adapt software and accompanying technical documents to another language and culture. Educate students, parents, staff, and teachers about the roles and functions of educational interpreters. Train and supervise other translators/interpreters. Travel with or guide tourists who speak another language.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.03. News, Broadcasting, and Public Relations. **Other Jobs in This Work Group:** Broadcast News Analysts; Public Relations Specialists; Reporters and Correspondents.

Skills: Social Perceptiveness; Speaking; Active Listening; Writing; Reading Comprehension.

Education and Training Programs: Education/Teaching of Individuals with Hearing Impairments, Including Deafness; Foreign Languages and Literatures, General; Linguistics; Language Interpretation and Translation; African Languages, Literatures, and Linguistics; East Asian Languages, Literatures, and Linguistics, General; Chinese Language and Literature; Japanese Language and Literature; Korean Language and Literature; Tibetan Language and Literature; others. **Related Knowledge/Courses:** Foreign Language; English Language; Geography; Sociology and Anthropology; Computers and Electronics; Communications and Media.

Plan and design land areas for such projects as parks and other recreational facilities; airports; highways; hospitals; schools; land subdivisions; and commercial, industrial, and residential sites.

Prepare site plans, specifications, and cost estimates for land development, coordinating arrangement of existing and proposed land features and structures. Confer with clients, engineering personnel, and architects on overall program. Compile and analyze data on conditions such as location, drainage, and location of structures for environmental reports and landscaping plans. Inspect landscape work to ensure compliance with specifications, approve quality of materials and work, and advise client and construction personnel.

GOE—Interest Area/Cluster: 02. Architecture and Construction. **Work Group:** 02.02. Architectural Design. **Other Jobs in This Work Group:** Architects, Except Landscape and Naval.

Skills: Operations Analysis; Management of Financial Resources; Coordination; Mathematics; Complex Problem Solving; Social Perceptiveness; Persuasion; Writing.

Education and Training Programs: Environmental Design/Architecture; Landscape Architecture (BS, BSLA, BLA, MSLA, MLA, PhD). **Related Knowledge/Courses:** Design; Building and Construction; Geography; Biology; Engineering and Technology; Fine Arts.

Work Environment: More often indoors than outdoors; very hot or cold; hazardous equipment; minor burns, cuts, bites, or stings; sitting.

Makeup Artists, Theatrical and Performance

- ⦿ Personality Code: AR
- ⦿ Education/Training Required: Postsecondary vocational training
- ⦿ Annual Earnings: \$35,250
- ⦿ Beginning Wage: \$15,920
- ⦿ Earnings Growth Potential: Very high
- ⦿ Growth: 39.8%
- ⦿ Annual Job Openings: 392
- ⦿ Self-Employed: 39.7%
- ⦿ Part-Time: 26.3%

Apply makeup to performers to reflect period, setting, and situation of their role. Confer with stage or motion picture officials and performers in order to determine desired effects. Duplicate work precisely in order to replicate characters' appearances on a daily basis. Establish budgets, and work within budgetary limits. Apply makeup to enhance and/or alter the appearance of people appearing in productions such as movies. Alter or maintain makeup during productions as necessary to compensate for lighting changes or to achieve continuity of effect. Select desired makeup shades from stock, or mix oil, grease, and coloring in order to achieve specific color effects. Cleanse and tone the skin in order to prepare it for makeup application. Assess performers' skin type in order to ensure that makeup will not cause breakouts or skin irritations. Analyze a script, noting events that affect each character's appearance, so that plans can be made for each scene. Requisition or acquire

needed materials for special effects, including wigs, beards, and special cosmetics. Write makeup sheets and take photos in order to document specific looks and the products that were used to achieve the looks. Examine sketches, photographs, and plaster models in order to obtain desired character image depiction. Attach prostheses to performers and apply makeup in order to create special features or effects such as scars, aging, or illness. Evaluate environmental characteristics such as venue size and lighting plans in order to determine makeup requirements. Design rubber or plastic prostheses that can be used to change performers' appearances. Create character drawings or models, based upon independent research, in order to augment period production files. Advise hairdressers on the hairstyles required for character parts. Study production information such as character descriptions, period settings, and situations in order to determine makeup requirements. Provide performers with makeup removal assistance after performances have been completed. Wash and reset wigs. Demonstrate products to clients, and provide instruction in makeup application.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.06. Drama. **Other Jobs in This Work Group:** Actors; Costume Attendants; Directors—Stage, Motion Pictures, Television, and Radio; Public Address System and Other Announcers; Radio and Television Announcers.

Skills: Management of Financial Resources; Equipment Selection; Time Management; Operations Analysis; Management of Material Resources; Management of Personnel Resources; Negotiation; Coordination.

Education and Training Programs: Cosmetology/Cosmetologist, General; Make-Up Artist/Specialist; Permanent Cosmetics/Makeup and Tattooing. **Related Knowledge/Courses:** Fine Arts; Chemistry; Design; Sales and Marketing; Personnel and Human Resources; Psychology.

Work Environment: Indoors; more often standing than sitting; using hands on objects, tools, or controls.

Marriage and Family Therapists

The primary personality type for this occupation is Social. Look for the description among the Social jobs.

Merchandise Displayers and Window Trimmers

- ❖ Personality Code: AER
- ❖ Education/Training Required: Moderate-term on-the-job training
- ❖ Annual Earnings: \$24,830
- ❖ Beginning Wage: \$16,300
- ❖ Earnings Growth Potential: Low

- ❖ Annual Job Openings: 9,103
- ❖ Self-Employed: 28.6%
- ❖ Part-Time: 16.7%

Plan and erect commercial displays, such as those in windows and interiors of retail stores and at trade exhibitions. Take photographs of displays and signage. Plan and erect commercial displays to entice and appeal to customers. Place prices and descriptive signs on backdrops, fixtures, merchandise, or floor. Change or rotate window displays, interior display areas, and signage to reflect changes in inventory or promotion. Obtain plans from display designers or display managers and discuss their implementation with clients or supervisors. Develop ideas or plans for merchandise displays or window decorations. Consult with advertising and sales staff to determine type of merchandise to be featured and time and place for each display. Arrange properties, furniture, merchandise, backdrops, and other accessories as shown in prepared sketches. Construct or assemble displays and display components from fabric, glass, paper, and plastic according to specifications, using hand tools and woodworking power tools. Collaborate with others to obtain products and other display items. Use computers to produce signage. Dress mannequins for displays. Maintain props and mannequins, inspecting them for imperfections and applying preservative

coatings as necessary. Select themes, lighting, colors, and props to be used. Attend training sessions and corporate planning meetings to obtain new ideas for product launches. Instruct sales staff in color-coordination of clothing racks and counter displays. Store, pack, and maintain records of props and display items. Prepare sketches, floor plans, or models of proposed displays. Cut out designs on cardboard, hardboard, and plywood according to motif of event. Install booths, exhibits, displays, carpets, and drapes as guided by floor plan of building and specifications. Install decorations such as flags, banners, festive lights, and bunting on or in building, street, exhibit hall, or booth. Create and enhance mannequin faces by mixing and applying paint and attaching measured eyelash strips, using artist's brush, airbrush, pins, ruler, and scissors.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.05. Design. **Other Jobs in This Work Group:** Commercial and Industrial Designers; Fashion Designers; Floral Designers; Graphic Designers; Interior Designers; Set and Exhibit Designers.

Multi-Media Artists and Animators

- Personality Code: AI
- Education/Training Required: Bachelor's degree
- Annual Earnings: \$54,550
- Beginning Wage: \$30,620
- Earnings Growth Potential: High
- Growth: 25.8%
- Annual Job Openings: 13,182
- Self-Employed: 69.7%
- Part-Time: 22.5%

Create special effects, animation, or other visual images, using film, video, computers, or other electronic tools and media, for use in products or creations such as computer games, movies, music videos, and commercials. Design complex graphics and animation, using independent judgment, creativity, and computer equipment. Create two-dimensional and three-dimensional images depicting objects in motion or illustrating a process, using computer animation or modeling programs. Make objects or characters appear lifelike by manipulating light, color, texture, shadow, and transparency or manipulating static images to give the illusion of motion. Apply story development, directing, cinematography, and editing to animation to create storyboards that show the flow of the animation and map out key scenes and characters. Assemble, typeset, scan, and produce digital camera-ready art or film negatives and printer's proofs. Script, plan, and create animated narrative sequences under tight deadlines, using computer software and hand-drawing techniques. Create basic designs, drawings, and illustrations for product labels, cartons, direct mail, or television. Create pen-and-paper images to be scanned, edited, colored, textured, or animated by computer. Develop briefings, brochures, multimedia presentations, Web pages, promotional products, technical illustrations, and computer artwork for use in products, technical manuals, literature, newsletters, and slide shows. Use models to simulate the behavior of animated objects in the finished sequence. Create

and install special effects as required by the script, mixing chemicals and fabricating needed parts from wood, metal, plaster, and clay. Participate in design and production of multimedia campaigns, handling budgeting and scheduling and assisting with such responsibilities as production coordination, background design, and progress tracking. Convert real objects to animated objects through modeling, using techniques such as optical scanning. Implement and maintain configuration control systems.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.09. Music Composers and Arrangers

- ✿ Personality Code: AE
- ✿ Education/Training Required: Work experience plus degree
- ✿ Annual Earnings: \$40,150
- ✿ Beginning Wage: \$16,110
- ✿ Earnings Growth Potential: Very high
- ✿ Growth: 12.9%
- ✿ Annual Job Openings: 8,597
- ✿ Self-Employed: 44.7%
- ✿ Part-Time: 37.0%

The job openings listed here are shared with Music Directors.

Write and transcribe musical scores. Copy parts from scores for individual performers. Transpose music from one voice or instrument to another to accommodate particular musicians. Use computers and synthesizers to compose, orchestrate, and arrange music. Write changes directly into compositions, or use computer software to make changes. Confer with producers and directors to define the nature and placement of film or television music. Guide musicians during rehearsals, performances, or recording sessions. Study original pieces of music to become familiar with them prior to making any changes. Study films or scripts to determine how musical scores can be used to create desired effects or moods. Write music for commercial mediums, including advertising jingles or film soundtracks. Accept commissions to create music for special occasions. Arrange music composed by others, changing the music to achieve desired effects. Write musical scores for orchestras, bands, choral groups, or individual instrumentalists or vocalists, using knowledge of music theory and of instrumental and vocal capabilities. Score compositions so that they are consistent with instrumental and vocal capabilities such as ranges and keys, using knowledge of music theory. Apply elements of music theory to create musical and tonal structures, including harmonies and melodies. Collaborate with other colleagues such as copyists

to complete final scores. Determine voices, instruments, harmonic structures, rhythms, tempos, and tone balances required to achieve the effects desired in musical compositions. Experiment with different sounds and types and pieces of music, using synthesizers and computers as necessary to test and evaluate ideas. Explore and develop musical ideas based on sources such as imagination or sounds in the environment. Rewrite original musical scores in different musical styles by changing rhythms, harmonies, or tempos. Transcribe ideas for musical compositions into musical notation, using instruments, pen and paper, or computers. Create original musical forms, or write within circumscribed musical forms such as sonatas, symphonies, or operas.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.07. Music. **Other Jobs in This Work Group:** Music Directors; Music Directors and Composers; Musicians and Singers; Musicians, Instrumental; Singers; Talent Directors.

Skills: Management of Financial Resources; Installation; Equipment Maintenance; Operation and Control; Management of Material Resources; Writing; Technology Design; Operations Analysis.

Education and Training Programs: Religious/Sacred Music; Music Performance, General; Music Theory and Composition; Musicology and Ethnomusicology; Conducting; Voice and Opera; Music Management and Merchandising; Music, Other. **Related Knowledge/Courses:**

Fine Arts; Communications and Media; Computers and Electronics; Sales and Marketing; Production and Processing; Design.

Work Environment: Indoors; sitting.

Music Directors

- ✿ Personality Code: AES
- ✿ Education/Training Required: Work experience plus degree
- ✿ Annual Earnings: \$40,150

The job openings listed here are shared with Music Composers and Arrangers.

Direct and conduct instrumental or vocal performances by musical groups such as orchestras or choirs. Study scores to learn the music in detail, and to develop interpretations. Consider such factors as ensemble size and abilities, availability of scores, and the need for musical variety in order to select music to be performed. Use gestures to shape the music being played, communicating desired tempo, phrasing, tone, color, pitch, volume, and other performance aspects. Engage services of composers to write scores. Plan and implement fund-raising and promotional activities. Coordinate and organize tours, or hire touring companies to arrange concert dates, venues, accommodations, and transportation for longer tours. Confer with clergy to select music for church services. Transcribe musical compositions and melodic lines to adapt them to a particular group, or to create a particular musical style. Audition and select performers for musical presentations. Meet with composers to discuss interpretations of their works. Conduct guest soloists in addition to ensemble members. Collaborate with music librarians to ensure availability of scores. Assign and review staff work in such areas as scoring, arranging, copying music, and vocal coaching. Position members within groups to obtain balance among instrumental or vocal sections. Plan and schedule rehearsals and performances, and arrange details such as locations,

accompanists, and instrumentalists. Meet with soloists and concertmasters to discuss and prepare for performances. Direct groups at rehearsals and live or recorded performances in order to achieve desired effects such as tonal and harmonic balance, dynamics, rhythm, and tempo. Perform administrative tasks such as applying for grants, developing budgets, negotiating contracts, and designing and printing programs and other promotional materials.

Photograph persons, subjects, merchandise, or other commercial products. May develop negatives and produce finished prints. Take pictures of individuals, families, and small groups, either in studio or on location. Adjust apertures, shutter speeds, and camera focus based on a combination of factors such as lighting, field depth, subject motion, film type, and film speed. Use traditional or digital cameras, along with a variety of equipment such as tripods, filters, and flash attachments. Create artificial light, using flashes and reflectors. Determine desired images and picture composition; select and adjust subjects, equipment, and lighting to achieve desired effects. Scan photographs into computers for editing, storage, and electronic transmission. Test equipment prior to use to ensure that it is in good working order. Review sets of photographs to select the best work. Estimate or measure light levels, distances, and numbers of exposures needed, using measuring devices and formulas. Manipulate and enhance scanned or digital images to create desired effects, using computers and specialized software. Perform maintenance tasks necessary to keep equipment working properly. Perform general office duties such as scheduling appointments, keeping books, and ordering supplies. Consult with clients or advertising staff and study assignments to determine project goals, locations, and equipment needs. Select and assemble equipment and required background properties according to subjects, materials, and conditions. Enhance, retouch, and resize photographs and negatives, using

airbrushing and other techniques. Set up, mount, or install photographic equipment and cameras. Produce computer-readable digital images from film, using flatbed scanners and photofinishing laboratories. Develop and print exposed film, using chemicals, touchup tools, and developing and printing equipment, or send film to photofinishing laboratories for processing. Direct activities of workers who are setting up photographic equipment. Employ a variety of specialized photographic materials and techniques, including infrared and ultraviolet films, macro-photography, photogrammetry, and sensitometry. Engage in research to develop new photographic procedures and materials.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.09. Media Technology.

Other Jobs in This Work Group: Audio and Video Equipment Technicians; Broadcast Technicians; Camera Operators, Television, Video, and Motion Picture; Film and Video Editors; Multi-Media Artists and Animators; Radio Operators; Sound Engineering Technicians.

Skills: Persuasion; Equipment Maintenance; Management of Financial Resources; Operation Monitoring; Service Orientation; Equipment Selection; Technology Design; Operations Analysis.

Education and Training Programs: Photojournalism; Visual and Performing Arts, General; Commercial Photography; Photography; Film/Video and Photographic Arts, Other; Art/Art Studies, General.

Related Knowledge/Courses: Sales and Marketing; Fine Arts; Clerical Practices; Customer and Personal Service; Communications and Media; Production and Processing.

Work Environment: More often indoors than outdoors; sitting; using hands on objects, tools, or controls.

Create original written works, such as scripts, essays, prose, poetry, or song lyrics, for publication or performance. Revise written material to meet personal standards and to satisfy needs of clients, publishers, directors, or producers. Choose subject matter and suitable form to express personal feelings and experiences or ideas, or to narrate stories or events. Plan project arrangements or outlines, and organize material accordingly. Prepare works in appropriate format for publication, and send them to publishers or producers. Follow appropriate procedures to get copyrights for completed work. Write fiction or nonfiction prose such as short stories, novels, biographies, articles, descriptive or critical analyses, and essays. Develop factors such as themes, plots, characterizations, psychological analyses, historical environments, action, and dialogue, to create material. Confer with clients, editors, publishers, or producers to discuss changes or revisions to written material. Conduct research to obtain factual information and authentic detail, using sources such as newspaper accounts, diaries, and interviews. Write narrative, dramatic, lyric, or other types of poetry for publication. Attend book launches and publicity events, or conduct public readings. Write words to fit musical compositions, including lyrics for operas, musical plays, and choral works. Adapt text

to accommodate musical requirements of composers and singers. Teach writing classes. Write humorous material for publication, or for performances such as comedy routines, gags, and comedy shows. Collaborate with other writers on specific projects.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.02. Writing and Editing. **Other Jobs in This Work Group:** Copy Writers; Editors; Technical Writers; Writers and Authors.

Skills: Writing; Social Perceptiveness; Management of Financial Resources; Persuasion; Active Listening; Reading Comprehension; Speaking; Critical Thinking.

Education and Training Programs: Communication Studies/Speech Communication and Rhetoric; Mass Communication/Media Studies; Family and Consumer Sciences/Human Sciences Communication; English Composition; Creative Writing; Playwriting and Screenwriting. **Related Knowledge/Courses:** Fine Arts; Communications and Media; Philosophy and Theology; Sociology and Anthropology; Sales and Marketing; English Language.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Set and Exhibit Designers

- ✿ Personality Code: AR
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$43,220
- ✿ Beginning Wage: \$23,600
- ✿ Earnings Growth Potential: High
- ✿ Growth: 17.8%
- ✿ Annual Job Openings: 1,402
- ✿ Self-Employed: 29.8%
- ✿ Part-Time: 16.7%

Design special exhibits and movie, television, and theater sets. May study scripts, confer with directors, and conduct research to determine

appropriate architectural styles. Examine objects to be included in exhibits to plan where and how to display them. Acquire, or arrange for acquisition of, specimens or graphics required to complete exhibits. Prepare rough drafts and scale working drawings of sets, including floor plans, scenery, and properties to be constructed. Confer with clients and staff to gather information about exhibit space, proposed themes and content, timelines, budgets, materials, and promotion requirements. Estimate set- or exhibit-related costs, including materials, construction, and rental of props or locations. Develop set designs based on evaluation of scripts, budgets, research information, and available locations. Direct and coordinate construction, erection, or decoration activities to ensure that sets or exhibits meet design, budget, and schedule requirements. Inspect installed exhibits for conformance to specifications and satisfactory operation of special effects components. Plan for location-specific issues such as space limitations, traffic flow patterns, and safety concerns. Submit plans for approval and adapt plans to serve intended purposes or to conform to budget or fabrication restrictions. Prepare preliminary renderings of proposed exhibits, including detailed construction, layout, and material specifications and diagrams relating to aspects such as special effects and lighting. Select and purchase lumber and hardware necessary for set construction. Collaborate with those in charge of lighting and sound so that those production aspects can be coordinated with set designs or exhibit layouts. Research architectural and stylistic elements appropriate to the time period to be depicted, consulting experts for information as necessary. Design and produce displays and materials that can be used to decorate windows, interior displays, or event locations such as streets and fairgrounds. Coordinate the removal of sets, props, and exhibits after productions or events are complete. Select set props such as furniture, pictures, lamps, and rugs. Confer with conservators to determine how to handle an exhibit's environmental aspects, such as lighting, temperature, and humidity, so that objects will be protected and exhibits will be enhanced.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.05. Design. **Other Jobs in This Work Group:** Commercial and Industrial Designers; Fashion Designers; Floral Designers; Graphic Designers; Interior Designers; Merchandise Displayers and Window Trimmers.

Skills: Installation; Operations Analysis; Persuasion; Management of Material Resources; Equipment Selection; Management of Personnel Resources; Management of Financial Resources; Complex Problem Solving.

Education and Training Programs: Design and Visual Communications, General; Illustration; Design and Applied Arts, Other; Technical Theatre/Theatre Design and Technology. **Related Knowledge/Courses:** Fine Arts; Design; History and Archeology; Communications and Media; Sociology and Anthropology; Computers and Electronics.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls.

Technical Writers

- Personality Code: AIC
- Education/Training Required: Bachelor's degree
- Annual Earnings: \$60,390
- Beginning Wage: \$36,490
- Earnings Growth Potential: Medium
- Growth: 19.5%
- Annual Job Openings: 7,498
- Self-Employed: 6.0%
- Part-Time: 6.5%

Write technical materials, such as equipment manuals, appendices, or operating and maintenance instructions. May assist in layout work. Organize material and complete writing assignment according to set standards regarding order, clarity, conciseness, style, and terminology. Maintain records and files of work and revisions. Edit, standardize, or make changes to material prepared by other writers or establishment personnel. Confer with customer representatives, vendors, plant executives, or publisher to establish technical specifications and to determine subject material to be developed for publication. Review published materials and recommend revisions or changes in scope, format, content, and methods of reproduction and binding. Select photographs, drawings, sketches, diagrams, and charts to illustrate material. Study drawings, specifications, mockups, and product samples to integrate and delineate technology, operating procedure, and production sequence and detail. Interview production and engineering personnel and read journals and other material to become familiar with product technologies and production methods. Observe

production, developmental, and experimental activities to determine operating procedure and detail. Arrange for typing, duplication, and distribution of material. Assist in laying out material for publication. Analyze developments in specific field to determine need for revisions in previously published materials and development of new material. Review manufacturer's and trade catalogs, drawings, and other data relative to operation, maintenance, and service of equipment. Draw sketches to illustrate specified materials or assembly sequence.

Social Occupations

Adult Literacy, Remedial Education, and GED Teachers and Instructors

- ✿ Personality Code: SAE
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$44,710
- ✿ Beginning Wage: \$25,310
- ✿ Earnings Growth Potential: High
- ✿ Growth: 14.2%
- ✿ Annual Job Openings: 17,340
- ✿ Self-Employed: 0.0%
- ✿ Part-Time: 41.3%

Teach or instruct out-of-school youths and adults in remedial education classes, preparatory classes for the General Educational Development test, literacy, or English as a Second Language. Teaching may or may not take place in a traditional educational institution. Adapt teaching methods and instructional materials to meet students' varying needs, abilities, and interests. Observe and evaluate students' work to determine progress and make suggestions for improvement. Instruct students individually and in groups, using various teaching methods such as lectures, discussions, and demonstrations. Plan and conduct activities for a balanced program of instruction, demonstration, and work time that provides students with opportunities to observe, question, and investigate. Maintain accurate and complete student records as required by laws or administrative policies. Prepare materials and classrooms for class activities. Establish clear objectives for all lessons, units, and projects and communicate those objectives to students. Conduct classes, workshops, and demonstrations to teach principles, techniques, or methods in subjects such as basic English language skills, life skills, and workforce entry skills. Prepare students for further education by encouraging them to explore learning opportunities and to persevere with challenging tasks. Establish and

enforce rules for behavior and procedures for maintaining order among the students for whom they are responsible. Provide information, guidance, and preparation for the General Equivalency Diploma (GED) examination. Assign and grade classwork and homework. Observe students to determine qualifications, limitations, abilities, interests, and other individual characteristics. Register, orient, and assess new students according to standards and procedures. Prepare and implement remedial programs for students requiring extra help. Prepare and administer written, oral, and performance tests and issue grades in accordance with performance. Use computers, audiovisual aids, and other equipment and materials to supplement presentations. Prepare objectives and outlines for courses of study, following curriculum guidelines or requirements of states and schools. Guide and counsel students with adjustment or academic problems or special academic interests. Enforce administration policies and rules governing students.

Counseling Psychologists

- ✿ Personality Code: SIA
- ✿ Education/Training Required: Doctoral degree
- ✿ Annual Earnings: \$62,210
- ✿ Beginning Wage: \$37,300
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.8%
- ✿ Annual Job Openings: 8,309
- ✿ Self-Employed: 34.2%
- ✿ Part-Time: 24.0%

The job openings listed here are shared with Clinical Psychologists and with School Psychologists.

Assess and evaluate individuals' problems through the use of case history, interview, and observation and provide individual or group counseling services to assist individuals in achieving more effective personal, social, educational, and vocational development and adjustment. Collect information about individuals or clients, using interviews, case histories, observational techniques, and other assessment methods. Counsel individuals, groups, or families to help them understand problems, define goals, and develop realistic action plans. Develop therapeutic and treatment plans based on clients' interests, abilities, and needs. Consult with other professionals to discuss therapies, treatments, counseling resources, or techniques and to share occupational information. Analyze data such as interview notes, test results, and reference manuals in order to identify symptoms and to diagnose the nature of clients' problems. Advise clients on how they could be helped by counseling. Evaluate the results of counseling methods to determine the reliability and validity of treatments. Provide consulting services to schools, social service agencies, and businesses. Refer clients to specialists or to other institutions for non-counseling treatment of problems. Select, administer, and interpret psychological tests to assess intelligence, aptitudes, abilities, or interests. Conduct research to develop or improve diagnostic or therapeutic counseling techniques.

Plan, direct, or coordinate the academic and non-academic activities of preschool and child care centers or programs. Confer with parents and staff to discuss educational activities and policies and students' behavioral or learning problems. Prepare and maintain attendance, activity, planning, accounting, or personnel reports and records for officials and agencies or direct preparation and maintenance activities. Set educational standards and goals and help establish policies, procedures, and programs to carry them out. Monitor students' progress and provide students and teachers with assistance in resolving any

problems. Determine allocations of funds for staff, supplies, materials, and equipment and authorize purchases. Recruit, hire, train, and evaluate primary and supplemental staff and recommend personnel actions for programs and services. Direct and coordinate activities of teachers or administrators at day-care centers, schools, public agencies, or institutions. Plan, direct, and monitor instructional methods and content of educational, vocational, or student activity programs. Review and interpret government codes and develop procedures to meet codes and to ensure facility safety, security, and maintenance. Determine the scope of educational program offerings and prepare drafts of program schedules and descriptions to estimate staffing and facility requirements. Review and evaluate new and current programs to determine their efficiency; effectiveness; and compliance with state, local, and federal regulations, and recommend any necessary modifications. Teach classes or courses or provide direct care to children. Prepare and submit budget requests or grant proposals to solicit program funding. Write articles, manuals, and other publications and assist in the distribution of promotional literature about programs and facilities. Collect and analyze survey data, regulatory information, and demographic and employment trends to forecast enrollment patterns and the need for curriculum changes. Inform businesses, community groups, and governmental agencies about educational needs, available programs, and program policies. Organize and direct committees of specialists, volunteers, and staff to provide technical and advisory assistance for programs.

Equal Opportunity Representatives and Officers

- ⦿ Personality Code: SEC
- ⦿ Education/Training Required: Long-term on-the-job training
- ⦿ Annual Earnings: \$48,400
- ⦿ Beginning Wage: \$28,980
- ⦿ Earnings Growth Potential: High
- ⦿ Growth: 4.9%
- ⦿ Annual Job Openings: 15,841
- ⦿ Self-Employed: 0.4%
- ⦿ Part-Time: 5.0%

The job openings listed here are shared with Coroners, with Environmental Compliance Inspectors, with Government Property Inspectors and Investigators, and with Licensing Examiners and Inspectors.

Monitor and evaluate compliance with equal opportunity laws, guidelines, and policies to ensure that employment practices and contracting arrangements give equal opportunity without regard to race, religion, color, national origin, sex, age, or disability. Investigate employment practices and alleged violations of laws to document and correct discriminatory factors. Interpret civil rights laws and equal opportunity regulations for individuals and employers. Study equal opportunity complaints to clarify issues. Meet with persons involved in equal opportunity complaints to verify case information and to arbitrate and settle disputes. Coordinate, monitor, and revise complaint procedures to ensure timely processing and review of complaints. Prepare reports of selection, survey, and other statistics, and recommendations for corrective action. Conduct surveys and evaluate findings to determine whether systematic discrimination exists. Develop guidelines for nondiscriminatory employment practices and monitor their implementation and impact. Review company contracts to determine actions required to meet governmental equal opportunity provisions. Counsel newly hired members of minority and disadvantaged groups, informing them about details of civil rights

laws. Provide information, technical assistance, and training to supervisors, managers, and employees on topics such as employee supervision, hiring, grievance procedures, and staff development. Verify that all job descriptions are submitted for review and approval and that descriptions meet regulatory standards. Act as liaisons between minority placement agencies and employers or between job search committees and other equal opportunity administrators. Consult with community representatives to develop technical assistance agreements in accordance with governmental regulations. Meet with job search committees or coordinators to explain the role of the equal opportunity coordinator, to provide resources for advertising, and to explain expectations for future contacts. Participate in the recruitment of employees through job fairs, career days, and advertising plans.

GOE—Interest Area/Cluster: 07. Government and Public Administration. **Work Group:** 07.03. Regulations Enforcement. **Other Jobs in This Work Group:**

Assist department chairperson, faculty members, or other professional staff members in colleges or universities by performing teaching or teaching-related duties such as teaching lower-level courses, developing teaching materials, preparing and giving examinations, and grading examinations or papers. Graduate assistants must be enrolled in graduate school programs. Graduate assistants who primarily perform non-teaching duties such as laboratory research, should be

reported in the occupational category related to the work performed. Lead discussion sections, tutorials, and laboratory sections. Evaluate and grade examinations, assignments, and papers, and record grades. Return assignments to students in accordance with established deadlines. Schedule and maintain regular office hours to meet with students. Inform students of the procedures for completing and submitting class work such as lab reports. Prepare and proctor examinations. Notify instructors of errors or problems with assignments. Meet with supervisors to discuss students' grades, and to complete required grade-related paperwork. Copy and distribute classroom materials. Demonstrate use of laboratory equipment, and enforce laboratory rules. Teach undergraduate level courses. Complete laboratory projects prior to assigning them to students so that any needed modifications can be made. Develop teaching materials such as syllabi, visual aids, answer keys, supplementary notes, and course websites. Provide assistance to faculty members or staff with laboratory or field research. Arrange for supervisors to conduct teaching observations; meet with supervisors to receive feedback about teaching performance. Attend lectures given by the instructors whom they are assisting. Order or obtain materials needed for classes. Provide instructors with assistance in the use of audiovisual equipment. Assist faculty members or staff with student conferences.

Promote, maintain, and improve individual and community health by assisting individuals and communities to adopt healthy behaviors. Collect and analyze data to identify community needs prior to planning, implementing, monitoring, and evaluating programs designed to encourage healthy lifestyles, policies, and environments. May also serve as a resource to assist individuals, other professionals, or the community and may administer fiscal resources for health education programs. Document activities, recording information such as the numbers of applications completed, presentations conducted, and persons assisted. Develop and present health education and promotion programs such as training workshops, conferences, and school or community presentations. Develop and maintain cooperative working relationships with agencies and organizations interested in public health care. Prepare and distribute health education materials, including reports; bulletins; and visual aids such as films, videotapes, photographs, and posters. Develop operational plans and policies necessary to achieve health education objectives and services. Collaborate with health specialists and civic groups to determine community health needs and the availability of services and to develop goals for meeting needs. Maintain databases, mailing lists, telephone networks, and other information to facilitate the functioning of health education programs. Supervise professional and technical staff in implementing health programs, objectives, and goals.

Design and conduct evaluations and diagnostic studies to assess the quality and performance of health education programs. Provide program information to the public by preparing and presenting press releases, conducting media campaigns, and/or maintaining program-related Web sites. Develop, prepare, and coordinate grant applications and grant-related activities to obtain funding for health education programs and related work. Provide guidance to agencies and organizations in the assessment of health education needs and in the development and delivery of health education programs. Develop and maintain health education libraries to provide resources for staff and community agencies. Develop, conduct, or coordinate health needs assessments and other public health surveys.

Develop instructional material, coordinate educational content, and incorporate current technology in specialized fields that provide guidelines to educators and instructors for developing curricula and conducting courses. Conduct or participate in workshops, committees, and conferences designed to promote the intellectual, social, and physical welfare of students. Plan and conduct teacher training programs and conferences dealing with new classroom procedures, instructional materials and equipment, and teaching aids. Advise teaching and administrative staff in curriculum development, use of materials and equipment, and implementation of state and federal programs and procedures. Recommend, order, or authorize purchase of instructional materials, supplies, equipment, and visual aids designed to meet student educational needs and district standards. Interpret and enforce provisions of state education codes and rules and regulations of state education boards. Confer with members of educational committees and advisory groups to obtain knowledge of subject areas and to relate curriculum materials to specific subjects, individual student needs, and occupational areas. Organize production and design of curriculum materials. Research, evaluate, and prepare recommendations on curricula, instructional methods, and materials for school systems. Observe work of teaching staff to evaluate performance and to recommend changes that could strengthen teaching skills. Develop instructional materials to be used by educators and instructors. Prepare grant proposals,

budgets, and program policies and goals or assist in their preparation. Develop tests, questionnaires, and procedures that measure the effectiveness of curricula and use these tools to determine whether program objectives are being met. Update the content of educational programs to ensure that students are being trained with equipment and processes that are technologically current. Address public audiences to explain program objectives and to elicit support. Advise and teach students. Prepare or approve manuals, guidelines, and reports on state educational policies and practices for distribution to school districts. Develop classroom-based and distance-learning training courses, using needs assessments and skill level analyses. Inspect instructional equipment to determine if repairs are needed and authorize necessary repairs.

Teach elemental natural and social science, personal hygiene, music, art, and literature to children from 4 to 6 years old. Promote physical, mental, and social development. May be required to hold state certification. Teach basic skills such as color, shape, number, and letter recognition; personal hygiene; and social skills. Establish and enforce rules for behavior and policies and procedures to maintain order among students. Observe and evaluate children's performance, behavior, social development, and physical health. Instruct students individually and in groups, adapting teaching methods to meet students' varying needs and interests. Read books to entire classes or to small groups. Demonstrate activities to children. Provide a variety of materials and resources for children to explore, manipulate, and use, both in learning activities and in imaginative play. Plan and conduct activities for a balanced program of instruction, demonstration, and work time that provides students with opportunities to observe, question, and investigate. Confer with parents or guardians, other teachers, counselors, and administrators to resolve students' behavioral and academic problems. Prepare children for later grades by encouraging them to explore learning opportunities and to persevere with challenging tasks. Establish clear objectives for all lessons, units, and projects and communicate those objectives to children. Prepare and implement remedial programs for students requiring extra help. Meet with parents and guardians to discuss their children's

progress and to determine their priorities for their children and their resource needs. Prepare objectives and outlines for courses of study, following curriculum guidelines or requirements of states and schools. Organize and lead activities designed to promote physical, mental, and social development such as games, arts and crafts, music, and storytelling. Guide and counsel students with adjustment or academic problems or special academic interests. Identify children showing signs of emotional, developmental, or health-related problems and discuss them with supervisors, parents or guardians, and child development specialists. Instruct and monitor students in the use and care of equipment and materials to prevent injuries and damage. Assimilate arriving children to the school environment by greeting them, helping them remove outerwear, and selecting activities of interest to them.

Diagnose and treat mental and emotional disorders, whether cognitive, affective, or behavioral, within the context of marriage and family systems. Apply psychotherapeutic and family systems theories and techniques in the delivery of professional services to individuals, couples, and families for the purpose of treating such diagnosed nervous and mental disorders. Ask questions that will help clients identify their feelings and behaviors. Counsel clients on concerns such as unsatisfactory relationships, divorce and separation, child rearing, home management, and financial difficulties. Encourage individuals and family members to develop and use skills and strategies for confronting their problems in a constructive manner. Maintain case files that include activities, progress notes, evaluations, and

recommendations. Collect information about clients, using techniques such as testing, interviewing, discussion, and observation. Develop and implement individualized treatment plans addressing family relationship problems. Determine whether clients should be counseled or referred to other specialists in such fields as medicine, psychiatry, and legal aid. Confer with clients in order to develop plans for post-treatment activities. Confer with other counselors to analyze individual cases and to coordinate counseling services. Follow up on results of counseling programs and clients' adjustments to determine effectiveness of programs. Provide instructions to clients on how to obtain help with legal, financial, and other personal issues. Contact doctors, schools, social workers, juvenile counselors, law enforcement personnel, and others to gather information in order to make recommendations to courts for the resolution of child custody or visitation disputes. Provide public education and consultation to other professionals or groups regarding counseling services, issues, and methods. Supervise other counselors, social service staff, and assistants. Provide family counseling and treatment services to inmates participating in substance abuse programs. Write evaluations of parents and children for use by courts deciding divorce and custody cases, testifying in court if necessary.

Teach students in public or private schools in one or more subjects at the middle, intermediate, or junior high level, which falls between elementary and senior high school as defined by applicable state laws and regulations. Establish and enforce rules for behavior and procedures for maintaining order among the students for whom they are responsible. Adapt teaching methods and instructional materials to meet students' varying needs and interests. Instruct through lectures, discussions, and demonstrations in one or more subjects such as English, mathematics, or social studies. Prepare, administer, and grade tests and assignments to evaluate students' progress. Establish clear objectives for all lessons, units, and projects and communicate these objectives to students. Plan and conduct activities for a balanced program of instruction, demonstration, and work time that provides students with opportunities to observe, question, and investigate. Maintain accurate, complete, and correct student records as required by laws, district policies, and administrative regulations. Observe and evaluate students' performance, behavior, social development, and physical health. Assign lessons and correct homework. Prepare materials and classrooms for class activities. Enforce all administration policies and rules governing students. Confer with parents or guardians, other teachers, counselors, and administrators to resolve students' behavioral and academic problems. Prepare students for later grades by encouraging them to

explore learning opportunities and to persevere with challenging tasks. Prepare objectives and outlines for courses of study, following curriculum guidelines or requirements of states and schools. Guide and counsel students with adjustment or academic problems or special academic interests. Meet with parents and guardians to discuss their children's progress and to determine their priorities for their children and their resource needs. Meet with other professionals to discuss individual students' needs and progress. Prepare and implement remedial programs for students requiring extra help. Prepare for assigned classes and show written evidence of preparation upon request of immediate supervisors. Instruct and monitor students in the use and care of equipment and materials to prevent injury and damage.

Assess, plan, organize, and participate in rehabilitative programs that help restore vocational, homemaking, and daily living skills, as well as general independence, to disabled persons. Plan, organize, and conduct occupational therapy programs in hospital, institutional, or community settings to help rehabilitate those impaired because of illness, injury, or psychological or developmental problems. Test and evaluate patients' physical and mental abilities and analyze medical data to determine realistic rehabilitation goals for patients. Select activities that will help individuals learn work and life-management skills within limits of their mental and physical capabilities. Evaluate patients' progress and prepare reports that detail progress. Complete and maintain necessary records. Train caregivers to provide for the needs of patients during and after therapies. Recommend changes in patients' work or living environments, consistent with their needs and capabilities. Develop and participate in health promotion programs, group activities, or discussions to promote client health, facilitate social adjustment, alleviate stress, and prevent physical or mental disability. Consult with rehabilitation team to select activity programs and coordinate occupational therapy with other therapeutic activities. Plan and implement programs and social activities to help patients learn work and school skills and adjust to handicaps. Design and create, or requisition, special supplies and equipment such as splints, braces and computer-aided adaptive equipment. Conduct research

in occupational therapy. Provide training and supervision in therapy techniques and objectives for students and nurses and other medical staff. Help clients improve decision making, abstract reasoning, memory, sequencing, coordination, and perceptual skills, using computer programs. Advise on health risks in the workplace and on health-related transition to retirement. Lay out materials such as puzzles, scissors, and eating utensils for use in therapy, and clean and repair these tools after therapy sessions. Provide patients with assistance in locating and holding jobs.

Assist physical therapists in providing physical therapy treatments and procedures. May, in accordance with state laws, assist in the development of treatment plans, carry out routine functions, document the progress of treatment, and modify specific treatments in accordance with patient status and within the scope of treatment plans established by physical therapists. Generally requires formal training. Instruct, motivate, safeguard, and assist patients as they practice exercises and functional activities. Observe patients during treatments to compile and evaluate data on their responses and progress, and provide results to physical therapists

in person or through progress notes. Confer with physical therapy staffs or others to discuss and evaluate patient information for planning, modifying, and coordinating treatment. Transport patients to and from treatment areas, lifting and transferring them according to positioning requirements. Secure patients into or onto therapy equipment. Administer active and passive manual therapeutic exercises, therapeutic massages, aquatic physical therapy, and heat, light, sound, and electrical modality treatments such as ultrasound. Communicate with or instruct caregivers and family members on patient therapeutic activities and treatment plans. Measure patients' ranges-of-joint motion, body parts, and vital signs to determine effects of treatments or for patient evaluations. Monitor operation of equipment and record use of equipment and administration of treatment. Fit patients for orthopedic braces, prostheses, and supportive devices such as crutches. Train patients in the use of orthopedic braces, prostheses, or supportive devices. Clean work areas and check and store equipment after treatments. Assist patients to dress, undress, or put on and remove supportive devices such as braces, splints, and slings. Attend or conduct continuing education courses, seminars, or in-service activities. Perform clerical duties such as taking inventory, ordering supplies, answering telephones, taking messages, and filling out forms. Prepare treatment areas and electrotherapy equipment for use by physiotherapists. Administer traction to relieve neck and back pain, using intermittent and static traction equipment. Perform postural drainage, percussions and vibrations, and teach deep breathing exercises to treat respiratory conditions.

GOE—Interest Area/Cluster: 08. Health Science.

Assess, plan, organize, and participate in rehabilitative programs that improve mobility, relieve pain, increase strength, and decrease or prevent deformity of patients suffering from disease or injury. Perform and document initial exams, evaluating data to identify problems and determine diagnoses prior to interventions. Plan, prepare, and carry out individually designed programs of physical treatment to maintain, improve, or restore physical functioning, alleviate pain, and prevent physical dysfunction in patients. Record prognoses, treatments, responses, and progresses in patients' charts or enter information into computers. Identify and document goals, anticipated progresses, and plans for reevaluation. Evaluate effects of treatments at various stages and adjust treatments to achieve maximum benefits. Administer manual exercises, massages, or traction to help relieve pain, increase patient strength, or decrease or prevent deformity or crippling. Test and measure patients' strength, motor development and function, sensory perception, functional capacity, and respiratory

and circulatory efficiency and record data. Instruct patients and families in treatment procedures to be continued at home. Confer with patients, medical practitioners, and appropriate others to plan, implement, and assess intervention programs. Review physicians' referrals and patients' medical records to help determine diagnoses and physical therapy treatments required. Obtain patients' informed consent to proposed interventions. Discharge patients from physical therapy when goals or projected outcomes have been attained, and provide for appropriate follow-up care or referrals. Provide information to patients about proposed interventions, material risks, and expected benefits and any reasonable alternatives. Inform patients when diagnoses reveal findings outside the scope of physical therapy to treat and refer to appropriate practitioners. Direct, supervise, assess, and communicate with supportive personnel. Provide educational information about physical therapy and physical therapists, injury prevention, ergonomics, and ways to promote health. Refer clients to community resources and services. Administer treatment involving application of physical agents, using equipment, moist packs, ultraviolet and infrared lamps, and ultrasound machines.

Instruct children (normally up to 5 years of age) in activities designed to promote social, physical, and intellectual growth needed for primary school in preschool, day care center, or other child development facility. May be required to hold state certification. Provide a variety of materials and resources for children to explore, manipulate, and use, both in learning activities and in imaginative play. Attend to children's basic needs by feeding them, dressing them, and changing their diapers. Establish and enforce rules for behavior and procedures for maintaining order. Read books to entire classes or to small groups. Teach basic skills such as color, shape, number, and letter recognition; personal hygiene; and social skills. Organize and lead

activities designed to promote physical, mental, and social development, such as games, arts and crafts, music, storytelling, and field trips. Observe and evaluate children's performance, behavior, social development, and physical health. Meet with parents and guardians to discuss their children's progress and needs, determine their priorities for their children, and suggest ways that they can promote learning and development. Identify children showing signs of emotional, developmental, or health-related problems and discuss them with supervisors, parents or guardians, and child development specialists. Enforce all administration policies and rules governing students. Prepare materials and classrooms for class activities. Serve meals and snacks in accordance with nutritional guidelines. Teach proper eating habits and personal hygiene. Assimilate arriving children to the school environment by greeting them, helping them remove outerwear, and selecting activities of interest to them. Adapt teaching methods and instructional materials to meet students' varying needs and interests. Establish clear objectives for all lessons, units, and projects and communicate those objectives to children. Demonstrate activities to children. Arrange indoor and outdoor space to facilitate creative play, motor-skill activities, and safety. Plan and conduct activities for a balanced program of instruction, demonstration, and work time that provides students with opportunities to observe, question, and investigate. Maintain accurate and complete student records as required by laws, district policies, and administrative regulations.

Radiation Therapists

- ✿ Personality Code: SRC
- ✿ Education/Training Required: Associate degree
- ✿ Annual Earnings: \$70,010
- ✿ Beginning Wage: \$46,580
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 24.8%
- ✿ Annual Job Openings: 1,461
- ✿ Self-Employed: 0.0%
- ✿ Part-Time: 10.3%

Provide radiation therapy to patients as prescribed by radiologists according to established practices and standards. Duties may include reviewing prescriptions and diagnoses; acting as liaisons with physicians and supportive care personnel; preparing equipment such as immobilization, treatment, and protection devices; and maintaining records, reports, and files. May assist in dosimetry procedures and tumor localization. Position patients for treatment with accuracy according to prescription. Administer prescribed doses of radiation to specific body parts, using radiation therapy equipment according to established practices and standards. Check radiation therapy equipment to ensure proper operation. Review prescriptions, diagnoses, patient charts, and identification. Follow principles of radiation protection for patients, radiation therapists, and others. Maintain records, reports, and files as required, including such information as radiation dosages, equipment settings, and patients' reactions. Conduct most treatment sessions independently, in accordance with long-term treatment plans and under general direction of patients' physicians. Enter data into computers and set controls to operate and adjust equipment and regulate dosages. Observe and reassure patients during treatments and report unusual reactions to physicians or turn equipment off if unexpected adverse reactions occur. Calculate actual treatment dosages delivered during each session. Check for side effects such as skin irritation, nausea, and hair loss to assess patients' reaction to

treatment. Prepare and construct equipment such as immobilization, treatment, and protection devices. Educate, prepare, and reassure patients and their families by answering questions, providing physical assistance, and reinforcing physicians' advice regarding treatment reactions and post-treatment care. Provide assistance to other health care personnel during dosimetry procedures and tumor localization. Help physicians, radiation oncologists, and clinical physicists to prepare physical and technical aspects of radiation treatment plans, using information about patient conditions and anatomies. Photograph treated areas of patients and process film. Act as liaisons with medical physicists and supportive care personnel. Train and supervise student or subordinate radiotherapy technologists. Implement appropriate follow-up care plans. Assist in the preparation of sealed radioactive materials such as cobalt, radium, cesium, and isotopes for use in radiation treatments. Store, sterilize, or prepare the special applicators containing the radioactive substances implanted by physicians.

Registered Nurses

- ✿ Personality Code: SIC
- ✿ Education/Training Required: Associate degree
- ✿ Annual Earnings: \$60,010
- ✿ Beginning Wage: \$42,020
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 23.5%
- ✿ Annual Job Openings: 233,499
- ✿ Self-Employed: 0.8%
- ✿ Part-Time: 21.8%

Assess patient health problems and needs, develop and implement nursing care plans, and maintain medical records. Administer nursing care to ill, injured, convalescent, or disabled patients. May advise patients on health maintenance and disease prevention or provide case management. Licensing or registration required. Includes advance practice nurses such as nurse practitioners, clinical nurse specialists, certified nurse midwives, and certified registered nurse anesthetists. Advanced practice nursing is practiced by RNs who have specialized formal, post-basic education and who function in highly autonomous and specialized roles. Monitor, record, and report symptoms and

changes in patients' conditions. Maintain accurate, detailed reports and records. Record patients' medical information and vital signs. Order, interpret, and evaluate diagnostic tests to identify and assess patients' conditions. Modify patient treatment plans as indicated by patients' responses and conditions. Direct and supervise less skilled nursing or health-care personnel or supervise particular units. Consult and coordinate with health care team members to assess, plan, implement and evaluate patient care plans. Monitor all aspects of patient care, including diet and physical activity. Instruct individuals, families, and other groups on topics such as health education, disease prevention, and childbirth, and develop health improvement programs. Prepare patients for, and assist with, examinations and treatments. Assess the needs of individuals, families, or communities, including assessment of individuals' home or work environments to identify potential health or safety problems. Provide health care, first aid, immunizations, and assistance in convalescence and rehabilitation in locations such as schools, hospitals, and industry. Prepare rooms, sterile instruments, equipment, and supplies, and ensure that stock of supplies is maintained. Inform physicians of patients' conditions during anesthesia. Administer local, inhalation, intravenous, and other anesthetics. Perform physical examinations, make tentative diagnoses, and treat patients en route to hospitals or at disaster site triage centers. Observe nurses and visit patients to ensure proper nursing care. Conduct specified laboratory tests. Direct and coordinate infection control programs, advising and consulting with specified personnel about necessary precautions. Prescribe or recommend drugs, medical devices, or other forms of treatment such as physical therapy, inhalation therapy, or related therapeutic procedures. Perform administrative and managerial functions such as taking responsibility for a unit's staff, budget, planning, and long-range goals. Hand items to surgeons during operations.

Rehabilitation Counselors

- ✿ Personality Code: SI
- ✿ Education/Training Required: Master's degree
- ✿ Annual Earnings: \$29,630
- ✿ Beginning Wage: \$19,610
- ✿ Earnings Growth Potential: Low
- ✿ Growth: 23.0%
- ✿ Annual Job Openings: 32,081
- ✿ Self-Employed: 5.9%
- ✿ Part-Time: 15.4%

Counsel individuals to maximize the independence and employability of persons coping with personal, social, and vocational difficulties that result from birth defects, illness, disease, accidents, or the stress of daily life. Coordinate

activities for residents of care and treatment facilities. Assess client needs and design and implement rehabilitation programs that may include personal and vocational counseling, training, and job placement. Monitor and record clients' progress in order to ensure that goals and objectives are met. Confer with clients to discuss their options and goals so that rehabilitation programs and plans for accessing needed services can be developed. Prepare and maintain records and case files, including documentation such as clients' personal and eligibility information, services provided, narratives of client contacts, and relevant correspondence. Arrange for physical, mental, academic, vocational, and other evaluations to obtain information for assessing clients' needs and developing rehabilitation plans. Analyze information from interviews, educational and medical records, consultation with other professionals, and diagnostic evaluations to assess clients' abilities, needs, and eligibility for services. Develop rehabilitation plans that fit clients' aptitudes, education levels, physical abilities, and career goals. Maintain close contact with clients during job training and placements to resolve problems and evaluate placement adequacy. Locate barriers to client employment, such as inaccessible work sites, inflexible schedules, and transportation problems, and work with clients to develop strategies for overcoming these barriers. Develop and maintain relationships with community referral sources such as schools and community groups. Arrange for on-site job coaching or assistive devices such as specially equipped wheelchairs in order to help clients adapt to work or school environments. Confer with physicians, psychologists, occupational therapists, and other professionals to develop and implement client rehabilitation programs. Develop diagnostic procedures for determining clients' needs. Participate in job development and placement programs, contacting prospective employers, placing clients in jobs, and evaluating the success of placements. Collaborate with clients' families to implement rehabilitation plans that include behavioral, residential, social, and/or employment goals. Collaborate with community agencies to establish facilities and programs to assist persons with disabilities.

Teach elementary and preschool school subjects to educationally and physically handicapped students. Includes teachers who specialize and work with audibly and visually handicapped students and those who teach basic academic and life processes skills to the mentally impaired. Instruct students in academic subjects, using a variety of techniques such as phonetics, multisensory learning, and repetition to reinforce learning and to meet students' varying needs and interests. Employ special educational strategies and techniques during instruction to improve the development of sensory- and perceptual-motor skills, language, cognition, and memory. Teach socially acceptable behavior, employing techniques such as behavior modification and positive reinforcement. Modify the general education curriculum for special-needs students based upon a variety of instructional techniques and technologies. Meet with parents and guardians to discuss their children's progress and to determine their priorities for their children and their resource needs. Plan and conduct activities for a balanced program of instruction, demonstration, and work time that provides students with opportunities to observe, question, and investigate.

Establish and enforce rules for behavior and policies and procedures to maintain order among the students for whom they are responsible. Confer with parents, administrators, testing specialists, social workers, and professionals to develop individual educational plans designed to promote students' educational, physical, and social development. Maintain accurate and complete student records and prepare reports on children and activities as required by laws, district policies, and administrative regulations. Establish clear objectives for all lessons, units, and projects and communicate those objectives to students. Develop and implement strategies to meet the needs of students with a variety of handicapping conditions. Prepare classrooms for class activities and provide a variety of materials and resources for children to explore, manipulate, and use, both in learning activities and imaginative play. Confer with parents or guardians, teachers, counselors, and administrators to resolve students' behavioral and academic problems. Observe and evaluate students' performance, behavior, social development, and physical health. Teach students personal development skills such as goal setting, independence, and self-advocacy.

Teach or instruct vocational or occupational subjects at the postsecondary level (but at less than the baccalaureate) to students who have graduated or left high school. Includes correspondence school instructors; industrial, commercial, and government training instructors; and adult education teachers and instructors who prepare persons to operate industrial machinery and equipment and transportation and communications equipment. Teaching may take place in public or private schools whose primary business is education or in a school associated with an organization whose primary business is other than education. Supervise and monitor students' use of tools and equipment. Observe and evaluate students' work to determine progress, provide feedback, and make suggestions for improvement. Present lectures and conduct discussions to increase students' knowledge and competence, using visual aids such as graphs, charts, videotapes, and slides. Administer oral, written, or performance tests to measure progress and to evaluate training effectiveness. Prepare reports and maintain records such as student grades, attendance rolls, and training activity details. Supervise independent or group projects, field placements, laboratory work, or other training. Determine training needs of students or workers. Provide individualized instruction and tutorial or remedial instruction. Conduct on-the-job training, classes, or training sessions to teach and demonstrate principles, techniques, procedures,

and methods of designated subjects. Develop curricula and plan course content and methods of instruction. Prepare outlines of instructional programs and training schedules and establish course goals. Integrate academic and vocational curricula so that students can obtain a variety of skills. Develop teaching aids such as instructional software, multimedia visual aids, or study materials. Select and assemble books, materials, supplies, and equipment for training, courses, or projects. Advise students on course selection, career decisions, and other academic and vocational concerns. Participate in conferences, seminars, and training sessions to keep abreast of developments in the field and integrate relevant information into training programs. Serve on faculty and school committees concerned with budgeting, curriculum revision, and course and diploma requirements. Review enrollment applications and correspond with applicants to obtain additional information. Arrange for lectures by experts in designated fields.

Control air traffic on and within vicinity of airport and movement of air traffic between altitude sectors and control centers according to established procedures and policies. Authorize, regulate, and control commercial airline flights according to government or company regulations to expedite and ensure flight safety. Issue landing and take-off authorizations and instructions. Monitor and direct the movement of aircraft within an assigned airspace and on the ground at airports to minimize delays and maximize safety. Monitor aircraft within a specific airspace, using radar, computer equipment, and visual references. Inform pilots about nearby planes as well as potentially hazardous conditions such as weather, speed and direction of wind, and visibility problems. Provide flight path changes or directions to emergency landing fields for

pilots traveling in bad weather or in emergency situations. Alert airport emergency services in cases of emergency and when aircraft experience difficulties. Direct pilots to runways when space is available or direct them to maintain a traffic pattern until there is space for them to land. Transfer control of departing flights to traffic control centers and accept control of arriving flights. Direct ground traffic, including taxiing aircraft, maintenance and baggage vehicles, and airport workers. Determine the timing and procedures for flight vector changes. Maintain radio and telephone contact with adjacent control towers, terminal control units, and other area control centers in order to coordinate aircraft movement. Contact pilots by radio to provide meteorological, navigational, and other information. Initiate and coordinate searches for missing aircraft. Check conditions and traffic at different altitudes in response to pilots' requests for altitude changes. Relay to control centers air traffic information such as courses, altitudes, and expected arrival times. Compile information about flights from flight plans, pilot reports, radar, and observations. Inspect, adjust, and control radio equipment and airport lights. Conduct preflight briefings on weather conditions, suggested routes, altitudes, indications of turbulence, and other flight safety information. Analyze factors such as weather reports, fuel requirements, and maps in order to determine air routes. Organize flight plans and traffic management plans to prepare for planes about to enter assigned airspace.

The job openings listed here are shared with Assessors.

Appraise real property to determine its value for purchase, sales, investment, mortgage, or loan purposes. Prepare written reports that estimate property values, outline methods by which the estimations were made, and meet appraisal standards. Compute final estimation of property values, taking into account such factors as depreciation, replacement costs, value comparisons of similar properties, and income potential. Search public records for transactions such as sales, leases, and assessments. Inspect properties to evaluate construction, condition, special features, and functional design and to take property measurements. Photograph interiors and exteriors of properties in order to assist in estimating property value, substantiate findings, and complete appraisal reports. Evaluate land and neighborhoods where properties are situated, considering locations and trends or impending changes that could influence future values. Obtain county land values and sales information about nearby properties in order to aid in establishment of property values. Verify legal descriptions of properties by comparing

them to county records. Check building codes and zoning bylaws in order to determine any effects on the properties being appraised. Estimate building replacement costs, using building valuation manuals and professional cost estimators. Examine income records and operating costs of income properties. Interview persons familiar with properties and immediate surroundings, such as contractors, homeowners, and realtors, in order to obtain pertinent information. Examine the type and location of nearby services such as shopping centers, schools, parks, and other neighborhood features in order to evaluate their impact on property values. Draw land diagrams that will be used in appraisal reports to support findings. Testify in court as to the value of a piece of real estate property.

GOE—Interest Area/Cluster: 06. Finance and Insurance. **Work Group:** 06.02. Finance/Insurance Investigation and Analysis. **Other Jobs in This Work Group:** Appraisers and Assessors of Real Estate; Assessors; Claims Adjusters, Examiners, and Investigators; Claims Examiners, Property and Casualty Insurance; Cost Estimators; Credit Analysts; Financial Analysts; Insurance Adjusters, Examiners, and Investigators; Insurance Appraisers, Auto Damage; Insurance Underwriters; Loan Counselors; Loan Officers; Market Research Analysts; Survey Researchers.

Detectives and Criminal Investigators

See Criminal Investigators and Special Agents (an Enterprising job), Immigration and Customs Inspectors (a Conventional job), Police Detectives (an Enterprising job), and Police Identification and Records Officers (a Conventional job), described separately.

Directors, Religious Activities and Education

- ✿ Personality Code: ESC
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$35,370
- ✿ Beginning Wage: \$19,850
- ✿ Earnings Growth Potential: High
- ✿ Growth: 19.7%
- ✿ Annual Job Openings: 11,463
- ✿ Self-Employed: 0.0%
- ✿ Part-Time: 25.2%

Direct and coordinate activities of their chosen denominational groups to meet religious needs of students. Plan, direct, or coordinate church school programs designed to promote religious education among church membership. May provide counseling and guidance relative to marital, health, financial, and religious problems. Analyze

member participation and changes in congregation emphasis to determine needs for religious education. Collaborate with other ministry members to establish goals and objectives for religious education programs and to develop ways to encourage program participation. Interpret religious education activities to the public through speaking, leading discussions, and writing articles for local and national publications. Implement program plans by ordering needed materials, scheduling speakers, reserving spaces, and handling other administrative details. Confer with clergy members, congregation officials, and congregation organizations to encourage support of and participation in religious education activities. Develop and direct study courses and religious education programs within congregations. Locate and distribute resources such as periodicals and curricula in order to enhance the effectiveness of educational programs. Visit congregation members' homes, or arrange for pastoral visits, in order to provide information and resources regarding religious education programs. Identify and recruit potential volunteer workers. Participate in denominational activities aimed at goals such as promoting interfaith understanding or providing aid to new or small congregations. Publicize programs through sources such as newsletters, bulletins, and mailings. Counsel individuals regarding interpersonal, health, financial, and religious problems. Attend workshops, seminars, and conferences to obtain program ideas, information, and resources. Analyze revenue and program cost data to determine budget priorities. Train and supervise religious education instructional staffs. Select appropriate curricula and class structures for educational programs. Schedule special events such as camps, conferences, meetings, seminars, and retreats. Plan and conduct conferences dealing with the interpretation of religious ideas and convictions.

GOE—Interest Area/Cluster: 10. Human Service.

Work Group: 10.02. Religious Work. **Other Jobs in This Work Group:** Clergy.

Skills: Management of Personnel Resources; Social Perceptiveness; Negotiation; Speaking; Management

of Financial Resources; Service Orientation; Coordination; Management of Material Resources.

Education and Training Programs: Bible/Biblical Studies; Missions/Missionary Studies and Missiology; Religious Education; Youth Ministry. **Related Knowledge/Courses:** Philosophy and Theology;

Education and Training; Therapy and Counseling; Sales and Marketing; History and Archeology; Economics and Accounting.

Work Environment: Indoors; sitting.

Directors—Stage, Motion Pictures, Television, and Radio

- ✿ Personality Code: EA
- ✿ Education/Training Required: Work experience plus degree
- ✿ Annual Earnings: \$61,090
- ✿ Beginning Wage: \$28,980
- ✿ Earnings Growth Potential: Very high
- ✿ Growth: 11.1%
- ✿ Annual Job Openings: 8,992
- ✿ Self-Employed: 29.5%
- ✿ Part-Time: 9.0%

The job openings listed here are shared with Producers, with Program Directors, with Talent Directors, and with Technical Directors/Managers.

Interpret script, conduct rehearsals, and direct activities of cast and technical crew for stage, motion pictures, television, or radio programs.

Direct live broadcasts, films and recordings, or non-broadcast programming for public entertainment or education. Supervise and coordinate the work of camera, lighting, design, and sound crew members. Study and research scripts to determine how they should be directed. Cut and edit film or tape to integrate component parts into desired sequences. Collaborate with film and sound editors during the post-production process as films are edited and soundtracks are added. Confer with technical directors, managers,

crew members, and writers to discuss details of production, such as photography, script, music, sets, and costumes. Plan details such as framing, composition, camera movement, sound, and actor movement for each shot or scene. Communicate to actors the approach, characterization, and movement needed for each scene in such a way that rehearsals and takes are minimized. Establish pace of programs and sequences of scenes according to time requirements and cast and set accessibility. Choose settings and locations for films and determine how scenes will be shot in these settings. Identify and approve equipment and elements required for productions, such as scenery, lights, props, costumes, choreography, and music. Compile scripts, program notes, and other material related to productions. Perform producers' duties such as securing financial backing, establishing and administering budgets, and recruiting cast and crew. Select plays or scripts for production and determine how material should be interpreted and performed. Compile cue words and phrases; cue announcers, cast members, and technicians during performances. Consult with writers, producers, or actors about script changes or "workshop" scripts, through rehearsal with writers and actors, to create final drafts. Collaborate with producers to hire crew members such as art directors, cinematographers, and costumer designers. Review film daily to check on work in progress and to plan for future filming. Interpret stage-set diagrams to determine stage layouts and supervise placement of equipment and scenery. Hold auditions for parts or negotiate contracts with actors determined suitable for specific roles, working in conjunction with producers.

GOE—Interest Area/Cluster: 03. Arts and Communication. **Work Group:** 03.06. Drama. **Other Jobs in This Work Group:** Actors; Costume Attendants; Makeup Artists, Theatrical and Performance; Public Address System and Other Announcers; Radio and Television Announcers.

Skills: Management of Personnel Resources; Time Management; Judgment and Decision Making; Operations Analysis; Equipment Selection; Active Listening; Speaking; Critical Thinking.

Education and Training Programs: Radio and Television; Drama and Dramatics/Theatre Arts, General; Directing and Theatrical Production; Theatre/Theatre Arts Management; Dramatic/Theatre Arts and Stagecraft, Other; Film/Cinema Studies; Cinematography and Film/Video Production. **Related Knowledge/Courses:** Communications and Media; Telecommunications; Fine Arts; Geography; Computers and Electronics; Education and Training.

Work Environment: More often indoors than outdoors; noisy; sitting; using hands on objects, tools, or controls.

Education Administrators, Elementary and Secondary School

- ✿ Personality Code: ESC

 - ✿ Part-Time: 8.3%
-

Plan, direct, or coordinate the academic, clerical, or auxiliary activities of public or private elementary or secondary-level schools. Review and approve new programs or recommend modifications to existing programs, submitting program proposals for school board approval as necessary. Prepare, maintain, or oversee the preparation and maintenance of attendance, activity, planning, or personnel reports and records. Confer with parents and staff to discuss educational activities, policies, and student behavioral or learning problems. Prepare and submit budget requests and recommendations or grant proposals to solicit program funding. Direct and coordinate school maintenance services and the use of school facilities. Counsel and provide guidance to

students regarding personal, academic, vocational, or behavioral issues. Organize and direct committees of specialists, volunteers, and staff to provide technical and advisory assistance for programs. Teach classes or courses to students. Advocate for new schools to be built or for existing facilities to be repaired or remodeled. Plan and develop instructional methods and content for educational, vocational, or student activity programs. Develop partnerships with businesses, communities, and other organizations to help meet identified educational needs and to provide school-to-work programs. Direct and coordinate activities of teachers, administrators, and support staff at schools, public agencies, and institutions. Evaluate curricula, teaching methods, and programs to determine their effectiveness, efficiency, and utilization and to ensure that school activities comply with federal, state, and local regulations. Set educational standards and goals and help establish policies and procedures to carry them out. Recruit, hire, train, and evaluate primary and supplemental staff. Enforce discipline and attendance rules. Observe teaching methods and examine learning materials to evaluate and standardize curricula and teaching techniques and to determine areas where improvement is needed. Establish, coordinate, and oversee particular programs across school districts, such as programs to evaluate student academic achievement. Review and interpret government codes and develop programs to ensure adherence to codes and facility safety, security, and maintenance.

- ❖ Part-Time: 6.1%

Plan, organize, direct, or coordinate activities of workers engaged in landscaping or groundskeeping activities such as planting and maintaining ornamental trees, shrubs, flowers, and lawns and applying fertilizers, pesticides, and other chemicals, according to contract specifications. May also coordinate activities of workers engaged in terracing hillsides, building retaining walls, constructing pathways, installing patios, and similar activities in following a landscape design plan. Work may involve reviewing contracts to ascertain service, machine, and work force requirements; answering inquiries from potential customers regarding methods, material, and price ranges; and preparing estimates according to labor, material, and machine costs. Establish and enforce operating procedures and work standards that will ensure adequate performance and personnel safety. Inspect completed work to ensure conformance to specifications, standards, and contract requirements. Direct activities of workers who perform duties such as landscaping, cultivating lawns, or pruning trees and shrubs. Schedule work for crews depending on work priorities, crew and equipment availability, and weather conditions. Plant and maintain vegetation through activities such as mulching, fertilizing, watering, mowing, and pruning. Monitor project activities to ensure that instructions are

followed, deadlines are met, and schedules are maintained. Train workers in tasks such as transplanting and pruning trees and shrubs, finishing cement, using equipment, and caring for turf. Provide workers with assistance in performing duties as necessary to meet deadlines. Inventory supplies of tools, equipment, and materials to ensure that sufficient supplies are available and items are in usable condition. Confer with other supervisors to coordinate work activities with those of other departments or units. Perform personnel-related activities such as hiring workers, evaluating staff performance, and taking disciplinary actions when performance problems occur. Direct or perform mixing and application of fertilizers, insecticides, herbicides, and fungicides. Review contracts or work assignments to determine service, machine, and workforce requirements for jobs. Maintain required records such as personnel information and project records. Prepare and maintain required records such as work activity and personnel reports. Order the performance of corrective work when problems occur, and recommend procedural changes to avoid such problems. Identify diseases and pests affecting landscaping, and order appropriate treatments. Investigate work-related complaints in order to verify problems, and to determine responses. Direct and assist workers engaged in the maintenance and repair of equipment such as power tools and motorized equipment. Install and maintain landscaped areas, performing tasks such as removing snow, pouring cement curbs, and repairing sidewalks.

Plan, organize, direct, control, or coordinate gaming operations in a casino. Formulate gaming policies for their area of responsibility. Resolve customer complaints regarding problems such as payout errors. Remove suspected cheaters, such as card counters and other players who may have systems that shift the odds of winning to their favor. Maintain familiarity with all games used at a facility, as well as strategies and tricks employed in those games. Train new workers and evaluate their performance. Circulate among gaming tables to ensure that operations are conducted properly, that dealers follow house rules, and that players are not cheating. Explain and interpret house rules, such as game rules and betting limits. Monitor staffing levels to ensure that games and tables are adequately staffed for each shift, arranging for staff rotations and breaks and locating substitute employees as necessary. Interview and hire workers. Prepare work schedules and station assignments and keep attendance records. Direct the distribution of complimentary hotel rooms, meals, and other discounts or free items given to players based on their length of play and betting totals. Establish policies on issues such as the type of gambling offered and the odds, the extension of credit, and the serving of food and beverages. Track supplies of money to tables and perform any required paperwork. Set and maintain a bank and table limit for each game. Monitor credit extended to players. Review operational expenses, budget estimates, betting accounts, and collection reports for accuracy. Record, collect, and pay off bets, issuing receipts as necessary. Direct workers compiling summary sheets that show wager amounts and payoffs for races and events. Notify board attendants of table vacancies so that waiting patrons can play.

Plan, direct, or coordinate the operations of companies or public and private sector organizations. Duties and responsibilities include formulating policies, managing daily operations, and planning the use of materials and human resources, but are too diverse and general in nature to be classified in any one functional area of management or administration, such as personnel, purchasing, or administrative services. Includes owners and managers who head small business establishments whose duties are primarily managerial. Oversee activities directly related to making products or providing services. Direct and coordinate activities of businesses or departments concerned

with the production, pricing, sales, or distribution of products. Review financial statements, sales and activity reports, and other performance data to measure productivity and goal achievement and to determine areas needing cost reduction and program improvement. Manage staff, preparing work schedules and assigning specific duties. Direct and coordinate organization's financial and budget activities to fund operations, maximize investments, and increase efficiency. Establish and implement departmental policies, goals, objectives, and procedures, conferring with board members, organization officials, and staff members as necessary. Determine staffing requirements, and interview, hire, and train new employees, or oversee those personnel processes. Plan and direct activities such as sales promotions, coordinating with other department heads as required. Determine goods and services to be sold, and set prices and credit terms based on forecasts of customer demand. Monitor businesses and agencies to ensure that they efficiently and effectively provide needed services while staying within budgetary limits. Locate, select, and procure merchandise for resale, representing management in purchase negotiations. Perform sales floor work such as greeting and assisting customers, stocking shelves, and taking inventory. Manage the movement of goods into and out of production facilities. Develop and implement product marketing strategies including advertising campaigns and sales promotions. Recommend locations for new facilities or oversee the remodeling of current facilities. Direct non-merchandising departments of businesses such as advertising and purchasing. Plan store layouts, and design displays.

Insurance Sales Agents

- Personality Code: ECS
- Education/Training Required: Bachelor's degree
- Annual Earnings: \$44,110
- Beginning Wage: \$25,230
- Earnings Growth Potential: High
- Growth: 12.9%
- Annual Job Openings: 64,162
- Self-Employed: 25.5%
- Part-Time: 9.8%

Sell life, property, casualty, health, automotive, or other types of insurance. May refer clients to independent brokers, work as independent broker, or be employed by an insurance company. Call on policyholders to deliver and explain policy, to analyze insurance program and suggest additions or changes, or to change beneficiaries. Calculate premiums and establish payment method. Customize insurance programs to suit individual customers, often covering a variety of risks. Sell various types of insurance policies to businesses and individuals on behalf of insurance companies, including automobile, fire, life, property, medical, and dental insurance or specialized policies such as marine, farm/crop, and medical malpractice. Interview prospective

clients to obtain data about their financial resources and needs and the physical condition of the person or property to be insured and to discuss any existing coverage. Seek out new clients and develop clientele by networking to find new customers and generate lists of prospective clients. Explain features, advantages, and disadvantages of various policies to promote sale of insurance plans. Contact underwriter and submit forms to obtain binder coverage. Ensure that policy requirements are fulfilled, including any necessary medical examinations and the completion of appropriate forms. Confer with clients to obtain and provide information when claims are made on a policy. Perform administrative tasks, such as maintaining records and handling policy renewals. Select company that offers type of coverage requested by client to underwrite policy. Monitor insurance claims to ensure that they are settled equitably for both the client and the insurer. Develop marketing strategies to compete with other individuals or companies who sell insurance. Attend meetings, seminars, and programs to learn about new products and services, learn new skills, and receive technical assistance in developing new accounts. Inspect property, examining its general condition, type of construction, age, and other characteristics, to decide if it is a good insurance risk. Install bookkeeping systems and resolve system problems. Plan and oversee incorporation of insurance program into bookkeeping system of company. Explain necessary bookkeeping requirements for customer to implement and provide group insurance program.

Police and Sheriff's Patrol Officers

See Police Patrol Officers (a Realistic job) and Sheriffs and Deputy Sheriffs (a Enterprising job), described separately.

Police Detectives

- ✿ Personality Code: EI
- ✿ Education/Training Required: Work experience in a related occupation
- ✿ Annual Earnings: \$59,930
- ✿ Beginning Wage: \$35,600
- ✿ Earnings Growth Potential: High
- ✿ Growth: 17.3%
- ✿ Annual Job Openings: 14,746
- ✿ Self-Employed: 0.3%
- ✿ Part-Time: 2.2%

The job openings listed here are shared with Criminal Investigators and Special Agents, with Immigration and Customs Inspectors, and with Police Identification and Records Officers.

Conduct investigations to prevent crimes or solve criminal cases. Provide testimony as witnesses in court. Secure deceased bodies and obtain evidence

from them, preventing bystanders from tampering with bodies prior to medical examiners' arrival. Examine crime scenes to obtain clues and evidence such as loose hairs, fibers, clothing, or weapons. Obtain evidence from suspects. Record progress of investigations, maintain informational files on suspects, and submit reports to commanding officers or magistrates to authorize warrants. Check victims for signs of life such as breathing and pulse. Prepare charges or responses to charges, or information for court cases, according to formalized procedures. Obtain facts or statements from complainants, witnesses, and accused persons and record interviews, using recording devices. Prepare and serve search and arrest warrants. Note, mark, and photograph locations of objects found such as footprints, tire tracks, bullets, and bloodstains, and take measurements of each scene. Question individuals or observe persons and establishments to confirm information given to patrol officers. Preserve, process, and analyze items of evidence obtained from crime scenes and suspects, placing them in proper containers and destroying evidence no longer needed. Secure persons at scenes, keeping witnesses from conversing or leaving scenes before investigators arrive. Take photographs from all angles of relevant parts of crime scenes, including entrance and exit routes and streets and intersections. Analyze completed police reports to determine what additional information and investigative work is needed. Obtain summary of incidents from officers in charge at crime scenes, taking care to avoid disturbing evidence. Provide information to lab personnel concerning the source of each item of evidence and tests to be performed. Examine records and governmental agency files to find identifying data about suspects. Block or rope off scenes and check perimeters to ensure that scenes are completely secured. Summon medical help for injured individuals and alert medical personnel to take statements from them. Observe and photograph narcotic purchase transactions to compile evidence and protect undercover investigators.

The job openings listed here are shared with Directors—Stage, Motion Pictures, Television, and Radio; Program Directors; Talent Directors; and Technical Directors/Managers.

Plan and coordinate various aspects of radio, television, stage, or motion picture production, such as selecting script; coordinating writing,

directing, and editing; and arranging financing. Coordinate the activities of writers, directors, managers, and other personnel throughout the production process. Monitor post-production processes to ensure accurate completion of all details. Perform management activities such as budgeting, scheduling, planning, and marketing. Determine production size, content, and budget, establishing details such as production schedules and management policies. Compose and edit scripts or provide screenwriters with story outlines from which scripts can be written. Conduct meetings with staff to discuss production progress and to ensure production objectives are attained. Resolve personnel problems that arise during the production process by acting as liaisons between dissenting parties when necessary. Produce shows for special occasions, such as holidays or testimonials. Edit and write news stories from information collected by reporters. Write and submit proposals to bid on contracts for projects. Hire directors, principal cast members, and key production staff members. Arrange financing for productions. Select plays, scripts, books, or ideas to be produced. Review film, recordings, or rehearsals to ensure conformance to production and broadcast standards. Perform administrative duties such as preparing operational reports, distributing rehearsal call sheets and script copies, and arranging for rehearsal quarters. Obtain and distribute costumes, props, music, and studio equipment needed to complete productions. Negotiate contracts with artistic personnel, often in accordance with collective bargaining agreements. Maintain knowledge of minimum wages and working conditions established by unions or associations of actors and technicians. Plan and coordinate the production of musical recordings, selecting music and directing performers. Negotiate with parties, including independent producers and the distributors and broadcasters who will be handling completed productions. Develop marketing plans for finished products, collaborating with sales associates to supervise product distribution. Determine and direct the content of radio programming.

Plan, direct, or coordinate selling, buying, leasing, or governance activities of commercial, industrial, or residential real estate properties.

Meet with prospective tenants to show properties, explain terms of occupancy, and provide information about local areas. Direct collection of monthly assessments; rental fees; and deposits and payment of insurance premiums, mortgage, taxes, and incurred operating expenses. Inspect grounds, facilities, and equipment routinely to determine necessity of repairs or maintenance. Investigate complaints, disturbances, and violations and resolve problems, following management rules and regulations. Manage and oversee operations, maintenance, administration, and improvement of commercial, industrial, or residential properties. Plan, schedule, and coordinate general maintenance, major repairs, and remodeling or construction projects for commercial or residential properties. Negotiate the sale, lease, or development of property and complete or review appropriate documents and forms. Maintain records of sales, rental or usage activity, special permits issued, maintenance and operating costs, or property availability. Determine and certify the eligibility of prospective tenants, following government regulations. Prepare detailed budgets and financial reports for properties. Direct and coordinate the activities of staff and contract personnel and evaluate their performance. Maintain contact with insurance carriers, fire and police departments, and other agencies to ensure protection and compliance with codes and regulations. Market vacant space to prospective tenants through leasing agents, advertising, or other methods. Solicit and analyze bids from contractors for repairs, renovations, and maintenance. Review rents to ensure that they are in line with rental markets. Prepare and administer contracts for provision of property services such as cleaning, maintenance, and security services. Purchase building and maintenance supplies, equipment, or furniture. Act as liaisons between on-site managers or tenants and owners. Confer regularly with community association members to ensure their needs are being met. Meet with boards of directors and committees to discuss and resolve legal and environmental issues or disputes between neighbors.

Plan and direct public relations programs designed to create and maintain a favorable public image for employer or client or, if engaged in fundraising, plan and direct activities to solicit and maintain funds for special projects and non-profit organizations. Identify main client groups and audiences and determine the best way to

communicate publicity information to them. Write interesting and effective press releases, prepare information for media kits, and develop and maintain company Internet or intranet Web pages. Develop and maintain the company's corporate image and identity, which includes the use of logos and signage. Manage communications budgets. Manage special events such as sponsorship of races, parties introducing new products, or other activities the firm supports to gain public attention through the media without advertising directly. Draft speeches for company executives and arrange interviews and other forms of contact for them. Assign, supervise, and review the activities of public relations staff. Evaluate advertising and promotion programs for compatibility with public relations efforts. Establish and maintain effective working relationships with local and municipal government officials and media representatives. Confer with labor relations managers to develop internal communications that keep employees informed of company activities. Direct activities of external agencies, establishments, and departments that develop and implement communication strategies and information programs. Formulate policies and procedures related to public information programs, working with public relations executives. Respond to requests for information about employers' activities or status. Establish goals for soliciting funds, develop policies for collection and safeguarding of contributions, and coordinate disbursement of funds. Facilitate consumer relations or the relationship between parts of the company such as the managers and employees or different branch offices. Maintain company archives. Manage in-house communication courses. Produce films and other video products, regulate their distribution, and operate film library. Observe and report on social, economic, and political trends that might affect employers.

Sell goods for wholesalers or manufacturers where technical or scientific knowledge is required in such areas as biology, engineering, chemistry, and electronics, normally obtained from at least 2 years of postsecondary education. Contact new and existing customers to discuss their needs, and to explain how these needs could be met by specific products and services. Answer customers' questions about products, prices, availability, product uses, and credit terms. Quote prices, credit terms, and other bid specifications. Emphasize product features based on analyses of customers' needs, and on technical knowledge of product capabilities and limitations. Negotiate prices and terms of sales and service agreements. Maintain customer records, using automated systems. Identify prospective customers by using business directories, following leads from existing clients, participating in organizations and clubs, and attending trade shows and conferences. Prepare sales contracts for orders obtained, and submit orders for processing. Select the correct products or assist customers in making product selections, based on customers' needs, product specifications, and applicable regulations. Collaborate with colleagues to

exchange information such as selling strategies and marketing information. Prepare sales presentations and proposals that explain product specifications and applications. Provide customers with ongoing technical support. Demonstrate and explain the operation and use of products. Inform customers of estimated delivery schedules, service contracts, warranties, or other information pertaining to purchased products. Attend sales and trade meetings, and read related publications in order to obtain information about market conditions, business trends, and industry developments. Visit establishments to evaluate needs and to promote product or service sales. Complete expense reports, sales reports, and other paperwork. Initiate sales campaigns and follow marketing plan guidelines in order to meet sales and production expectations. Recommend ways for customers to alter product usage in order to improve production. Complete product and development training as required. Provide feedback to company's product design teams so that products can be tailored to clients' needs. Arrange for installation and test-operation of machinery.

GOE—Interest Area/Cluster: 14. Retail and Wholesale Sales and Service. **Work Group:** 14.02. Technical Sales. **Other Jobs in This Work Group:** Sales Engineers.

Cargo and Freight Agents

- ✿ Personality Code: CER
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$37,060
- ✿ Beginning Wage: \$22,720
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 16.5%
- ✿ Annual Job Openings: 9,967
- ✿ Self-Employed: 1.1%
- ✿ Part-Time: 6.1%

Expedite and route movement of incoming and outgoing cargo and freight shipments in airline, train, and trucking terminals and shipping docks. Take orders from customers and arrange pickup of freight and cargo for delivery to loading platform. Prepare and examine bills of lading to determine shipping charges and tariffs. Negotiate and arrange transport of goods with shipping or freight companies. Notify consignees, passengers, or customers of the arrival of freight or baggage and arrange for delivery. Advise clients on transportation and payment methods. Prepare manifests showing baggage, mail, and freight weights and number of passengers on airplanes and transmit data to destinations. Determine method of shipment and prepare bills of lading, invoices, and other shipping documents. Check import/export documentation to determine cargo contents and classify goods into different fee or tariff groups, using a tariff coding system. Estimate freight or postal rates and record shipment costs and weights. Enter shipping information into a computer by hand or by using a hand-held scanner that reads bar codes on goods. Retrieve stored items and trace lost shipments as necessary. Pack goods for shipping, using tools such as staplers, strapping machines, and hammers. Direct delivery trucks to shipping doors or designated marshalling areas and help load and unload goods safely. Inspect and count items received and check them against invoices or other documents, recording shortages and rejecting damaged goods. Install straps, braces, and padding to loads to prevent

shifting or damage during shipment. Keep records of all goods shipped, received, and stored. Coordinate and supervise activities of workers engaged in packing and shipping merchandise. Arrange insurance coverage for goods. Direct or participate in cargo loading to ensure completeness of load and even distribution of weight. Open cargo containers and unwrap contents, using steel cutters, crowbars, or other hand tools. Attach address labels, identification codes, and shipping instructions to containers. Contact vendors or claims adjustment departments to resolve problems with shipments or contact service depots to arrange for repairs. Route received goods to first available flight or to appropriate storage areas or departments, using forklifts, handtrucks, or other equipment. Maintain a supply of packing materials.

Coordinate changes to computer databases. Test and implement the databases, applying knowledge of database management systems. May plan, coordinate, and implement security measures to safeguard computer databases. Test programs or

databases, correct errors, and make necessary modifications. Modify existing databases and database management systems or direct programmers and analysts to make changes. Plan, coordinate, and implement security measures to safeguard information in computer files against accidental or unauthorized damage, modification, or disclosure. Work as part of project teams to coordinate database development and determine project scope and limitations. Write and code logical and physical database descriptions and specify identifiers of database to management system or direct others in coding descriptions. Train users and answer questions. Specify users and user access levels for each segment of databases. Approve, schedule, plan, and supervise the installation and testing of new products and improvements to computer systems such as the installation of new databases. Review project requests describing database user needs to estimate time and cost required to accomplish project. Develop standards and guidelines to guide the use and acquisition of software and to protect vulnerable information. Review procedures in database management system manuals for making changes to database. Develop methods for integrating different products so they work properly together such as customizing commercial databases to fit specific needs. Develop data models describing data elements and how they are used, following procedures and using pen, template, or computer software. Select and enter codes to monitor database performances and to create production databases. Establish and calculate optimum values for database parameters, using manuals and calculators. Revise company definition of data as defined in data dictionary. Review workflow charts developed by programmer analysts to understand tasks computer will perform, such as updating records. Identify and evaluate industry trends in database systems to serve as a source of information and advice for upper management.

Review individual applications for insurance to evaluate degree of risk involved and determine acceptance of applications. Examine documents to determine degree of risk from such factors as applicant financial standing and value and condition of property. Decline excessive risks. Write to field representatives, medical personnel, and others to obtain further information, quote rates, or explain company underwriting policies. Evaluate possibility of losses due to catastrophe or excessive insurance. Decrease value of policy when risk is substandard and specify applicable endorsements or apply rating to ensure safe profitable distribution of risks, using reference materials. Review company records to determine amount of insurance in force on single risk or group of closely related risks. Authorize reinsurance of policy when risk is high.

GOE—Interest Area/Cluster: 06. Finance and Insurance. **Work Group:** 06.02. Finance/Insurance Investigation and Analysis. **Other Jobs in This Work Group:** Appraisers and Assessors of Real Estate; Appraisers, Real Estate; Assessors; Claims Adjusters, Examiners, and Investigators; Claims Examiners, Property and Casualty Insurance; Cost Estimators; Credit Analysts; Financial Analysts; Insurance Adjusters, Examiners, and Investigators; Insurance Appraisers, Auto Damage; Loan Counselors; Loan Officers; Market Research Analysts; Survey Researchers.

Mapping Technicians

- ✿ Personality Code: CR
- ✿ Education/Training Required: Moderate-term on-the-job training
- ✿ Annual Earnings: \$33,640
- ✿ Beginning Wage: \$20,670
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 19.4%
- ✿ Annual Job Openings: 8,299
- ✿ Self-Employed: 4.2%
- ✿ Part-Time: 4.5%

The job openings listed here are shared with Surveying Technicians.

Calculate mapmaking information from field notes and draw and verify accuracy of topographical maps. Check all layers of maps to ensure accuracy, identifying and marking errors and making corrections. Determine scales, line sizes, and colors to be used for hard copies of computerized maps, using plotters. Monitor mapping work and the updating of maps to ensure accuracy, the inclusion of new and/or changed information, and compliance with rules and regulations. Identify and compile database information to create maps in response to requests. Produce and update overlay maps to show information boundaries, water locations, and topographic features on various base maps and at different scales. Trace contours and topographic details to generate maps that denote specific land and property locations and geographic attributes. Lay out and match aerial photographs in sequences in which they were taken and identify any areas missing from photographs. Compare topographical features and contour lines with images from aerial photographs, old maps, and other reference materials to verify the accuracy

of their identification. Compute and measure scaled distances between reference points to establish relative positions of adjoining prints and enable the creation of photographic mosaics. Research resources such as survey maps and legal descriptions to verify property lines and to obtain information needed for mapping. Form three-dimensional images of aerial photographs taken from different locations, using mathematical techniques and plotting instruments. Enter GPS data, legal deeds, field notes, and land survey reports into GIS workstations so that information can be transformed into graphic land descriptions such as maps and drawings. Analyze aerial photographs to detect and interpret significant military, industrial, resource, or topographical data. Redraw and correct maps, such as revising parcel maps to reflect tax code area changes, using information from official records and surveys. Train staff members in duties such as tax mapping, the use of computerized mapping equipment, and the interpretation of source documents.

Network Designers

- ✿ Personality Code: CIR
- ✿ Education/Training Required: Bachelor's degree
- ✿ Annual Earnings: \$71,510
- ✿ Beginning Wage: \$37,600
- ✿ Earnings Growth Potential: High
- ✿ Growth: 15.1%
- ✿ Annual Job Openings: 14,374
- ✿ Self-Employed: 6.6%
- ✿ Part-Time: 5.6%

The job openings listed here are shared with Computer Systems Engineers/Architects, with Software Quality Assurance Engineers and Testers, with Web Administrators, and with Web Developers.

Determine user requirements and design specifications for computer networks. Plan and implement network upgrades. Develop network-related documentation. Design, build, or operate equipment configuration prototypes, including network hardware, software, servers, or server operation systems. Coordinate network operations, maintenance, repairs, or upgrades. Adjust network sizes to meet volume or capacity demands. Communicate with vendors to gather information about products, to alert them to future needs, to resolve problems, or to address system maintenance issues. Coordinate installation of new equipment. Coordinate network or design activities with designers of associated networks. Design, organize, and deliver product awareness, skills transfer, and product education sessions for staff and suppliers. Determine specific network hardware or

software requirements, such as platforms, interfaces, bandwidths, or routine schemas. Develop disaster recovery plans. Communicate with customers, sales staff, or marketing staff to determine customer needs. Explain design specifications to integration or test engineers. Develop plans or budgets for network equipment replacement. Prepare design presentations and proposals for staff or customers. Supervise engineers and other staff in the design or implementation of network solutions. Use network computer-aided design (CAD) software packages to optimize network designs. Develop or maintain project reporting systems. Participate in network technology upgrade or expansion projects, including installation of hardware and software and integration testing. Research and test new or modified hardware or software products to determine performance and interoperability. Develop and implement solutions for network problems. Prepare or monitor project schedules, budgets, or cost control systems. Monitor and analyze network performance and data input/output reports to detect problems, identify inefficient use of computer resources, or perform capacity planning. Evaluate network designs to determine whether customer requirements are met efficiently and effectively. Estimate time and materials needed to complete projects. Develop or recommend network security measures, such as firewalls, network security audits, or automated security probes.

GOE—Interest Area/Cluster: 11. Information Technology. **Work Group:** 11.02. Information Technology Specialties. **Other Jobs in This Work Group:** Computer and Information Scientists, Research; Computer Operators; Computer Programmers; Computer Security Specialists; Computer Software Engineers, Applications; Computer Software Engineers, Systems Software; Computer Support Specialists; Computer Systems Analysts; Computer Systems Engineers/Architects; Database Administrators; Network Systems and Data Communications Analysts; Software Quality Assurance Engineers and Testers; Web Administrators; Web Developers.

Collect data on work environments for analysis by occupational health and safety specialists.

Implement and conduct evaluation of programs designed to limit chemical, physical, biological, and ergonomic risks to workers. Maintain all required records and documentation. Supply, operate, and maintain personal protective equipment. Verify that safety equipment such as hearing protection and respirators is available to employees, and monitor their use of such equipment to ensure proper fit and use. Evaluate situations where a worker has refused to work on the grounds that danger or potential harm exists, and determine how such situations should be handled. Prepare and calibrate equipment used to collect and analyze samples. Test workplaces for environmental hazards such as exposure to radiation, chemical and biological hazards, and excessive noise. Prepare and review specifications and orders for the purchase of safety equipment, ensuring that proper features are present and that items conform to health and safety standards. Report the results

of environmental contaminant analyses, and recommend corrective measures to be applied. Review physicians' reports, and conduct worker studies in order to determine whether specific instances of disease or illness are job-related. Examine credentials, licenses, or permits to ensure compliance with licensing requirements. Conduct fire drills, and inspect fire suppression systems and portable fire systems to ensure that they are in working order. Educate the public about health issues, and enforce health legislation in order to prevent diseases, to promote health, and to help people understand health protection procedures and regulations. Provide consultation to organizations or agencies on the application of safety principles, practices, and techniques in the workplace. Conduct interviews to obtain information and evidence regarding communicable diseases or violations of health and sanitation regulations. Review records and reports concerning laboratory results, staffing, floor plans, fire inspections, and sanitation in order to gather information for the development and enforcement of safety activities. Prepare documents to be used in legal proceedings, testifying in such proceedings when necessary. Plan emergency response drills. Maintain logbooks of daily activities, including areas visited and activities performed.

GOE—Interest Area/Cluster: 07. Government and Public Administration. **Work Group:** 07.03. Regulations Enforcement. **Other Jobs in This Work Group:** Agricultural Inspectors; Aviation Inspectors; Compliance Officers, Except Agriculture, Construction, Health and Safety, and Transportation; Construction and Building Inspectors; Environmental Compliance Inspectors; Equal Opportunity Representatives and Officers; Financial Examiners; Fire Inspectors; Fish and Game Wardens; Forest Fire Inspectors and Prevention Specialists; Freight and Cargo Inspectors; Government Property Inspectors and Investigators; Immigration and Customs Inspectors; Licensing Examiners and Inspectors; Nuclear Monitoring Technicians; Occupational Health and Safety Specialists; Tax Examiners, Collectors, and Revenue Agents; Transportation Vehicle, Equipment, and Systems Inspectors, Except Aviation.

Skills: Science; Persuasion; Operations Analysis; Technology Design; Negotiation; Mathematics; Equipment Selection; Operation Monitoring.

Coordinate and expedite the flow of work and materials within or between departments of an establishment according to production schedules, inventory levels, costs, and production problems. Examine documents, materials, and products, and monitor work processes to assess completeness, accuracy, and conformance to standards and specifications. Review documents such as production schedules, work orders, and staffing tables to determine personnel and materials requirements, and material priorities. Revise production schedules when required due to design changes, labor or material shortages, backlogs, or other interruptions, collaborating with management, marketing, sales, production, and engineering. Confer with department supervisors and other personnel to assess progress and discuss needed changes. Confer with establishment personnel, vendors, and customers to coordinate production and shipping activities, and to resolve complaints or eliminate delays. Record production data, including volume produced, consumption of raw materials, and quality control measures. Requisition and maintain inventories of materials and supplies necessary to meet production demands. Calculate figures such as required amounts of labor and materials, manufacturing costs, and wages, using pricing schedules, adding machines, calculators, or computers. Distribute production schedules and work orders to departments. Compile information such as production rates and progress, materials inventories, materials used, and customer information, so that status reports can be completed. Arrange for delivery, assembly, and distribution of supplies and parts to expedite flow of materials and meet production schedules. Contact suppliers to verify shipment details. Maintain files such as maintenance records, bills of lading, and cost reports. Plan production commitments and timetables for business units, specific programs, and/or jobs, using sales forecasts. Establish and prepare product construction directions and locations; information on required tools, materials, and equipment; numbers of workers needed; and cost projections. Compile and prepare documentation related to production sequences, transportation, personnel schedules, and purchase, maintenance, and repair orders.

Provide documentation and information to account for delays, difficulties, and changes to cost estimates.

GOE—Interest Area/Cluster: 04. Business and Administration. **Work Group:** 04.07. Perform routine clerical and administrative functions such as drafting correspondence, scheduling appointments, organizing and maintaining paper and electronic files, or providing information to callers. Operate office equipment such as fax machines, copiers, and phone systems and use computers for spreadsheet, word-processing, database management, and other applications. Answer telephones and give information to callers, take messages, or transfer calls to appropriate individuals. Greet visitors and callers, handle their inquiries, and direct them to the appropriate persons according to their needs. Set up and maintain paper and electronic filing systems for records, correspondence, and other material. Locate and attach appropriate files to incoming correspondence requiring replies. Open, read, route, and distribute incoming mail and other material and prepare answers to routine letters. Complete forms in accordance with company procedures. Make copies of correspondence and other printed material. Review work done by others to check for correct spelling and grammar, ensure that company format policies are followed, and recommend revisions. Compose, type, and distribute meeting notes, routine correspondence, and reports. Learn to operate new office technologies as they are developed and implemented. Maintain scheduling and event calendars. Schedule and confirm appointments for clients, customers, or supervisors. Manage projects and contribute to committee and team work.

Mail newsletters, promotional material, and other information. Order and dispense supplies. Conduct searches to find needed information, using such sources as the Internet. Provide services to customers, such as order placement and account information. Collect and disburse funds from cash accounts and keep records of collections and disbursements. Prepare and mail checks. Establish work procedures and schedules and keep track of the daily work of clerical staff. Coordinate conferences and meetings. Take dictation in shorthand or by machine and transcribe information. Arrange conferences, meetings, and travel reservations for office personnel. Operate electronic mail systems and coordinate the flow of information both internally and with other organizations. Supervise other clerical staff and provide training and orientation to new staff.

GOE—Interest Area/Cluster: 04. Business and Administration. **Work Group:** 04.04. Secretarial Support. **Other Jobs in This Work Group:** Executive Secretaries and Administrative Assistants; Legal Secretaries; Medical Secretaries.

Skill: Writing.

Education and Training Programs: Administrative Assistant and Secretarial Science, General; Executive Assistant/Executive Secretary. **Related Knowledge/Courses:** Clerical Practices; Customer and Personal Service; Computers and Electronics; Economics and Accounting; English Language; Personnel and Human Resources.

Work Environment: Indoors; sitting; repetitive motions.

Shipping, Receiving, and Traffic Clerks

- ✿ Personality Code: CRE
- ✿ Education/Training Required: Short-term on-the-job training
- ✿ Annual Earnings: \$26,990
- ✿ Beginning Wage: \$17,390
- ✿ Earnings Growth Potential: Medium
- ✿ Growth: 3.7%
- ✿ Annual Job Openings: 138,967

The job openings listed here are shared with Billing, Cost, and Rate Clerks and with Billing, Posting, and Calculating Machine Operators.

Prepare and distribute bank statements to customers, answer inquiries, and reconcile discrepancies in records and accounts. Encode and cancel checks, using bank machines. Take orders for imprinted checks. Compare previously prepared bank statements with canceled checks and reconcile discrepancies. Verify signatures and required information on checks. Post stop-payment notices

to prevent payment of protested checks. Maintain files of canceled checks and customers' signatures. Match statements with batches of canceled checks by account numbers. Weigh envelopes containing statements to determine correct postage and affix postage, using stamps or metering equipment. Load machines with statements, cancelled checks, and envelopes to prepare statements for distribution to customers or stuff envelopes by hand. Retrieve checks returned to customers in error, adjusting customer accounts and answering inquiries about errors as necessary. Route statements for mailing or over-the-counter delivery to customers. Monitor equipment to ensure proper operation. Fix minor problems, such as equipment jams, and notify repair personnel of major equipment problems.

GOE—Interest Area/Cluster: 04. Business and Administration. **Work Group:** 04.06. Mathematical Clerical Support. **Other Jobs in This Work Group:** Billing and Posting Clerks and Machine Operators; Billing, Cost, and Rate Clerks; Bookkeeping, Accounting, and Auditing Clerks; Brokerage Clerks; Payroll and Timekeeping Clerks; Tax Preparers.

Skills: None met the criteria.

Education and Training Program: Accounting Technology/Technician and Bookkeeping. **Related Knowledge/Courses:** Economics and Accounting; Clerical Practices; Administration and Management.

Work Environment: Indoors; sitting; repetitive motions.

Statisticians

- ⦿ Personality Code: CI
- ⦿ Education/Training Required: Master's degree
- ⦿ Annual Earnings: \$69,900
- ⦿ Beginning Wage: \$38,140
- ⦿ Earnings Growth Potential: High
- ⦿ Growth: 8.5%
- ⦿ Annual Job Openings: 3,433
- ⦿ Self-Employed: 6.0%
- ⦿ Part-Time: 13.1%

Engage in the development of mathematical theory or apply statistical theory and methods to collect, organize, interpret, and summarize numerical data to provide usable information. May specialize in fields such as bio-statistics, agricultural statistics, business statistics, economic statistics, or other fields. Report results of statistical analyses, including information in the form of graphs, charts, and tables. Process large amounts of data for statistical modeling and graphic analysis, using computers. Identify relationships and trends in data, as well as any factors that could affect the results of research. Analyze and interpret statistical data in order to identify significant differences in relationships among sources of information. Prepare data for processing by organizing information, checking for any inaccuracies, and adjusting and weighting the raw data. Evaluate the statistical methods and procedures used to obtain data in order to ensure validity, applicability, efficiency, and accuracy. Evaluate sources of information in order to determine any limitations in terms of reliability or usability. Plan data collection methods for specific projects and determine the types and sizes of sample groups to be used. Design research projects that apply valid scientific techniques and utilize information obtained from baselines or historical data in order to structure uncompromised and efficient analyses. Develop an understanding of fields to which statistical methods are to be applied in order to determine whether methods and results are appropriate. Supervise and provide instructions

for workers collecting and tabulating data. Apply sampling techniques or utilize complete enumeration bases in order to determine and define groups to be surveyed. Adapt statistical methods in order to solve specific problems in many fields, such as economics, biology, and engineering. Develop and test experimental designs, sampling techniques, and analytical methods. Examine theories, such as those of probability and inference, in order to discover mathematical bases for new or improved methods of obtaining and evaluating numerical data.

GOE—Interest Area/Cluster: 15. Scientific Research, Engineering, and Mathematics. **Work Group:** 15.06. Mathematics and Data Analysis.

Other Jobs in This Work Group: Actuaries; Mathematical Technicians; Mathematicians; Social Science Research Assistants; Statistical Assistants.

Skills: Programming; Science; Mathematics; Writing; Active Learning; Negotiation; Complex Problem Solving; Operations Analysis.

Education and Training Programs: Biostatistics; Mathematics, General; Applied Mathematics; Statistics, General; Mathematical Statistics and Probability; Statistics, Other; Business Statistics.

Related Knowledge/Courses: Mathematics; Computers and Electronics; English Language; Law and Government; Education and Training.

Work Environment: Indoors; sitting; using hands on objects, tools, or controls; repetitive motions.

Surveying and Mapping Technicians

See Mapping Technicians (a Conventional job) and Surveying Technicians (a Realistic job), described separately.

Tellers

- Personality Code: CE
- Education/Training Required: Short-term on-the-job training
- Annual Earnings: \$22,920
- Beginning Wage: \$17,360

Receive and pay out money. Keep records of money and negotiable instruments involved in a financial institution's various transactions. Balance currency, coin, and checks in cash drawers at ends of shifts and calculate daily transactions, using computers, calculators, or adding machines. Cash checks and pay out money after verifying that signatures are correct, that written and numerical amounts agree, and that accounts have sufficient funds. Receive checks and cash for deposit, verify amounts, and check accuracy of deposit slips. Examine checks for endorsements and to verify other information such as dates, bank names, identification of the persons receiving payments, and the legality of the documents. Enter customers' transactions into computers to record transactions and issue computer-generated receipts. Count currency, coins, and checks received, by hand or using currency-counting machine, to prepare them for deposit or shipment to branch banks or the Federal Reserve Bank. Identify transaction mistakes when debits and credits do not balance. Prepare and verify cashier's checks. Arrange monies received in cash boxes and coin dispensers according to denomination. Process transactions such as term deposits, retirement savings plan contributions, automated teller transactions, night deposits, and mail deposits. Receive mortgage, loan, or public utility bill payments, verifying payment dates and amounts due. Resolve problems or discrepancies concerning customers' accounts. Explain, promote, or sell products or services such as travelers' checks,

savings bonds, money orders, and cashier's checks, using computerized information about customers to tailor recommendations. Perform clerical tasks such as typing, filing, and microfilm photography. Monitor bank vaults to ensure cash balances are correct. Order a supply of cash to meet daily needs. Sort and file deposit slips and checks. Receive and count daily inventories of cash, drafts, and travelers' checks. Process and maintain records of customer loans. Count, verify, and post armored car deposits. Carry out special services for customers, such as ordering bank cards and checks. Compute financial fees, interest, and service charges. Obtain and process information required for the provision of services, such as opening accounts, savings plans, and purchasing bonds.

GOE—Interest Area/Cluster: 06. Finance and Insurance. **Work Group:** 06.04. Finance/Insurance Customer Service. **Other Jobs in This Work Group:** Bill and Account Collectors; Loan Interviewers and Clerks; New Accounts Clerks.

Skills: Service Orientation; Mathematics.

Education and Training Program: Banking and Financial Support Services. **Related Knowledge/Courses:** Customer and Personal Service; Sales and Marketing; English Language; Clerical Practices.

Work Environment: Indoors; more often standing than sitting; using hands on objects, tools, or controls; repetitive motions.

Treasurers and Controllers

- ⦿ Personality Code: CE

The job openings listed here are shared with Financial Managers, Branch or Department.

Direct financial activities, such as planning, procurement, and investments, for all or part of an organization. Prepare and file annual tax returns or prepare financial information so that outside accountants can complete tax returns. Prepare or direct preparation of financial statements, business activity reports, financial position forecasts, annual budgets, and/or reports required by regulatory agencies. Supervise employees performing financial reporting, accounting, billing, collections, payroll, and budgeting duties. Delegate authority for the receipt, disbursement, banking, protection, and custody of funds, securities, and financial instruments. Maintain current knowledge of organizational policies and procedures, federal and state policies and directives, and current accounting standards. Conduct or coordinate audits of company accounts and financial transactions to ensure compliance with state and federal requirements and statutes. Receive and record requests for disbursements; authorize disbursements in accordance with policies and procedures. Monitor financial activities and details such as reserve levels to ensure that all legal and regulatory requirements are met. Monitor and evaluate the performance of accounting and other financial staff; recommend and implement personnel actions such as promotions and dismissals. Develop and maintain relationships with banking, insurance, and non-organizational accounting personnel in order to facilitate financial activities. Coordinate and direct the financial planning, budgeting, procurement, or investment activities of all or part of an organization. Develop internal control policies, guidelines, and procedures for activities such as budget administration, cash and credit management, and accounting. Analyze the financial details of past, present, and expected operations in order to identify development opportunities and areas where improvement is needed. Advise management on short-term and long-term financial objectives, policies, and actions. Provide direction and assistance to other organizational units regarding accounting and budgeting policies and procedures and efficient control

and utilization of financial resources. Evaluate needs for procurement of funds and investment of surpluses and make appropriate recommendations.

GOE—Interest Area/Cluster: 06. Finance and Insurance. **Work Group:** 06.01. Managerial Work in Finance and Insurance. **Other Jobs in This Work Group:** Financial Managers; Financial Managers, Branch or Department.

Skills: Management of Financial Resources; Management of Material Resources; Judgment and Decision Making; Management of Personnel Resources; Mathematics; Negotiation; Time Management; Persuasion.

Education and Training Programs: Accounting and Finance; Accounting and Business/Management; Finance, General; International Finance; Public Finance; Credit Management; Finance and Financial Management Services, Other. **Related Knowledge/Courses:** Economics and Accounting; Administration and Management; Personnel and Human Resources; Law and Government; Mathematics; English Language.

The job openings listed here are shared with Computer Systems Engineers/Architects, with Network Designers, with Software Quality Assurance Engineers and Testers, and with Web Developers.

Manage Web environment design, deployment, development, and maintenance activities. Perform testing and quality assurance of Web sites and Web applications. Back up or modify applications and related data to provide for disaster recovery. Determine sources of Web page or server problems, and take action to correct such problems. Review or update Web page content or links in a timely manner, using appropriate tools. Monitor systems for intrusions or denial of service attacks, and report security breaches to appropriate personnel. Implement Web site security measures, such as firewalls or message encryption. Administer Internet/intranet infrastructure, including components such as Web, file transfer protocol (FTP), news, and mail servers. Collaborate with development teams to discuss, analyze, or resolve usability issues. Test backup or recovery plans regularly and resolve any problems. Monitor Web developments through continuing education, reading, or participation in professional conferences, workshops, or groups. Implement updates, upgrades, and patches in a timely manner to limit loss of service. Identify or document backup or recovery plans. Collaborate with Web developers to create and operate internal and external Web sites, or to manage projects, such as e-marketing campaigns. Install or configure Web server software or hardware to ensure that directory structure is well-defined, logical, secure, and that files are named properly. Gather, analyze, or document user feedback to locate or resolve sources of problems. Develop Web site performance metrics. Identify or address interoperability requirements. Document installation or configuration procedures to allow maintenance and repetition. Identify, standardize, and communicate levels of access and security. Track, compile, and analyze Web site usage data. Test issues such as system integration, performance, and system security on a regular schedule or after any major program modifications. Recommend Web site improvements, and develop budgets to support recommendations. Inform Web site users of problems, problem resolutions, or application changes and updates. Document application and Web site changes or change procedures. Develop or implement procedures for ongoing Web site revision.

APPENDIX A

Occupations Ordered by Two-Letter Personality Codes

This listing is based on the coding used by the O*NET database of the U.S. Department of Labor. It also includes some SOC titles that are not included in the O*NET database; we determined their RIASEC codes by taking the *average* of the ratings for the equivalent O*NET jobs. Other publishers may not create the exact same set of linkages between personality codes and occupations. For example, some sales jobs that are coded as Social by Psychological Assessment Resources, Inc., the publisher of the *Self-Directed Search*, are coded as Enterprising by O*NET.

APPENDIX B

The Guide for Occupational Exploration (GOE) Interest Areas and Work Groups

The RIASEC classification that this book uses to organize occupations was originally developed as a way of interpreting the results of an interest inventory. However, it is not the only interest-based way of classifying jobs. The Guide for Occupational Exploration (GOE) was developed by the U.S. Department of Labor as an intuitive way to assist in career exploration. In the *New Guide for Occupational Exploration*, Fourth Edition, JIST revised the GOE scheme to match the 16 career clusters that the U.S. Department of Education's Office of Vocational and Adult Education developed around 1999 and that many states now use to organize their career-oriented programs and career information.

The GOE structure organizes the world of work into large interest areas (or clusters) and more specific work groups containing jobs that have a lot in common. This appendix defines the 16 GOE interest areas and lists the work groups included in each interest area. We thought you would want to see the complete GOE taxonomy so you would understand how any job that interests you fits into this structure.

Interest areas have two-digit code numbers; work groups have four-digit code numbers beginning with the code number for the interest area in which they are classified. These are the 16 GOE interest areas and their work groups:

01 Agriculture and Natural Resources: *An interest in working with plants, animals, forests, or mineral resources for agriculture, horticulture, conservation, extraction, and other purposes.* You can satisfy this interest by working in farming, landscaping, forestry, fishing, mining, and related fields. You may like doing physical work outdoors, such as on a farm or ranch, in a forest, or on a drilling rig. If you have a scientific curiosity, you could study plants and animals or analyze biological or rock samples in a lab. If you have management

ability, you could own, operate, or manage a fish hatchery, a landscaping business, or a greenhouse.

01.01 Managerial Work in Agriculture and Natural Resources

01.02 Resource Science/Engineering for Plants, Animals, and the Environment

01.03 Resource Technologies for Plants, Animals, and the Environment

01.04 General Farming

01.05 Nursery, Groundskeeping, and Pest Control

01.06 Forestry and Logging

01.07 Hunting and Fishing

01.08 Mining and Drilling

02 Architecture and Construction: *An interest in designing, assembling, and maintaining components of buildings and other structures.* You may want to be part of the team of architects, drafters, and others who design buildings and render the plans. If construction interests you, you might find fulfillment in the many building projects being undertaken at all times. If you like to organize and plan, you can find careers in managing these projects. Or you can play a more direct role in putting up and finishing buildings by doing jobs such as plumbing, carpentry, masonry, painting, or roofing, either as a skilled craftworker or as a helper. You can prepare the building site by operating heavy equipment or installing, maintaining, and repairing vital building equipment and systems such as electricity and heating.

02.01 Managerial Work in Architecture and Construction

02.02 Architectural Design

02.03 Architecture/Construction Engineering Technologies

02.04 Construction Crafts

02.05 Systems and Equipment Installation, Maintenance, and Repair

02.06 Construction Support/Labor

03 Arts and Communication: *An interest in creatively expressing feelings or ideas, in communicating news or information, or in performing.* You can satisfy this interest in creative, verbal, or performing activities. For example, if you enjoy literature, perhaps writing or editing would appeal to you. Journalism and public relations are other fields for people who like to use their writing or speaking skills. Do you prefer to work in the performing arts? If so, you could direct or perform in drama, music, or dance. If you especially enjoy the visual arts, you could create paintings, sculpture, or ceramics or design products or visual displays. A flair for technology might lead you to specialize in photography, broadcast production, or dispatching.

03.01 Managerial Work in Arts and Communication

03.02 Writing and Editing

03.03 News, Broadcasting, and Public Relations

- 03.04 Studio Art
- 03.05 Design
- 03.06 Drama
- 03.07 Music
- 03.08 Dance
- 03.09 Media Technology
- 03.10 Communications Technology
- 03.11 Musical Instrument Repair

04 Business and Administration: *An interest in making a business organization or function run smoothly.*

You can satisfy this interest by working in a position of leadership or by specializing in a function that contributes to the overall effort in a business, a nonprofit organization, or a government agency. If you especially enjoy working with people, you may find fulfillment from working in human resources. An interest in numbers may lead you to consider accounting, finance, budgeting, billing, or financial record-keeping. A job as an administrative assistant may interest you if you like a variety of tasks in a busy environment. If you are good with details and word processing, you may enjoy a job as a secretary or data-entry clerk. Or perhaps you would do well as the manager of a business.

- 04.01 Managerial Work in General Business
- 04.02 Managerial Work in Business Detail
- 04.03 Human Resources Support
- 04.04 Secretarial Support
- 04.05 Accounting, Auditing, and Analytical Support
- 04.06 Mathematical Clerical Support
- 04.07 Records and Materials Processing
- 04.08 Clerical Machine Operation

05 Education and Training: *An interest in helping people learn.* You can satisfy this interest by teaching students, who may be preschoolers, retirees, or any age in between. You may specialize in a particular academic field or work with learners of a particular age, with a particular interest, or with a particular learning problem. Working in a library or museum may give you an opportunity to expand people's understanding of the world.

- 05.01 Managerial Work in Education
- 05.02 Preschool, Elementary, and Secondary Teaching and Instructing
- 05.03 Postsecondary and Adult Teaching and Instructing
- 05.04 Library Services
- 05.05 Archival and Museum Services
- 05.06 Counseling, Health, and Fitness Education

06 Finance and Insurance: *An interest in helping businesses and people be assured of a financially secure future.* You can satisfy this interest by working in a financial or insurance business in a leadership

or support role. If you like gathering and analyzing information, you may find fulfillment as an insurance adjuster or financial analyst. Or you may deal with information at the clerical level as a banking or insurance clerk or in person-to-person situations providing customer service. Another way to interact with people is to sell financial or insurance services that will meet their needs.

- 06.01 Managerial Work in Finance and Insurance
- 06.02 Finance/Insurance Investigation and Analysis
- 06.03 Finance/Insurance Records Processing
- 06.04 Finance/Insurance Customer Service
- 06.05 Finance/Insurance Sales and Support

07 Government and Public Administration: *An interest in helping a government agency serve the needs of the public.* You can satisfy this interest by working in a position of leadership or by specializing in a function that contributes to the role of government. You may help protect the public by working as an inspector or examiner to enforce standards. If you enjoy using clerical skills, you could work as a clerk in a law court or government office. Or perhaps you prefer the top-down perspective of a government executive or urban planner.

- 07.01 Managerial Work in Government and Public Administration
- 07.02 Public Planning
- 07.03 Regulations Enforcement
- 07.04 Public Administration Clerical Support

08 Health Science: *An interest in helping people and animals be healthy.* You can satisfy this interest by working on a health-care team as a doctor, therapist, or nurse. You might specialize in one of the many different parts of the body (such as the teeth or eyes) or in one of the many different types of care. Or you may want to be a generalist who deals with the whole patient. If you like technology, you might find satisfaction working with X rays or new diagnostic methods. You might work with healthy people, helping them eat right. If you enjoy working with animals, you might care for them and keep them healthy.

- 08.01 Managerial Work in Medical and Health Services
- 08.02 Medicine and Surgery
- 08.03 Dentistry
- 08.04 Health Specialties
- 08.05 Animal Care
- 08.06 Medical Technology
- 08.07 Medical Therapy
- 08.08 Patient Care and Assistance
- 08.09 Health Protection and Promotion

09 Hospitality, Tourism, and Recreation: *An interest in catering to the personal wishes and needs of others so that they can enjoy a clean environment, good food and drink, comfortable lodging away from home, and recreation.* You can satisfy this interest by providing services for the convenience, care, and pampering of others in hotels, restaurants, airplanes, beauty parlors, and so on. You may want to use your love of cooking as a chef. If you like working with people, you may want to provide personal services by being a travel guide, a flight attendant, a concierge, a hairdresser, or a waiter. You may want to work in cleaning and building services if you like a clean environment. If you enjoy sports or games, you could work for an athletic team or casino.

09.01 Managerial Work in Hospitality and Tourism

09.02 Recreational Services

09.03 Hospitality and Travel Services

09.04 Food and Beverage Preparation

09.05 Food and Beverage Service

09.06 Sports

09.07 Barber and Beauty Services

10 Human Service: *An interest in improving people's social, mental, emotional, or spiritual well-being.* You can satisfy this interest as a counselor, social worker, or religious worker who helps people sort out their complicated lives or solve personal problems. You may work as a caretaker for very young people or the elderly. Or you may interview people to help identify the social services they need.

10.01 Counseling and Social Work

10.02 Religious Work

10.03 Child/Personal Care and Services

10.04 Client Interviewing

11 Information Technology: *An interest in designing, developing, managing, and supporting information systems.* You can satisfy this interest by working with hardware, software, multimedia, or integrated systems. If you like to use your organizational skills, you might work as a systems or database administrator. Or you can solve complex problems as a software engineer or systems analyst. If you enjoy getting your hands on hardware, you might find work servicing computers, peripherals, and information-intense machines such as cash registers and ATMs.

11.01 Managerial Work in Information Technology

11.02 Information Technology Specialties

11.03 Digital Equipment Repair

12 Law and Public Safety: *An interest in upholding people's rights or in protecting people and property by using authority, inspecting, or investigating.* You can satisfy this interest by working in law, law enforcement, fire fighting, the military, and related fields. For example, if you enjoy mental challenge and intrigue, you could investigate crimes or fires for a living. If you

enjoy working with verbal skills and research skills, you may want to defend citizens in court or research deeds, wills, and other legal documents. If you want to help people in critical situations, you may want to fight fires, work as a police officer, or become a paramedic. Or, if you want more routine work in public safety, perhaps a job in guarding, patrolling, or inspecting would appeal to you. If you have management ability, you could seek a leadership position in law enforcement and the protective services. Work in the military gives you a chance to use technical and leadership skills while serving your country.

12.01 Managerial Work in Law and Public Safety

12.02 Legal Practice and Justice Administration

12.03 Legal Support

12.04 Law Enforcement and Public Safety

12.05 Safety and Security

12.06 Emergency Responding

12.07 Military

13 Manufacturing: *An interest in processing materials into intermediate or final products or maintaining and repairing products by using machines or hand tools.* You can satisfy this interest by working in one of many industries that mass-produce goods or by working for a utility that distributes electric power or other resources. You might enjoy manual work, using your hands or hand tools in highly skilled jobs such as assembling engines or electronic equipment. If you enjoy making machines run efficiently or fixing them when they break down, you could seek a job installing or repairing such devices as copiers, aircraft engines, cars, or watches. Perhaps you prefer to set up or operate machines used to manufacture products made of food, glass, or paper. You could enjoy cutting and grinding metal and plastic parts to desired shapes and measurements. Or you may want to operate equipment in systems that provide water and process wastewater. You may like inspecting, sorting, counting, or weighing products. Another option is to work with your hands and machinery to move boxes and freight in a warehouse. If leadership appeals to you, you could manage people engaged in production and repair.

13.01 Managerial Work in Manufacturing

13.02 Machine Setup and Operation

13.03 Production Work, Assorted Materials Processing

13.04 Welding, Brazing, and Soldering

13.05 Production Machining Technology

13.06 Production Precision Work

13.07 Production Quality Control

13.08 Graphic Arts Production

13.09 Hands-On Work, Assorted Materials

13.10 Woodworking Technology

13.11 Apparel, Shoes, Leather, and Fabric Care

13.12 Electrical and Electronic Repair

13.13 Machinery Repair

13.14 Vehicle and Facility Mechanical Work

13.15 Medical and Technical Equipment Repair

13.16 Utility Operation and Energy Distribution

13.17 Loading, Moving, Hoisting, and Conveying

14 Retail and Wholesale Sales and Service: *An interest in bringing others to a particular point of view by personal persuasion and by sales and promotional techniques.* You can satisfy this interest in various jobs that involve persuasion and selling. If you like using knowledge of science, you may enjoy selling pharmaceutical, medical, or electronic products or services. Real estate offers several kinds of sales jobs as well. If you like speaking on the phone, you could work as a telemarketer. Or you may enjoy selling apparel and other merchandise in a retail setting. If you prefer to help people, you may want a job in customer service.

14.01 Managerial Work in Retail/Wholesale Sales and Service

14.02 Technical Sales

14.03 General Sales

14.04 Personal Soliciting

14.05 Purchasing

14.06 Customer Service

15 Scientific Research, Engineering, and Mathematics: *An interest in discovering, collecting, and analyzing information about the natural world; in applying scientific research findings to problems in medicine, the life sciences, human behavior, and the natural sciences; in imagining and manipulating quantitative data; and in applying technology to manufacturing, transportation, and other economic activities.* You can satisfy this interest by working with the knowledge and processes of the sciences. You may enjoy researching and developing new knowledge in mathematics, or perhaps solving problems in the physical, life, or social sciences would appeal to you. You may want to study engineering and help create new machines, processes, and structures. If you want to work with scientific equipment and procedures, you could seek a job in a research or testing laboratory.

15.01 Managerial Work in Scientific Research, Engineering, and Mathematics

15.02 Physical Sciences

15.03 Life Sciences

15.04 Social Sciences

15.05 Physical Science Laboratory Technology

15.06 Mathematics and Data Analysis

15.07 Research and Design Engineering

15.08 Industrial and Safety Engineering

15.09 Engineering Technology

16 Transportation, Distribution, and Logistics: *An interest in operations that move people or materials.* You can satisfy this interest by managing a transportation service, by helping vehicles keep on their assigned schedules and routes, or by driving or piloting a vehicle. If you enjoy taking responsibility, perhaps managing a rail line would appeal to you. If you work well with details and can take pressure on the job, you might consider being an air traffic controller. Or would you rather get out on the highway, on the water, or up in the air? If so, you could drive a truck from state to state, be employed on a ship, or fly a crop duster over a cornfield. If you prefer to stay closer to home, you could drive a delivery van, taxi, or school bus. You can use your physical strength to load freight and arrange it so that it gets to its destination in one piece.

16.01 Managerial Work in Transportation

16.02 Air Vehicle Operation

16.03 Truck Driving

16.04 Rail Vehicle Operation

16.05 Water Vehicle Operation

16.06 Other Services Requiring Driving

16.07 Transportation Support Work

APPENDIX C

Definitions of Skills and Knowledge/Courses

In the Part IV job descriptions, you can see the top skills and types of knowledge required by each job.

Definitions of Skills

Because some of the skill names may not be completely familiar to you, we present here the definitions of all the skills referred to in this book.

| Skill Name | Definition |
|------------------------------|---|
| Active Learning | Understanding the implications of new information for both current and future problem-solving and decision-making. |
| Active Listening | Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times. |
| Complex Problem Solving | Identifying complex problems and reviewing related information to develop and evaluate options and implement solutions. |
| Coordination | Adjusting actions in relation to others' actions. |
| Critical Thinking | Using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions, or approaches to problems. |
| Installation | Installing equipment, machines, wiring, or programs to meet specifications. |
| Instructing | Teaching others how to do something. |
| Judgment and Decision Making | Considering the relative costs and benefits of potential actions to choose the most appropriate one. |
| Learning Strategies | Selecting and using training/instructional methods and procedures appropriate for the situation when learning or teaching new things. |

| Skill Name | Definition |
|-----------------------------------|--|
| Management of Financial Resources | Determining how money will be spent to get the work done and accounting for these expenditures. |
| Management of Material Resources | Obtaining and seeing to the appropriate use of equipment, facilities, and materials needed to do certain work. |
| Management of Personnel Resources | Motivating, developing, and directing people as they work; identifying the best people for the job. |
| Mathematics | Using mathematics to solve problems. |
| Monitoring | Monitoring/assessing your performance and that of other individuals or organizations to make improvements or take corrective action. |
| Negotiation | Bringing others together and trying to reconcile differences. |
| Operations Analysis | Analyzing needs and product requirements to create a design. |
| Persuasion | Persuading others to change their minds or behavior. |
| Programming | Writing computer programs for various purposes. |
| Quality Control Analysis | Conducting tests and inspections of products, services, or processes to evaluate quality or performance. |
| Reading Comprehension | Understanding written sentences and paragraphs in work-related documents. |
| Science | Using scientific rules and methods to solve problems. |
| Service Orientation | Actively looking for ways to help people. |
| Social Perceptiveness | Being aware of others' reactions and understanding why they react as they do. |
| Speaking | Talking to others to convey information effectively. |
| Systems Analysis | Determining how a system should work and how changes in conditions, operations, and the environment will affect outcomes. |
| Systems Evaluation | Identifying measures or indicators of system performance and the actions needed to improve or correct performance relative to the goals of the system. |
| Technology Design | Generating or adapting equipment and technology to serve user needs. |
| Time Management | Managing one's own time and the time of others. |
| Troubleshooting | Determining causes of operating errors and deciding what to do about them. |
| Writing | Communicating effectively in writing as appropriate for the needs of the audience. |

Definitions of Knowledge/Courses

Each job description lists certain kinds of knowledge that are used on the job. These may also be thought of as the content of the courses that you take as part of your education or training for the job. Here is how the terms are defined.

| Knowledge/Course Name | Definition |
|-------------------------------|---|
| Administration and Management | Knowledge of principles and processes involved in business and organizational planning, coordination, and execution. This includes strategic planning, resource allocation, manpower modeling, leadership techniques, and production methods. |
| Biology | Knowledge of plant and animal living tissue, cells, organisms, and entities, including their functions, interdependencies, and interactions with each other and the environment. |
| Building and Construction | Knowledge of the materials, methods, and appropriate tools to construct objects, structures, and buildings. |
| Chemistry | Knowledge of the composition, structure, and properties of substances and of the chemical processes and transformations that they undergo. This includes uses of chemicals and their interactions, danger signs, production techniques, and disposal methods. |
| Clerical Studies | Knowledge of administrative and clerical procedures and systems such as word-processing systems, filing and records management systems, stenography and transcription, forms, design principles, and other office procedures and terminology. |
| Communications and Media | Knowledge of media production, communication, and dissemination techniques and methods, including alternative ways to inform and entertain via written, oral, and visual media. |
| Computers and Electronics | Knowledge of electric circuit boards, processors, chips, and computer hardware and software, including applications and programming. |
| Customer and Personal Service | Knowledge of principles and processes for providing customer and personal services, including needs assessment techniques, quality service standards, alternative delivery systems, and customer satisfaction evaluation techniques. |
| Design | Knowledge of design techniques, principles, tools, and instruments involved in the production and use of precision technical plans, blueprints, drawings, and models. |
| Economics and Accounting | Knowledge of economic and accounting principles and practices, the financial markets, banking, and the analysis and reporting of financial data. |

| Skill Name | Definition |
|----------------------------|--|
| Education and Training | Knowledge of instructional methods and training techniques, including curriculum design principles, learning theory, group and individual teaching techniques, design of individual development plans, and test design principles. |
| Engineering and Technology | Knowledge of equipment, tools, and mechanical devices and their uses to produce motion, light, power, technology, and other applications. |
| English Language | Knowledge of the structure and content of the English language, including the meaning and spelling of words, rules of composition, and grammar. |
| Fine Arts | Knowledge of theory and techniques required to produce, compose, and perform works of music, dance, visual arts, drama, and sculpture. |
| Food Production | Knowledge of techniques and equipment for planting, growing, and harvesting of food for consumption, including crop rotation methods, animal husbandry, and food storage/handling techniques. |
| Foreign Language | Knowledge of the structure and content of a foreign (non-English) language, including the meaning and spelling of words, rules of composition and grammar, and pronunciation. |
| Geography | Knowledge of various methods for describing the location and distribution of land, sea, and air masses, including their physical locations, relationships, and characteristics. |
| History and Archeology | Knowledge of past historical events and their causes, indicators, and impact on particular civilizations and cultures. |
| Law and Government | Knowledge of laws, legal codes, court procedures, precedents, government regulations, executive orders, agency rules, and the democratic political process. |
| Mathematics | Knowledge of numbers and their operations and interrelationships, including arithmetic, algebra, geometry, calculus, and statistics and their applications. |
| Mechanical Devices | Knowledge of machines and tools, including their designs, uses, benefits, repair, and maintenance. |
| Medicine and Dentistry | Knowledge of the information and techniques needed to diagnose and treat injuries, diseases, and deformities. This includes symptoms, treatment alternatives, drug properties and interactions, and preventive health-care measures. |

| Skill Name | Definition |
|-------------------------------|--|
| Personnel and Human Resources | Knowledge of policies and practices involved in personnel/human resource functions. This includes recruitment, selection, training, and promotion regulations and procedures; compensation and benefits packages; labor relations and negotiation strategies; and personnel information systems. |
| Philosophy and Theology | Knowledge of different philosophical systems and religions, including their basic principles, values, ethics, ways of thinking, customs, and practices and their impact on human culture. |
| Physics | Knowledge and prediction of physical principles, laws, and applications, including air, water, material dynamics, light, atomic principles, heat, electric theory, earth formations, and meteorological and related natural phenomena. |
| Production and Processing | Knowledge of inputs, outputs, raw materials, waste, quality control, costs, and techniques for maximizing the manufacture and distribution of goods. |
| Psychology | Knowledge of human behavior and performance, mental processes, psychological research methods, and the assessment and treatment of behavioral and affective disorders. |
| Public Safety and Security | Knowledge of weaponry; public safety; security operations, rules, regulations, precautions, and prevention; and the protection of people, data, and property. |
| Sales and Marketing | Knowledge of principles and methods involved in showing, promoting, and selling products or services. This includes marketing strategies and tactics, product demonstration and sales techniques, and sales control systems. |
| Sociology and Anthropology | Knowledge of group behavior and dynamics; societal trends and influences; and cultures and their history, migrations, ethnicity, and origins. |
| Telecommunications | Knowledge of transmission, broadcasting, switching, control, and operation of telecommunications systems. |
| Therapy and Counseling | Knowledge of information and techniques needed to rehabilitate physical and mental ailments and to provide career guidance, including alternative treatments, rehabilitation equipment and its proper use, and methods to evaluate treatment effects. |
| Transportation | Knowledge of principles and methods for moving people or goods by air, rail, sea, or road, including their relative costs, advantages, and limitations. |

APPENDIX D

Resources for Further Exploration

The facts and pointers in this book provide a good beginning to the subject of jobs for your personality type. If you want additional details, we suggest you consult some of the resources listed here.

Facts About Careers

The *Occupational Outlook Handbook* (or the *OOH*) (JIST): Updated every two years by the U.S. Department of Labor, this book provides descriptions for 270 major jobs covering more than 85 percent of the workforce.

The *Enhanced Occupational Outlook Handbook* (JIST): This book includes all descriptions in the *OOH* plus descriptions of more than 6,000 more-specialized jobs related to them.

The *O*NET Dictionary of Occupational Titles* (JIST): The only printed source of the 950 jobs described in the U.S. Department of Labor's Occupational Information Network database. It covers all the jobs in the book you're now reading, but it offers more topics than we were able to fit here.

The *New Guide for Occupational Exploration* (JIST): An important career reference that allows you to explore all major O*NET jobs based on your interests. (An outline of the interest areas and work groups included appears in Appendix B.)

Career Decision Making and Planning

Overnight Career Choice, by Michael Farr (JIST): This book can help you choose a career goal based on a variety of criteria, including skills, interests, and values. It is part of the Help in a Hurry series, so it is designed to produce quick results.

10 Best College Majors for Your Personality, by Laurence Shatkin, Ph.D., and The Editors at JIST (JIST): Built around the six Holland personality types, this book includes an assessment to help you identify your dominant and secondary personality types, plus lists and descriptions of college majors linked to jobs with high pay, high growth, and many openings.

Job Hunting

Same-Day Resume, by Michael Farr (JIST): Learn in an hour how to write an effective resume. This book includes dozens of sample resumes from professional writers and even offers advice on cover letters, online resumes, and more.

Job Banks by Occupation. This is a set of links offered by America's Career InfoNet. At www.acinet.org, find the Career Tools box, click Career Resource Library, then Job & Resume Banks. The Job Banks by Occupation link leads you to groups of jobs such as "Construction and Extraction Occupations" and "Arts, Design, Entertainment, Sports and Media Occupations," which in turn lead you to more specific job titles and occupation-specific job-listing sites maintained by various organizations.
