DATA SCIENCE **I N F I N I T Y**

DO ASK...

"What project in the next 6 months are you most excited about?"

⬇

Not only is this a **relevant** question (you're asking about an interesting project that the very team you're interviewing for will likely be working on) - it makes them speak about something that **excites** them - ensuring the interview finishes on a **positive** note!

DO ASK...

"What does excellence in this role look like?"

You're not just asking what "success" looks like - you're going one step further and asking what it takes to **really excel** in this role...

This is a great **subconscious cue** for the interviewer that you're the type of person who **shoots for the stars**!

DATA SCIENCE INFINITY

DO ASK...

"What are the key challenges of this role?"

There are good parts and hard parts of every role - starting an **open, honest discussion** around these can be really beneficial for you in terms of making your decision!

If you happen to have insights or experience on these key challenges - this will be a **big positive** for the hiring manager!

DON'T ASK...

"What don't you like about working here?"

⬇

There most likely are things that the interviewer is **not happy** about in their work or with their workplace, but, they've just met you, and they probably **aren't going to tell you** about these things in great detail!

All this question does is make them think about something **negative**, and you really don't want any negative associations, consciously or subconsciously, with the time they spent with you!

DATA SCIENCE I N F I N I T Y

DON'T ASK...

"How did I do? What are my chances?"

↓

Often an interviewer will want to absorb everything and speak with other interviewers before making up their mind. Trust me, they **don't want to be put on the spot like this** - so avoid the temptation to ask!

Instead, ask when you're likely to get **feedback**, or when you'll hear about **next steps**.

DATA SCIENCE INFINITY

"I landed my new role at Amazon totally thanks to DSI. It's been the best academic choice of my life - giving better results than two degrees"

- Andrea

"DSI is incredible - everything is taught in such a clear and simple way, even the more complex concepts!"

- Arianna

"The best program I've been a part of, hands down"

- Christian

"I had over 40 interviews without an offer. After DSI I quickly got 7 offers including one at KPMG and my amazing new role at Deloitte!"

- Ritesh
